# Table of Contents

Preface v  
Organizing Committees and Sponsors vi  

**Development of Helicopter Power Transmission System Technology**  
Z.Y. Yin, B.B. Fu, T.B. Xue, Y.H. Wang and J. Gao ................................................................. 1  

**Future Transmissions for Wind Turbines**  
B.R. Höhn .............................................................................................................................. 18  

**Dynamic Behavior of Helical Gears with Effects of Shaft and Bearing Flexibilities**  
K. Feng, S. Matsumura and H. Houjoh ............................................................................. 26  

**Dynamic Modeling of Multi-Stage Planetary Gears Coupled with Bearings in Housing**  
Z.M. Xiao and D.T. Qin ......................................................................................................... 30  

**A Static and Dynamic Model of Spiral Bevel Gears**  
J. Wang, J.T. Alves, M. Guingand, J.P. de Vaujany and P. Velex ............................................. 35  

**Research on Meshing Characteristics for Face Gear with Arcuate Tooth**  

**A Challenge to Design of a New Harmonic Drive Device**  
S.T. Li ...................................................................................................................................... 43  

**Study on Helical Tooth Profile Modification of Planetary Gear Transmission on the Basis of Gear Transmission Error**  
Y. Tang, S. Chang, Z.Q. Wang and K. Zhang ........................................................................ 47  

**Optimization Procedure for Complete Planetary Gearboxes with Torque, Weight, Costs and Dimensional Restrictions**  
U. Kissling and I. Bae ............................................................................................................. 51  

**Analysis System of Marine Planetary Gear Trains**  
G. Liu, S. Chang, L.Y. Wu and Y.S. Li .................................................................................. 55  

**Application Probing of Advanced Helicopter Transmission System Technology**  
W.Q. Ding .................................................................................................................................. 59  

**Initial Pressure Influence on Pressure Flow Factor Used in Mixed-Lubrication Model**  
F.M. Meng and Y.P. Chen ...................................................................................................... 65  

**Asymmetric Gears: Parameter Selection Approach**  
A. Kapelevich .......................................................................................................................... 70  

**Failures in the Development and Service of the Helicopter Transmission System**  
T.B. Xue and G.Q. Li .............................................................................................................. 74  

**Modification Analysis of the New Axis-Fixed Cycloid Drive**  

**Research on the Dynamic Response of a Combining Gear Drive System**  
Y.Q. Zheng, X.Z. Xue and S.M. Wang ................................................................................... 86  

**Study on General Principle for Structure Fatigue Substantiation of Helicopter Transmission Systems**  
B. Hu ......................................................................................................................................... 90  

**Thermal Effects Analysis on DCT Driven Plate in Vehicle Initial Condition**  
J.Y. Huang, Z.J. Liu, W. Sun and D.T. Qin .......................................................................... 96  

**Simulation of Finite Element Analysis for Cutting Force of High-Speed Dry Gear Milling by Flying Cutter**  
Q. Guo, C. Lin and W. Quan ................................................................................................. 100
Optimum Design of the 3Z-II Planet Drive Based on Matlab  
Q.L. Huang, Y. Wang, M.L. Xu, J.G. Wang and Z.G. Luo .................................................. 104

The Influence Analysis of Fatigue Limit for Mechanical Components Based on Standard Deviation of Full Scale Sub-Sample  
B. Ouyang and W.Q. Ding ................................................................. 108

X – Zero Gear Drive with Minor Teeth Difference  
Y.Q. Zhou, G. Zeng and C. Sun ........................................................... 112

Study on the Dynamic Excitation of the Star Gearing  

The Design Concept Application on RMS for Tail Drive System of Civil Helicopter  
W.Z. Liu, W.Q. Ding and Y.H. Wang ....................................................... 120

Dynamic Modeling and Virtual Test of a New All Terrain Off-Road Vehicle  
S.B. Lu, Y.N. Li and Y.L. Dong .......................................................... 125

Loaded Gear Contact Analyses for Pin Gear Reducers  
S.T. Li ................................................................. 129

Primary Application of the ILS Technology in the Tail Rotor Drive System of the Certain-Type Helicopter  
C. Duan, J. Gao, Y.H. Wang and Y. Lin ................................................. 133

