Foreword ................................................................. ix
Preface ........................................................................ xi
Acknowledgments ....................................................... xvii
Editors .......................................................................... xix
Contributors ............................................................... xxi

PART I Natural Self-Healing Systems

Chapter 1 Keeping the Green World Alive: The Repair Cycle of Photosystem II .................................................. 3
Josef Komenda, Franck Michoux, and Peter J. Nixon

Chapter 2 Regeneration of 11-cis-Retinal in the Retinoid Visual Cycle .......... 23
Gennadiy Moiseyev and Jian-Xing Ma

Chapter 3 Biological Repair Mechanisms: A Short Overview .................. 45
Alessandro Sinigaglia

PART II Artificial Self-Healing Systems

Chapter 4 Self-Healing of Gold Nanoparticles during Laser Irradiation: An Embryonic Case of “Systems Nanotechnology” ............... 71
Vincenzo Amendola and Moreno Meneghetti

Chapter 5 Self-Healing in Two-Dimensional Supramolecular Structures: Utilizing Thermodynamic Driving Forces ..................... 91
Markus Lackinger

Serena Berardi, Andrea Sartorel, Mauro Carraro, and Marcella Bonchio
## Contents

### Chapter 7 Dynamic Self-Assembly of Nanoscale Components for Solar Energy Conversion

Ardemis A. Boghossian, Moon-Ho Ham, Jong Hyun Choi, and Michael S. Strano

---

### Chapter 8 Self-Healing Nanocomposites: Role and Activation of Inorganic Moieties and Hybrid Nanophases

Ivano Alessandri

---

### Chapter 9 Thermoreversibility in Polymeric Systems: Chemical and Physical Aspects

C. Toncelli, D. De Reus, A.A. Broekhuis, and F. Picchioni

---

### Chapter 10 Self-Repairing by Damage-Triggered Smart Containers

Dmitry G. Shchukin and Dmitry O. Grigoriev

---

### Chapter 11 Self-Healing Process in Glassy Materials

François O. Mear, Daniel Coillot, Renaud Podor, and Lionel Montagne

---

### Chapter 12 Basic Principles of Self-Healing in Polymers, Ceramics, Concrete, and Metals

Martin D. Hager and Ulrich S. Schubert

---

### PART III Frontiers of Self-Healing at the Nanoscale

### Chapter 13 Design of a Repair-and-Go System for Site-Specific Healing at the Nanoscale

German V. Kolmakov, Todd Emrick, Thomas P. Russell, Alfred J. Crosby, and Anna C. Balazs

---

### Chapter 14 Autopoietic Self-Reproduction as a Distinctive Feature of Structural and Dynamic Organization in Microcompartment Systems: From Self-Assembled Micelles to Synthetic Cells

Pasquale Stano
Contents

Chapter 15  Molecular Motors and Self-Healing at the Neuromuscular Synapse................................................................................................. 357
            Alf Måansson, Marlene Norrby, and Sven Tågerud

Chapter 16  Fault-Tolerant Approach to the Configuration of Programmable Logic at the Nanoscale.............................................................. 395
            Gianluca Tempesti, André Stauffer, and Joël Rossier

Index......................................................................................................................... 431
