Advanced Manufacturing Technology

PART 3

Selected papers from the 2011 International Conference on Advanced Design and Manufacturing Engineering (ADME 2011)
16-18 September, 2011, Guangzhou, China

Edited by

Jian Gao
Part 3

High-Speed/Precision Machining and Inspection Technology

A Novel Measurement System to Evaluate the Six Geometric Errors of Rotary Table
K.I. Lee, A.G. Nanda Kumar and S.H. Yang ................................................................. 1691

Application of MECHATROLINK-II Fieldbus in Multi-Axis Embedded CNC System
W.Q. Gao, C.T. Qing, Z.H. Hu and Z.Y. Huang ......................................................... 1695

Study on the Spindle Error Test and Analysis System of Numerical Control Machine Tools
Y.M. Zhang, Q.W. Liu, S. Zhong and J.L. Han ......................................................... 1702

Parameter Determination of Multiple Probes Scanning Method for Profile Measurement
X. Chen, G.Q. Ding, L.H. Lei and Y. Li ................................................................. 1707

Strength and Fatigue Analyses on Rotor in High Speed MU Traction Motor under Different Operating States
Y.M. Jiang, Y.H. Zhang, Y.F. He, H.Y. Xiang and J.C. Cao ...................................... 1713

Study on Dynamic Accuracy of CNC in Aviation Part
L. Du, W. Wang, Z.Y. Song and J.X. Ding ............................................................... 1717

The Effects of Curvature Radius on Cutting Force and Stability during End Milling
W.Z. Liu, Q. Liu, G. Gao and X. Yan ................................................................. 1721

Wire Electrical Discharge Machining (Wire EDM) Cutting of Flexures for a Rotary Flexural Bearing Fabrication
H.P. Luo, Z.X. Zhou, Y.J. Zhang and Z.N. Guo ......................................................... 1727

Tool Path Optimization Based on the Constrain of Radial Cutting Depth in High Speed Milling
K.Z. Li and S.X. Wu ................................................................. 1734

Study on Material Removal Mechanism of Silicon Nitride during ELID
Ultraprecision Grinding
W.D. Jin ................................................................. 1740

The Optimized Design of Strains Transducer Elastic Component with Double Cantilever Beam
Y.F. Yan ................................................................. 1746

Study on High-Precision Computer-Controlled Aspheric Surface Processing Techniques
C. Zhang, P. Wang and Y.L. Chen ................................................................. 1750

Monitoring of Tool Wear in Rotary Ultrasonic Machining of Advanced Ceramics
L.P. Liu, B. Lin and F.Z. Fang ................................................................. 1754

Thermal Analysis and Optimization Design on Spindle Bearing of GSKC200A CNC Lathe
L.P. Liu and G.H. Deng ................................................................. 1760

Mechanical Design of New Type Ceramic Polishing Machine
W. Liu, C. Yan, S.W. Zheng and H.F. Tong ................................................................. 1764

New Digital Differential Analyzer Linear Interpolation Program and Error Analysis
X.Y. Fan, Y.H. Guo, S.C. Li and X.P. Su ................................................................. 1769

Study on Machining Deformation Errors in Spiral Finish Milling of Thin-Walled Blades

Analysis the Dynamic Strain of AM60 Magnesium Alloy by Means of a Single Laser Shock Processing

Surface Channel Hot-Carrier Effect on CLC n-TFTs
M.C. Wang and H.C. Yang

Single Femtosecond Laser Pulse Irradiation of Silicon on Different Crystallographic Facet Planes
L.T. Qi

Study of Effect on Tensile Stress Test from Distortion of Fibre Laser Welded Ti6Al4V Using FEA
Y. Fan, P. Shipway, G. Tansley and Z. Chen

Influence of Light Leakage from Q-Switched Laser on Laser-Induced Shock Wave
Y.X. Ye, Z. Wu and H.B. Guan

Effect of Laser Surface Modification and Tempering Process on Microstructure and Hardness Profiles of Roll Materials
G.Z. Huang, Z.H. Li and J.Y. Tang

Impact of Ni-2 Laser Cladding Coating on the Repeated Impact of the Dynamic Response
L.L. Shen, S.H. Shi, G.Y. Fu and L. Liu

High Resolution ITO Lithography Using Excimer Laser for Flat-Panel Display Fabrication
X.X. Wang, J.Y. Zhou, L. Lei, Q.H. Lin, Y. Shi and L.H. Mei

Study on a New Way of Aligning the Focal Plane for the Laser projection Image System

Instability Effect on CLC nTFTs with Positive-Bias Temperature Stress
M.C. Wang and H.C. Yang