Study on Design and Simulation of the Vibration-Reduction of the Damp Structure for the Gearbox  
X. Wang, J.B. Fu and X.M. Yin ............................................................. 139

The Application of the Diagnoses Technique of Vibration on the Failure Analysis of Gear and Bearing in Gearbox  
Y.S. Ai, Y.H. Wang and W.Z. Liu ........................................................ 143

Advanced Tooth Surface Modification for Spiral Bevel Gears  
J.Z. Su, Z.D. Fang and X.W. Cai ......................................................... 148

Mold Machining Process and Applying Technologies of Spiral Bevel Gears  
X.Y. Tie and H. Zhang ................................................................. 152

Lubrication Mode and Selection of the Helicopter Transmission System Roller Bearing  
J.P. Qiu, M. Yin and L.S. Guo ......................................................... 156

Analysis of Static Load Sharing in Star Gearing  
L.X. Ying, L.D. Jiang, S.G. Yin and F.K. Kong ..................................... 162

Active Gear Pair Vibration Control Based on Filtered-X RLS Algorithm  
W. Sun, Y.N. Li, F. Zhang and G.Y. Li ................................................ 166

Preload Design of Bearings in Helicopter Transmission System  
M. Yin, J.P. Qiu and J. Gao ............................................................. 170

Dynamics Study of a Dynamic Balancing Linkage with Small Fluctuations in Load  
T. Ren, W.T. Qu and W. Sun ........................................................... 176

Blind Separation Method for Gearbox Mixed Fault Signals  
Y.B. Lei, Z.G. Chen and H.O. Liu .................................................... 180

Analysis on Thermo-Mechanical Coupling Contact Stress of Cycloid Ball Planetary Drive  
H.C. Xia, Z.M. Yang and Z.J. An ..................................................... 184

Computational Tooth Root Stress Analysis of Crossed Beveloid Gears with Small Shaft Angle  
C.S. Song, C.C. Zhu, T.C. Lim and R. Fan .......................................... 188

Research on Relationship between Modulus and Tooth Number of Transmitting Gear and Vibration Noise  
G.H. Dai, A.J. Zhao, H.F. Zhang and C.W. Gao .................................. 192

</table>
Single Versus Bi-Directional (Reversal) Gear Tooth Bending Stress and Life (S-N) Evaluation
J. Chen

Transmission Design for a Wind Powered Compressed Air Generation System
D. Shaw, J.Y. Cai and C.T. Liu

The Design and Experiment of Oval Bevel Gear
C. Lin, Y.J. Hou, Q.L. Zeng, H. Gong, L. Nie and H. Qiu

Research on Helicopter Main Gearbox Operating without Oil

Analysis of Load Sharing Behavior in Herringbone Gears Power Branching Transmission System
X.F. Yang, Z.D. Fang, B.B. Wang and J.F. Du

Improving Gearbox Design and Analysis for Offshore Wind Turbines
H. Long, J.Z. Wu and A. Firth

Investigation on Modulation Sidebands in a K-H-V Planetary Gear with Double-Enveloping Cycloid Drive Vibration
J.Y. Liu, S. Matsumura, B.K. Chen and H. Houjoh

The Application and Investigation about Industry CT Scan Technology in the Measure and Design about Complex Box
L. Chen

Time Domain Computational Analysis for Shock Characteristics of Elastic Support Gearbox
G.H. Dai, C.W. Gao and Y.H. Liu

Effect of Tooth Surface Modification on the Load Sharing and Strength of Offset Face Gear Drive with Spur Involute Pinion
J.H. Wang, Y.B. Shen, Z.Y. Yin, J. Gao and Y.Y. Jiang

Longitudinal Dynamic Modeling of the Snowmobile Considering Fuel Economy
X.S. Du, H.J. Liu, C.C. Zhu and H.F. Ding

Study on the Calculating Method of Bending Stress for Non-Circular Gear

Development Solution of Civil Helicopter Transmission Train Vibration Monitoring System
S.N. Zhang, W.Q. Ding and Y.H. Wang

