Message from the Chairs ........................................................................................................... xvii
Organizing Committee ............................................................................................................. xviii
Program Committee ............................................................................................................... xx
External Reviewers ................................................................................................................ xxii
IEEE Computer Society Technical Committee on Services Computing (TC-SVC) ................. xxiii

RESEARCH TRACKS

Research Track 1: Services Systems
SATE—Service Boundary and Abstraction Threshold Estimation for Efficient Services Design ......................................................................................................................... 1
Kalapriya Kanan, Gandhi Sivakumar, and Nanjangud C. Narendra

Adaptive Request Prioritization in Dynamic Service-Oriented Systems ........................................... 9
Roman Khazankin, Daniel Schall, and Schahram Dustdar

Proactive SLA Negotiation for Service Based Systems: Initial Implementation and Evaluation Experience .......................................................................................................................... 16
Khaled Mahbub and George Spanoudakis

Research Track 2: Cloud Management
Introducing Semantics to Cloud Services Catalogs ....................................................................... 24
Yu Deng, Michael R. Head, Andrzej Kochut, Jonathan Munson, Anca Sailer, and Hidayatullah Shaikh

Dynamic Processor Resource Configuration in Virtualized Environments .................................... 32
Hai Jin, Li Deng, Song Wu, and Xuanhua Shi
Data Augmentation as a Service for Single View Creation

Ullas Nambiar, Tanveer A. Faruquie, K. Hima Prasad, L. Venkata Subramaniam, and Mukesh K. Mohania

Research Track 3: Service Discovery

Recommend-As-You-Go: A Novel Approach Supporting Services-Oriented Scientific Workflow Reuse
Jia Zhang, Wei Tan, John Alexander, Ian Foster, and Ravi Madduri

QoS-Based Service Ranking and Selection for Service-Based Systems
Stephen S. Yau and Yin Yin

Self-Adaptive Fuzzy QoS-Driven Web Service Discovery
Romina Torres, Hernán Astudillo, and Rodrigo Salas

Research Track 4: Cloud Migration

Improving Performance and Availability of Services Hosted on IaaS Clouds with Structural Constraint-Aware Virtual Machine Placement
Deepal Jayasinghe, Calton Pu, Tamar Eilam, Malgorzata Steinder, Ian Whally, and Ed Snible

Migration to Multi-image Cloud Templates
Birgit Pfitzmann and Nikolai Joukov

Management of SOA-Based Context-Aware Applications Hosted in a Distributed Cloud Subject to Percentile Constraints
Keerthana Boloor, Rada Chirkova, Tiia Salo, and Yannis Viniotis

Research Track 5: Service Measurement

Dynamic Fractal Clustering Technique for SOAP Web Messages
Dhiah Al-Shammary and Ibrahim Khalil

Enhancing Penetration Testing with Attack Signatures and Interface Monitoring for the Detection of Injection Vulnerabilities in Web Services
Nuno Antunes and Marco Vieira

Provisioning Norm: An Asymmetric Quality Measure for SaaS Resource Allocation
M. Brent Reynolds, Kenneth M. Hopkinson, Mark E. Oxley, and Barry E. Mullins
Research Track 6: Workflow Management
Automated Attribute Inference in Complex Service Workflows Based on Sharing Analysis
Dragan Ivanović, Manuel Carro, and Manuel Hermenegildo

Semantic Notions of Weakly Correct AND/XOR Business Workflows Based on Partial Synchronization
Akhil Kumar, Anup K. Sen, Meda H. Sundari, and Amitava Bagchi

OPQL: A First OPM-Level Query Language for Scientific Workflow Provenance
Chunhyeok Lim, Shiyong Lu, Artem Chebotko, and Farshad Fotouhi

Research Track 7: Service Composition
Top-k Web Service Compositions Using Fuzzy Dominance Relationship
Karim Benouaret, Djamal Benslimane, Allel Hadjali, and Mahmoud Barhamgi

Bridging the Gap between Semantic Web Service Composition and Common Implementation Architectures
Fuyuki Ishikawa, Satoshi Katafuchi, Florian Wagner, Yoshiaki Fukazawa, and Shinichi Honiden

Exception Diagnosis for Composite Service Based on Error Propagation Degree
Yu Dai, Lei Yang, Bin Zhang, and Zhiliang Zhu

