VOLUME 3

"Exploring Teenagers' Travel Behavior for School and After-School Activities: Implications on Safety" ................................................................. 1893

Maria Kamargianni, Amalia Polydoropoulou

A Study on Chinese Motorists' Operational Behavior in Angry Driving ................................................................. 1902

Hu Lei, Xinpeng Yan, Chaohong Wu, Hui Zhang

Design of Virtual Dynamic Traffic Events for Driver Safety Awareness Training ......................................................... 1909

Ying Zhou, Chaohong Wu, Song Gao, Yu Wang

Research on Longitudinal Spacing Control for a Simulated Vehicle Platooning System ................................................. 1916

Xinyu Liu, Yulin Ma, Qing Wu, Xinglong Liu

An Improved ANN Algorithm for Traffic Sign Recognition ......................................................................................... 1926

Qinfang Chai, Xianqiao Chen, Pinfli Yang

A Recognition Model for Acceleration Intention of Automobile Drivers Based on Fuzzy Clustering ......................... 1935

Rui Zhang, Xinpeng Yan, Chaohong Wu
Heterogeneous Database Access Technology and Application .................................................. 1945
Feng Wang, Jianming Guo

A Recognition Method for Lane Change Intention Based on Hidden Markov Model .................. 1952
Wang Xu, Xinping Yan, Chuanchang Wu

Strategic Considerations for Low-Speed Transportation Systems in Urban Street Networks in
Megacities in China ............................................. 1961
Shengdi Chen, Jian Lu

An Integrated and Multidisciplinary Approach for Studying Use and Acceptance of New Driver
Support System: The French National Project on Intelligent Speed Adaptation (LAVIA Project) ........ 1967
Sylvain Lasserre, Farida Saad

Experiments Carried Out on Asphalt Pavement Including LAM Base .................................. 1975
Jiantian Tong, Wei Wang

Development and Optimization of a New Occupant Restraint System for Improving Mini Vehicle
Safety .................................................................... 1981
Zhigang Li, Jinhuan Zhang, Qingxin Lai, Chunsheng Ma

A Real-Time Hybrid Method for Head Pose Estimation ...................................................... 1989
Kun Xu, Yufen Sun, Gang Liu

AIR TRANSPORTATION

Analysis about the Impact of Regional Aviation Transportation Security Factors ...................... 1999
Yonggang Wang, Yi Meng

Evaluation of Airline Safety Based on Different Angles .......................................................... 2006
Yonggang Wang, Yi Meng

Discussion of the Application of Six Sigma in Civil Aviation ................................................ 2014
Zhang Wei, Zhu Chen, Yajian Chen, Zhang Peng

A Fault Tree Analysis of a Typical Lightning Strike on Aircraft .............................................. 2020
Ning-Ning Zhao, Yi-qian Wang

Developing and Testing the Reliability and Validity for Airport Operators’ Work-Related Stress .... 2028
WenJuan Liang, Ming Cheng

Construction and Validation of Safety Risk Evaluation Model for Operating Jobs in Airport ......... 2035
Ming Cheng, Ruishan Sun

Application of System Safety Assessment in ETOPS Design .................................................. 2043
Feng Wang

Civil Aircraft’s Dynamics Simulation for Detailed Trajectory Estimation .................................... 2051
Jin Qi, Jiansheng Yang, Wenguang Xie

Analysis of A320/319/321 and B737NG Aircraft Pilot Operation Procedure Based on
Accidents/Incidents ...................................................... 2058
Huiyan Jin, Hongbing Du, Lijia Peng

Analysis of Use Reliability on Electrical Power System of Civil Aviation Training Planes .......... 2066
Wei Liu, Wei-feng Peng

Information Communication Problem in Aircraft Maintenance ................................................. 2074
Li Li, Qing-song Zhang

Research on Terminal Facility Optimization in Large Airport ............................................... 2081
Ran An, Hai-xin Ma, Yan-xi Liu

Comparative Analysis of Air Transport Passenger Fatalities per Passenger-Kilometer between China
and America .......................................................... 2087
Le Liu, Ruishan Sun

Application of Port Competitiveness Evaluation Based on Fuzzy Model of Entropy Weight ....... 2096
Jingsong Lin