The Effect of Superfinishing on the Contact Fatigue of Case Carburised Gears
J. Zhang and B.A. Shaw

Numerical Method of Determining the Curvature Interference Limit Curve for Modified Hourglass Worm Pairs
Y.P. Zhao and T.C. Wu

Design, Analysis and Testing of a Micro/Nano-Transmission Platform
C. Lin, S.S. Yu, K. Cheng and G.B. Tao

Optimal Design and Contact Analysis for Planetary Roller Screw
S.J. Ma, G. Liu, J.X. Zhou and R.T. Tong

The Application of Advanced Composite Material in Tail Driver Shaft of the Helicopter
K.F. Li and T.H. Xia

Research on Digital Design and Manufacture Technology of Rolling Swing Movable Teeth Transmission
Y.L. Yi and Z.J. An

A Lumped Parameter Model to Analyse the Dynamic Load Sharing in Planetary Gears with Planet Errors
X.Y. Gu and P. Velex
Sensitivity Analysis of Natural Frequency to Structural Parameters of Helical Gear Shaft for Wind Turbine Gearbox
J.G. Wang, Y. Wang, Y.T. An and Q.L. Huang .......................................................... 380

Static/Dynamic Contact Finite Element Analysis for Tooth Profile Modification of Helical Gears
Y.J. Wu, J.J. Wang and Q.K. Han ........................................................................... 384

Helicopter Transmission System Technology Readiness Assessment
J.W. Liu, S. Wang and Y.H. Wang ........................................................................... 389

Current Development Situation and Prospect of Circular-Arc Gear
H.M. Gao, Y. Liu, Y. Chen and S.J. Liu ................................................................. 394

A New Method of Constructing Tooth Surface for Logarithmic Spiral Bevel Gear
Q. Li, Z.L. Wei and H.B. Yan .................................................................................. 399

Generation and TCA of Straight Bevel Gear Drive with Modified Geometry
J.S. Jiao and X.M. Cao ......................................................................................... 403

Effects of Technical Elements on Microstructure and Hardness of TiAlN/TiN Coatings
L. Lu, M.H. Ren and T. Jiang ................................................................................ 407

Computer Simulation Analysis of Bending Stress for Face Gear with a New Type Fillet Tooth Surface
Y.B. Shen, J. Gao and W.Q. Ding ........................................................................... 411

Thermal Network Model for Temperature Prediction in Planetary Gear Trains

The Design of RODS Software on the Basis of Transmission Machinery Robust Optimal Designing System
H.X. Zhang, X.C. Lu and L. Lu ............................................................................... 419

Study on Ultrasonic Lapping System of Spiral Bevel Gear
J.J. Yang, B.Y. Wei, X.Z. Deng and Z.D. Fang ...................................................... 424

Quantitative Evaluation of Aero Spiral Bevel Gear Meshing Quality
P. Jiang, G.L. Liu, R.T. Zhang and C.Q. Wang ...................................................... 428

Effect of Transmission Error on the Fluctuating Tension Force for Dual-Coiler Machine
Y.Q. Wang, F.Y. Wang and Y.X. Luo ................................................................. 434

Advanced Developments in Computerized Design and Manufacturing of Spiral Bevel and Hypoid Gear Drives
Q. Fan ...................................................................................................................... 439

Study on the Micro Thermal EHL Behavior of Wind Turbine Gearbox
B. Wu, W.K. Shi, L. Zhao and P. Fu ........................................................................ 443

Experiment Study of Heat Transfer in Aeroengine Bearing Chambers
X.C. Yuan, H. Guo and L.Y. Wang ........................................................................ 448

The Tooth Form Deviation Correction of CNC Spiral Bevel Gears Grinding Machine
W.Q. Zhang, X.D. Guo and M.D. Zhang ................................................................. 454

Analysis of Thermoeelastic Instability on Multi-Disc Clutch
W. Yang, G.D. Lu and H.S. Lv .............................................................................. 458

Study of the Brush Seal Design and Test Technology
N. Li, G. Tang and L. He ......................................................................................... 463

Modeling and Simulation of Mechatronic System to Integrated Design of Supervision: Using a Bond Graph Approach
M.A. Mellal, S. Adjerid and D. Benazzouz ............................................................. 467