Research Track 8: Service Quality Modeling
A Game Theoretic Approach for Analyzing the Efficiency of Web Services in Collaborative Networks
Babak Khosravifar, Mahsa Alishahi, Jamal Bentahar, and Philippe Thiran

A Composed Approach for Automatic Classification of Web Services Robustness
Rui Oliveira, Nuno Laranjeiro, and Marco Vieira

Modeling and Analysis of Dependability Attributes of Service Computing Systems
Jiwei Huang, Chuang Lin, Xiangzhen Kong, and Yemei Zhu

Evaluating Feedback Ratings for Measuring Reputation of Web Services
Shangguang Wang, Zibin Zheng, Qibo Sun, Hua Zou, and Fangchun Yang
Research Track 9: Workflow Modeling

Modelling Workflow Executions under Role-Based Authorisation Control ....................................................... 200
  Ligang He, Kewei Duan, Xueguang Chen, Deqing Zou, Zongfen Han,
  Ali Fadavinia, and Stephen A. Jarvis

Detecting Concurrency-Related Problematic Activity Arrangement
in WS-BPEL Programs ........................................................................................................................................ 209
  Yitao Ni, Lu Zhang, Zhongjie Li, Tao Xie, and Hong Mei

Precise Mappings between Business Process Models in Versioning Scenarios ................................................. 218
  Christian Gerth, Markus Luckey, Jochen M. Küster, and Gregor Engels

APPLICATIONS AND EXPERIENCES TRACKS

Applications and Experiences Track 1: Workflow Management

How Physical Objects and Business Workflows Can Be Correlated ................................................................. 226
  Andreas Wombacher

Undoing Event-Driven Adaptation of Business Processes ..................................................................................... 234
  Sébastien Mosser, Gabriel Hermosillo, Anne-Françoise Le Meur,
  Lionel Seinturier, and Laurence Duchien

Reference Models for Saas Oriented Business Workflow Management Systems .......................................... 242
  Bin Wu, Shuiguang Deng, Ying Li, Jian Wu, and Jianwei Yin

Applications and Experiences Track 2: Service Composition and Verification

Comparison of Bio-inspired Algorithms for Peer Selection in Services
Composition ......................................................................................................................................................... 250
  Jun Shen, Ghassan Beydoun, Shuai Yuan, and Graham Low

A Spring Based Framework for Verification of Service Composition ............................................................. 258
  Anshuman Mukherjee, Zahir Tari, and Peter Bertok

Flexible Ontology-Independent and QOS-Enabled Dynamic Web Services
Composition Using Google Distance ...................................................................................................................... 266
  R. Ding and D.N. Jutla
Applications and Experiences Track 3: Service Composition and Analysis

Towards an Automated Gap Analysis for E-Service Portfolios ......................................................... 274
Norman May, Ulrich Scholten, and Robin Fischer

Adaptive QoS-Aware Service Process Reconfiguration ................................................................. 282
Jing Li, Dianfu Ma, Xiupei Mei, Hailong Sun, and Zibin Zheng

Analyzing Fault-Impact Region of Composite Service for Supporting Fault Handling Process ........................................ 290
Azlan Ismail, Jun Yan, and Jun Shen

Applications and Experiences Track 4: Semantic Services

Reconciliation of Ontology Mappings to Support Robust Service Interoperability ........................................ 298
Asad Masood Khattak, Zeeshan Pervez, Khalid Latif, A.M. Jehad Sarkar, Sungyoung Lee, and Young-Koo Lee

Correlating Business Objectives with Services: An Ontology-Driven Approach .................................. 306
Lam-Son Lê, Aditya K. Ghose, Muralee Krishnan, Krishnajith M. Krishnankunju, and Konstantin Hoesch-Klohe

Discovering Linkage Patterns among Web Services Using Business Process Knowledge ........................................ 314
Mohammed Abu Jarour and Ahmed Awad

Applications and Experiences Track 5: Service Selection

Web Service Selection Based on Similarity Evaluation ........................................................................ 322
Hao Gao, Jun Yan, and Yi Mu

Reputation-Based Selection of Language Services ........................................................................... 330
Shinsuke Goto, Yohei Murakami, and Toru Ishida

Preference-Based Discovery of Dynamically Generated Service Offers ........................................... 338
Maciej Zaremba, Tomas Vitvar, Sami Bhiri, and Manfred Hauswirth

