2011 IEEE 11th International Conference on Advanced Learning Technologies

(ICALT 2011)

Athens, Georgia, USA
6-8 July 2011
Table of Contents

Preface ........................................................................................................................................... xx
ICALT 2011 Chairs/Committees ....................................................................................................... xxi
Reviewers ...................................................................................................................................... xxiv

Main Track
A 3D Motion Controlled Method for the Training of Mental Rotation ....................................... 1
    Chin-Yea Wang, Shin-Chen Yeh, Jing-Liang Wang, Shin-Chen Yang, and Albert Rizzo
A 3D Virtual Classroom Simulation for Supporting School Teachers Training Based
on Synectics - “Making the Strange Familiar” .............................................................................. 4
    Pavlos Kallonis and Demetrios G. Sampson
A Case Study of an Academic Achievement-oriented Student in Game-based Learning .......... 7
    Morris S.Y. Jong, Fong-lok Lee, Jimmy H.M. Lee, and Junjie Shang
A Cloud-based Cyberlearning Environment for Introductory Computing Programming
Education ...................................................................................................................................... 12
    Prabir Bhattacharya, Minzhe Guo, Lixin Tao, Bin Wu, Kai Qian, and E. Kent Palmer
A Collaborative Interactive Cyber-learning Platform for Anywhere Anytime Java
Programming Learning .............................................................................................................. 14
    Prabir Bhattacharya, Minzhe Guo, Lixin Tao, Yujian Fu, and Kait Qian
A Computer Game Based Approach for Increasing Fluency in the Speech of
the Autistic Children .................................................................................................................. 17
    Anika Anwar, Md. Mustafizur Rahman, S.M. Ferdous, Samiul Alam Anik, and Syed Ishaque Ahmed
A Conceptual Design of Multi-Agent Based Personalized Quiz Game ................................... 19
    Martin M. Weng, Ireti Fakinlede, Fuhua Lin, Timothy K. Shih, and Maiga Chang
A Contextualized Annotation Model for Mobile Learning ...................................................... 22
    Pierre-Yves Gicquel and Dominique Lenne
A Digital Board Game Based Learning System for Authentic Learning ................................... 25
    Kuan-Chang Chen, Chia-Jung Wu, and Gow-Dong Chen
<table>