Design and Manufacture of Helical Planetary Gear Reducer with Small Module and Big Helical Angle
Study on Designing and Dressing of Worm for Grinding Process of Face Gear  
X.Z. Li, R.P. Zhu, Z.M.Q. Li and F.J. Li ...............................475

Bifurcation Analysis of Impact Model in Gear Transmission System  
J.Y. Tang, Q.B. Wang, L.J. Wu and S.Y. Chen .............................479

Operational Modal Test for Wind Turbine Gearbox  

Transmission System Health Management Technique  
X.X. Cai, X.J. Guo and H.Y. Long ..............................................487

Strength Analysis of Logix Gear Based on UG  
J.H. Wang, Y.C. Wang, F. Xie and X. Huang ...............................492

Globoidal Indexing Cam’s CAD/CAM Development on Pro/E  
N.F. Xu, F. Xu and W. He ....................................................496

Anonymous Function Method and its Application in Screw Pump’s Design and Processing  
Y.X. Zhang, Q. Tang and X.Z. Ye ..............................................500

Rotor Dynamic Design of a Helicopter Tail Drive Shaft System  
Y.H. Wang, W. Yuan and Y.N. Chen .........................................504

A Model of Nonlinear Dynamic Modeling for Planetary Gear Transmission System with Backlash  
F.J. Li, R.P. Zhu, H.Y. Bao and X.Z. Li ....................................510

Dynamic Simulation Analysis of the Globoidal Indexing Cam Mechanism  
F. Xu and W. He ................................................................514

Effect of Shot Peened and Overload on Low Cycle Fatigue of Simulated Terminal Gear Specimen  
Y.M. Zhao, G.C. Ge and X.X. Cai ..............................................523

Effects of Graphite Content on Performance of Powder Injection Molding Copper-Based Antifriction Materials  
B. Qiao, L. Xiao, F. Shang, H.Q. Li and T.L. Guo ..........................527

Dynamic Contact Emulate Analysis of Logarithmic Spiral Bevel Gear with ANSYS/LS-DYNA  
Q. Li, S.Q. Wu and H.B. Yan ..................................................531

Structure Design Research for Concrete Mixer Blade  
H. Zhang, Q. Tang and Y.X. Zhang ............................................535

Application of Contact Analysis in Strength Analysis of Helicopter Transmission System  
W. Li ..........................................................................................539

Adaptive Impulse Controller Design of Harmonic Drives System with Friction  
G.J. Li .......................................................................................543

Research on Geometry Relationship of Pin-Rack Gearing  
Z.H. Feng, M.K. Gou and S. Wu ................................................547

Coupled Motion Control and Adjustment in Automatic Programming System of CNC Hobbing Machines  
Q. Li, L.L. Yi, S.L. Wang and J. Zhou ..........................................552

Investigation and Application of the Helicopter Typical Flight States Identification  
Z.H. Wan ................................................................................556

The Optimization Design for Rack Tooth Profile Curve of Straight Push-Rod Linear Reducer  
C.X. Zhou, Q.S. Huang and F. Guan ............................................562
Mechanisms of Synchronous Belt Tooth Failure due to Fatigue Shear Fracture
J.H. Guo, H.Y. Jiang and D.S. Li ................................................................. 566

Precision Involute Gearboxes
B.R. Höhn, K. Stahl, H.P. Otto and H. Bauhoffer ....................................... 570

Study on Face Gear's Bending Stress Based on Test and Finite Element Analysis Method
Z.H. Huang and B. Tang ........................................................................... 574

Powertrain Control Logic Test for Plug-in Hybrid Electric Vehicle
M. Ye, Y.G. Liu and H. Shu ..................................................................... 579

Effect of Atomic-Scale Roughness on Contact Behavior
F.L. Duan, H.B. Qiu, J.M. Yang and C.Y. Wu ........................................ 584

The Technique of Centrifugal Load Loading on a Tail Rotor Shaft Fatigue Life Test
L.S. Lin ...................................................................................................... 590

The Design of the Tooth Shape Silence Chain
G.X. Yang ............................................................................................... 594

