2010 IEEE 7th International Conference on e-Business Engineering

(ICEBE 2010)

Shanghai, China
10-12 November 2010

Editors:

Francis Lau
Nazaraf Shah

Jen-Yao Chung

IEEE Catalog Number: CFP10EBE-PRT
ISBN: 978-1-4244-8386-0
Session D1: Data and Knowledge Management for E-Business - I

Toward a Language Modeling Approach for Consumer Review Spam Detection
C.L. Lai, K.Q. Xu, Raymond Y.K. Lau, Y. Li, and L. Jing

Towards Fair Reputation Propagation from a Composite Service to Its Component Services
Shiting Wen, Qing Li, Lihua Yue, An Liu, and Chaogang Tang

Mining Commercial Networks from Online Financial News
Yunqing Xia, Nianxing Ji, Weifeng Su, and Yi Liu

Mining Product Features from Online Reviews
Weishu Hu, Zhiguo Gong, and Jingzhi Guo

Session D2: Data and Knowledge Management for E-Business - II

A Domain Ontology Approach in the ETL Process of Data Warehousing
Lihong Jiang, Hongming Cai, and Boyi Xu

Expert System for Data Identification in Auction System along with Market Trends Analysis
Radoslav Fasuga, Tomas Drabek, Galina Toporkova, and Libor Holub

Yotta: A Knowledge Map Centric E-Learning System
Qinghua Zheng, Yanan Qian, and Jun Liu

A Support Vector Machine Based Method for Credit Risk Assessment
Wei Xu, Shenghu Zhou, Dongmei Duan, and Yanhui Chen

Session D3: Data and Knowledge Management for E-Business - III

A Bottom-Up Approach to Build XML Business Document Standards
Philipp Liegl, Christian Huemer, and Christian Pichler

Integrated Modeling of Performance Monitoring with Business Artifacts
Rong Liu, Anil Nigam, Jun-Jang Jeng, Chian-Rou Shieh, and Frederick Y. Wu

Data Warehouse Decentralization Strategy
Tekaya Karima, Abdellaziz Abdelaatif, and Ounalli Habib

Ranking Difficulty of Knowledge Units Based on Learning Dependency
Jun Liu, Sha Sha, Qinghua Zheng, and Ling Chen

Session I: Integration and Collaboration

A Systematic Analysis of Cluster Supply Chain Alliance and Its Service Infrastructures
Xiao Xue, Biqing Huang, and Tao Wang

Business Document Integration for SMEs in Supply Chains
Razieh-Sadat Shamsedin-Tekieh, Fethi Rabbi, and Hamid Reza Motahari-Nezhad

A Framework for Dynamic and Reliable E-Procurement
David J. Lutz, Yongzheng Liang, and Sascha Neinert
Integrate C&P Operation Enabling Systems Using Reference Semantic Model ......................................................... 105
  Zhi Yuan Zhou, Qiang Wang, and Keith Wells

Session C: Cloud Computing

Workload Evaluation and Analysis on Virtual Systems ...................................................................................................... 111
  Shiang-Jiun Chen, Po-Huei Liang, and Jiann-Min Yang
Prioritizing Service Requests on Cloud with Multi-tenancy ................................................................................................. 117
  Wei-Tek Tsai, Qihong Shao, and Jay Elston
A Cloud Provisioning System for Deploying Complex Application Services ............................................................................. 125
  Trieu C. Chieu, Ajay Mohindra, Alexei A. Karve, and Alla Segal
  Pingpeng Yuan, Chong Ding, Long Cheng, Shengli Li, Hai Jin, and Wenzhi Cao

Session B: Business Analytics and Optimization

Adoption of E-Commerce Online Shopping in Malaysia .................................................................................................. 140
  Lee Heng Wei, Mohd Azam Osman, Nasrihah Zakaria, and Tan Bo
A Fuzzy Approach for Transactional Risk Management in E-Business Collaborations .............................................................. 144
  Omar Hussain
Modeling Business Applications for Business Architecture .................................................................................................. 152
  Joseph Kramer, Ignacio Terrizzano, and Jorge Sanz
Trees Weighting Random Forest Method for Classifying High-Dimensional Noisy Data .............................................................. 160
  Hong Bo Li, Wei Wang, Hong Wei Ding, and Jin Dong