<tbody>
<tr>
<td>A Framework for Observation and Analysis of Learners' Behavior in a Full-Scope Simulator of a Nuclear Power Plant - Approach Based on Modelled Traces</td>
<td>30</td>
</tr>
<tr>
<td>Olivier Champalle, Karim Sehba, Alain Mille, and Yannick Prié</td>
<td></td>
</tr>
<tr>
<td>A Framework of Educational Control in Game-based Learning Environment</td>
<td>32</td>
</tr>
<tr>
<td>Ryo Takaoka, Masayuki Shimokawa, and Toshio Okamoto</td>
<td></td>
</tr>
<tr>
<td>A Keyword-based Video Summarization Learning Platform with Multimodal Surrogates</td>
<td>37</td>
</tr>
<tr>
<td>Wen-Hsuan Chang, Jie-Chi Yang, and Yu-Chieh Wu</td>
<td></td>
</tr>
<tr>
<td>A Location-Based Mobile Game for Business Education</td>
<td>42</td>
</tr>
<tr>
<td>Jean-Christophe Paja and David Parsons</td>
<td></td>
</tr>
<tr>
<td>A Mobile Learning Study in High School Mathematics: Challenges, Lessons Learned and Recommendations</td>
<td>45</td>
</tr>
<tr>
<td>Vani Kaloo and Permanand Mohan</td>
<td></td>
</tr>
<tr>
<td>A Multiagent Model for Searching Learning Objects in Heterogeneous Set of Repositories</td>
<td>48</td>
</tr>
<tr>
<td>Jonas Vian, Ronaldo Lima Rocha Campos, Cecilia Estela Giuffra Palomino, and Ricardo Azambuja Silveira</td>
<td></td>
</tr>
<tr>
<td>A New Application to Detect “Emotional Perception and Styles” of Primary School Children, and their Evolution with Age</td>
<td>53</td>
</tr>
<tr>
<td>Carlo Giovannella and Simone Carcone</td>
<td></td>
</tr>
<tr>
<td>A New e-Learning Architecture for the Automatic Assessment of Network Services</td>
<td>56</td>
</tr>
<tr>
<td>Antonio Robles-Gómez, Llanos Tobarrta, Salvador Ros, Roberto Hernández, Agustin C. Caminero, and Rafael Pastor</td>
<td></td>
</tr>
<tr>
<td>A Robust Estimation Scheme of Reading Difficulty for Second Language Learners</td>
<td>58</td>
</tr>
<tr>
<td>Yi-Ting Huang, Hsiao-Pei Chang, Yeali Sun, and Meng Chang Chen</td>
<td></td>
</tr>
<tr>
<td>A Robust Multi-Modal Emotion Recognition Framework for Intelligent Tutoring Systems</td>
<td>63</td>
</tr>
<tr>
<td>Xiaoping Liu, Lei Zhang, Jacob Yadegar, and Niranjan Kamat</td>
<td></td>
</tr>
<tr>
<td>A Semantic Web-enabled Tool for Self-Regulated Learning in the Workplace</td>
<td>66</td>
</tr>
<tr>
<td>Melody Stadat, Jelena Jovanović, Kai Pata, Teresa Holocher-Ertl, Dragon Galević, and Nikola Milkić</td>
<td></td>
</tr>
<tr>
<td>A Shared Rationale Space for Supporting Knowledge Awareness in Collaborative Learning Activities: An Empirical Study</td>
<td>71</td>
</tr>
<tr>
<td>Lu Xiao</td>
<td></td>
</tr>
<tr>
<td>A Simple Low-Cost Portable Energy Efficient Device to Supplement Operating System Curriculum</td>
<td>76</td>
</tr>
<tr>
<td>Chia-Tien Dan Lo, Kai Qian, and Yan-qing Zhang</td>
<td></td>
</tr>
<tr>
<td>A Study of Video-based Concordancer on Scene Classification</td>
<td>78</td>
</tr>

</table>
Design Electronic Botany Worksheet Generation Based on Bloom’s Taxonomy
for Mobile Learning ................................................................. 192
   Rita Kuo, Maiga Chang, Keith Ying, and Jia-Sheng Heh

Design of a Long-Distance-Controlled Robot System for Distance Education ...................................................... 195
   Akiyuki Minamide, Kazuya Takemata, and Megan Hastie

Design of Lifelong Learning Content Using Space Education: Development of
the Mobile 3D (Three Dimensional) Image Projection System ................................................................. 197
   Kazuya Takemata, Akiyuki Minamide, Sumio Nakamura, and Nobuhiro Tanba

Designing a Virtual Tutee System to Enhance College Student Motivation ......................................................... 199
   Seung Won Park and ChanMin Kim

Development of a Game-based Learning System Using Toy Robots ................................................................. 202
   Li-Der Chou, Tzu-Chien Liu, David Chunhu Li, Yi-Shou Chen, Man Tat Ieong, Pei-Husn Lee, and Yi-Chun Lin

Domain-Specific Modeling Approach to Support Instructional Design Rationale .................................................. 205
   El Amine Ouraiba, Christophe Choquet, and Philippe Cottier

Dual Mapping for Support of Problem Solving and Knowledge Construction ..................................................... 207
   Bin Wu and Min Hong Wang

Dynamic Adaptation in OPENET4LD .............................................. 210
   Juan C. Vidal, Manuel Lama, Beatriz Fernández-Gallego, and Alberto Bugarin