Study on the Organizational Factors in Civil Aviation Safety ................................................. 2103
Jing Cui, Ruishan Sun

Analysis of Civil Aviation Communications Error Events Based on SHEL Model .................... 2111
Ruishan Sun, Ruijiang Shi

Civil Aviation Maintenance Human Error Control Assessment Based on Evidence Theory ........ 2118
Mengtian Chen, Changchun Zhou, Rui Li

Design and Implementation of Hazard Management Information System for ATM Based on B/S
Mode ................................................................. 2125
Yu Cai, Ruishan Sun, Leping Yuan

Research on Structural Damage on Cement Concrete Pavement in the Airport .................. 2131
Runfeng Zhang, Chunxiang Qi, Xiaomin Zhang
Bird Strike Risk Analysis at Airports Based on BP Neural Network
Yang Guo, Xueying Hu

Qualitative Analysis Method of Civil Aviation Safety Information Sources
Hao Liu, Ruifan Sun, Rendi Li

A Study on Effectiveness Evaluation of Airfield Lighting System Based on Fuzzy Comprehensive Evaluation
Wei Li, Hui Chen, Yuelet Zhang

Positive Research on Flight Delays Based on Data Mining
Jiang Cheng, Youhong Xing

RAIL TRANSPORTATION

Morteza Bagheri, Martrin Yerma, Vedar Vener

Determination of the Maximum Running Speed of Trains in Urban Rail Transit
Jin-hong Wu, Xin Qiu, Qiang Wei

An Evaluation Model for Support Capability of Railway Quick Response Transportation
Shiheng Tang, Jianguo Li, Linli Gu

Emergency Evacuation Simulation of Urban Railway Station Based on EXODUS Software
Zhigang Liu, Yan Chun Huang, Haize Pan

Passenger Train Plan Optimal System for Dedicated Passenger Traffic Line
Lian-bo Deng, Peng Shi, Jin Qin

Study on Accessibility Model for Passenger Transfer in Railway Hub
Qun-je Peng, Liang-jie Xu

Formation of Train Operation Conflict on High-Speed Railways
Chao Wen, Yuhong Chen

Prediction of Ride Comfort Values Based on GA-BP Neural Network
Song Liu, Yong Qin, Zong-yi Xing

Prediction of Derailment Coefficient Using NARX Neural Network
Yang Qin, Yong Qin, Zong-yi Xing, Li-ming Jia

Railway Track Quality Assessment Method Based on Mechanism Modeling
Yang Qin, Wei Wei, Zong-yi Xing, Li-min Jia, Xiaocheng Chen

Reliability Measurement and Evaluation of Pedestrian Facilities for Emergency Evacuation in Urban Rail Transit Terminal
Li-li Yang, Hong-fei Jia, Zhi-cai Juan

• Grade X—A Network Screening and Countermeasure Analysis Tool for Highway-Railway Grade Crossings

Study on Safety of Trains Passing by Each Other at High Speed Based on Fluid-Solid Coupling Vibration
Tao Cui, Wenhua Zhong

Flow Prediction Research of Urban Rail Transit Based on Support Vector Machine
Zhao-long Li, Qin-nian Zhang, Lei Wang

Study on Ride Comfort Indices Correlation Analysis Based on BP Neural Network
Yong Qin, Ya Xue, Zong-yi Xing, Yan-hui Wang

Analysis of Influence of Lateral Free Clearance of Axle Box Bearings on Heavy Haul Locomotive
Jianguo Liu, Yifan Yan, Guangham Feng, Dao-feng Li

Sustainable Development Research on Rail Transit and Xi’an
Tao Hu, Hui-yi Yan

Automotive Generic Hazard List (AGHL)
Daniel Basel, Eckehard Schleuderer

Scheduling Optimization for an Urban Subway Line with Deadheading Strategy
Haimin Niu, Minghui Zhong, Ali Haghani

Regional Inter-City Rail Network Accessibility Based on Geographic Information System
Ronghua Hou, Peihua Bai

A Study on an Index System for the Evaluation of Railway Passenger Satisfaction
Qingdong Zeng, Xingping Yan