Probing Drain Current with Vertical and Horizontal Electrical Fields under Temperature Stress on CLC TFTs
M.C. Wang and H.C. Yang

Surface-Channel Drain-Avalanche Hot-Carrier Effect under Temperature Variation on CLC TFTs
M.C. Wang and H.C. Yang

Ablation Threshold of Sapphire by Pulsed Green Laser in Nanosecond Regime
X.Z. Xie, F.M. Huang, X. Wei, W. Hu, Q.L. Ren and X.R. Yuan

A.F. Zhang, W. Fu, D.C. Li, Z.L. Lu, G.X. Zhu and Q.P. Lu

Experimental Assessment of Roughness Changes in the Cutting Surface and Microhardness Changes of the Material S 355 J2 G3 after Being Cut by Non-Conventional Technologies
J. Maščeník and Š. Gašpár

Mechanical Seal Face Texturing by the Acousto-Optic Q-Switched Pulsed Nd:YAG Laser
Y. Xie, S.F. Suo, Y.J. Li, F.J. Ge and Y.M. Wang

Research on Fatigue Fracture Defect of 23CrNi3Mo Drill Steel
B. Huang, Y.Z. Liu, L.Y. Zhou, G.W. Li and D. Zhang

Thermal Analysis of Laser Irradiation of Fused Silica
P. Yao, Y.D. Gong, S.X. Yuan, T.F. Zhou, J.W. Yan and T. Kuriyagawa

Numerical Simulation on Similarity of Thermal-Mechanical Effects of Thin-Walled Pressure Vessel Irradiated by Laser
Y.H. Wang, F. Liu, X.H. Zhang and S. Ding
Bionic Mechanisms and Bio-Manufacturing

Construction of a New Genetic Engineering Bacterium for Preparation of Superoxide Dismutase with High Productivity
Y. Zhao, Y. Li and R.Q. Li .................................................................1973

Study on Method of Determination Plastic Work Conversion Into Thermal Coefficient
H.B. Li and S.C. Xu .................................................................1977

Modal Analysis of Ball Screw Based on ANSYS Software

Algorithm Research of Pattern Recognition for Process Control of Electrospinning
D.L. Liu, C.J. Jing, Y.Y. Liu and Q.X. Hu .....................................1987

Architectural Design of Bionic Structure and Biomimetic Materials

Study on Feature Extraction Method for Tooth Surface Based on Snake Model
S.X. Zheng, J. Li and Q.F. Sun ..................................................1995

Digital Manufacture and Management

Dynamical Adjustment of Cash Holdings in Operations Management
G.J. Li and K.W. Hankins .........................................................2003

Quantitative Modeling of the Capacitated Multi-Level Production-Inventory Problem in Petroleum Industry
G.L. Liu, J. Zhao and W. Wang ...................................................2008

A Framework of Conflict Management System for the Virtual Manufacturing Environment
S. Liu ......................................................................................2012

Optimal Policies for Crude Oil Purchasing
G.L. Liu, J. Zhao and W. Wang ...................................................2019

Study on the Balancing and Improving of Assembling Line for a Type of Scanner Shell
W.X. Yao ................................................................................2023

Knowledge-Integration Model for Networked Manufacturing

Community Structure in Service-Oriented Enterprises Collaboration Network
F.Q. Zhang and P.Y. Jiang ..........................................................2033

How to Realize the Heterogeneous Data Sharing through Grid Technology
H.B. Wang and Z.W. Wang ..........................................................2037

Research on SOA-Based Decision-Making Support of VE Establishing

Research on the ITOC Based Solutions for Ship-Piping Jobshop Scheduling
R. Li, Y.J. Liu and K. Hamada .......................................................2046

Service Rate Optimization of Manufacturing Cell Based on Cost Models
Y.Y. Zhang, C. Su, Y. Shang and Z.X. Li ......................................2055

Constructing a Transportation Service Platform through Integrating GPS and Optimized Dispatching Mechanism
H.E. Chueh, C.Y. Kao and C.S. Fahn ..........................................2060

Three Dimensional Point Clouds Watermarking Algorithm Based on Sphere Degenerated Octree
J.X. Liu, H.G. Cui and X. Dai ......................................................2064

Research on Jobshop Scheduling Problem with Energy Consumption
J.H. Wang and W.T. Gong ..........................................................2071
An Improved Palmer-Based Heuristic for Two-Stage Flexible Flow Shop with Group Constraint
Z.T. Li, Q.X. Chen and N. Mao ................................................................. 2076