Dynamic Adaptive Mechanism in Learning Management System Based on Learning
Styles .......................................................................................... 215
   Samar Alkhuraiji, Barry Cheetham, and Omaima Bamasak

Dynamic User Modeling and Adaptation Based on Learning Styles for Supporting
Semi-Automatic Generation of IMS Learning Design ....................................................................................... 218
   Silvia Baldiris, Sabine Graf, and Ramon Fabregat

Educational Massively Multiplayer Online Role Playing Game for Teaching Youth
Finance .......................................................................................... 221
   David A. Jones and Maiga Chang

Educational Robotics and Inquiry Learning: A Pilot Study in a Web-Based Learning
Environment .................................................................................. 224
   Heilo Altin, Margus Pedaste, and Alvo Aabloo

Effectiveness of “Learning by Doing” Methodology in Training Programs - An
Evaluation of a Teacher Training Program for Information Technology Education ............................................. 227
   Surya Kiran Reddy Karri and Sandhya Kode

Effects of Applying STR for Group Learning Activities on Learning Performance in
a Synchronous Cyber Classroom ......................................................................................................................... 232
   Tony C.T. Kuo, Rastam Shadiev, Wu-Tuin Hwang, and Nian-Shing Chen

e-Learning Using iPads - An e-learning Scenario Using Mobile Devices and Sensors
for Measurements ............................................................................. 237
   Manfred Lohr
Enhanced Understand of Biological Systems Using Structure-Behavior-Function Models .................................................................239
  Michael Helms, Svaroop Vattam, Ashok K. Goel, and Jeannette Yen

Enhancing English Reading Comprehension by Integrating Direct Access to Digital Materials and Scaffolded Questionings in Paper Prints .........................244
  Daniel Chia-En Teng, Nian-Shing Chen, and Cheng-Han Lee

Enhancing Learning Paths with Concept Clustering and Rule-Based Optimization ..........................................................249
  S.T. Fung, Vincent Tam, and Edmund Y. Lam

Evaluation of Personalization Strategies Based on Fuzzy Logic ..................................................................................254
  Fathi Essalmi, Leila Jemni Ben Ayed, Mohamed Jemni, Kinshuk, and Sabine Graf

Evolution of an Integrated Technology for Supporting Learning about Complex Systems .........................................................257
  David A. Joyner, Ashok K. Goel, Spencer Rugaber, Cindy Hmelo-Silver, and Rebecca Jordan

Examining the Effects of Technology-Based Learning on Children with Autism: A Case Study ...................................................260
  Rayshun Dorsey and Ayanna M. Howard

Expanding the Concept of Learner Control in Higher Education: Consequences for Intervention Design ...........................................262
  Sebastian H.D. Fiedler and Terje Vålåtåga

Experiences in Visualizing the Analysis of Blended-Learning Interactions to Support Teachers ...........................................................265
  Maite Martín, Ainhoa Álvarez, Isabel Fernández-Castro, David Reina, and Maite Urretavizcaya

Exploring a Standards-based Approach to the Design and Delivery of Adaptable Learning Content: A Case Study ..................................................267
  Voula Gkatzidou and Elaine Pearson

Facilitating Informal Learning in a Mobile Application for a Group of Type 2 Diabetics .................................................................272
  Salys Sultan and Permanand Mohan

Flexible Learning Support in an Inflexible Society ................................................................................................................274
  Lee Griffiths

From Behavioral Indicators to Contextualized Competence Assessment ..............................................................................277
  Michael Bedek, Sobah Abbas Petersen, and Tuija Heikura

From Collections of Exercises to Educational Games: A Process Model and a Case Study ..........................................................282
  Daniel Rodríguez-Cerezo, Mercedes Gómez-Albarrán, and José-Luis Sierra

From Learning Objects Repositories to Learning Design Repositories: The COSMOS Learning Design Repository ........................285
  Demetrios G. Sampson, Panagiotis Zervas, and Sofoklis Sotiriou
Gathering Practice Sharing and Problem Solving on a Single Platform for Teacher Training: A Collaborative Platform Model for Teacher Professional Development ................................................................. 290