Applications and Experiences Track 6: Services Composition

Controlled Flexibility in Business Processes Defined for Service Compositions ..................................... 346
Malinda Kapuruge, Jun Han, and Alan Colman

CBBCM: Clustering Based Automatic Service Composition ................................................................ 354
Ying Ma, Liang Chen, Jian Hui, and Jian Wu

QoS-Driven Service Composition with Multiple Flow Structures ....................................................... 362
Wen-jun Li, Xi Li, Xiao-jun Liang, and Xiao-cong Zhou
Applications and Experiences Track 7: Service Pricing
Towards Pay-As-You-Consume Cloud Computing ................................................................. 370
  Shadi Ibrahim, Bingsheng He, and Hai Jin
Price Heuristics for Highly Efficient Profit Optimization of Service Composition .................... 378
  Xianzhi Wang, Zhongjie Wang, and Xiaofei Xu
Differentiated Service Pricing on Social Networks Using Stochastic Optimization ............................. 386
  Alexei A. Gaivoronski and Denis Becker

Applications and Experiences Track 8: Evolutionary Service Composition
Client Update: A Solution for Service Evolution ............................................................................. 394
  Meriem Ouederni, Gwen Salaün, and Ernesto Pimentel
Cultural Language Service: A Discovery, Composition and Organization ........................................... 402
  Arif Bramantoro and Toru Ishida
A Granular Concurrency Control for Collaborative Scientific Workflow Composition ............................ 410
  Xubo Fei, Shiyong Lu, and Jia Zhang

Applications and Experiences Track 9: Service Monitoring and Testing
Magnifier: Online Detection of Performance Problems in Large-Scale Cloud Computing ................. 418
  Haibo Mi, Huaimin Wang, Gang Yin, Hua Cai, Qi Zhou, Tingtao Sun, and Yangfan Zhou
Building a Service-Oriented Monitoring Framework with REST and Nagios ...................................... 426
  Gregory Katsaros, Roland Kübert, and Georgina Gallizo
Model-Based Testing of Service-Oriented Applications via State Models ......................................... 432
  Andre Takeshi Endo and Adenilso Simao

Applications and Experiences Track 10: Service Applications
IRTG: A Grid Middleware for Bioinformatics .................................................................................... 440
  Kamal Taha and Ramez Elmasri
OdinTools-Model-Driven Development of Intelligent Mobile Services ............................................... 448
  Andrew Meads and Ian Warren
Applications and Experiences Track 11: Service Quality Control

Fine-Grained Modeling of Web Services for Test-Based Security Certification ........................................456
Marco Anisetti, Claudio A. Ardagna, and Ernesto Damiani

Optimizing DaaS Web Service Based Data Mashups .................................................................464
Mahmoud Barhamgi, Chirine Ghedira, Djamal Benslimane,
Salah-Eddine Tbahriti, and Michael Mrissa

A New Approach for Quality Enforcement in Communities of Web Services ........................................472
Abdelghani Benharref, M. Adel Serhani, Salah Bouktif, and Jamal Bentahar

Applications and Experiences Track 12: Service Models

A Dependency-Aware Hierarchical Service Model for SaaS and Cloud Services .........................................480
Rui Wang, Yong Zhang, Shijun Liu, Lei Wu, and Xiangxu Meng

A Clustering Based Schema Matching Scheme for Improving Matching Correctness of Web Service Interfaces .................................................................488
Byoungoh Kim, Ho Namkoong, Dongman Lee, and Soon J. Hyun

Applications and Experiences Track 13: Quality Measurement

A Petri-Net Model for the Publish-Subscribe Paradigm and Its Application for the Verification of the BonjourGrid Middleware .................................................................496
Leila Abidi, Christophe Cérin, and Sami Evangelista

Measuring the Conceptual Coupling of Services Using Latent Semantic Indexing .................................................................504
Ali Kazemi, Ali Nasirzadeh Azizkandi, Ali Rostampour, Hassan Haghighi,
Pooyan Jamshidi, and Fereidoon Shams

A Metrics Framework for Evaluating SOA Service Granularity .................................................................512
Saad Alahmari, Ed Zaluska, and David C. De Roure

Applications and Experiences Track 14: Service Allocation

Jerrymouse: A Tool for a Flexible and Dynamic Distribution of Web Service Requests .................................................................520
Paulo S.L. de Souza, Bruno S. Façal, Marcos J. Santana,
Regina H.C. Santana, Jonathan de Matos, and Ed Zaluska

