# TABLE OF CONTENTS

## Supplemental Proceedings: Volume 3: General Paper Selections

## General Abstracts: Electronic, Magnetic and Photonic Materials Division

### Session I

Investigation of Electronic Properties for Nano-Titania/Metal-Ion-Doped Titania Semiconductor Prepared by Sol-Gel Methods..................3

*L. Liau, and C. Ma*

Structure and Magnetic Properties Characterization of Electrodeposited Co$_{37}$Fe$_{63}$ Alloys Containing Oxygen for Magnetic Recording Applications .....11

*S. Elhalawaty, R. Carpenter, J. George, and S. Brankovic*

Tungsten Doping Effect on Thermoelectric Properties of Heusler Fe$_2$VAl Alloy..........................................................19

*H. Morishita, M. Mikami, K. Ozaki, and K. Kobayashi*

### Session II

Tantalum Nitride for Efficient Visible-Light-Driven Photocatalyst..............25

*Z. Wang, J. Wang, L. Liu, K. Huang, J. Hou, and H. Zhu*

Failure Mechanism of Electrode in Crystalline Photovoltaics..................31

*C. Oh, N. Park, C. Han, and W. Hong*

Synthesis of Nano-Sized Tantalum Nitrides with Various Morphology ............37

*L. Liu, C. Ma, Z. Wang, K. Huang, S. Jiao, and H. Zhu*

Development of New Transparent Conductive Material of Mg(OH$_{1-x}$C$_x$)$_2$ (x = 0.1-0.35 ) by Magnetron Sputtering.........................................43

*T. Honjo, and T. Kuji*

Synthesis of Ultrafine Single Crystals and Nanostructured Coatings of Indium Oxide from Solution Precursor........................................51

*N. Pentyala, R. Guduru, P. Mohanty, and E. Shnerpunas*
Reliability of Wedge Wire Bonds Subjected to Ultrasonic Welding and Thermal Cycling

A. Saigal, M. Zimmerman, and J. Battaglia

General Abstracts: Light Metals Division

General Light Metals

Determination of Heat Treatment Effect on 6XXX Series Aluminum Foams by Design of Experiment

D. Deniz Polat, B. Ozkal, and O. Keles

Effect of Reacted Layer on Galvanic Corrosion Phenomenon at Interface Between Ti Dispersion and Mg-Al Alloy

K. Kondoh, N. Nakanishi, R. Takei, and J. Umeda

Compressive Capacity and Fracture Mechanism of Aluminum Foam

H. Hao, G. Lu, M. Diop, H. Dong, and X. Zhang

LiAl Alloy Prepared by Bulk Mechanical Alloying

T. Honjo, and T. Kuji

Metal Matrix Composites

Preparation and Characterization of Cast Hypereutectic Al-20wt.%Si-4.5wt.%Cu Nanocomposites with Al₂O₃ Nanoparticles

H. Choi, and X. Li

An Investigation of Nanoparticle Wetting, Grain Refinement and Mechanical Property Enhancement in Aluminum Matrix Nanocomposites

M. De Cicco, D. Wang, and X. Li

Stability of Nanoparticle Dispersion and Property Enhancement in Aluminum Matrix Nanocomposites during Repeated Casting Cycles

D. Wang, M. De Cicco, and X. Li

Preparation Process of Aluminum Foam Reinforced by Carbon Fibers

H. Luo, Y. Liu, P. Chen, and Z. Zhao

Influence of Processing Parameters on Distribution of Fibers in Cast Aluminium Matrix

P. Yan, G. Yao, J. Shi, and X. Sun
Primary Production and General Issues

A Model for the Collapse of the World Trade Center ............................................. 155
C. Simensen

Analysis on the Market Developing Conditions of Prebaked Carbon Anodes for the Aluminium Industries ................................................................. 163
G. Lang, C. Fu, R. Logan, and Y. Li

Removal of Fluoride from Waste Water of Aluminum Smelter by Aluminum Ion Loaded Ion Exchange Resin ................................................................. 167
B. Padhi, and A. Sharma

Corrosion Behavior of Cermet Anodes in Na₃AlF₆-K₃AlF₆-Based Baths for Low-Temperature Aluminum Electrolysis Cells ........................................... 175
G. Wang, X. Sun, W. Wang, D. Wang, and Y. He

Preparation of Al-Mg Alloys from MgO in KCl-MgF₂-LiF Electrolyte by Molten Salt Electrolysis Method ................................................................. 183

