Cultivating Communities of Practice via Learning Study for Enhancing Teacher Learning ........ 1138
Eric C. K. Cheng, The Hong Kong Institute of Education, Hong Kong

ELEMENTS OF A SUCCESSFUL ONLINE COMMUNITY OF PRACTICE: AN INVESTIGATION OF THE INFORMATION TECHNOLOGY COORDINATORS (ITCs) GROUP ......................................................... 1153
Fariza Khalid, University of Nottingham, Malaysia

Improving Doctoral Candidates’ Persistence in the Online Dissertation Process .................. 1162
Amanda Szapkiw, Liberty University, USA

Revolutionising Engineering Education: Make It FUN ......................................................... 1167
Aditya Bhainagar, Drona Edutronics, India

Investigating the Problem Solving Experiences of Students in Actionscript 3 Programming Language ................................................................. 1168
Serkan Cankaya, Abdullah Kuzu, Anadolu University, Turkey

eLearning Methodology Master Class ................................................................................. 1170
Duy Huynh, Beyondedge, Australia

Implementing Synectic and Practice Model in the Teaching Methodology of Entrepreneurships Subject in Creating a Competitive Entrepreneur ......................................................... 1171
Janita Meitalu, Widyatama University, Indonesia

Learning with Laptops: The Impact of the ILP on gendered primary classrooms............. 1180
Laura Morris, Melbourne Grammar School (Grimwade), Australia

Project Based Learning: Collaboration for Integration of Technology & Relevancy Within Teacher Education ........................................................................ 1192
Trudi Nelson, Patricia Bruinsma, The University of South Dakota, USA

The Use of iPads for Educational Purposes: A Study of Lecturer and Student Engagement within Mobile Learning Environments ......................................................... 1196
Andrew O’Loughlin, Deakin University, Australia

To Group or Not to Group? Innovative Ways of Grouping in an Interactive Learning Environment? .......... 1199
Pamela Theroux, State University of New York/Queensland University of Technology, Australia, Australia

Conceptual Framework for Understanding the “Serious-Game”: Application of the Learning Model “S2P” ......................................................................................... 1204
Salah Eddine Bahji, High School of Technology (Sale) - Mohammed V-Agdal University (Rabat), Morocco

The ‘Lost City’: Development of a National-Level On-Line Mystery Game
Using Freeware and Low Budget Technology ........................................................................ 1210
Tom Benjamin, New South Wales Department of Education & Training, Australia

A 2-Dimensional Programmable Arcade-Style Computer Game for Teaching Python Programming to Lower Secondary School ........................................................................ 1217
Eva Hartati, Universiti Sains Malaysia, Malaysia

Comparison of Learning Experiences and Outcomes Between a Serious Game-Based and Non-Game-Based Online American History Course ......................................................... 1223
Taryn Hess, 21st Century Learning Solutions, USA; Glenda Gunter, University of Central Florida, USA

A Suggestion of an Initiative Game Which Encourages Students to Consider Pro-Social Behavior1229 Hiroki Murakawa, Kansai University, Japan

