Table of Contents

Preface xi

1. Getting Started ................................................................. 1
   1.1 Installing the Integrated Development Environment (IDE) ........ 4
   1.2 Setting Up the Arduino Board ......................................... 8
   1.3 Using the Integrated Development Environment (IDE) to Prepare
       an Arduino Sketch .................................................... 10
   1.4 Uploading and Running the Blink Sketch ............................ 13
   1.5 Creating and Saving a Sketch ....................................... 14
   1.6 Using Arduino .......................................................... 17

2. Making the Sketch Do Your Bidding ...................................... 23
   2.1 Structuring an Arduino Program ..................................... 24
   2.2 Using Simple Primitive Types (Variables) ......................... 25
   2.3 Using Floating-Point Numbers ....................................... 27
   2.4 Working with Groups of Values ..................................... 29
   2.5 Using Arduino String Functionality ................................ 32
   2.6 Using C Character Strings .......................................... 37
   2.7 Splitting Comma-Separated Text into Groups ..................... 38
   2.8 Converting a Number to a String .................................. 41
   2.9 Converting a String to a Number ................................... 43
   2.10 Structuring Your Code into Functional Blocks ................. 45
   2.11 Returning More Than One Value from a Function ............... 49
   2.12 Taking Actions Based on Conditions .............................. 52
   2.13 Repeating a Sequence of Statements ............................. 53
   2.14 Repeating Statements with a Counter ............................ 55
   2.15 Breaking Out of Loops .............................................. 58
   2.16 Taking a Variety of Actions Based on a Single Variable ...... 59
   2.17 Comparing Character and Numeric Values ....................... 61
   2.18 Comparing Strings ................................................. 63
   2.19 Performing Logical Comparisons .................................. 64
2.20 Performing Bitwise Operations 65
2.21 Combining Operations and Assignment 68

3. Using Mathematical Operators .............................................. 69
  3.1 Adding, Subtracting, Multiplying, and Dividing 69
  3.2 Incrementing and Decrementing Values 70
  3.3 Finding the Remainder After Dividing Two Values 71
  3.4 Determining the Absolute Value 72
  3.5 Constraining a Number to a Range of Values 73
  3.6 Finding the Minimum or Maximum of Some Values 74
  3.7 Raising a Number to a Power 75
  3.8 Taking the Square Root 76
  3.9 Rounding Floating-Point Numbers Up and Down 76
  3.10 Using Trigonometric Functions 77
  3.11 Generating Random Numbers 78
  3.12 Setting and Reading Bits 80
  3.13 Shifting Bits 84
  3.14 Extracting High and Low Bytes in an int or long 85
  3.15 Forming an int or long from High and Low Bytes 87

4. Serial Communications ...................................................... 89
  4.1 Sending Debug Information from Arduino to Your Computer 94
  4.2 Sending Formatted Text and Numeric Data from Arduino 97
  4.3 Receiving Serial Data in Arduino 100
  4.4 Sending Multiple Text Fields from Arduino in a Single Message 105
  4.5 Receiving Multiple Text Fields in a Single Message in Arduino 111
  4.6 Sending Binary Data from Arduino 114
  4.7 Receiving Binary Data from Arduino on a Computer 118
  4.8 Sending Binary Values from Processing to Arduino 120
  4.9 Sending the Value of Multiple Arduino Pins 122
  4.10 How to Move the Mouse Cursor on a PC or Mac 125
  4.11 Controlling Google Earth Using Arduino 130
  4.12 Logging Arduino Data to a File on Your Computer 135
  4.13 Sending Data to Two Serial Devices at the Same Time 138
  4.14 Receiving Serial Data from Two Devices at the Same Time 141
  4.15 Setting Up Processing on Your Computer to Send and Receive Serial Data 145

5. Simple Digital and Analog Input ......................................... 147
  5.1 Using a Switch 150
  5.2 Using a Switch Without External Resistors 154
  5.3 Reliably Detecting the Closing of a Switch 155
  5.4 Determining How Long a Switch Is Pressed 158
7.13 Controlling an Array of LEDs by Using MAX72xx Shift Registers 279
7.14 Increasing the Number of Analog Outputs Using PWM Extender Chips (TLC5940) 281
7.15 Using an Analog Panel Meter as a Display 285

8. Physical Output ................................................................. 289
8.1 Controlling the Position of a Servo 292
8.2 Controlling One or Two Servos with a Potentiometer or Sensor 294
8.3 Controlling the Speed of Continuous Rotation Servos 296
8.4 Controlling Servos Using Computer Commands 298
8.5 Driving a Brushless Motor (Using a Hobby Speed Controller) 299
8.6 Controlling Solenoids and Relays 300
8.7 Making an Object Vibrate 302
8.8 Driving a Brushed Motor Using a Transistor 304
8.9 Controlling the Direction of a Brushed Motor with an H-Bridge 306
8.10 Controlling the Direction and Speed of a Brushed Motor with an H-Bridge 309
8.11 Using Sensors to Control the Direction and Speed of Brushed Motors (L293 H-Bridge) 311
8.12 Driving a Bipolar Stepper Motor 317
8.13 Driving a Bipolar Stepper Motor (Using the EasyDriver Board) 320
8.14 Driving a Unipolar Stepper Motor (ULN2003A) 323

9. Audio Output ................................................................. 327
9.1 Playing Tones 329
9.2 Playing a Simple Melody 331
9.3 Generating More Than One Simultaneous Tone 333
9.4 Generating Audio Tones and Fading an LED 335
9.5 Playing a WAV File 338
9.6 Controlling MIDI 341
9.7 Making an Audio Synthesizer 344

10. Remotely Controlling External Devices .................................... 347
10.1 Responding to an Infrared Remote Control 348
10.2 Decoding Infrared Remote Control Signals 350
10.3 Imitating Remote Control Signals 354
10.4 Controlling a Digital Camera 357
10.5 Controlling AC Devices by Hacking a Remote-Controlled Switch 359

11. Using Displays ................................................................. 363
11.1 Connecting and Using a Text LCD Display 364
11.2 Formatting Text 367
11.3 Turning the Cursor and Display On or Off 370
