Contents

Foreword by Stefan Tilkov ........................................ xxix
Acknowledgments .................................................. xxxiii

Chapter 1: Introduction ........................................... 1

1.1 About this Book .................................................. 2
Who this Book is For ............................................... 2
What this Book Does Not Cover ................................. 3

1.2 Recommended Reading .......................................... 3

1.3 How this Book is Organized ................................... 4
Part I: Fundamentals ................................................ 4
  Chapter 3: Introduction to Services ............................. 4
  Chapter 4: SOA Terminology and Concepts ..................... 5
  Chapter 5: REST Constraints and Goals ....................... 5
Part II: RESTful Service-Orientation ............................. 5
  Chapter 6: Service Contracts with REST ....................... 5
  Chapter 7: Service-Oriented with REST ....................... 5
Part III: Service-Oriented Analysis and Design with REST .......... 5
  Chapter 8: Mainstream SOA Methodology and REST .......... 5
  Chapter 9: Analysis and Service Modeling with REST .......... 5
  Chapter 10: Service-Oriented Design with REST ............... 6
Part IV: Service Composition with REST ....................... 6
  Chapter 11: Fundamental Service Composition with REST .... 6
  Chapter 12: Advanced Service Composition with REST ....... 6
  Chapter 13: Service Composition with REST Case Study ....... 6
Part V: Supplemental ................................................ 6
  Chapter 14: Design Patterns for SOA with REST .............. 6
  Chapter 15: Service Versioning with REST ................... 6
  Chapter 16: Uniform Contract Profiles ......................... 7
Part VI: Appendices ................................................. 7
  Appendix A: Case Study Conclusion ............................ 7
  Appendix B: Industry Standards Supporting the Web .......... 7
  Appendix C: REST Constraints Reference ...................... 7
  Appendix D: Service-Orientation Principles Reference ........ 7
Appendix E: SOA Design Patterns Reference ........................................... 7
Appendix F: State Concepts and Types ...................................................... 7
Appendix G: The Annotated SOA Manifesto .............................................. 7
Appendix H: Additional Resources .......................................................... 8

1.4 Conventions ................................................................. 8
Use of the Color Red ........................................................................ 8
Design Constraints, Principles, and Patterns:
Page References and Capitalization ................................................. 8
Design Goals: Capitalization .......................................................... 9
Symbol Legend .............................................................................. 9

1.5 Additional Information .......................................................... 10
Updates, Errata, and Resources (www.servicetechbooks.com) ........ 10
Master Glossary (www.soaglossary.com) ........................................ 10
Service-Orientatiom (www.serviceorientation.com) ....................... 10
What Is REST? (www.whatisrest.com) ............................................. 10
Referenced Specifications (www.servicetechspecs.com) ................. 10
*The Service Technology Magazine* (www.servicetechmag.com) .... 10
SOASchool.com® SOA Certified Professional (SOACP) ................. 11
CloudSchool.com™ Cloud Certified (CCP) Professional ................. 11
Notification Service ...................................................................... 11

**CHAPTER 2: Case Study Background** ............................................. 13

2.1 How Case Studies Are Used .................................................... 14

2.2 Case Study Background #1: Midwest University Association (MUA) ............................................................ 14
History ................................................................................. 14
IT Environment ......................................................................... 14
Business Goals and Obstacles ....................................................... 16
1. Build Reusable Business Services .............................................. 18
2. Consolidate Systems and Information .................................... 18
3. Improve Channel Experience ................................................. 18
4. Build Services Infrastructure ................................................. 18

2.3 Case Study Background #2: KioskEtc Co. ................................ 18
History ................................................................................. 19
IT Environment ......................................................................... 19
Business Goals and Obstacles ....................................................... 19
PART I: FUNDAMENTALS

CHAPTER 3: Introduction to Services ........................................... 23

3.1 Service Terminology .................................................. 24
Service ................................................................. 24
Service Contract .................................................. 24
Service Capability ................................................ 26
Service Consumer .............................................. 26
Service Agent ...................................................... 27
Service Composition ............................................... 27

3.2 Service Terminology Context ......................................... 29
Services and REST ............................................... 29
Services and SOA .................................................. 29
REST Services and SOA ........................................... 29

CHAPTER 4: SOA Terminology and Concepts ............................... 31

4.1 Basic Terminology and Concepts .................................... 32
Service-Oriented Computing ........................................ 33
Service-Orientation .................................................. 34
Service-Oriented Architecture (SOA) ................................. 37
SOA Manifesto ...................................................... 38
Services ................................................................. 39
Cloud Computing ..................................................... 40
IT Resources .......................................................... 41
Service Models .......................................................... 41
Agnostic Logic and Non-Agnostic Logic ......................... 42
Service Inventory ..................................................... 42
Service Portfolio ..................................................... 43
Service Candidate ................................................... 44
Service Contract ..................................................... 44
Service-Related Granularity ....................................... 45
Service Profiles ...................................................... 46
SOA Design Patterns .................................................. 46

