2010 23rd IEEE Conference on Software Engineering Education and Training

(CSEE&T 2010)

Pittsburgh, Pennsylvania, USA
9 – 12 March 2010
## Table of Contents

Welcome from the Conference Chair ......................................................................................... viii  
Organizing Committee ...................................................................................................................... ix  
Steering Committee Members ............................................................................................................. x  
Program Committee ............................................................................................................................ xi  
Keynote: Dr. Alistair Cockburn, Initiator of the Agile Movement in Software Development ................... xii  
Keynote: Dr. Nick Bowen, Vice President of Technology, IBM ....................................................... xiii  
Keynote: Professor Raj Reddy, Robotics Institute Simon University Professor & School of Computer Science ......................................................................................................................... xv  
Keynote: Don Marinelli, Executive Producer of the Entertainment Technology Center, CMU ................ xvi  
Keynote: Professor David Garlan, Director of Professional Software Engineering Programs, School of Computer Science, Carnegie Mellon University ........................................................................................................ xvii

### Day 1, Track 1

**Workplace Issues in an Undergraduate Software Engineering Course** ........................................... 1  
   *Richard G. Epstein*

**Component Based Software Engineering across the Curriculum** ................................................. 9  
   *John M. Hunt and John D. McGregor*

**Stages in Teaching Formal Methods** ............................................................................................ 17  
   *A. J. Cowling*

### Day 1, Track 2

**Fostering UML Modeling Skills and Social Skills through Programming Education** .................. 25  
   *Norio Ishii, Yuri Suzuki, Hironobu Fujiyoshi, and Takashi Fujii*

**Competency Framework for Software Engineers** .......................................................................... 33  
   *José Gamaliel Rivera-Ibarra, Josefina Rodríguez-Jacobo, and Miguel Angel Serrano-Vargas*
The Effects of Layout on Detecting the Role of Design Patterns .................................................41

*Bonita Sharif and Jonathan I. Maletic*

**Day 1, Track 3**

**KAIST-CMU MSE Program - The Past and the Future** .........................................................49

*Sungwon Kang, In-Young Ko, Jongmoon Baik, Hojin Choi, and Danhyung Lee*

From Student to Software Engineer in the Indian IT Industry: A Survey of Training ........................................57

*Vidy Kulkarni, Christelle Scharff, and Olly Gotel*

**Day 2, Track 1**

A Graduate Education in Software Management and the Software Business for Mid-Career Professionals .................................................................65

*Ray Bareiss and Gladys Mercier*

Customers' Role in Teaching Distributed Software Development .....................................................73

*Ivana Bosnić, Igor Čavrak, Mario Zagar, Rikard Land, and Ivica Crnković*

Teaching an End-User Testing Methodology ...............................................................................81

*Huai Liu, Fei-Ching Kuo, and Tsong Yueh Chen*

**Day 2, Track 2**

Current State of the Software Testing Education in North American Academia and Some Recommendations for the New Educators ..................................................89

*Vahid Garousi and Aditya Mathur*

Improving Distance Mentoring: Challenges and How to Deal with them in Global Development Project Courses ............................................................................97

*Gil Taran and Lynn Robert Carter*

Why Better Industrial/Academic Links Are Needed If There is to Be an Effective Software Engineering Workforce .................................................................105

*J. Barrie Thompson*

**Day 2, Track 3**

A Comprehensive Embedded Systems Lab for Teaching Web-Based Remote Software Development .................................................................113

*Janusz Zalewski*

Using LEGO MINDSTORMS NXT and LEJOS in an Advanced Software Engineering Course .................................................................121

*Michael W. Lew, Thomas B. Horton, and Mark S. Sherriff*

Information Systems Application Development Courses: A Carnegie Mellon University Experience in Global Pedagogy .................................................................129

*Selma Limam Mansar, Jeria Quesenberry, Raja Sooriamurthi, and Randy Weinberg*

**Day 3, Track 1**

Pedagogical and Structural Analysis of SE Courses ....................................................................136

*Muhammad Usman, Javed Khan, Manas Hardas, and Naveed Ikram*
Building Organizational Competitive Advantages with Strategically Aligned Technical Degrees: Dividends from a Visionary Corporate-University Partnership ......................................................... 144
Edward R. Alef and David C. Poirier

Should Software Engineering Projects Be the Backbone or the Tail of Computing Curricula? ......................................................................................................................................... 153
David Broman

Day 3, Track 2

An Undergraduate Summer Research Program in Software Safety .......................................................................................................................... 157
W. Eric Wong and Vidroha Debroy

Adding Service Engineering and Management to a Software Engineering Program .................................................................................................. 165
Gavin Finnie and Padmanabhan Krishnan

Software Engineering Practicum Course Experience ................................................................................................................................. 169
Edward P. Katz

Day 3, Track 3

Software Engineering Leadership: A Student Initiative to Promote Change Agents in Industry .......................................................................................... 173
Gil Taran and Jonathan Hartje

An Open Modern Software Testing Laboratory Courseware – An Experience Report ........................................................................................................ 177
Vahid Garousi

Capstone Project: From Software Engineering to "Informatics" ............................................................................................................................. 185
Hadar Ziv and Sameer Patil

Author Index ................................................................................................................................................................................................. 189
