2010 Seventh International Conference on the Quality of Information and Communications Technology

QUATIC 2010

Table of Contents

Message from the Organizing Chairs ................................................................. xi
Message from the Program Chairs ................................................................. xii
Program Committee ......................................................................................... xiv
Steering Committee ......................................................................................... xvi
Additional Reviewers ......................................................................................... xvii

Main Session

Experiments with Adding to the Experience that Can be Acquired from Software Courses ........................................................................................................ 1
Robert Dupuis, Roger Champagne, and Alain April Normand Séguin
Conveying Conceptions of Quality through Instruction ..................................... 7
Arnold Pears
Supporting the Definition of Software Processes at Consulting Organizations via Software Process Lines ................................................................. 15
Ahilton Barreto, Elaine Duarte, Ana Regina Rocha, and Leonardo Marta
Applying Grounded Theory to Understand Software Process Improvement Implementation ......................................................................................... 25
Mariano Angel Montoni and Ana Regina Rocha
Evaluating the Effect of Agile Methods on Software Defect Data and Defect Reporting Practices - A Case Study ................................................................. 35
Kirs Kirkkonen
Empirical Studies on Quality in Agile Practices: A Systematic Literature Review ........................................................................................................ 44
Panagiotis Sfetsos and Ioannis Stameloas
Software Safety Standards for the Basis of Certification in the Nuclear Domain ........................................................................................................ 54
Hammi Harju, Juksi Lahlilann, Jukka Ranta, Risto Nevalainen, and Mika Johansson
The Evolving Picture of Standardisation and Certification for Process Assessment ........................................................................................................ 63
Terence P. Rout
Towards Specification Patterns for Global Software Development Projects - Experiences from the Industry ........................................................................................................ 73
Frank Salger, Jochen Englert, and Gregor Engels
Thematic Track: Quality in Requirements Engineering

Quality in Requirements Engineering .................................................. 189
  Ana Moreira

Experiences on the Use of Business Models for Identifying Quality Requirements
  for Information systems .............................................................. 192
  Rosaria Bittencourt, Renata Araújo, Claudia Cappelli, Juliana Ferreira, and Priscila Engiel

Collecting Quality Requirements Using Quality Models and Goals .................................................. 198
  Reinhold Plösch, Alois Mayr, and Christian Körner

Increasing Quality in Scenario Modelling with Model-Driven Development ................................................. 204
  João Pedro Santos, Ana Moreira, João Araújo, and Miguel Goulão

Survey on System Behavior Specification for Extending ProjectIT-RSL .................................................. 210
  David de Almeida Ferreira and Alberto Manuel Rodrigues da Silva

Applying a UML Profile in the Requirements Modeling to Multi-Agents Systems .................................................. 216
  Gilleanes Thorwald Araújo Guedes and Rosa Maria Vicari

Leveraging Goal Models and Performance Indicators to Assess Health Care Information Systems ...................... 222
  Craig Kuziemsky, Xia Liu, and Liam Peyton

Relevant Skills to Requirement Analysts According to the Literature and the Project Managers' Perspective ...................... 228
  Luciano Vale, Adriano Bessa Albuquerque, and Patricia Besorra

Thematic Track: Quality in Model Driven Engineering

Quality in Model Driven Engineering .................................................. 233
  Parastoo Mohagheghi

Increasing Software Quality through Design Reuse .................................................. 236
  Fernando Barros

A Tool for Automatic Defect Detection in Models Used in Model-Driven Engineering .................................................. 242
  Beatriz Marin, Giovanni Giachetti, Oscar Pastor, and Tanja E.J. Vos

A Model-Driven Framework for Process-Centric Business Continuity Management .................................................. 248
  Ulrich Winkler, Mathias Fritzsche, Wasif Gilani, and Alan Marshall

Seamlessness as a Desirable Aspect of Quality for MDE: The Contribution of Object-Relational Database Structures ...................... 253
  Patricia Roberts

Thematic Track: Quality in ICT Verification and Validation

Quality in ICT Verification and Validation .................................................. 259
  Antonia Bertolino

Synthesis-Based Loose Programming .................................................. 262
  Anna-Lena Lamprecht, Stefan Naujokat, Tiziana Margaria, and Bernhard Steffen