Session S: Security, Privacy, and Open Source

A Practical Management Framework for Commercial Software Development with Open Sources .................................................. 164
  Sooho Chang, Jaesin Lee, and Woobok Yi
Mobile-Aware Anonymous Peer Selecting Algorithm for Enhancing Privacy and Connectivity in Location-Based Service .................................................................................. 172
  Jian Xu, Z.P. Jin, Ming Xu, and Ning Zheng
Security Alert Management System for Internet Data Center Based on ISO/IEC 27001 Ontology ................................................... 178
  Terry M.F. Tsang, Thomas M.W. Yeung, Dickson K.W. Chiu, Haiyang Hu, Yi Zhuang, and Hua Hu
Study on Open APIs of E-Commerce Platforms and Design of a Third Party Application for Taobao ............................................... 184
  Chunhui Piao and Xufang Han
Session M: Mobile and Pervasive Commerce

Research on RFID-Based Mobile Logistics Monitoring Solution and Anti-collision Algorithm for Grouped RFID Tags Identification ................................................................. 190

Chunhui Piao, Zhenjiang Fan, and Xufang Han

A k-Layer Self-Organizing Structure for Product Management in Stock-Based Networks ............................................................................................................................. 198

A. Carneiro Viana, N. Mitton, L. Schmidt, and M. Vecchio

Session E1: Software Engineering for E-Business - I

The Bundling of Multiple Requirements for Maximizing the Utilization of Service Resources ......................................................................................................................... 206

Zhongjie Wang, Xiaofei Xu, Dianhui Chu, and Xianzhi Wang

Web Services Recommendation Based on User's Behavior .......................................................... 214

Nguyen Ngoc Chan, Walid Gaaloul, and Samir Tata

A Language-Based Framework for Analyzing Service Representation Models and Service Composition Approaches ................................................................. 222

Yin Wang, Hamid Reza Motahari-Nezhad, and Sharad Singhal

A Software Product Line Approach for E-Commerce Systems .................................................. 230

Miguel A. Laguna and Carmen Hernández

Session E2: Software Engineering for E-Business - II

A Scalable Queuing Service Based on an In-Memory Data Grid .................................................. 236

Yuan Wang, Han Chen, Bin Wang, Jing Min Xu, and Hui Lei

A Computational Trust Model in C2C E-Commerce Environment ............................................. 244

Jun Li, Xiaolong Zheng, Yafeng Wu, and Deren Chen

Component Monitoring of OSGi-Based Software ........................................................................ 250

Tao Wang, Xiaowei Zhou, Jun Wei, Wenbo Zhang, and Xin Zhu

Session V1: Service Engineering - I

A Structure-Wise Service Selection Approach for Efficient Service Composition ................................................................. 256

Jun Jin, Yuanda Cao, Dongfeng Zhu, Xing Pu, and Minghua Yang

An Adaptive Replanning Mechanism for Dependable Service-Based Systems .......................... 262

Jun Na, Guo-hong Li, Bin Zhang, Li Zhang, and Zhi-liang Zhu

Building Flexible SOA-Based Enterprise Process Using Decision Services .......................... 270

Xiao Ping Wang, San Yuan Zhou, and Yu Fa An

An Effective Framework for Monitoring Service-Based Mobile Applications .......................... 278

Du Wan Cheun, Hyun Min Lee, and Soo Dong Kim
Session V2: Service Engineering - II

Evaluating Open Source Enterprise Service Bus ................................................................. 284
F.J. Garcia-Jiménez, M.A. Martínez-Carreras, and A.F. Gómez-Skarmeta

Balanced MVC Architecture for Developing Service-Based Mobile Applications ................................................................. 292
Hyun Jung La and Soo Dong Kim