Failure Analysis of Output Shaft in the Gearbox Transmission
W.J. Xu, Y.F. Chen, J. Wang and T. Wang ................................................ 598

Influence Factors and Calculating Methods for Gear Windage Power Loss
Y.Z. Ge, X.M. Lei, Y.C. Zhang and P. Liu .................................................. 602

Optimum Design of a 3-RRR Planar Parallel Manipulator with a Singularity-Free Workspace
M.W. Gao, X.M. Zhang and Z.W. Wu ........................................................ 606

Study on Dynamic Load Sharing Behavior of Two-Stage Planetary Gear Train Based on a Nonlinear Vibration Model
T.J. Li, R.P. Zhu and H.Y. Bao ................................................................. 611

Research on Milling-Turning Compound Processing of Spiral Bevel Gears Based on GibbsCAM
G.B. Tao, L.L. Yi, Z. Zheng and L.H. Hu ................................................... 615

Design of Wind Turbine Gearbox Housing
Q.F. Cao, H.Y. Du, Y.C. Zhang and P. Liu ............................................... 619

Numerical Analysis on Transmission Characteristics of Stephenson’s Six-Bar Punching Mechanism with Servo Input
J.G. Hu, Y.S. Sun, Y.Q. Cheng and W.P. Ruan ........................................... 623

Research on the Knowledge Fusion Technology Based Optimized Design of the Drive Axle Differential Gear
K. Chen, C.W. Yao and G.F. Yin .............................................................. 629

Modular Design on Basic Parameters of Volume Reducer
T. Wang, J. Shen and F.Q. Zhao ............................................................... 633

An Accurate Modeling Method of the Plane Enveloping Hourglass Worm
X.A. Chen and L.M. Tang ....................................................................... 637

Behavior Test on Wind Turbine Gearbox
L.Y. Tan and J.B. Liu ............................................................................... 641

Rolling Contact Fatigue Life of Case-Hardened Steel Treated by Shot Peenings with Shot Diameters of 0.05 mm and 0.30 mm
L. Wang, G.L. Liu, M. Seki, M. Fujii and Q. Li ........................................ 645

Multiscale Analysis on Friction-Reducing Characteristics of Textured Surface in Nanoscale Sliding Contacts
R.T. Tong, G. Liu, L. Liu and S.J. Ma ...................................................... 649
Study on Dynamic Characteristics of Wind Turbine Planetary Gear System Coupled with Bearing at Varying Wind Speed  

Design and Analysis for High-Speed Gear Coupling  
X.M. Lei, Y.Z. Ge, Y.C. Zhang and P. Liu ............................................... 658

Dynamic Optimization Design of a Warship’s Gearbox Based on FEM  
Y.H. Xue, X.H. Li, Z.G. Wang and J. Song ........................................... 662

Optimum Design of Motion Curve of Cam Mechanism with Lowest Maximum Acceleration  
C.Q. Sun, A.H. Ren and G.X. Sun ......................................................... 666

Temperature Field and Residual Stress Analysis of the Gear on CO₂ Laser Welding Process  

Study of Load Distribution and Sharing Characteristics of Planetary Geartrain for Wind Turbines  
J.G. Kim, G.H. Lee, Y.J. Park, Y.Y. Nam and T.H. Chong ...................... 674

Study on Loads of Accelerated Contact Fatigue Testing and its Application  
H. Zuo, Y.C. Zhang, P. Liu, W. Wang and S. Xiong ................................ 680

The Optimization and Simulation of New Type Non-Circular Gears in CVT  
F.Y. Zheng, A.H. Ren, C.Q. Sun and G.X. Sun ...................................... 684

Research of Simulation Technology in Low-Stress Machining on Tooth Surface of Spiral Bevel Gears Used in Aviation Industry  
Y.Z. Wang, Y.Y. Chen, X. Han, L.F. Wu and H. Zeng ............................. 688

Effect of Machining Precision Caused by NC Gear Hobbing Deformation  
S.L. Wang, Y. Yang, J. Zhou, Q. Li, S. Yang and L. Kang ...................... 692

Research on Load Modification of Cylindrical Gears with Consideration of System Deformation  
S. Xiong, Y.C. Zhang, P. Liu, W. Wang and H. Zuo .................................. 696