General Abstracts: Materials Processing and Manufacturing Division

Casting, Surface Modification, and Powder Processing

Calcium Silicate-Graphite-Compound, a New Material for the Flow Control of Liquid Aluminum Alloys ................................................................. 189
W. Huettner, T. Hoelscher, M. Quackenbush, and R. Smith

Influence of a Direct Current on the Solidification Behavior of Pure Aluminum ................................................................. 197

Influence of Heating Effect on the Solidified Structure of Pure Aluminum by Electric Current Pulse ................................................................. 203
Z. Yin, B. Li, Y. Gong, and Q. Zhai

Manufacturing Methods and Properties of Powder-Based Parts with Inherently Saved Information ................................................................. 211
B. Behrens, N. Vahed, F. Lange, and E. Gastan
Microstructure and Mechanical Properties of Al Based Composite Coatings Produced by the Cold Gas Dynamic Spraying Process ..........................................219
O. Meydanoglu, M. Baydogan, E. Kayali, and H. Cimenoglu

Optimization of Fiber Laser Produced Hastelloy C-276 Single Track Clad.....227
P. Leggett, P. Balu, R. Kovacevic, and S. Hamid

Preparation of Nanocrystalline Aluminum by Warm-Vacuum-Compaction Method..........................................................237
W. Liu, and Q. Zhou

The Microstructure and Mechanical Properties of Direct-Quenched and Tempered AISI 4140 Steel .................................................................245
R. Ghasemzadeh, A. Meysami, H. Seyedy, M. Aboutalebi, and R. Rezaei

Surface Characteristics and High Temperature Oxidation Resistance Performance of Stainless Steel Foam Modified by Pack Aluminizing and Moderate Oxidation.................................................................255
D. Huo, X. Zhou, H. Wang, J. Li, and P. Zhu

Development of Copper Coating on Austenitic Stainless Steel through Microwave Hybrid Heating.................................................................263
D. Gupta, and A. Sharma

Forging, Forming, and Machining

A New Method for the Determination of Formability Limit in the Tube Drawing Process.........................................................................................271
H. Bui, R. Bihamta, M. Guillot, G. D’Amours, A. Rahem, and M. Fafard

A Novel Method for Joining of Stainless Steel (SS-316) Through Microwave Energy.........................................................................................279
M. Srinath, A. Sharma, and P. Kumar

A Reliable Method for Determining the Solidification Force of Steel for Continuous Casting Conditions........................................................287
M. Rowan

An Investigation into the Laser Micro-Welding of Aluminum and Copper in Lap Joint Configuration.................................................................295
P. Bahu, B. Carlson, and R. Kovacevic
Deformation of High Purity Copper Specimens in Compression between Flat and Grooved Dies ................................................................. 309
  B. Raddad, T. Al-hashani, and M. Rahman

Local Strain Hardening of Massive Forming Components by Means of Martensite Generation ........................................... 317
  B. Behrens, and J. Knigge

Profile of Electrochemically Machined Microcomponents .................. 325
  N. Hung, L. Viswanathan, and M. Powers

Some Studies on Performance of a Natural Polymer Media for Abrasive Flow Machining ................................................................. 333
  S. Rajesha, A. Sharma, and P. Kumar

Modeling, Simulation, Ceramics, and Chemical Processing

A Finite Element-Phase Field Study of Solid State Phase Transformation: Coarsening of Coherent Precipitates and Instability of Multilayer Thin Films .................................................................................. 341
  M. Zaeem, H. El Kadiri, S. Mesaroivc, P. Wang, and M. Horstemeyer

Development of a New Modeling Technique for Die Geometry for Extrusion of LCP Films ................................................................. 349
  A. Ahmadzadegan, M. Zimmerman, and A. Saigal

Microwave Drying of Silica Sand: Modeling, Kinetics, and Energy Consumption .............................................................................. 357
  Y. Li, Y. Lei, H. Niu, L. Zhang, J. Peng, H. Luo, and W. Qu

Structural and Thermal Stability of Microwave Synthesized Nano-Hydroxyapatite ................................................................. 365
  M. Khan, R. Hussain, M. Akram, and N. Iqbal

A Study on the Hydrophobicity and Investigation of Physical and Chemical Properties of Produced Zinc Borate ................................................................. 373
  M. Piskin, N. Acarali, N. Tugrul, E. Derun, and O. Akgun