4.2 Further Reading .......................................................... 49

4.3 Case Study Example ....................................................... 50
CHAPTER 7: Service-Orientation with REST .......................... 93

7.1 "SOA vs. REST" or "SOA + REST"? .............................. 95

7.2 Design Goals ..................................................... 97
Increased Intrinsic Interoperability ................................. 97
Increased Federation .................................................. 98
Increased Vendor Diversity Options ............................... 99
Increased Business and Technology Alignment .................. 100
Increased ROI .......................................................... 100
Increased Organizational Agility ................................. 102
Reduced IT Burden ...................................................... 102
Common Goals ......................................................... 103

7.3 Design Principles and Constraints ..................... 104
Standardized Service Contract ................................. 104
Service Loose Coupling ............................................ 105
Service Abstraction .................................................. 107
Service Reusability .................................................... 109
Service Autonomy .................................................... 110
Service Statelessness ................................................ 111
Service Discoverability .......................................... 113
Service Composability ............................................ 114
Common Conflicts ..................................................... 114
Stateful Interactions ................................................. 115
Service-Specific Contract Details .......................... 115

Case Study Example ................................................. 116
PART III: SERVICE-ORIENTED ANALYSIS AND DESIGN WITH REST

**Chapter 8: Mainstream SOA Methodology and REST**  . . . 127

8.1 Service Inventory Analysis ........................................... 131
8.2 Service-Oriented Analysis (Service Modeling) ................. 133
8.3 Service-Oriented Design (Service Contract) ......................... 135
8.4 Service Logic Design .................................................. 137
8.5 Service Discovery ...................................................... 137
8.6 Service Versioning and Retirement ................................. 138

**Chapter 9: Analysis and Service Modeling with REST**  . . 139

9.1 Uniform Contract Modeling and REST Service Inventory Modeling .................................................. 141
   REST Constraints and Uniform Contract Modeling .................. 144
   REST Service Centralization and Normalization .................. 146
9.2 REST Service Modeling ................................................ 147
   REST Service Capability Granularity ............................... 148
   Resources vs. Entities ................................................. 149
   REST Service Modeling Process .................................... 150
   Case Study Example .................................................. 152
   Step 1: Decompose Business Process (into Granular Actions) ... 152
   Case Study Example .................................................. 152
   Step 2: Filter Out Unsuitable Actions ............................... 154
   Case Study Example .................................................. 154
   Step 3: Identify Agnostic Service Candidates ...................... 155
   Case Study Example .................................................. 157
   *Event Service Candidate (Entity)* ................................ 157
   *Award Service Candidate (Entity)* ................................ 158
   *Student Service Candidate (Entity)* .............................. 158
   *Notification Service Candidate (Utility)* ......................... 159
   *Document Service Candidate (Utility)* ........................... 159
   Step 4: Identify Process-Specific Logic ............................ 160
10.2 REST Service Contract Design ........................................ 191
   Designing Services Based on Service Models .......................... 191
      Task Services .................................................. 191
      Entity Services .............................................. 192
      Utility Services .............................................. 193
   Designing and Standardizing Resource Identifiers .................. 194
      Service Names in Resource Identifiers .............................. 195
      Other URI Components .......................................... 196
      Resource Identifier Overlap .................................... 197
      Resource Identifier Design Guidelines ............................ 199
   Designing with and Standardizing REST Constraints ............... 201
      Stateless ..................................................... 201
      Cache ......................................................... 202
      Uniform Contract ............................................ 203
      Layered System ............................................... 204
   Case Study Example ................................................ 205
      Confer Student Award Service Contract (Task) ..................... 205
      Event Service Contract (Entity) ................................ 207
      Award Service Contract (Entity) ................................ 207
      Student Transcript Service Contract (Entity) ...................... 208
   Notification and Document Service Contracts (Utility) ............ 209

10.3 Complex Method Design ............................................. 211
   Stateless Complex Methods .......................................... 214
      Fetch Method .................................................. 214
      Store Method .................................................. 215
      Delta Method .................................................. 217
      Async Method .................................................. 219
   Stateful Complex Methods .......................................... 221
      Trans Method .................................................. 221
      PubSub Method .................................................. 222
   Case Study Example ................................................ 224
      OptLock Complex Method ........................................ 224
      PesLock Complex Method ........................................ 226
PART IV: SERVICE COMPOSITION WITH REST

