## Foreword

## Chapter 1 - Collaborative Design

Global Engineering Alliance for Research and Education (GEARE) - A Comprehensive Study & Intern Abroad Program for Engineering Students  
*Albers, Albert; Burkardt, Norbert; Becke, Claudia* ........................................... 20

Collaborative Projects - a global survey on problems and benefits  
*Eriksen, Kaare* ................................................................. 26

English Corner: Fostering International Student Collaboration Through E-learning Technologies  
*Bull, Karen Lisa; McCartan, Sean; Beck, Andy* .................................................. 32

*Grimheden, Martin; Berglund, Anders* .................................................. 38

Design at a distance  
*Holden, Georgina Merial* ................................................................. 43

Collaborative Student Centred Learning - Intellectual Property for Product Designers  
*Humphries-Smith, Tania Maxine* .................................................. 49

London Design Map: Design Schools  
*Green, Stephen Timothy* ................................................................. 55

Initiating engineers to distant collaboration: which scenario for a collaborative platform?  
*Masclet, Cédric; Boujut, Jean-François* .................................................. 61

cADP Reloaded - New Experiences and Validation Approaches in Interdisciplinary Student Project Collaboration  
*Richter, Marc; Geis, Christian; König, Christina; Rambo, Jürgen* .... 67

The Use of Open Briefs in Design Skills Development  
*Collins, Annick Louise* ................................................................. 73
Creating a Better World

Integrative Engineering Design using Product Data Management Systems in Education
Gerhard, Detlef; Grafinger, Manfred ................................. 79

University Industry Collaboration in the Development of PLC training material for use in the design and development of Quarry Plant
McKeag, Dennis; Blakley, Jim; Hanson, Nigel ......................... 85

Projects into industry - taking academic ideas on parametric modelling to industry
Dowlen, Chris .............................................................. 91

Splitwave Twintip Hydrofoil Kiteboard: an example of a design project developed towards commercial realisation in conjunction with an MSc in Enterprise
Dowlen, Chris; Townsend, Barney ................................. 97

Finding the Right Type of Industrial Collaboration for the Right Type of Studio Project
Liem, Andre .............................................................. 103

Design Interventions: Economic Development and Educational Enhancement
Wood, Bruce .............................................................. 108

Chapter 2 - Educational Philosophy

Education of T-shaped Technical Innovation (MBA) Managers
Gerson, Philips M.; Ramond, Bruno ................................. 116

The development of an on-line learning & teaching resource for the socio-centric aspects of sustainable design
Conrad, Franziska; Humphries-Smith, Tania Maxine ............ 122

Creating a better world? Can we relate this to students from the post-modern generation?
Dowlen, Chris .............................................................. 128

Two professions divided by an un-common language using ‘CoLab’ to improve collaboration between industrial designers and engineering designers
Evans, Mark; Pei, Eujin; Campbell, Ian: .......................... 134
Videocasts in engineering and design education
Covill, Derek Graham; Katz, Tim; Gill, Deshinder Singh;
Morris, Richard .................................................................140

Design Education: a 'new' paradigm, design and provenance
Crisp, Alan Roy; Dale, James; Arthur, Lesley .........................146

From school to Higher Education; Reviewing the pedagogic transfer in Product Design
Morris, Richard; Tim, Katz; Derek, Covill .............................151

Elements and Ways of Integrated Product Development Education - Current and Future Challenges
Hepperle, Clemens; Eben, Katharina G M; Lindemann, Udo ...........157

Chapter 3 - New Pedagogy

Assessment of theses - A comparison of current approaches practiced in engineering education
Watty, Robert; Kreimeyer, Matthias ........................................164

Use of Computer Moderated Quizzes to develop a 'real-time engagement' culture.
Awcock, Graeme John .........................................................170

Mapping Elements of Assessment for Learning within a Global Design Studio
Bohemia, Erik; Harman, Kerry ............................................176

Anonymous marking in Design - How does that work?
Southee, Darren John ..........................................................182

Using Audio Technology for Student Feedback
Trimingham, Rhodes ..........................................................187

From practice to theory. Has our design research teaching influenced our education and research practice?
Baggerud, Bjørn; Boks, Casper ..............................................193

Towards a New Disciplinary Framework for contemporary Design Practice
Dykes, Tommy; Rodgers, Paul Anthony; Smyth, Michael .............199
### Creating a Better World

# Table of Contents

Sketching to Solid Modelling Skills for Mechanical Engineers  
*Robb, David A; Flora, Harminder; Childs, Peter R N* .......................... 275

Undergraduate Project on Conceptual Design of a Small Screw Compressor  
*Machado, Laura; Gowree, Erwin Ricky; Ondoa, Georges; Hashi, Mohamed, Gaind, Roshan; Kovacevic, Ahmed* .......................... 281

Introduction and Evaluation of The Peer Evaluation Tool  
*Kallela, Timo; Lehtonen, Timo; Luostarinen, Pasi, Riitahuhta, Asko; Lanz, Minna* ................................................................. 287

Product Designers get inspired and delighted by an engineering imagery database  
*Langeveld, Lau; Vergeest, Joris* .................................................. 293

A Case Study on Engineering Faculty Design Projects  
*Begum, Margahan; Crawford, Adam* .............................................. 299