On-Line Real-Time Service Allocation and Scheduling for Distributed Data Centers .................................................................528
Shuo Liu, Gang Quan, and Shangping Ren
An Enhanced PROMETHEE Model for QoS-Based Web Service Selection .................................................. 536
Raed Karim, Chen Ding, and Chi-Hung Chi

INDUSTRY TRACKS

Industry Track 1: Enterprise Management
Towards a Service-Oriented Component Model for Autonomic Management .................................................. 544
Yoann Maurel, Philippe Lalanda, and Ada Diaconescu
Managing Enterprise IT Systems Using Online Communities ........................................................................... 552
Maja Vukovic and Vijay K. Naik
Managing Software Assets in a Global Enterprise .............................................................................................. 560
Matthew A. McCarthy and Lorraine M. Herger

Industry Track 2: Services Applications
Intelligent Scheduling Algorithm and Application in Modernizing Manufacturing Services .................................. 568
Yaojun Chen, Liang-Jie Zhang, and Qian Wang
Application Framework for Efficient Development of Sensor as a Service for Home Network System ............ 576
Masahide Nakamura, Shuhei Matsuo, Shinsuke Matsumoto, Hiroyuki Sakamoto, and Hiroshi Igaki

Industry Track 3: Services Development Frameworks
Leveraging Cloud Platform for Custom Application Development ...................................................................... 584
Nianjun Zhou, Da Peng An, Liang-Jie Zhang, and Chih-Hong Wong
Capability Diagnostics of Enterprise Service Architectures Using a Dedicated Software Architecture Reference Model ................................................................................................................. 592
Alfred Zimmermann, Helge Buckow, Hans-Jürgen Groß, Oliver F. Nandico, Gunther Piller, and Karl Prött
REFINTO: An Ontology-Based Requirements Engineering Framework for Business-IT Alignment in Financial Services Organizations ........................................................................................................... 600
Emem Umoh, Pedro R. Falcone Sampaio, and Babis Theodoulidis

Industry Track 4: Services Selection and Composition
Providing Map and GPS Assistance to Service Composition in Bioinformatics .................................................. 608
Wei Tan, Jia Zhang, Ravi Madduri, Ian Foster, and David De Roure
Building FCA-Based Decision Trees for the Selection of Heterogeneous Services
Stephanie Chollet, Vincent Lestideau, Philippe Lalanda, Yoann Maurel, Pierre Colomb, and Olivier Reynaud

Composition Context Matching for Web Service Recommendation
Nguyen Ngoc Chan, Walid Gaaloul, and Samir Tata

ServiceMap: Providing Map and GPS Assistance to Service Composition in Bioinformatics
Wei Tan, Jia Zhang, Ravi Madduri, Ian Foster, David De Roure, and Carole Goble

Industry Track 5: Services Testing
An Event-Driven Approach for Runtime Verification of Inter-organizational Choreographies
Aymen Baouab, Olivier Perrin, and Claude Godart

Verify Enterprise System Implementation through Business Process Model-Based Test Suite Generation
Bing Shao, Qinhua Wang, Chengrui Ren, Miao He, and Jin Dong

A Novel Test and Evaluation Scheme for WS-Management Protocol and Its Implementation
ZhiHui Lu, XiaoHong Gao, and Jie Wu

Industry Track 6: Services Monitoring
A Real-Time Risk Assessment and Mitigation Engine Based on Dynamic Context
Sinem Güven and Catalin Mihai Barbu

A Business Centric Monitoring Approach for Heterogeneous Service Composites
Geetika T. Lakshmanan, Paul T. Keyser, Aleksander Slominski, and Francisco Curbera

Sustainable Service Level Agreements
Thiago Barroero, Gianmario Motta, and Marco Durante

Industry Track 7: Business Process Management
Towards a Constraint-Based Framework for Dynamic Business Process Adaptation
Zan Xiao, Donggang Cao, Chao You, and Hong Mei

Uniform Modeling of Resources and Business Processes Using Business Entities
Rong Liu, Anil Nigam, Zhe Shan, and Frederick Wu
LISEP: A Lightweight and Extensible Tool for Complex Event Processing .................................................. 701
Ivan Zappia, David Parlanti, and Federica Paganelli