CHAPTER 11: Fundamental Service Composition with REST

11.1 Service Composition Terminology
- Compositions and Composition Instances
- Composition Members and Controllers
  - Service Compositions Are Actually Service Capability Compositions
  - Designated Controllers
  - Collective Composability
- Service Activities
- Composition Initiators
- Point-to-Point Data Exchanges and Compositions

11.2 Service Composition Design Influences
- Service-Orientation Principles and Composition Design
  - Standardized Service Contract and the Uniform Contract
  - Service Loose Coupling and the Uniform Contract
  - Service Abstraction and Composition Information Hiding
  - Service Reusability for Repeatable Composition
  - Service Autonomy and Composition Autonomy Loss
  - Service Statelessness and Stateless
  - Service Composability and Service-Orientation
- REST Constraints and Composition Design
  - Stateless and Stateful Compositions
  - Cache and Layered System
  - Code-on-Demand and Composition Logic Deferral
  - Uniform Contract and Composition Coupling

11.3 Composition Hierarchies and Layers
- Task Services Composing Entity Services
- Entity Services Composing Entity Services

11.4 REST Service Composition Design Considerations
- Synchronous and Asynchronous Service Compositions
- Idempotent Service Activities
- Lingering Composition State
- Binding Between Composition Participants
11.5 A Step-by-Step Service Activity

1. Request to Purchase a Ticket
2. Verify the Requested Flight Details
3. Confirm a Seat on the Flight
4. Generate an Invoice
5. Create the Ticket

Summary

Chapter 12: Advanced Service Composition
with REST

12.1 Service Compositions and Stateless
Composition Design with Service Statelessness
Composition Design with Stateless

12.2 Cross-Service Transactions with REST
REST-Friendly Atomic Service Transactions
Phase 1: Initialize
Phase 2: Reserve
Phase 3A: Confirm
Phase 3B: Cancel
Phase 3C: Timeout
Compliance with Stateless
Additional Considerations

REST-Friendly Compensating Service Transactions
Phase 1: Begin
Phase 2: Do
Phase 3A: Complete
Phase 3B: Undo
Phase 3C: Timeout
Compliance with Stateless
Additional Considerations

Non-REST-Friendly Atomic Service Transactions
Phase 1: Initialize
Phase 2: Do
Phase 3: Prepare
Phase 4A: Commit
Phase 4B: Rollback
Phase 4C: Timeout
Chapter 13: Service Composition with REST

Case Study ........................................... 305

13.1 Revisiting the Confer Student Award Process .......... 306
13.2 Application Submission and Task Service Invocation ... 310
13.3 Confer Student Award Service Composition Instance
(Pre-Review Service Activity View) .......................... 312
  Step 1: Composition Initiator to Confer Student Award
  Task Service (A) ..................................... 312
  Step 2: Confer Student Award Task Service to Event
  Entity Service (B) ....................................... 312
  Step 3: Event Entity Service to Confer Student Award
  Task Service (B) .......................................... 313
  Step 4: Confer Student Award Task Service to Award
  Entity Service (E) ........................................ 314
  Step 5: Award Entity Service to Confer Student Award
  Task Service (E) .......................................... 314
  Step 6: Confer Student Award Task Service to Award
  Entity Service (E) ........................................ 314
Step 7: Award Entity Service to Confer Student Award
Task Service (E) .................................................. 315

Step 8: Confer Student Award Task Service to Student
Entity Service (F) .................................................. 315

Step 9: Student Entity Service to Confer Student Award
Task Service (F) .................................................. 315

Step 10: Confer Student Award Task Service to Student
Transcript Entity Service (F) ...................................... 316

Step 11: Student Transcript Entity Service to Confer Student
Award Task Service (F) .......................................... 316

Step 12: Confer Student Award Task Service to Composition
Initiator .......................................................... 316

13.4 Review of Pending Applications and Task Service
Invocation ....................................................... 317

Confer Student Award Service Composition Instance
(Post-Review Service Activity View) .......................... 318

Step 1: Composition Initiator to Confer Student Award
Task Service (L) .................................................. 320

Step 2: Confer Student Award Task Service to Notification
Utility Service (N) ................................................. 320

Step 3: Notification Utility Service to Student Entity
Service (N) ........................................................ 320

Step 4: Student Entity Service to Notification Utility
Service (N) ........................................................ 320

Step 5: Notification Utility Service to Confer Student Award
Task Service (N) .................................................. 321

Intermediate Step: Confer Student Award Task Service to
Transaction Coordinator (P, Q) ............................... 321

Intermediate Step: Transaction Coordinator to Confer
Student Award Task Service (P, Q) ......................... 321

Step 6: Confer Student Award Task Service to Conferral
Entity Service (P) ................................................. 322

