Foreword vii
Preface ix
Nanomedicine and Brain Diseases: The Way Forward xi

Section 1: General Aspects

1. Safety of Carbon Nanotubes for Neuronal Tissue
   Giuseppe Bardi 3

2. Nanoparticle-Based Immunoassays and their Applications in Nervous System Biomarker Detection
   Chunping Jia, Qinghui Jin and Jianlong Zhao 17

3. Electrical Stimulation of Brain Tissue with Carbon Nanofiber Microbrush Arrays
   Edward de Asis, Russell J. Andrews and Jun Li 38

4. Nanoelectrode Arrays for Monitoring and Modulating Nervous System Electrical and Chemical Activity
   Russell J. Andrews and Jun Li 60

5. Probing Protein Nanoassemblies in Neurodegenerative Disease
   Min S. Wang and Michael R. Sierks 75

6. Nanoparticle-assisted Laser Desorption/ionization (nano-PALDI)-based Imaging Mass Spectrometry (IMS) and its Application to Brain Sciences
   Saira Hameed, Yuki Sugiura, Yoshishige Kimura, Kalmesh Kumar Shrivas and Mitsutoshi Setou 97

7. Nanomaterials and Ion Channels: Observed Effects and Possible Mechanisms
   Lorin M. Jakubek and Robert H. Hurt 119
8. Biomolecular Engineering for the Regulation of Alpha-synuclein Nanostructure—toward the Development of Alpha-synuclein Targeting Nanomedicine
Natsuki Kobayashi, Jihoon Kim and Koji Sode

9. Nanomaterials for Stem Cell Imaging in the Central Nervous System
Aniruddh Solanki, Shreyas Shah, Michael H. Koucky and Ki-Bum Lee

10. Carbon Nanotubes and Neuronal Performance
Alessandra Fabbro, Francesca Maria Toma, Giada Cellot, Maurizio Prato and Laura Ballerini

Section 2: Therapeutics

11. Nanotechnologies for Treatment of Stroke and Spinal Cord Injury
Šárka Kubinová and Eva Syková

12. Delivering siRNA Using Nanoparticles to the Central Nervous System
S. Neslihan Alpay, Bulent Ozpolat, Hee-Dong Han, Gabriel Lopez-Berestein, Anil K. Sood and Hui-Lin Pan

13. Targeting Drug Delivery to the Brain via Transferrin Anchored Nanoparticles
Jiang Chang and Didier Betbeder

14. Therapeutic-loaded Lipid Nanostructures and Brain Diseases
Maria Luisa Bondì and Emanuela Fabiola Craparo

15. Nanocarriers for the Treatment of Brain Tumours
Pauline Resnier, Anne Clavreul and Catherine Passirani

16. Electrospinning of Nanofibres for Repair of the Injured Peripheral Nervous System
Dorothee Hodde, José Luis Gerardo-Nava, Ronald Deumens, Jörg Mey and Gary Anthony Brook

17. Bridging the Gap for Regeneration after CNS Injury by Nanofiber Scaffolds: use of SAPNS for Traumatic Brain and Spinal Cord Injury
Jiasong Guo, Gilberto K.K. Leung and Wutian Wu
18. Nanoparticle-iron Chelator Conjugates as Multifunctional Disease-modifying Drugs for Prevention and Treatment of Alzheimer's Disease
   Gang Liu, Ping Men, George Perry and Mark A. Smith

19. The Pharmacological and Toxicological Profiles of Carbon Nanotubes as Drug Carriers Toward Central Nervous System
   Yingge Zhang and Changxiao Liu

Index
