Communicating Process Architectures 2011
WoTUG-33

Edited by
Peter H. Welch
University of Kent, UK
Adam T. Sampson
University of Abertay Dundee, UK
Jan B. Pedersen
University of Nevada, Las Vegas, USA
Jon Kerridge
Edinburgh Napier University, UK
Jan F. Broenink
University of Twente, the Netherlands
and
Frederick R.M. Barnes
University of Kent, UK

Proceedings of the 33rd WoTUG Technical Meeting,
19–22 June 2011, University of Limerick,
Ireland

IOS Press
Amsterdam • Berlin • Tokyo • Washington, DC
Contents

Preface                                   v
   Peter Welch, Adam Sampson, Frederick Barnes, Jan B. Pedersen,
   Jan Broenink and Jon Kerridge

Editorial Board                         vi

Reviewing Committee                     vii

Implementing Generalised Alt – A Case Study in Validated Design Using CSP
   Gavin Lowe                             1

Verification of a Dynamic Channel Model Using the SPIN Model Checker
   Rune Mollegaard Friborg and Brian Vinter   35

Programming the CELL-BE Using CSP
   Kenneth Skovhede, Morten N. Larsen and Brian Vinter  55

Static Scoping and Name Resolution for Mobile Processes with Polymorphic Interfaces
   Jan Bækgaard Pedersen and Matthew Sawders    71

Prioritised Choice over Multiway Synchronisation
   Douglas N. Warren                        87

An Analysis of Programmer Productivity Versus Performance for High Level Data Parallel Programming
   Alex Cole, Alistair McEwan and Satnam Singh    111

Experiments in Multicore and Distributed Parallel Processing Using JCSP
   Jon Kerridge                            131

Evaluating an Emergent Behaviour Algorithm in JCSP for Energy Conservation in Lighting Systems
   Anna Kosek, Aly Syed and Jon Kerridge        143

LUNA: Hard Real-Time, Multi-Threaded, CSP-Capable Execution Framework
   M.M. Bezemer, R.J.W. Wilterdink and J.F. Broenink 157

Concurrent Event-Driven Programming in ocean-π for the Arduino
   Christian L. Jacobsen, Matthew C. Jadud, Omer Kilic and
   Adam T. Sampson                        177

Fast Distributed Process Creation with the XMOS XS1 Architecture
   James Hanlon and Simon J. Hollis           195

Serving Web Content with Dynamic Process Networks in Go
   James Whitehead II                      209
Performance of the Distributed CPA Protocol and Architecture on Traditional Networks
Kevin Chalmers

Object Store Based Simulation Interworking
Carl G. Ritson, Paul S. Andrews and Adam T. Sampson

A Model for Concurrency Using Single-Writer Single-Assignment Variables
Matthew Huntbach

The Computation Time Process Model
Martin Korsgaard and Sverre Hendseth

SystemVerilogCSP: Modeling Digital Asynchronous Circuits Using SystemVerilog Interfaces
Arash Saifshahemi and Peter A. Beerel

Process-Oriented Subsumption Architectures in Swarm Robotic Systems
Jeremy C. Posso, Adam T. Sampson, Jonathan Simpson and Jon Timmis

A Systems Re-Engineering Case Study: Programming Robots with occam and Handel-C
Dan Slipper and Alistair A. McEwan

The Flying Gator: Towards Aerial Robotics in occam-π
Ian Armstrong, Michael Pirrone-Brusse, Anthony Smith and Matthew Jadud

CONPASU-Tool: A Concurrent Process Analysis Support Tool Based on Symbolic Computation
Yoshinao Isobe

Development of an ML-Based Verification Tool for Timed CSP Processes
Takeshi Yamakawa, Tsuneki Ohashi and Chikara Fukunaga

Mobile Processes and Call Channels with Variant Interfaces (a Duality)
Eric Bonnici and Peter H. Welch

Adding Formal Verification to occam-π
Peter H. Welch, Jan B. Pedersen, Fred R.M. Barnes, Carl G. Ritson and Neil C.C. Brown