Designing Games for Learning: Challenges of Transferring a Course into a Summer School Format ........ 1235
Envisioning new learning environments through gaming. A 21st Century Digital Workforce
Apprenticeship. .......................................................... 1237
Joshua Squires, Mark Evans, MoWerks Learning, USA; Lucas Jensen, Michael Orey, The University of Georgia, USA
A Checklist for Evaluating the Potential of Mod Tools in Developing Role-Playing Science
Learning Game .......................................................... 1245
Hong-Zheng Sun Lin, Guey-Fa Chiong, National Taiwan Normal University, Taiwan
Use of Learning Portals in Education in the Arab Region........................................... 1252
Mohammad Akhela Khanum, Shameen Fatima, King Saud University, Saudi Arabia
Investigating Online Student Roles as a Basis for
Understanding Learning and Development in a Learning Community ........................................... 1257
Elaine Khoo, Michael Forret, University of Waikato, New Zealand
Crowdsourced Grading: Exploring the Validity and Effects of Student-Author and Student-
Evaluated Textbooks .......................................................... 1266
Patrick O’Shea, Appalachian State University, USA; Jennifer Killd, Old Dominion University, USA
Developing an epistemic community in the classroom as teacher development............. 1272
Xuell Wang, Beaumie Kim, Jason Wen Yau Lee, Mi Song Kim, National Institute of Education, Singapore
E-book Instruction and Its Effects on Teaching and Learning ........................................... 1282
Chiryn Chen, Metho, University, Taiwan
The Relationship between E-book Users’ Learning Performance and Related Factors ............... 1292
Chiryn Chen, Metho, University, Taiwan
Preparing students for the job application process using the marketing effectiveness of a positive
digital footprint. .......................................................... 1303
Mark Hein, Yongso International School of Seoul, Korea (South)
Western Teachers as Beginning Learners of Arabic: The Evolution of Their Interest and Beliefs
about it as a Foreign Language ........................................... 1310
Hazem Kasem, Emirates College for Advanced Education, United Arab Emirates
Flexible Learning in a Workplace:
Blended a Motivation to a Lifelong Learner
in a Social Network Environment ........................................... 1314
Jaitip Na-songkhla, Chulalongkorn University, Thailand
The Development of the System to Solve the Problems of PBL ........................................... 1320
Makio Fukuda, Osaka International University, Japan; Michinori Yamashita, Rissho University, Japan; Toshiyuki Ueyama,
Chiba University of Commerce, Japan; Minae Nishimoto, Kwaesel Gakuen University, Japan
Multiple paths to common outcomes ........................................... 1326
Cheryl Howard, Faculty of Information Technology, Monash University, Australia
An Integrated eLearning Model: Indications of a changing organizational culture at the University
of the Western Cape (UWC) ........................................... 1333
Juliet Stoltenkamp, Jeptha Mapiwa, E-Learning Unit, University of the Western Cape, Cape Town, South Africa
Using Log Data of E-Learners Obtained by Educational Data Mining to Provide Relevant
Information to Individual E-Learners ........................................................................... 1335
Shigeyoshi Watanabe, Takehiro Nakamura, University of Electro-Communications, Japan
Is the assumed necessity to give learner control in distance education an ‘urban legend?’ ...... 1342
Jean Claude Callens, Katho, Belgium
The absence of structure as affordance to support critical reflection? ........................................... 1346
Jean Claude Callens, Katho, Belgium; Jan Elen, K.U.Leuven, Belgium
A Constructionist Approach to Computer Science ........................................... 1352
Stefano Federici, University of Cagliari, Italy; Linda Stern, The University of Melbourne, Australia
‘In between physio and all that goes on’: netbooks and learning in the hospital environment... 1362
Julie Green, Amy Nisselle, Shaun Hanns, Royal Children’s Hospital Education Institute, Australia; Tony Jones, The University of Melbourne, Australia
A Comparison of Context Effects on the Organizational Strategy Use ........................................... 1367
Junya Kawai, Graduate School of Mathematics Education, Tokyo University of Science, Japan; Hiroshi Kato, The Open
University of Japan, Japan; Yoshiro Yamamoto, Tokyo University of Science, Japan
An Alternative Approach to e-Learning: Emotion-Based e-Learning ........................................... 1373
Hyegil Kwon, Cheongju National University of Education, Korea (South); Pyung Jun Yoo, SooMyung Women’s University, Korea (South)
Students’ use of eLearning strategies and their perceptions of eLearning usefulness ........................................... 1379
Paul Lam, Jack Lee, Mavis Chan, Carmel McNaught, The Chinese University of Hong Kong, Hong Kong
Problem-Based Learning Approach in Multimedia Foreign Language Learning .......................... 1389
Lyu Fang Lin, National Taiwan Ocean University, Taiwan

Descriptive Writing: Does Dynamic Visual Help? ................................................................. 1393
Mona Masood, Universiti Sains Malaysia, Malaysia