Thierry Condamines

Hoodies and Barrels: Using a Hide-and-seek Ubiquitous Game to Teach Mathematics ................................................................. 295

Ivon Arroyo, Imran A. Zualkernan, and Beverly P. Woolf

How Can Psychology Inform the Design of Learning Experiences? ................................................................. 300

Milos Kravcik, Ralf Klamma, and Zinayda Petrushyna

How Students Use Contextual Cues in Finding Information in Paper and Electronic Textbooks ................................................................. 302

Sheng-Jie Yang, Gwo-Dong Chen, and Liang-Yi Li

How to Learn Chinese through Online Tools? From the Perspective of Informal Learning to Culture Immersion ................................................................. 305

Mei-Jen Audrey Shih and Jie-Chi Yang

Identification of Learning Goals in Forum-based Communities ................................................................. 307

Julian Krenge, Zinayda Petrushyna, Milos Kravcik, and Ralf Klamma

Implementation of an Intelligent Framework for Utilization within an InfoStation-based mLearning Environment ................................................................. 310

Zhanlin Ji, Damien Meere, Ivan Ganchev, and Máirtín O’Droma

Implementing a Classroom Oral Reading Platform for Primary EFL Students’ Oral Reading Rate ................................................................. 312

Kuo-Ping Liu, Cheng-Chung Liu, Kuo-Chun Hung, Chih-Hsin Huang, and Chia-Jung Chang

Improving Students’ Satisfaction in a Massive Online Academic Writing Course ................................................................. 314

Jorge Villalon and Carolina Heiremans

Incorporating the Prisoners’ Dilemma in Peer-Assessment: An Experimental Study ................................................................. 317

Hend S. Al-Khalifa, Henda Choifi, Afnan A. Al-Subaihin, Amal Al-Ibrahim, and Maha Al-Yahya

Influences of AR-Supported Simulation on Learning Effectiveness in Face-to-face Collaborative Learning for Physics ................................................................. 320

Nai Li, Yuan Xun Gu, Leanne Chang, and Henry Been-Lirn Duh

Instructional Expertise for Phrase Singing and its Application for a Chorus Learning Support System ................................................................. 323

Mizue Kayama, Kazunori Itoh, Kazushi Asanuma, Masami Hashimoto, and Makoto Otani

Integrating Trust and Competency Management to Improve Learning ................................................................. 326

Nicola Capuano, Matteo Gaeta, Giuseppina Rita Mangione, Francesco Orciuoli, and Pierluigi Ritrovato

Interactions between Inquiry Processes in a Web-Based Learning Environment ................................................................. 331

Mario Mäeots, Margus Pedaste, and Tago Sarapuu

Interactive Storytelling for Elementary School Nature Science Education ................................................................. 336

Jui-Feng Weng, Hsui-lien Kuo, and Shian-Shyong Tseng

xi
Interpreter for the Deployment of Intelligent Tutoring Systems in Mobile Devices ..................................................339  
Ramón Zatarain Cabada, María Lucía Barrón Estrada, L. Edgar Parra,  
and Carlos Alberto Reyes García

Introducing Accessibility Features in an Educational Game Authoring Tool: The <e-Adventure> Experience .................................................................341  
Javier Torrente, José Ángel Vallejo-Pinto, Pablo Moreno-Ger, and Baltasar Fernández-Manjón

Investigating the Role and Potentials of Using Web 2.0 in Music Education from Student Perspective ..........................................................344  
Chi-Ting Wei and Shelley S.C. Young

Investigations of Using Interactive Whiteboards with and without an Additional Screen ..................................................347  
Ting-Wen Chang, Kinshuk, Pao-Ta Yu, and Jenq-Muh Hsu