Reconstructing NC Program-Based Geometrical Error Compensation for Heavy-Duty NC Machine Tool
Y. Lu, J.G. Li, D. Gao and F. Zhou .......................................................... 2082

Nondestructive Testing of Wood-Plastics Structural Plates with Stiffener
G.W. Yu ............................................................................................... 2087

Kinematic Analysis and Optimum Design of Double Wishbone Independent Suspension Based on Adams/View
Y. Wang, J.Q. Gao and E. Chen ................................................................. 2091

Study on Technology of Suffocated Polystyrene Spheres with Bigger Particle Size
X.X. Xu, Z. Hong, Y.P. Yu and Y.W. Zhang ........................................... 2096

Design and Analysis on Greedy Algorithm Based on Distribution Center Location
C. Liu .................................................................................................... 2100

Managing Change in Lean Manufacturing Implementation
N. Nordin, B. Md Deros, D. Abd Wahab and M.N. Ab Rahman ............. 2105

An AHP Application for Solar Power Systems Selection
C.W. Chang, H.E. Chueh and H. Lin ....................................................... 2112

Modeling Analysis and Simulation Control Mechanism of Resource Ability Occupation
C.X. Shao, A.M. Wang, H.W. Chen and H.L. Yuan .................................. 2116

Optimal Co-Design of Control Algorithm and Bandwidth Scheduling for Networked Control Systems
R. Chen ............................................................................................... 2124

A Rough Set Based Knowledge Discovery Model and its Application in Virtual Assembly
C.L. Li and R.Y. Zhao ........................................................................... 2132

Research on the Weight Control Technique in the Manufacturing of Offshore Engineering Structure
J. Wang, Y.J. Liu, Y.J. Li, R. Li and Y.P. Deng ........................................ 2140

Research and Development for Makeup Object Model Agent Layer about XML Standard of Profession Field
H. Gu ..................................................................................................... 2152

Research on Preventative Maintenance of Key Equipment in Discrete Manufacturing Enterprise MES
H.Q. Li ................................................................................................. 2158

A Research on Remanufacturing Products Quality Control
Y. Liu, B.S. Xu, P.J. Shi and B.H. Liu .................................................... 2162

Developing a Selection Model for the Solar Power System
C.W. Chang, C.S. Liu and C.Y. Huang .................................................. 2168

Reinforcement Learning Based Job Shop Scheduling with Machine Choice
C. Wang, H.B. Zhang, J. Guo and L. Chen ............................................ 2172

Research on Technology of Process-Oriented Virtual Assembly Modeling for Product Information
Z.J. Liu, J.J. Wan and P. Wang ................................................................. 2177

Optimal Transportation Solution to International Project Logistics Based on Decision Network Planning
H.L. Yang, Y.F. Ji, H. Cao and L.L. Wang .............................................. 2185

Artificial Bee Colony Algorithm for Traveling Salesman Problem
W.H. Li, W.J. Li, Y. Yang, H.Q. Liao, J.L. Li and X.P. Zheng .................. 2191
Architecture of Remanufacturing Systematic Engineering
X.D. Jing, B.S. Xu and G.Q. Zhang ................................................................. 2197

Power Line Carrier Detection System Based on Virtual Instrument
M. Yu, X.Y. Jin, C.G. Xu and Y. Zhang ........................................................... 2205

A New Optimized Cutting Method Based on Group Technology in the Structural Member Manufacturing
D.Z. Qi, Y.Q. Rao, N.Y. Sun and Q. Chen ....................................................... 2210

Conceptual Queries Based on Knowledge for E-Commerce
J.K. Xu, H.L. Sun, X.Y. Song and Y.H. Wang .................................................. 2215

Research on Power Line Carrier Communication Quality Evaluation
M. Yu, C.G. Xu, X.Y. Jin and Y. Zhang ........................................................... 2221

Synthesis and Luminescent Properties of New Oligofluorene Derivatives Containing Various Comonomers
X.D. Hu, S.H. Wang and Z.X. Hou ................................................................. 2227

A Gravity-Like Mechanism for Car Sequencing Problem with Multistage Sequencing Buffer

Study on the Screening Efficiency for the Probability Screen
Q. Tang and Y.J. Huang ..................................................................................... 2238

Progressive Damage and Failure Analysis of Fiber-Reinforced Laminated Composites Containing a Hole
B.M. Zhang and L. Zhao .................................................................................. 2243

Research on CAD Model Data Conversion for RP Technology
D.G. Cai and T.R. Zhou .................................................................................... 2253

A Framework for Correlation Relationship Mining of Cloud Service in Cloud Manufacturing System
H. Guo, L. Zhang and F. Tao ............................................................................. 2259