Designing Course Material Using Interactive Authoring Software Application for Hard-of-Hearing Students ................................................................. 1402
Miki Namatame, Tsukuba University of Technology, Japan; Munee Kitajima, National Institute of Advanced Industrial Science and Technology, Japan

The Students’ Access to World Wide Web Information to Foster their Learning .......................... 1409
Ural Salem, Universitas Tanjungpura, Indonesia

Modern information and communication technologies and teaching/learning English as the second or a foreign language .................................................. 1417
Vera Tauchmanova, Faculty of Education, University of Hradec Králové, Czech Republic

A New Approach for a New World ................................................................. 1423
Duy Huynh, Beyondedge, Australia

Nursing Informatics Education Using ICT System in Training for Nurse Administrators ............... 1424
Yukie Majimo, Faculty of Liberal Arts and Sciences, Osaka Prefecture University, Japan

The teacher’s laptop in the classroom as a hub for learning .................................................. 1432
Judy Porr, Lorrae Ward, University of Auckland, New Zealand

How Adaptive Learning Can Keep Every Student on Track to Graduation ............................... 1440
Jose Ferreira, Knewton, USA

Learning Style and Interaction Preference: Application of Moore’s Typology .............................. 1445
Genevieve Johnson, Curtin University of Technology, Australia

Web Based Reading Support System Adapting to the Vocabulary of Individual Users .................. 1451
Shoji Mizobuchi, Kinki University, Japan; Kazuaki Ando, Kagawa University, Japan

Remote laboratory for FET amplifier ......................................................................................... 1457
Dog A. H. Samuelsen, Olaf H. Graven, Buskerud University College, Norway

Innovative Approaches to Integrated Interactive e-Learning for Working Professionals: Pepperdine Online and DeVry Online .................................................. 1464
Barbara Son, DeVry University Online, USA; Robert Goldstone, California State University, Los Angeles, USA

E-Learning through Transmedia Storytelling. How the Emerging Internet-Based Participatory Cultures in China can be Co-Opted for Education .................................. 1469
Filippo Gilardi, James Reid, University of Nottingham Ningbo China, China

Learning podcasts by doing podcasts ............................................................................................ 1481
Karen Lusnia, Ma, Elena Delgado Ponce de León, Universidad Nacional Autónoma de México, Mexico

What Do the Participants Gain from Exposure to Technology Enabled Active Learning (TEAL): A High School Case Study .................................................. 1487
Ruey Shieh, Kainan University, Taiwan

Computer Simulation Method in Learning Mobile Communications Engineering .......................... 1495
Balamuralithara Balakrishnan, Universiti Tunku Abdul Rahman, Malaysia

Integrated Simulation Game in Teaching Theoretical Concepts .............................................. 1505
George Balonggay, Institute of Technical Education, Singapore

Switching Roles: a critique of the constructivist perspective on teachers and students - the case of online role-play simulation games .................................................. 1515
Roni Linser, Fablusi P/L, Australia

Sun Tracker: A K-12 Solar Energy Simulation .............................................................................. 1519
Irene Polycarpou, Cymdi Rader, Chad Kembel, Colorado School of Mines, USA

Location, location, location: Chemistry Simulation Design Influence on Engagement and Interaction Patterns ........................................................................................................ 1529
Susan Rodrigues, The University of Dundee, Australia; Eugene Gvozdenko, The University of Melbourne, Australia

Jello Tectonic Plates for Learning Geoscience ......................................................................... 1538
Lara Ruffolo, Beaumie Kim, Mi Song Kim, Jason Wen You Lee, National Institute of Education, Singapore

Beyond Immersion – Meaningful Involvement in Virtual Worlds ............................................ 1548
Andrew Cram, John Heidelberg, Macquarie University, Australia

Virtual Research Arena: Presenting Research in 3D Virtual Environments ................................. 1558
Mikhail Fominykh, Ekaterina Prasolova-Förland, Program for learning with ICT, Norwegian University of Science and Technology, Norway