Knowledge Sharing in the Classroom: A Social Network Approach for Diagnostic Assessment and Learning Together ..................................................350  
Johannes Konert, Stefan Göbel, Kristina Richter, and Regina Bruder

Learning Functional Models of Biological Systems for Biologically Inspired Design ..................................................355  
Bryan Wiltgen, Swaroop Vattam, Michael Helms, Ashok K. Goel, and Jeannette Yen

Learning Object Repositories for Science Education: The Case of the OpenScienceResources Repository ..................................................358  
Demetrios G. Sampson, Panagiotis Zervas, and Sofoklis Sotiriou

LEXI: A Semantic Tool to Enrich Lexical Competence of Language Learners ..................................................360  
Maha Al-Yahya, Hend S. Al-Khalifa, Alia Bahanshal, and Iman Aloudah

Live Programming Learning Objects on Cloud ..................................................362  
Bin Wu, Kai Qian, Prabir Bhattacharya, Minzhe Guo, and Wanjun Hu

Load Forecasting Mechanism for e-Learning Infrastructures Using Exponential Smoothing ..................................................364  
Agustín C. Caminero, Salvador Ros, Roberto Hernández, Antonio Robles-Gómez, and Rafael Pastor

Mapping Business Simulation Games to a Component Architecture ..................................................366  
Alexander Neef, Dennis Maciuszek, and Alke Martens

Matching and Mismatching in Web-based Learning: A Human Centered Approach ..................................................369  
Pei-Ren Huang, Li-Ping Chang, Yu-Cheng Shih, Yung-Chi Hsu, and Sherry Y. Chen

Mixed Reality for Learning Standard Mechanical Elements ..................................................372  
Jorge Martín-Gutiérrez and Manuel Contero

Model-based Tagging: Promoting Access to Online Texts on Complex Systems for Interdisciplinary Learning ..................................................375  
Swaroop Vattam and Ashok K. Goel

Modeling Mobile Learning System Using ANFIS ..................................................378  
Ahmed Al-Hmouz, Jun Shen, Jun Yan, and Rami Al-Hmouz
Modelling the Aggregation of Multimedia Data to Connect the Inputs and Outcomes of a Variety of Tools

Emilio Julio Lorenzo and Maria Felisa Verdejo

MuistiKoti - Towards Better Awareness of the Technological Solutions Designed for People with Alzheimer’s Disease

Ilkka Niskanen, Jyri Toivonen, and Julia Kantorovich

No Evidence of Correlation among Felder-Silverman’s Learning Styles, Visual Memory and Visualization Styles

Carlo Giovannella

Ontologies and Knowledge Aggregation in the Active Semantic Learning System

Ioan Silaghi, Radu Balog-Crisan, Ana Roxin, and Ioan Roxin

OntoQue: A Question Generation Engine for Educational Assessment Based on Domain Ontologies

Maha Al-Yahya

Operationalization of Learning Scenarios on Open and Distance Learning Platforms: The Case of the Moodle Platform

Aymen Abedmouleh, Lahcen Oubahssi, Pierre Alforcade, and Christophe Choquet

Optimizing the Performance of Educational Web Services

Mark Floryan and Beverly Park Woolf

Paleoclimate Clues: Problem-Based Learning Digital Media for Climate Science

Anna Mansour, Chris Sumsky, and Brian Magerko

Pedagogy in Computer-Based Sport Training

Yulita Hanum P. Iskandar, Lester Gilbert, and Gary B. Wills

PeerSpace - An Online Collaborative Learning Environment for Computer Science Students

Cen Li, Zhijiang Dong, Roland Unlch, Michael Chasteen, and Nathan Reale

Personalized Forecasting Student Performance

Nguyen Thai-Nghe, Tomáš Horváth, and Lars Schmidt-Thieme

Petri Nets and Ontologies: Tools for the “Learning Player” Assessment in Serious Games