Intermediate Step: Conferral Entity Service to Transaction
Coordinator (P) .................................................. 322

Intermediate Step: Transaction Coordinator to Conferral
Entity Service ..................................................... 322

Step 7: Conferral Entity Service to Confer Student Award
Task Service (Q) ................................................. 322

Step 8: Confer Student Award Task Service to Student
Manuscript Entity Service (Q) ............................... 323
Intermediate Step: Student Transcript Entity Service to Transaction Controller (Q) ........................................... 323
Intermediate Step: Transaction Controller to Student Transcript Entity Service (Q) ........................................... 323
Step 9: Student Transcript Entity Service to Confer Student Award Task Service (Q) ........................................... 324
Intermediate Step: Confer Student Award Task Service to Transaction Coordinator (P, Q) ........................................... 324
Intermediate Step: Transaction Coordinator to Confer Student Award Task Service (P, Q) ........................................... 324
Step 10: Confer Student Award Task Service to Composition Initiator ................................................................. 324

PART V: SUPPLEMENTAL

CHAPTER 14: Design Patterns for SOA with REST ........... 327

14.1 REST-Inspired SOA Design Patterns ..................... 329
Content Negotiation ........................................... 331
  Related Patterns ........................................... 332
  Related Service-Oriented Computing Goals .................. 332
Endpoint Redirection ......................................... 332
  Related Patterns ........................................... 333
  Related Service-Oriented Computing Goals .................. 333
Entity Linking ............................................. 333
  Related Patterns ........................................... 335
  Related Service-Oriented Computing Goals .................. 335
Idempotent Capability ....................................... 335
  Related Patterns ........................................... 335
  Related Service-Oriented Computing Goals .................. 335
Lightweight Endpoint ....................................... 336
  Related Patterns ........................................... 337
  Related Service-Oriented Computing Goals .................. 337
Reusable Contract ......................................... 338
  Related Patterns ........................................... 338
  Related Service-Oriented Computing Goals .................. 339
Uniform Contract ......................................... 339
14.2 Other Relevant SOA Design Patterns .......................... 340
  Contract Centralization ........................................ 340
  Contract Denormalization ....................................... 340
  Domain Inventory ............................................... 340
  Schema Centralization .......................................... 341
  State Messaging ................................................. 341
  Validation Abstraction .......................................... 342

**Chapter 15: Service Versioning with REST .................. 343**

15.1 Versioning Basics ............................................ 346
  REST Service Contract Compatibility ......................... 346
    *Compatible and Incompatible Changes* .................... 348
  Uniform Contract Method Compatibility ...................... 349
  Uniform Contract Media Type Compatibility .................. 350
    *Media Types and Forwards-compatibility* ................. 354

15.2 Version Identifiers ........................................... 355
  Using Version Identifiers .................................... 356
  Version Identifiers and the Uniform Contract ............... 358

**Chapter 16: Uniform Contract Profiles ....................... 361**

16.1 Uniform Contract Profile Template ......................... 362
  Uniform-Level Structure ...................................... 363
  Method Profile Structure ..................................... 364
  Media Type Profile Structure ................................ 365

16.2 REST Service Profile Considerations ....................... 367

16.3 Case Study Example .......................................... 369
  Uniform-Level Structure: MUAUC ............................. 370
  Method Profile Structure: Fetch ............................. 371
  Response Code Handling for GET Methods in Fetch Method .. 373
  Method Profile Structure: Store ............................. 374
  Response Code Handling for PUT and DELETE Methods in Store Method ........................................ 376
  Method Profile Structure: GET .................................. 377
  Method Profile Structure: PUT .................................. 378
  Media Type Profile Structure: Invoice
    (application/vnd.edu.mua.invoice+xml) .................... 379
PART VI: APPENDICES

Appendix A: Case Study Conclusion ............................................. 383

Appendix B: Industry Standards Supporting the Web.............. 387

The Internet Engineering Taskforce (IETF) ............................. 388
The World Wide Web Consortium ........................................... 389
Other Web Standards ......................................................... 390

Appendix C: REST Constraints Reference ................................. 391

Appendix D: Service-Oriented Principles Reference .................. 409

Appendix E: SOA Design Patterns Reference ............................ 425

Appendix F: State Concepts and Types ..................................... 521

State Management Explained ................................................. 522
State Management in Abstract ............................................. 522
Origins of State Management ............................................. 523
Deferral vs. Delegation ...................................................... 527

Types of State ................................................................. 527
Active and Passive ........................................................... 527
Stateless and Stateful ....................................................... 528
Session and Context Data ................................................... 528

Measuring Service Statelessness ......................................... 530

Appendix G: The Annotated SOA Manifesto .............................. 533