Modeling and Analysis of Gear Driving System Based on the CATIA  
W. Cao and R. Wang ................................................................. 700

The Research on General Modeling Methods of the Complicated Transmission Based on Hypergraph Theory  
C.L. Xiang, Y.Y. Zhang, H. Liu and M. Cui ......................................... 704

A Simplified Approach Based Phase Angle for Tooth Contact Analysis of Planetary Gear Trains  
K. Xu, G. Liu, X.Z. Deng, J.J. Yang and J.X. Su .................................. 709

Effect of Friction Coefficient on the Stiffness Excitation of Gear  
Y.M. Hu, D.S. Xue and Y.J. Pi .......................................................... 713

Structural Design and Analysis of Thrust Collar in Main Wind Turbine Speed-Increasing Gearboxes  
Q.Q. Xiang, M. Li, Y.C. Zhang and H.B. Zhou .................................. 717

Study of Bearing Modelling in the Helicopter Gearbox  
L. Zamponi, E. Mermoz and J.M. Linares ........................................... 721

Static Load Sharing in Power-Split Planetary Gear Trains  
Y. Li, G. Liu and G.L. Liu .............................................................. 725

Solid Modeling Methods and Wire-Cutting Process Simulation of Non-Circular Gears  

Gearbox Fault Diagnosis Using Vibration Signal with Wavelet De-Noising  

Dynamic Analysis and Experimental Study of MW Wind Turbine Gearbox  
H.J. Wang, X.S. Du and X.Y. Xu .......................................................... 739
Determination of Load-Sharing Displacement of Flexible Pin Roll in Planet Gear Train
Y.C. Zhang, L. Tan, P. Liu and H.B. Zhou ................................................................. 743

Research on Vibration Influence Chart of Planetary Gear Systems
L.H. Chang, G. Liu, L.Y. Wu and Z.H. Bu ................................................................. 747

Improvement of Positioning Error on a Ball Screw by Cooling System
Z.Z. Xu, Q. Zhang and S.K. Lyu .................................................................................. 752

A Discrete Lumped-Parameter Dynamic Model for a Planetary Gear Set with Flexible
Ring Gear
J. Zhang, Y.M. Song and J.Y. Xu ................................................................................ 756

Modeling and Controlling of Anti-Slip Regulation Based on Limited-Slip Differential
J.J. Hu, P. Ge, Z.B. He and D.T. Qin .......................................................................... 762

Advanced Methods of Gas Turbine Reducer Design and its Analyses
L. Xiao and R.M. Li ...................................................................................................... 767

Deformation of Harmonic Drive in Transmission State Based on Contact Analysis with
Shell Element Tooth
X.X. Chen, S.Z. Lin, J.Z. Xing and Y.S. Liu ................................................................. 771

Research on Torsional Dynamic Model and Rigidity Excitation of Cycloid Ball Planetary
Transmission System
P. Zhang, Z.J. An and Z.M. Yang ................................................................................ 775

Coordinated Torque Control for Mode-Switch between Motor and Engine Driving in Heavy
Hybrid Electric Vehicle
Y. Yang, J.F. Huang, D.T. Qin and W.H. Yang ............................................................. 779

Analysis of Winding Dynamics of Film Web on Winder
G. Li and Y. Sun ............................................................................................................ 784

Life Estimation of Tilt-Rotor Transmission Based on Dynamic Analysis

Fluid Dynamic Analysis and Experimental Study on Wet Friction Clutch
T.J. Lin, L. Pan and S.J. Zhang ..................................................................................... 792

Study on Visualization of Planetary Gear Based on Topological Theory
X.Y. Shi ........................................................................................................................ 797

Strategy Study on Comfort Optimization of Metro Train Traction
C.M. He, H. Li, G.S. Fei and S.J. Pang ......................................................................... 801

Numerical Analysis of Concave-Slab Type Water Lubricated Rubber Alloy
Bearings’ Lubrication
J.X. Wang, Y.F. Han, G.W. Zhou, K. Xiao, Y. Qin and S. Wu ..................................... 805