Software Approaches to Assuring High Scalability in Cloud Computing ................................................................. 300
Jae Yoo Lee and Soo Dong Kim

Towards Network Application Service Interface ................................................................. 307
Xi Chen, Huaxin Zeng, and Tao Wu

An Approach in Security and Privacy for Service Governance Framework ................................................................. 313
Weider D. Yu, Karthika Srinivasan, and Sreedevi Pericherla

Session G: Green Supply Chain, Business, and RFID

A Coordinated P2P Message Delivery Mechanism in Local Association Networks for the Internet of Things ................................................................. 319
Zongwei Luo, Tianle Zhang, Shuihua Han, and Junyuan Liang

The Internet of Things as an Enabler to Supply Chain Innovation ................................................................. 326
Miao He, Changrui Ren, Qinhua Wang, Bing Shao, and Jin Dong

Session X1: Industry Experience and Applications - I

Smart Location-Aware Service Platform for Business Operation ................................................................. 332
Ying Zhou, Jingqi Wei, Xin Xiong, Dancheng Li, and Zhiliang Zhu

Simulation-Based Evaluation of Resource Allocation Strategies for Archival Management Workflow: The Macau Case ................................................................. 338
Veng-Ian Chan and Yain-Whar Si

Framework for SaaS Management Platform ................................................................. 345
Kai Tang, Jian Ming Zhang, and Zhong Bo Jiang

Session X2: Industry Experience and Applications - II

A New Method for Load Identification of Nonintrusive Energy Management System in Smart Home ................................................................. 351
Hsueh-Hsien Chang and Ching-Lung Lin

E-Eagerness Leverages on the Breakthrough of E-Commerce in the Public Sector: Case Study of Khuzestan Water & Power Authority of Iran 1 ................................................................. 358
Laleh Kasraian and Alireza Faed

An Internet-Mobile Platform for NGN/IMS Applications ................................................................. 364
Hsin-Yi Lee, Rebecca Chen, and Yi-Bing Lin
First International Workshop on Engineering a Sustainable City (EASC 2010)

Measuring the Sustainability Performance of Software Projects .................................................................................. 369  
Felipe Albertao, Jing Xiao, Chunhua Tian, Yu Lu, Kun Qiu Zhang, and Cheng Liu

Discovery of Periodic Patterns in Large Water Distribution Network ........................................................................ 374
Hongmei Xiao, Xiuli Ma, Xiaohui Lin, Shiwei Tang, and Chunhua Tian

A GEO-Related IOT Applications Platform Based on Google Map ............................................................................. 380
Shi Dayu, Xu Huaiyu, Su Ruidan, and You Zhiqiang

Modelling and Simulation for Safe Following Distance Based on Vehicle Braking Process ................................................. 385
Guangdong Feng, Wuhong Wang, Jianshuai Feng, Huachun Tan, and Feng Li

Vehicle Speed Measurement for Accident Scene Investigation ..................................................................................... 389
Huachun Tan, Jie Zhang, Jianshuai Feng, and Feng Li

Towards Building an Integrated Information Platform for Eco-city ............................................................................. 393
Xiaoxun Zhang, Ethan Zhang, Bin Song, and Furu Wei

First International Workshop on Engineering Low-Carbon Business (ELCB 2010)

Supply Chain Carbon Impact Analysis: A SCOR Based Input-Output Model ................................................................. 399
Yongda Wei, Zongwei Luo, and Edward C. Wong

Coordination in a Two-Level Green Supply Chain with Environment-Conscious and Price-Sensitive Customers: A Nash Equilibrium View ............................................................................................................. 405
Daqiang Chen, Ertian Hua, and Yulian Fei

A Model for Energy-Efficient Household Maintenance through Behavioral Analysis of Electrical Appliances ................. 409
Ciprian Pungila

A Profile Based Energy Management System for Domestic Electrical Appliances ............................................................... 415
Kuo-Ming Chao, Nazaraf Shah, Raymond Farmer, Adriana Matei, Ding-Yuan Chen, Heike Schuster-James, and Richard Tedd