Security-Risk Management of Beijing Subway Network Operation
Tiankun Xu, Qinghui Liang, Boqiu Liu, Min Wang

Hazard Assessment on Railway Dangerous Goods Station
Feibiao Bai, Ronghua Hou, Zhe Wang

Expert Weight Allocation for Diesel Engine Condition Identification Based on Entropy Theory and Fuzzy Logic

Zhiwei Guo, Chengqing Yuan, Peng Liu

Classification of Inland Ships

Yong Hao, Linghai Song, Wei Sun

Research on Risk Assessment Model in Waters Adjoining Bridge Based on Bayesian Network

Xing Yang, Lei Cheng, Ming Huang, Kezhong Liu

Study on a VOR Signal Generator Based on Software-Defined Radio

Song Guan, Guangbo Wu

The Ship Automatic Tracking Technique and Implementation Based on VTS Images

Hui Ma, Rui Shen, Zhaolin Wu

Navigation Environment Evaluation Research for Three Gorges Reservoir Area Based on the Scenario Analysis Method

Lei Wang, Qing Liu, Zhaolong Li

Classification of Navigation Environment Elements in Three Gorges Reservoir Based on Cluster Analysis Method

Hao Li, Qing Liu

Diagnosis and Countermeasures Study on Cross-River Traffic Problem Based on Analysis of Traffic Supply and Demand Coupling

Zhichao Nie, Shu-ying Zhu, Hong Wang, Liangjun Ma

Fuzzy Evaluation of Crews' Comprehensive Quality Based on Analytic Hierarchy Process

Xiaobiao Fan, Dan Zhang, Derong Zhang, Dong Wang

Study on Intelligent Voice Alarm System for Ships' Navigation Safety Based on Data Fusion Theory

Jing Zhang, Tuan Song

A Laser Three-Dimensional Video Method for Deep-Water Salvage in Changjiang

Jie Ying, Jiayuan Chen, Huiliang Cao

Use of GIS for Marine Accident Data Analysis Visualization

Zhe Mao, Xiping Yan, Hui Chen, Xiaomin Chu, Xiong Yuan

ADRC-Based Ship-Track Control and Its Application to Traffic Safety Evaluation in Harbor Fairway

Ronghui Li, Tieshan Li, Renxiang Bu

Marine Police Warship Anti-Sinking Training Simulator

Mingkui Feng, Yongjin Li

Probabilistic Model of Under-Keel Clearance Assessment As a Practical Tool for Ships' Safety Determination in Existing and Designed Ports

Marta Schoeneich

Analysis of Multi-Dimensional Association Rule in Marine Casualties

Jinfen Zhang, Xiping Yan, Xianqiao Chen, Xiumin Chu, Zhang Di

Research on Navigation Information Flow Architecture of the Three Gorges under the Support of Internet of Things

Xing Sun, Xiping Yan, Qishi Yin, Xiumin Chu

Research and Design of Ship and Cargo Monitoring System Based on Pervasive Network

Xiaodi Peng, Zhiyong Lv, Dingguo Ma

Dynamic Risk Early Warning Technique for Regional Airport Safety and Security

Hong Jun Xu, Jun Gai Tian

New Automatic Salvage Pontoon Used in Deep Water

Zhiyong Lu, Shanshan Fu, Xiaodi Peng, Zhiqiang Zha

Study on Assessing Dynamic Risk of Ship Collision

Yalei Ren, Junmin Mou, Qingxin Yan, Fan Zhang

Research on Competitiveness of Port Based on the DEA-AHP Model

Zhou Jiang

Research on a Commodity Scheduling System for Emergency Rescue in Inland River

Guoxing Wang, Zhiyong Lv, Dingguo Ma

Research on Evaluation Model for Characteristic of Solar Cell in Simulated Marine Environment Based on Information Fusion

Yuewei Sun, Xiping Yan, Chengqing Yuan

A Message-Oriented Generation Method for Discrete Queues: A Case Study of Ship Transit Lock

Bo Wang, Junmin Mou, Weiming Tong, Yanzhao Wen

Analysis on Construction Conditions of Inland Waterway Service Area

Junwei Peng, Jin Lu, Shengzhe Zhu