The Analysis of Gear Contact under Cycloidal Load
L.P. Wang, Y.Q. Xu and Y. Yuan .................................................................................. 809

Initial Behavior of Speed Increasing Helical Gears by Torque Fluctuation
C.I. Park ....................................................................................................................... 813

Static Simulation Analysis of Torsion Characteristics of Highly Flexible Coupling
K. Xiao, J.X. Wang, J.M. Li and Y.M. Zheng ................................................................. 817

Using Lubricating Oil Filter Debris Analysis to Monitor Abnormal Wear of Aero-Engine
Z.X. Zhu, J.Z. Zheng and D. Chen .............................................................................. 821

Research on Gear Contact Fatigue Stress Test
T. Wang, H.M. Li, B.L. Zhang and Z.F. Wu ................................................................. 825

A Load Spectrum Method for Multi-Stage Planetary Transmission
C.F. Hu and Y.Q. Tan .................................................................................................... 829
The Design of Power Transmission of Electric Screw Press Directly Driven by Permanent Magnet Disc Synchronous Motor
J.T. Liang, S.D. Zhao, Y.L. Zhao and Z.Y. Sun ..........................................................833

Scanning Measurement and Evaluation of Gear Tooth Root and Bottom Profiles
S. Kurokawa, H. Kido, T. Taguchi, T. Okada, O. Ohnishi and T.K. Doi ................................838

A Method to Determine the Basic Value of Gear Root Stress Based on FEM
J. Zhang, H.C. Wu and H.J. Wang ..............................................................842

Development and Application of Non-Contact Seal Assembly for High-Speed Shaft Ends
P. Liu, Q.P. Ou, H.B. Zhou and M. Li .............................................................846

Stress Analysis of the Skewed-Roller Slipping Clutch Based on Frictional Contact and Dynamic Equilibrium
M. Feng and G.R. Yan ..................................................................................850

Optimization of New Type Sintering Machine’s Sprocket Wheel with Even-Number Teeth
M.H. Bai, L.B. An, S.B. Ren and L.J. Wang ..........................................................854

Optimum Design of Toggle Transmission System in Double Toggle Mechanical Press Using Response Surface Methodology Combined with Experimental Design
J. Xie, S.D. Zhao, Z.H. Sha and J.T. Liang .........................................................858

Original Research on Logarithmic Spiral Bevel Gear
H.B. Yan, Q. Li, Z.L. Wei and S.Q. Wu ..............................................................863

Effects of Surface Roughness and Abnormal Surface Layer on Fatigue Strength
G. Deng, S. Suzuki and T. Nakanishi .....................................................................867

Precise Modeling of Arc Cylinder-Gears with Tooth Root Fillet
Y.M. Cui, Z.D. Fang, J.Z. Su and Y.P. Liu ..........................................................871

Study on 18Cr2Ni4WA Gear Contact Fatigue Experiment and Data Analysis
Z.F. Wu, T. Wang, R.L. Zhang and H.M. Li ........................................................875

Thermal Analysis of Axial Driving System for Numerically Controlled Machine Tool
B. Li, H.R. Cao and Z.L. Yang ........................................................................879

Reduction of Power Losses in Transmissions and Gearings
F.J. Joachim, N. Kurz and J. Börner ..................................................................883

Manufacturing Method of Long-Cone-Distance Spiral Bevel Gears Based on CNC Machining Center
B.Z. Lei, B. Zhang and H. Zhang .......................................................................889

Analysis of Gas Dynamics in a Rotating Disk Cavity
Y. Liu, Y.H. Zhang, G.D. Chen and R. Wan ......................................................893

Micropitting in Wind Turbine Gearboxes: Calculation of the Safety Factor and Optimization of the Gear Geometry
H. Dinner ........................................................................................................898

Modal Analysis and Parameters Research of Internal Helical Gears Based on AWE
Y.J. Gong, X.Y. Wang, H. Zhao and K. Huang ................................................904

Analysis on Deformation and Relieving of Spline in 1.5MW Wind Turbine Gearbox
M. Zhang, L.Y. Zhang, Y.H. Bao, F. Gao and C. Wang ......................................908

Keyword Index .................................................................................................915

Author Index ....................................................................................................923