Research of Coal Mine Gas Monitoring System Based on Technology Fusion of Wireless Sensor Network and 3DGIS
X.Y. Wan, H. Yang, L.H. Sun, H.M. Tian and Z.P. Huang ............................... 2263

Research on the Variable Leads Transmission Mechanism Meshing Surfaces
W. Zhang, X. Shi and D.B. Li ........................................................................... 2268

Study on Balance Points of Bucket Brigade Lines with Return Velocities
J. Song, B.X. Zhang and Y.Y. Guan ................................................................. 2273

Workgroup-Based Manpower Planning for Multi-Type Staff Collaboration
Z.H. Liang, Q.X. Chen and N. Mao ................................................................... 2278

Study on Nano-Scaled Precipitate in the Process of Cold-Rolled Production Based on CSP Technology
H. Sun ............................................................................................................... 2282

The Application of DELMIA in ARJ21 Aircraft Central Wing Assembly Simulation
H.J. Liu, X.Y. Tong, S.L. Lv and Q.M. Fan ....................................................... 2287

Realization of DFM in Mold Design & Manufacturing
W.R. Jong and P.J. Lai ..................................................................................... 2293

Application of Grey Relational Analysis Based on Distance Analysis in the Location of Automobile Distribution Center

Study on the Design of Layout of an Automobile Factory Based on SLP
K.Q. Zhou, X. Li, B. Xie and C.X. Yao ............................................................ 2306

Innovative Design of Adjustable Gauge Block in Measurement of Planeness
S.Q. Zhang, J. Hua and W. Xu

2414

Design and Development of Quality Information System for Electronic Ballast Based on Parameter Testing
X.Y. Zou, B.R. Wang, Q. Hu and W.K. Lu

2419

Architecture of RFID Spatio-Temporal Data Management
Y.H. Wang, H.L. Sun and J.K. Xu

2425

Effect of Weld Metal Hardening Property on Deformation Behavior and Crack Driving Force of Mismatched Welded Joint
L.Y. Xiong and Y.H. Zhang

2429

The Research of Production Process Statistical Steady-State Based on the Hypothesis Test
W.Z. Wang

2433

Research on Materials Tracking in Toy Production Based on the Internet of Things
Y.L. Cao, W.F. Li and W. Song

2439

Research on Quality Control of Clearance between Gears in Mesh Based on the Box-Cox Transformation
W.H. Shi, C.L. Chen and J.T. Niu

2443

To Promote Entrepreneurial Education in Art Colleges with the Development of Creative Industries
X. Wang and Y. Meng

2449

Research on Real-Time Synthetic Error Compensation Principle for CNC Machine Tool
G.W. Cui, J. Lu, Y.F. Gu, D. Gao, H.C. Wang and C.C. Li

2454

Parameter Optimization of the Sheet Metal Shearing Process in the Manufacturing of Leaf Spring Assembly Using the Grey Taguchi Method and Simulated Annealing Algorithm
G. Gopalaramasubramaniyan and V.S. Senthil Kumar

2458

Design and Implementation of Height Detection of the Cotton Top-Cutting
Y. Xu, X.P. Gou and J.P. Zhou

2464

A Blending Control Aircraft Assembly Quality Method Using Key Assembly Characteristic
J.H. Liu, T.H. Wang and C. Zou

2469

Probing Active-Area Shift with Improved Kelvin Measurement for Trench DRAM
M.C. Wang and H.C. Yang

2474

A Study on r Chart for Short-Run and Mixed Model Productions
K. Gu, X.Z. Jia and H.L. You

2478

Support Vector Data Description Based Multivariate Cumulative Sum Control Chart
S.G. He and C.Y. Zhang

2482

Design of Medical Wireless Sensor Network
Y. Sun, S.H. Ye and Y. Ye

2486

The Study on RFID Middleware for Real-Time Monitoring in Manufacturing
Y.B. Fu, P.Y. Jiang and Y. Li

2491

Design of Stable Image Platform on Airborne Camera
Y.X. Qian, L.B. Yang, F.R. Hu and X.T. Hong

2495

Stress Analysis of the Working Device of Multi-Functional Excavator
S.X. Qin and Y.L. Li

2499

Modified Double EWMA Approach for Mixed Product Run-to-Run CMP Process Control
A.C. Lee, T.W. Kuo and Z.L. Lee

2504

Research on a New Technique of No Mark Overprint
Y. Wang, F.F. Ren and C. Zhang

2512

A Method of Speech Segregation in Noisy Environment
C.Q. Li, L.Y. Sun and J.J. Li

2518
An Improving Approach for 6σ-Based Multi-Process Machining Environment
