2011 Second International Conference on Mechanic Automation and Control Engineering

(MACE 2011)

Inner Mongolia, China
15 – 17 July 2011

Pages 1577-2366
Yanwen Bai, Xiufang Bian, Lei Yang, Xubo Qin, Kai Guo

Structure design and fabrication of a bistable microvalve................................................................. 1635
Bucong Yang, Boxiong Wang, Werner Karl Schomburg

Study of Blend Films from Methacryloyl Guar Gum and Sodium Alginate........................................ 1639
Wenfa Xiao, Litao Dong

Study of Buck-Boost Photovoltaic Inverter Based on Discrete Sliding Mode Control Strategy.................. 1643
Zhou Yue

Study of High-power and High-energy Laser Fiber Coupler................................................................. 1648
Zhihong Liu, Fengyan Dai, Jianshi Cao

Study of Network Planning, Optimization for WLAN.............................................................................. 1653
Xuejun Meng, Huanmei Guan

Study on Bluetooth Technology and its access to BACnet..................................................................... 1657
Wei-zhong Lu, Wen-liang Liu, Liang Ding

Study on Dynamic Optimum Design of Tower Crane Structure.............................................................. 1660
Weihua Yang, Yourong Li, Zifan Fang, Kengde He

Study on Electromagnetic Detection Transmitter System......................................................................... 1664
Yanhong Li, Guoqiang Liu, Shiqiang Li, Hui Xia

Study on Experiment of Vertical Impact Damping System........................................................................ 1668
Jiansheng Zhang, Xi Zhan

Study on Friction Compensation for Gun Control System of Tank based on ADRC..................................... 1672
Dongou Zhu, Xiaobo Qiu, Kai Wang, Yongqiang Hou

Study on Grinding Force of Grind-Hardening Based on Orthogonal Experimental Method.................... 1676
Judong Liu, Jiezheng Zhuang, Jinkui Xiong

Study on oxidation and dissolution of tungsten carbide in water............................................................ 1679
Xiaoming Jia, Xiaoxin Chen, Xiuling Zhang

Study on remote PLC experiment system based on web........................................................................... 1683
Hui Li, Jing Zhang

Study on Simulation of Extended-circular Flights of Rotary Dryers......................................................... 1687
Zhigang Huang, Hui Zhu, Ling Yan

Study on the Application of Fuzzy-PID Control to Precision Seeding Technology of Wheat.................... 1690
Jie Li, Pengfei Zhu, Zhen Wang, Min Liu, Xiaoling Ding

Study on the Motion Control System of a Novel 3-DOF PKM Module Based on Turbo PMAC.................. 1694
Jiaxing Zhuang, Chuang Chen, Hui Wang

Study on the new joining technology of aluminum alloy / Q235 steel dissimilar metal by the longitudinal electromagnetic hybrid TIG welding-brazing method................................................. 1698
J. Luo, H.B. Leng, J.F. Xiong, X.M. Wang, D.J. Liu, Y.J. Long

Study on the Position of Space Manipulator's Locked Points.................................................................... 1702
Junxiu Liu, Zongquan Deng, Honghao Yue

Study on wettability and corrosivity of a new no-clean flux for lead-free solder paste in electronic packaging technology.............................................................. 1706
Dongxia Xu, Xusheng Li, Caiqin Wang, Bin Xu

Survey of Signal Processing Methods and Research on Vibrating Screen Fault Diagnosis....................... 1709
Chusheng Liu, Liping Peng, Feng Li

Teaching of Engineering Drawing in the 21st Century............................................................................... 1713
Zheng Jian

Temperature and Thermal Stress Analytical Models of Metal Materials in Heat Treating......................... 1716
Hengliang Zhang, Danmei Xie, Yangheng Xiang, Zongjie Zhang