Pradeepa Thomas, Anel Yessad, and Jean-Marc Labat

Pictures, Audio and Movies - Positioned around Me (PAM-PAM)

Darren Mundy and Linda Hockley

Preliminary Review of Assessment Technologies Visualizing Knowledge Structure:

Exploring an Alternative Approach

Min Kyu Kim

Programming Turing Machines as a Game for Technology Sense-Making

Andrea Valente and Emanuela Marchetti
A System for Adaptation of Educational Contents to Learners and their Mobile Device ........................................ 484
   Antonio Garcia, Eva Garcia, Luis De-Marcos, José-Ramón Hilera, José-Antonio Gutiérrez,
   José-María Gutiérrez, Salvador Otón, Roberto Barchino, and José-Javier Martínez

Tailoring Serious Games with Adaptive Pedagogical Scenarios: A Serious Game
for Persons with Cognitive Disabilities ........................................ 486
   Aarij Mahmood Hussaan, Karim Sehaba, and Alain Mille

Teaching Web Security Using Portable Virtual Labs ........................................ 491
   Li-Chiou Chen and Lixin Tao

Technology-enhanced Learning for Students with Learning Disabilities ................. 496
   Onintra Poobrasert, Piyada Sabayjai, and Namnueng Mitsuamarn

The Definition of a Tunneling Strategy between Adaptive Learning
and Reputation-based Group Activities ........................................ 498
   M. De Marsico, A. Sterbini, and M. Temperini

The Design and Implementation of an Enculturated Web-Based Intelligent Tutoring
System for Computer Science Education ........................................ 501
   Phaedra Mohammed and Permanand Mohan

The Impact of Animated Pedagogical Agents on Girls' and Boys' Emotions, Attitudes,
Behaviors and Learning ........................................ 506
   Ivon Arroyo, Beverly P. Woolf, David G. Cooper, Winslow Burleson, and Kasia Muldner

The Influence of a Motion-sensing and Game-based Mobile Learning System
on Learning Achievement and Learning Retention ........................................ 511
   Kuo-Liang Ou, WernHuar Tarng, Yu-Chung Yao, and Gwo-Dong Chen

The Interaction Analysis of Web Collaborative Exploration Learning in Two
Scenarios: Shared-Computer and One-to-One Computer ........................................ 516
   Chia-Jung Chang, Cheng-Chung Liu, and Kuo-Ping Liu

The Practice of Rationale Sharing in Virtual Group Learning Activities: An Empirical
Study ........................................ 521
   Lu Xiao

The Relationships of Social Economic Status and Learners' Motivation
and Performance in Learning from a Game-Design Project ..................... 524
   Li-Chun Wang and Ming-Puu Chen

The Role of Affordances and Motives in Explaining How and Why Students Use
Computer-based Scaffolds ........................................ 529
   Brian R. Belland, Joel Drake, and Zhiying Liu

The Structure and Substance of Student Asynchronous Communication in Hybrid
STEM Courses ........................................ 532
   Zhongxiao Li, Kairui Chen, and Xin Xu