Investigation of Reaction Conditions Effecting Hydrophobicity on Zinc Borate Yield ................................................................. 379
  S. Piskin, N. Acarali, E. Derun, and N. Tugrul
Effect of Iron Additions on the Shape Memory Characteristics of Cu-Al Alloys ................................................................. 385
    T. Raju, and V. Sampath

**General Abstracts: Structural Materials Division**

**Applications**

Effects of Differential Oxygen Access on the Corrosion Behavior of Zinc Relevant to Mechanically Stabilized Earth Walls .................................................. 395
    V. Padilla, and A. Alfantazi

Analysis of Eutectically Soldered Silicon Chips on a Copper Flanges with Innovative "Ductile Layer" Technology ..................................................... 405
    P. Zhou, M. Zimmerman, and A. Saigal

Influence of Sulfide on Internal-Fracture-Type Rolling Contact Fatigue Life of Bearing Steels ................................................................. 413
    K. Hashimoto, K. Hiraoka, and K. Kida

Shear Capacity of Reinforced Concrete Beams Using Recycled Coarse Aggregates .............................................................................. 419
    E. Ikponmwosa, and M. Salau

Influence of Heterogeneous Deformation on Microstructural Cracking in Alpha-Titanium Alloys ................................................................. 427
    M. Morita, S. Moroka, and O. Umezawa

Deformation Behavior of Biomedical Co-Cr-Mo Alloy ........................................ 433
    H. Matsumoto, S. Kurosu, B. Lee, Y. Li, Y. Koizumi, and A. Chiba

Effects of Solution Temperatures on Creep Properties and Fracture Mechanism of FGH95 Nickel-Base Superalloy ........................................ 439
    J. Xie, S. Tian, X. Zhou, J. Li, and W. Wang

Effect of Hydrogen on Tensile Properties of a Ductile Cast Iron ........................ 447
    H. Matsunaga, K. Matsuno, and K. Hayashida
Microstructure

Microstructural Properties of Gamma Titanium Aluminide Manufactured by Electron Beam Melting ................................................. 455
S. Franzén, J. Karlsson, R. Dehoff, U. Ackelid, O. Rios, C. Parish, and W. Peters

A New Method for Constructing Coincident Site Lattices for Cubic Crystals ................................................................. 463
M. Shamsuzzoha

Mechanical Properties and Strain Mechanisms Analysis in Ti-5553 Titanium Alloy ................................................................. 471
T. Duval, P. Villechaise, and S. Andrieu

Static Recrystallization Behavior of Co-Ni-Cr-Mo Superalloy After Cold Rolling and Subsequent Heat Treatment ............... 479
T. Otomo, S. Kurosu, Y. Li, H. Matsumoto, S. Sato, Y. Koizumi, K. Wagatsuma, and A. Chiba

Processing

Using Resistance Heating to Create Full-Scale API RP2Z CTOD Samples .... 485
M. Gallagher, S. Babu, and J. Gould

Role of Heat Treatments on the Mechanical Properties of Dual-Phase Steel Sheet ................................................................. 493
H. Seyedrezai, K. Pilkey, and D. Boyd

Preparing Titanium Powders by Calcium Vapor Reduction Process of Titanium Dioxide ............................................................. 501
B. Xu, B. Yang, H. Wan, W. Sen, Y. Dai, and D. Liu

The Microstructure and Mechanical Properties of Direct-Quenched and Tempered AISI 4140 Steel ........................................... 509
R. Ghasemzadeh, A. Meysami, H. Seyedyn, M. Aboutalebi, and R. Rezaei
General Poster Session

Session I

Study on the Interface Behavior of Ore Powder in Organic Media ..........................521
L. Dan, C. Qiyuan, and Y. Zhoulan

Study on Preparation of ZnO/TiO₂ and Its Photocatalytic Activity ..........................529
W. Daoxin, X. Changbin, and T. Haixia

Study on Thermal Decomposition of Precursor of Nb₅⁺ Doped Rutile TiO₂
Treated by Ultrasonic ...........................................................................................................537
W. Daoxin

Three-Dimension Electrode Device Assembled from Bamboo Char Loaded
Nano Ferric Oxide for Catalytic Treatment of Organic Wastewater ..........................545
L. Dan, G. Suli, Z. Ling, L. Jun, Z. Jintao, and M. Qiujie