Industry Track 8: Case Studies
SOMP: Service-Oriented Multi Processors ......................................................................................... 709
Chao Wang, Junneng Zhang, Xuehai Zhou, Xiaojing Feng, and Xiaoning Nie
Sensor Service Selection through Switch Options .................................................................................. 717
Sehin Cem Geyik, Boleslaw Szymanski, Petros Zerfos, and Abbe Mowshowitz

WORK-IN-PROGRESS TRACKS

Work-in-Progress Track 1: Services Discovery
QoS-Based Distributed Service Selection in Large-Scale Web Services ............................................. 725
Limin Pan, Liang Chen, Jian Hui, and Jian Wu
An Enhanced QoS Prediction Approach for Service Selection .......................................................... 727
Liang Chen, Yipeng Feng, Jian Wu, and Zibin Zheng
A Clustering Method for Web Service Discovery .................................................................................. 729
Jian-xiao Liu, Ke-qing He, Jian Wang, and Da Ning
Using 3-Way Satisfaction for Web Service Selection: Preliminary Investigation .......................... 731
Erbin Lim, Philippe Thiran, Zakaria Maamar, and Jamal Bentahar
Discovering Service Similarity by Testing ............................................................................................. 733
Joshua Church and Amihai Motro
A Multi-dimensional Social Tagging Method for Semantic Web Services ............................................ 735
Da Ning, Ke-qing He, Rong Peng, and Jian-xiao Liu

Work-in-Progress Track 2: SOA
An Architecture for Managing and Delivering Trustworthy Context-Dependent Services .................. 737
Naseem Ibrahim, Mubarak Mohammad, and Vangalur Alagar
On-Demand Service-Oriented Architecture and Standardization ...................................................... 739
Fei He, Keging He, Peng Liang, and Jian Wang
Cloud Service Delivery across Multiple Cloud Platforms .................................................................... 741
Ines Houidi, Marouen Mechtri, Wajdi Louati, and Djamal Zeghlache
An Ontology Based Service Creation Process ..................................................................................... 743
Budan Wu and Junliang Chen
MyDeepWeb: An Integration Service for Your OWN Deep Web Data ............................................. 745
Sherif Sakr and Anna Liu
Work-in-Progress Track 3: Services Coordination

A Model-Driven BPM Approach for SOA Mediation Information System Design in a Collaborative Context ............................................................... 747

Wenxin Mu, Frédéric Bénaben, Hervé Pingaud, Nicolas Boissel-Dallier, and Jean-Pierre Lorre

Towards a Flexible Event-Driven SOA Based Approach for Collaborating Interactive Business Processes ................................................................. 749

Da Zhu, Yang Zhang, Bo Cheng, and Junliang Chen

Integration of Business and Manufacturing Processes through Industrial Machinery as a Service Approach ...................................................... 751

Virgilio Gilart-Iglesias, Francisco Maciá-Pérez, Diego Marcos-Jorquera, Francisco J. Mora-Jimeno, and Juan A. Gil-Martínez-Abarca

Policy Driven Services Coordination for Building Social Networks Based Applications ............................................................... 753

Javier A. Espinosa-Oviedo, Genoveva Vargas-Solar, José Luis Zechinelli-Martini, and Christine Collet

Decentralized Service Management Based on Homophily for Self-Adaptive SOMAS ............................................................. 755

E. del Val, M. Rebollo, and V. Botti

SPARQL-to-SQL Query Translation: Bottom-Up or Top-Down? ............................................................. 757

Andrey Kashlev and Artem Chebotko

Work-in-Progress Track 4: Services QoS

Policy Consolidation and Privacy-Vital Information Flow Control in Composite Services ............................................................. 759

Yang Zhang and Jun-Liang Chen

Multi Domain-Specific Modeling of the Security Concerns of Service-Oriented Architectures ............................................................. 761

Juan Pedro Silva Gallino, Miguel de Miguel, Javier F. Briones, and Alejandro Alonso

On the Performance of Hosting Web Services on Mobile Devices ............................................................. 763

Rabeb Mizouni, M. Adel Serhani, Rachida Dssouli, Abdelghani Bentharref, and Ikbal Taleb

SlapOS: A Multi-Purpose Distributed Cloud Operating System Based on an ERP Billing Model ............................................................. 765

Jean-Paul Smets-Solanes, Christophe Cérin, and Romain Courteaud

Towards Financial Planning as a Service ............................................................. 767

Jochen Martin, Simon Caton, Tobias Conte, and Christof Weinhardt