Tools for Context-Aware Learning Design and Mobile Delivery ..................... 534
   Panagiotis Zervas, Sergio Eduardo Gómez Ardila, Ramón Fabregat, and Demetrios G. Sampson
Towards a Better Understanding of Learning Objects Content ................................................................. 536
   Ramzi Farhat, Bruno Defude, and Mohamed Jemni
Towards Non-invasive Adaptive Meta-Cognitive Support for Online Training ................................................. 541
   Adam Moore, Owen Conlan, Declan Dogger, and Vincent Wade
TsoiChem: A Mobile Application to Facilitate Student Learning in Organic Chemistry ........................................... 543
   Mai Yin Tsoi and Sonal Dekhane
Understanding Learners’ Interaction Patterns through Analyzing Context of Questions in Discussion Transcripts ........................................................................................................ 548
   Yonghe Zhang, Yanyan Li, Peijie Cao, and Ronghuai Huang
Usage-based Clustering of Learning Objects for Recommendation ................................................................. 553
   Marc-André Orthmann, Martin Friedrich, Uwe Kirschenmann, Katja Niemann, Maren Scheffel,
   Hans-Christian Schmitz, and Martin Wolpers
Using Collaborative Concept Maps for Coordination and Knowledge-sharing in Learning Communities for Science ........................................................................................................ 558
   Emilio Julio Lorenzo, Miguel Rodríguez-Artacho, and Beatriz Barros Blanco
Using Educational Resources to Improve the Efficiency of Web Searches for Additional Learning Material .................................................................................................................. 563
   João C. Prates and Sean S.M. Siqueira
Using Indicators During Synchronous Tutoring of Practical Work ........................................................................ 568
   Aina Lekira, Christophe Desprès, Pierre Jacoboni, Christophe Choquet, Sébastien Iksal,
   Dominique Py, and Diem Pham Thi Ngoc
Using Logical Sensors Network to the Accurate Monitoring of the Learning Process in Distance Education Courses .................................................................................................................... 573
   Gislaine Cristina Micheloti Rosales, Regina Borges de Araújo, Joice Lee Otsuka,
   and Rodrigo Vilela da Rocha
Using Robot Based Learning to Enhance CS Curriculum Delivery ........................................................................ 576
   S.A. Bogle and W.D. Potter
Using the Think Aloud Method to Observe Students’ Help-seeking Behavior in Math Tutoring Software .............................................................................................................................. 579
   Ming-hui Tai, Beverly P. Woolf, and Ivan Arroyo
Using Web 2.0 Technologies in Academic Education for Students in Engineering ................................................ 582
   Radu Vasiu and Diana Andone
Video Bookmarking for Learner Support in Blended Learning: Selection of Appropriate Keywords for Efficient Review of Lecture Video ................................................................................. 585
   Yusuke Kometani, Takeshi Furuta, and Takako Akakura
Visualizing e-Learner Emotion, Topic, and Group Structure in Chinese Interactive Texts .................................................. 587
   Feng Tian, Huiyan Zhang, Longzhuang Li, Qinghua Zheng, and Yang Yang
Widgets to Support the Concept of an Adaptable Personal Learning Environment ................................................. 590
   Elaine Pearson, Voula Gkatzidou, and Steve Green
Working WITH vs. Working ON Audiovisual Educational Content ................................................................. 593
Mari Luz Guenaga, Andoni Eguiluz, and Iker Jamardo

Learning Technologies for the Developing World (LT4D) – Issues, Constraints and Solutions Workshop
Purposeful Learning is Transformative: How Experience with Media Production Tools at a Digital Agricultural Extension in India Suggests an Approach for Deepening the Impact of Educational ICT4D Project ................................................................. 596
Boris Kizelshteyn and John Bosco Lourdusamy

A Recommender System that Allows Reasoning and Interoperability over Educational Content Metadata ................................................................................................................................. 598
Tiago Thompsen Primo and Rosa Maria Vicari

Cross-Cultural Learning Design: Past the Head and the Hands to the HEART of the Matter ................................................................. 600
Adam Blake, Claire Donald, Ashwini Datt, and Bai Xiaoyan

Information and Communication Technology (ICT) Development in Indian Schools: A Case Study ................................................................................................................................. 602
Swarandeep Singh, Esha Goel, Aman Goyal, Anupriya Chauhan, and Manu Sheel Gupta

Self-Regulated Learning in Responsive Open Learning Environments Workshop
Supporting Self-Regulated Learning within a Personal Learning Environment: The OpenLearn Case Study ................................................................................................................................. 607
Alexander Mikroyannidis

Learning Analytics for Communities of Lifelong Learners: A Forum Case ................................................................................................. 609
Zinayda Petrushyna, Milos Kravcik, and Ralf Klamma