Three-Dimension Electrode Device with Bamboo Char Loaded Nano-Cobalt
Oxide for Catalytic Degradation of Organic Pollutant in Wastewater ..........................553
Z. Ling, Z. Lidan, G. Suli, L. Jun, L. Tiang, J. Xiaocui, D. Chenlin,
G. Fan, and L. Mi

Diffusion Bonding Process for Aerospace Components .......................................561
H. Lee, J. Yoon, and D. Shin

Coarsening of β Precipitates in an Isothermally-Aged Fe₇₅-Ni₁₀-Al₁₅
Alloy ..................................................................................................................................569
O. Soriano-Vargas, V. Lopez-Hirata, H. Dorantes-Rosales,
M. Saucedo-Muñoz, E. Avila-Davila, and S. Lezama-Alvarez

Experimental Simulation on the Continuous Casting Solidified Structure of
S32205 Duplex Stainless Steel .......................................................................................577
X. Chen, Q. Sun, L. Ao, H. Zhong, H. Zheng, Q. Zhai, and Z. Li

Wettability Testing for Ni/Ti(CN) System in High Temperature ..........................585
K. Shimojima, H. Hosokawa, K. Kato, and A. Matsumoto

Effect of Stirring on the Solidification Structure and Segregation of 60Si₂MnA
Spring Steel during Continuous Casting .......................................................................589
Effect of Pulse Magnetic Field on Normal Grain Growth of Grain Oriented Silicon Steels during Primary Recrystallization Annealing
Q. Xia, L. Li, J. Huang, L. Liu, and Q. Zhai

Optical Properties and Electrical Properties of Transparent Conductive Films of Magnesium Hydroxide Based Compounds
M. Chiba, M. Higashi, H. Kiyota, M. Maizono, and T. Kuji

Synthesis and Characterization of Flame Retarding UV-Curable Boron Containing Hybrid Coatings
B. Zeytuncu, V. Kahraman, and O. Yucel

Preparation of (Ti_{0.8}Mo_{0.2})C-Ni Cermets by Mechanical Alloying
H. Hosokawa, K. Kato, K. Shimojima, and A. Matsumoto

Aerosol Route Synthesis of Lithium Borate Spheres Using Lithium Nitrate and Boric Acid Solution
B. Ebin, S. Gurmen, and C. Arslan

Synthesis of Nanocrystalline Cu_{3}B_{2}O_{6} Particles by Ultrasonic Spray Pyrolysis Method
B. Ebin, S. Gurmen, and C. Arslan

Study on the Microstructure Evolution of Fe-6.5wt.%Si Powders Fabricated by High Pressure Gas Atomization
L. Zhu, K. Li, Y. Guo, C. Song, Q. Zhai, and Y. Zhang

Microstructural and Mechanical Performance of Cold-Rolled Al Base Alloys
S. Casolco, and S. Valdez

Research on the Carbothermic Reduction Conditions of Mill Scale from Continuous Casting Processes
F. Demirci, and O. Yucel

Effects of Silicon Content and Cooling Rate on Distribution and Size of Inclusion in Silicon Steel Thin Strip
Q. Peng, L. Wang, X. He, R. Yang, C. Song, and Q. Zhai

A Low Cost Method for Manufacturing of Aluminum/Alumina Composite by Anodizing and CRB Process
R. Jamaati, M. Toroghinejad, and E. Zahrani
Influences of Alloying Elements on Grain Sizes in Friction Stir Processed Pure Aluminum and Aluminum Alloys .................................................................677
   T. Hirata, T. Morishige, M. Tsujikawa, and K. Higashi

   P. Agrawal, A. Oliveira, G. Brito, C. Cunha, E. Araújo, and T. Melo

Thoughened Poly (Acid Lactic): Mechanical and Morphological Characterizations .................................................................................................................693
   G. Brito, T. Melo, P. Agrawal, C. Cunha, and E. Araújo

Toughening of ADI Austenitized in Intercritical Region ...................................701
   J. Chen, B. Chen, and J. Tsai

Development and Characterization of Milled Silver Powder Addition to Polypropylene Feedstock for Injection Molding .....................................................709
   K. Yumakgil, A. Söyler, G. Yilmaz, C. Tamerler, and B. Özkal

Horizontal Directional Solidification of Zn-Al Alloys ....................................717
   A. Ares, S. Gueijman, and C. Schvezov

Electron Beam Melting and Recycling of Hafnium...........................................725
   K. Vutova, V. Vassileva, G. Mladenov, E. Koleva, T. Prakash, and N. Munirathnam