Fourth International Workshop on E-Marketplace Integration and Interoperability (EM2I 2010)

Modeling an E-Government Portal of Tourism Industry Using Two Level Factorial Design .................................................. 421
Foad Marzoughi, Mohammad Mehdi Farhangian, Ehsan Ahmadizadeh, Farzin Charejoo, and Erfan Aghasian

E-Marketing Strategy for Businesses ............................................................................................................................. 428
Adam Grywaczewski, Rahat Iqbal, Nazaraf Shah, and Anne James
Design a Telecare E-Marketplace System for Elder People in Elderly Center .................................................435

Ching-Lung Lin, Hsueh-Hsien Chang, Ching-Feng Lin, Pei-Yung Yao, Yi-Ru Cai, and Shi-Hao Ye

Integrating Topic-centric Thread-Based Organized Chat into Web-Based Enterprise Instant Messengers .................................................................442

Haifeng Shen

Automatic Concept Mapping between Multilingual Dictionaries and WordNet to Derive Vocabulary for E-Marketplace .................................................448

Guangyi Xiao, Jingzhi Guo, and Zhiguo Gong

Joint Second International Workshop on Cloud Services - Platform Accelerating E-Business (IWCS 2010) and Workshop on Applications and Services on Cloud (ASOC 2010)

Design Aspects of Software as a Service to Enable E-Business through Cloud Platform .................................................................456

Wei Sun, Changjie Guo, Zhongbo Jiang, Xin Zhang, Ning Duan, Ying Huang, and Yue Da Xiong

Cloud Computing Business Model Based on Value Net Theory .................................................................462

Zhiyuan Fang, Junbin Chen, Mingzhi Yi, Zhidong Wu, and Hengjuan Qian

Management as a Service: An Empirical Case Study in the Internetware Cloud .................................................................470

Xing Chen, Xuanzhe Liu, Fuzhi Fang, Xiaodong Zhang, and Gang Huang

Cloud Service Portal for Mobile Device Management .................................................................474

Leslie Liu, Randy Moulic, and Dennis Shea

Research on Tenant Placement Based on Business Relations .................................................................479

Kai Tang, Zhong Bo Jiang, Wei Sun, Xin Zhang, and Wei Shan Dong

Two-Tier Multi-tenancy Scaling and Load Balancing .................................................................484

Wei-Tek Tsai, Xin Sun, Qihong Shao, and Guanqiu Qi

Analysis on Cloud-Based Security Vulnerability Assessment .................................................................490

Huan-Chung Li, Po-Huei Liang, Jiann-Min Yang, and Shiang-Jiun Chen

Sixth International Workshop on Service-Oriented Applications, Integration, and Collaboration (SOAIC 2010)

Value Network Based Service Choreography Design and Evolution .................................................................495

Zhongjie Wang, Dianhui Chu, and Xiaofei Xu

Research on Reverse Logistics Distribution Centre Location Problem in E-Business .................................................................501

Liu Lan, Xue Huacheng, and Wang Xia

Moral System and Evaluation Model of Network Marketing .................................................................505

Tang Ping, Yang Yingmei, and Wang Jianhui

Application of Web Data Mining Based on the Neural Network Algorithms in E-Commerce .................................................................509

Kun Lin
Analysis Integration of Internet of Things from the Shanghai Lianhua Logistics ................................................................. 513
   Moyang Xu
Research on Practical Teaching for Electronic Commerce in Higher Vocational Education .................................................. 518
   Gao Song

Fourth International Workshop on Service-Oriented Knowledge Management and Business Intelligence (SOKMBI 2010)

A Joint of Bidding and Ranking Approach for Resource Sharing among Multiple Websites .............................................. 523
   Hua Hu, Zhongjin Li, and Haiyang Hu
Computational Customer Behavior Modeling for Knowledge Management with an Automatic Categorization Using Retail Service’s Datasets .......................................................... 528
   Tsukasa Ishigaki, Takeshi Takenaka, and Yoichi Motomura

Author Index ...................................................................................................................................................... 534