Competence Development of Pre-Service Teachers with the Support of LeContract ................................................................................................. 611
Terje Völjatago, Kairit Tammets, and Hans Pöldoja

Supporting Self-Regulated Learning in Technical Domains with Repositories of Learning Objects and Recommender Systems ................................................................................................. 613
Daniel Rodríguez-Cerezo, Mercedes Gómez-Albarrán, and José-Luis Sierra

Integrating Collaborative Learning Into the Self-regulated Learning Process Model ................................................................................................. 615
Marcel Berthold, Alexander Nussbaumer, and Dietrich Albert

Social Network and Augmented/Virtual Reality Technologies Enhanced Learning Workshop
A Study on Trends of Virtual Reality from Year 2001 to 2010 in Taiwan ................................................................................................. 617
Kuei-Shu Hsu and Yueh-Min Huang

Adapting and Sharing Open Educational Resources: A Social Networking Approach ................................................................................................. 619
Alexander Mikroyannidis, Alexandra Okada, and Teresa Connolly

Assessment of Implementing a Digital Game-based Learning System over Facebook ................................................................................................. 621
Hong-Ren Chen, Jan-Pan Hwang, Ting-Ting Wu, Yueh-Min Huang, and Hui-Ting Hsueh
OpenSim Virtual Worlds as a Platform for Enhanced Learning Concepts ......................................................... 623
  Walter Ridgewell, Vive Kumar, Oscar Lin, and Kinshuk

Traces of Writing Competency - Surfing the Classroom, Social, and Virtual Worlds .............................................. 625
  Clayton Clemens, Maiga Chang, Dunwei Wen, Vive Kumar, Oscar Lin, and Kinshuk

Exploring the Future of Technology Enhanced Education: Visions, Practical Implementations and Impact of Localities (DULP@ICALT2011) Workshop

A Motivation for “Ubuntu” to Enhance e-Learning Social Network Services in South Africa ............................................... 627
  M. Halse and B.J. Malinsson

As We May Remix: REFF Book and the Augmented Press Experience .................................................................. 629
  Luca Simeone, Salvatore Iaconesi, and Federico Monaco

Foreseeing the Transformative Role of IT in Lectures ......................................................................................... 634
  Telmo Zarraonandia, Paloma Diaz, and Ignacio Aedo

Improving Role Taking in CSCL Script Using SNA and Semantic Web ................................................................. 636
  Nicola Capuano, Giuseppe Laria, Elvis Mazzoni, Anna Pierri, and Giuseppina Rita Mangione

InfoCoral: Open-Source Hardware for Low-Cost, High-Density Concurrent Simple Response Ubiquitous Systems ........................................................................................................ 638
  Imran A. Zualkernan

Monitoring Affective and Motivational Aspects of Learning Experience with the Subtle Stone ................................ 640
  ChanMin Kim and Madeline Balaam

Supporting Cooperative Learning in the Classroom: Exploiting Large Multi-Touch Displays ................................... 642
  Alessandra Agostini and Elisa Di Biase

Toward a General Model of the Learning Experience ......................................................................................... 644
  Carlo Giovannella and Fabrizia Moggio

Doctoral Consortium

A Study on Using Podcast to Facilitate English Listening Comprehension .............................................................. 646
  Mei-Jen Audrey Shih and Jie-Chi Yang

GAMBLE: Towards Ensuring Quality of Education Using Goal Driven Model Based Learning Environments: Automating a Family of eLearning Systems by Integrating Lean and Software Product Lines ................................................................................. 648
  Sridhar Chimalakonda

Analysing the Effectiveness of Learning Objects and Designs ................................................................................ 650
  Alicia M. Campos

Tailored Training in Mobility: Interactive Video and Device-Specific Usage Patterns .............................................. 652
  Santiago Dominguez-Noriega, J. Enrique Agudo, and Hector Sanchez
Tutorial
How to Do Multimodal Detection of Affective States? ..................................................654