## Chapter 4 - Educational Cultures

Cross-educating in design, business and engineering: Challenges of coherence and relevance  
*Koria, Mikko; Karjalainen, Toni-Matti; Salimäki, Markku* .................. 306

Innovation Design Engineering: Non-linear progressive education for diverse intakes  
*Hall, Ashley; Childs, Peter* ......................................................... 312

Taking on Australian Industrial Design Education: Current Practice and Future Directions  
*Trathen, Stephen Douglas; Varadarajan, Soumitri* ............................. 318

Recycling Traditional Designs. A Practical Approach  
*Al-Faisal, Hanan Faisal* ............................................................. 324

A new breed of design students and their attitude to technology  
*Koohgilani, Mehran* ................................................................. 330

Comparing the transfer process from High School to Higher Education in the UK with Iran  
*Mortezaei, Seyed-Reza; Morris, Richard; Katz, Tim* ............................ 336
Chapter 5 - Creativity

Developing creative engineers: a design approach to engineering education  
de Vere, Ian ........................................ 342

Design vs. re-design, and how to innovate  
Leblanc, Tatjana ....................................... 348

The Use of Creativity methods for Industrial Design problem solving,  
Moghaddam, Nasrin; Ajdari, Alireza .......................... 354

Stimulating a creative approach to learning about a manufacturing process  
Loy, Jennifer Elizabeth ...................................... 360

The Future of Design Synthesis Education  
Acuña, Alejandro ............................................. 365

Exercise of Imagination to Think About New Designs  
Lloveras, Joaquim ........................................... 370

Understanding Innovativeness by Encapsulating Creativity in Higher Engineering Education  
Berglund, Anders .............................................. 376

Chapter - 6 Sustainable Design

Ecodesign tools in design education  
Lofthouse, Vicky ............................................ 384

The Design of Eco Board Games as an umbrella approach to Sustainable Product Design Education  
Boks, Casper; McAlone, Tim .................................. 390

Ecodesign integration in education: the utility of an existing multidisciplinary design methodology  
Bergen, Jan Peter; Verhulst, Elli .............................. 396

The significance of purchasing behavioural characteristics on sustainable design education of students  
Hunt, Clive; Reynolds, Tim James ............................ 402
Enhancing the receptivity of designers and skills of designers and product planners to environmentally-considered new product development
McCain, Holly; Lemon, Mark; Ford, Peter .......................... 408

Capacity for sustainability: the changing contexts of design education
O’Rafferty, Simon; Curtis, Hannah; O’Connor, Frank ............... 414

Teaching sustainable design through a creative approach to technology and recycling
Sazhina, Elena; Manzanares, Elizabeth ............................... 420

The changing role of the industrial designer with the growing sustainability imperative
Loy, Jennifer Elizabeth ................................................. 426

Making Intelligent Products for a Better World
De Grande, Guido; Baelus, Chris ..................................... 431

Sustainability and Design Education: From Products to Practices
Marchand, Anne .......................................................... 436

Chapter 7 - Design and Emotion

To learn to feel: developing tactual aesthetic sensitivity in design education
Sonneveld, Marieke H.; Schifferstein, Hendrik N.J. .................... 442

Educational studies in relation between subjective concepts and Abstract Forms
Khorsandian, Shadman; Moghaddam, Nasrin; Tashakorinia, Zahra ............................... 448

Basic sculpturing methods as innovatory incentives in the development of aesthetic form concepts.
Thomsen, Bente Dahl .................................................. 454

Let’s get emotional: Introducing undergraduate Product Design students to the concept of emotional design
Maclachlan, Mary; Harrison, David; Wood, Bruce ...................... 460
Creating a Better World

Studying Emotional Design in Ladies Wrist Watches
Tolooei, Nata; Alanchari, Narges ................................. 466

VIS-able: a Visual Research Gallery to provide inspiration for Beautiful (and therefore Usable) objects
Grundy, Catherine Anne; Blake, Andrew ........................ 472

Style-Branding, Aesthetic Design DNA
Eves, Bob; Hewitt, Jon ............................................. 478

Cultural Affordance of Products: Coverage within Industrial Design Education
Razzaghi, Mohammad; Ramirez, Mariano ........................ 483

Comparing Creative behaviours observed when 2D and 3D sketch modelling and when using CAD
Musta’amal, Aede Hatib; Norman, Eddie; Hodgson, Tony ............................. 489

International Design Studio Project: Australian Findings on Preparing Industrial Design Students for the Global Emergin Economy
Novoa, Mauricio .................................................. 495

Aesthetic Emotions and the Evaluation of Architectural Design Styles
Hernan Pablo Casakin; Mastandrea Stefano ........................ 501

Emotional Design: Study of the colour preferences of Iranian users
Khodadadeh, Yassaman; Rostamkhani, Sadaf ........................ 507

Chapter 8 - Socially Relevant Design

Creating better Communities: Involving Design Students in Regeneration Projects
Schaber, Friedemann ............................................... 514

Applying design thinking to Regeneration
Reid, Iain; Harrison, David; Wood, Bruce; Clements, Michael ....... 520

“It’s a Honda! for me...” An exploratory student project on branding and product design for the older adult population
Person, Oscar; Warell, Anders; Karjalainen, Toni-Matti; Rahe, Ulrike .......................... 526