Modeling of Weld Penetration in High Velocity GTAW ...................................733
   U. Duman, and P. Mendez

Electrosynthesis, Characterization, and Thermal Property Analysis of Pentakis (Diethylamido) Tantalum ........................................................................741
   J. Yang

Separation of Antimony from a Stibnite Concentrate through a Low-Temperature Smelting Process to Eliminate SO2 emission ...........................................749
   J. Yang, C. Tang, Y. Chen, J. He, and M. Tang

Generation and Control of Two Way Shape Memory Effect for SMA Coil Spring ........................................................................................................757
   K. Jee, J. Han, W. Jang, and J. Park

xiv
Water Modeling of Optimization of Two-Strand Tundish Configuration for Slab Continuous Casting with Gas Bubbling ............................................................... 765
S. Zheng

Preparation and Current Distribution Performance of Pb-Al Layered Composite Anode Materials ............................................................ 771
S. Zhou, P. Zhu, Y. Sun, and L. Sun

Characteristics of the Gas Dispersion Generated through a Jet Sparger in Aqueous Media ............................................................. 777
F. Tavera, and R. Escudero

Thermodynamic Study for Cleaning Water Contaminated with Cu, Pb, and Ni ....................................................... 791
R. Escudero, F. Tavera, and E. Espinoza

Correlation of Porosity Detected by Computed Tomography and Fatigue Strength of Aluminium Alloys .................................................. 803
T. Pabel, G. Geier, D. Habe, J. Rosc, P. Schumacher, and T. Petkov

CO₂-Corrosion of Steels Exposed to Saline Water Environment .......... 807
A. Pfennig, B. Linke, S. Schulz, and A. Kranzmann

Evaluation of the Effect of Residual Silver in Copper on the Cementation Process by Factorial Design and Multiple Regression Analysis .......... 815
D. Agaogullari, I. Duman, and Ö. Keles

Intermetallic Phases and Microstructure in AlSi Alloys Influenced by Fluid Flow ............................................................. 825
P. Mikolajczak, and L. Ratke

Effects of Al–5Ti–1B Grain Refiner on the Structure, Hardness and Tensile Properties of a New Developed Super High Strength Aluminum Alloy ........ 833
M. Alipour, M. Emamy, J. Rasizadeh, M. Azarbarmas, and M. Karamouz

Effect of Predeformation and Heat Treatment Conditions in the Modified SIMA Process on Microstructural of a New Developed Super High-Strength Aluminium Alloy Modified by Al-8B Grain Refiner .......... 843
M. Alipour, M. Emamy, J. Rasizadeh, M. Karamouz, and M. Azarbarmas
The Effects of Al-5Ti-1B Grain Refiner and Heat Treatment on the Microstructure and Dry Sliding Wear Behavior of a New Developed Super High-Strength Aluminum Alloy ................................................................. 855
  M. Alipour, M. Emamy, J. Rasizadeh, M. Karamouz, and M. Azarbarmas

Combined Processing of ECAP and Cold Rolling to Enhance the Performance of Metallic Materials .................................................................................................................. 867
  H. Miyamoto, T. Xiao, and T. Uenoya

The Effects of Be on Mechanical Properties of Al-Mg2Si In Situ Composite ................................................................................................................................. 873
  M. Azarbarmas, M. Emamy, J. Rasizadeh, M. Alipour, and M. Karamouz

The Effects of Cooling Rate on the Microstructure and Hardness of Al-15wt.%Mg2Si In Situ Composite with Boron ................................................................. 883
  M. Azarbarmas, M. Emamy, J. Rasizadeh, M. Karamouz, and M. Alipour

Explosive Generation of High Pressures and Temperatures and Areas of Their Application .................................................................................................................. 891
  N. Chikhradze, and V. Kabulashvili

The Effects of Li Additions on the Microstructure and Mechanical Properties of 380 Aluminum Casting Alloys ................................................................. 899
  M. Ravari, M. Emamy, J. Rasizadeh, M. Alipour, and M. Azarbarmas

The Influence of Li on Properties of 380 Aluminum Casting Alloys .......... 907
  M. Karamouz, M. Emamy, J. Rasizadeh, M. Azarbarmas, and M. Alipour

Microstructural and Mechanical Properties (hardness) Investigations of 0.61%Al-1.11%Si Austempered Ductile Iron ................................................................. 915
  A. Kiani-Rashid, and B. Hashemi

Author Index ........................................................................................................ 923

Subject Index ........................................................................................................ 927