Test Coverage Analysis of UML Activity Diagrams for Interactive Systems .................................................. 268
  Ricardo D.F. Ferreira, João P. Faria, and Ana C.R. Paiva

A Formal Passive Testing Approach for Checking Real Time Constraints .................................................. 274
  Fayçal Bessayah and Ana Cavalli

Thematic Track: Quality in Agile Methods

Quality in Agile Methods ................................................................. 382
Panagiotis Sfetsos

Procedures and Conditions that Influence on the Efficiency of Some Agile Practices .................................................. 385
Henrique Farias Landim, Adriano Bessa Albuquerque, and Thiago Christian Macedo

Classification and Comparison of Agile Methods .................................................. 391
Joao M. Fernandes and Mauro Almeida

Component Recycling for Agile Methods .................................................. 397
George Kakarontzas and Ioannis Stamelos

Test-Driven Development - Still a Promising Approach? ......................... 403
Sami Kollanus

Thematic Track: ICT Process Improvement and Assessment

ICT Process Improvement and Assessment ................................................. 409
Karol Frihaimf

MPS.BR: A Tale of Software Process Improvement and Performance Results in the Brazilian Software Industry ........................................... 412
Gleison Santos, Marcos Kalinowski, Ana Regina Rocha, Guilherme Horta Travassos, Kival Chaves Weber, and Josel Antonio Antonioni

Organizational Factors Shaping Software Process Improvement in Small-Medium Sized Software Teams: A Multi-Case Analysis .................................. 418
Ian Allison

A Gap Analysis Methodology for the Team Software Process ...................... 424
Luis Manuel Gonzalez Amoral and Joao Pascoal Faria

A Method for Tridimensional Process Assessment Using Modelling Theory ........................................... 430
Clenio F. Salviano, Marcia Regina Martins Martinez, Edgar Lopes Banhesse, Angela Enelize, Alessandra Zoucas, and Marcello Thity

Process Assessment In Very Small Entities - An ISO/IEC 29110 Based Method ........................................... 436
Timo Varkoi

Analyzing the Similarity among Software Projects to Improve Software Project Monitoring Processes ........................................... 441
Andrea Oliveira Soares Barreto and Ana Regina Rocha

An Approach to Implement Software Process Improvement in Small and Mid Sized Organizations ........................................... 447
Giselo Villas Boas, Ana Regina Cavalcanti da Rocha, and Marcio Pecegueiro do Amaral

PIT-ProcessM: A Software Process Improvement Meta-Model ...................... 453
Paula Ventura Martins and Alberto Rodrigues da Silva

Thematic Track: Standardization and Certification in ICT

Standardization and Certification in ICT ............................................... 459
Knut Blind

An Approach to Ambiguity Analysis in Safety-Related Standards .................. 461
Isabella Biscoglio, Alessandro Coco, Mario Fusani, Stefania Gnesi, and Gianluca Trentanni
Establishing a Well-Founded Conceptualization about Software Measurement in High Maturity Levels ................................................................. 467

Monalessa Perini Barcellos, Ricardo de Almeida Falbo, and Ana Regina Rocha

Thematic Track: Quality in Web Engineering

Quality in Web Engineering ............................................................................................................................. 473

Coral Calero

A Metrics-Based Approach to Technical Documentation Quality ................................................................. 476

Anna Wingkvist, Morgan Ericsson, Rüdiger Lincke, and Welf Löwe

Gathering Information about Web 2.0 Applications for Usability Engineering ............................................. 482

Ludger Martin

Adaptive Quality Control of Web Resources .................................................................................................. 487

Nuno Escudeiro and Paula Escudeiro

Websites Quality: Does It Depend on the Application Domain? ................................................................. 493

Américo Rio and Fernando Brito e Abreu

Improving the Design of Existing Web Applications .................................................................................... 499

Mario Luca Bernardi, Giuseppe Antonio Di Lucca, and Damiano Distante

Automatic Selection of RIA Software Architectures Using Quality Models ............................................... 505

Santiago Meliá, Jesús Pardillo, and Cristina Cachero

Author Index .................................................................................................................................................. 511
