Proceedings of the
ASME FLUIDS ENGINEERING DIVISION
SUMMER CONFERENCE
– 2009 –

VOLUME 1
PART C

FLOW MANIPULATION AND ACTIVE CONTROL
FLUID POWER
FLOW APPLICATIONS IN AEROSPACE
NON-INVASIVE MEASUREMENTS IN SINGLE AND MULTIPHASE FLOWS
FLUID-STRUCTURE INTERACTION AND FLOW-INDUCED NOISE IN INDUSTRIAL APPLICATIONS
GAS-PARTICLE FLOWS
CFD VERIFICATION AND VALIDATION
APPLICATIONS IN COMPUTATIONAL FLUID DYNAMICS

presented at
2009 ASME FLUIDS ENGINEERING DIVISION SUMMER CONFERENCE
AUGUST 2–6, 2009
VAIL, COLORADO USA

sponsored by
THE FLUIDS ENGINEERING DIVISION, ASME

ASME
Three Park Avenue  New York, N.Y. 10016
PART C

4TH SYMPOSIUM ON FLOW MANIPULATION AND ACTIVE CONTROL
FEDSM2009-78025 ........................................................................................................ 1527
Coupling Active and Passive Flow Control Strategies for Simplified Car Models
   Charles-Henri Bruneau, Emmanuel Creusé, Delphine Depeyras, Patrick Gilliéron, and
   Iraj Mortazavi
CVD Simulation of the Submerged Cofferdams Effect on the Operation of the Future Tocoma Hydroelectric Power Plant
Milan Stanko, Andrea Shmueli, Miguel Asuaje, Frank Kenyery, Gonzalo Montilla, María de los Ángeles Toscano, and Richard Sánchez

Study on Performance and Flow Condition of Cross-Flow Wind Turbine With a Symmetrical Casing
Junichiro Fukutomi, Toru Shigemitsu, and Hiroki Daito

Utilisation of Bio-Fuels in Aviation Gas-Turbine Engines: An Experimental and Theoretical Evaluation
Jason Cromarty and Sylvester Abanteriba

3RD INTERNATIONAL SYMPOSIUM ON FLOW APPLICATIONS IN AEROSPACE
Unsteady Flow Field in the Wake of an Airfoil
Hamed Sadeghi and Mahmoud Mani

Influence of Tip Shape on Structure of Wing-Tip Vortex at Low Reynolds Numbers
Djavad Kamari and Mehran Tadjfar

Dynamics of Swirling Flow in a Dump Combustor at Elevated Pressures
N. P. Yadav and Abhijit Kushari

Aerodynamic Degradation of Iced Airfoils: Experiments and CFD Simulations
Z. Chara, V. Horak, and D. Rozehnal

Dynamic Behaviors of Butterfly Wing and Their Application to Micro Flight Robot
Tadatsugu Imura, Masaki Fuchiwaki, and Kazuhiro Tanaka

Instability and Breakdown of a Zero Net Mass-Flux Jet in a Blasius Boundary Layer
Jonathan H. Watmuff

SYMPOSIUM ON NON-INVASIVE MEASUREMENTS IN SINGLE AND MULTIPHASE FLOWS
The Measurement on Micro-Jet Impulse Based on Laser Interferometer
Zhu Ping, Liya Hou, and Weiyi Zhang

X-Ray Flow Visualization of a Circular Hydraulic Jump
Megan R. DiVall and Theodore J. Heindel
FEDSM2009-78249
Direct Numerical Simulation of Four Way-Coupled Gas-Solid Flow and Deposition in a Turbulent Channel Flow
Goodarz Ahmadi, Hojjat Nasr, and John B. McLaughlin

FEDSM2009-78282
Evaluation of Magnitude and Location of Solid Particle Erosive Wear in an Elbow Geometry Using CFD Analysis
Quamrul H. Mazumder

FEDSM2009-78284
Transport and Deposition of Particles and Fibers in Human Tracheobronchial Tree
L. Tian, G. Ahmadi, P. K. Hopke, and Y.-S. Cheng

FEDSM2009-78286
Numerical Study of Angle of Incidence Effect on Particle Deposition Over a Square Cylinder in a Channel Using Lattice-Boltzmann Method
S. Jafari, M. Salmanzadeh, M. Rahnama, and G. Ahmadi

FEDSM2009-78312
Simulation of Aerosol Deposition in 90° Square Cross Section Bends Using LES
Nemat Baghernezhad, Omid Abouali, and Goodarz Ahmadi

FEDSM2009-78357
Effect of Entrance Position on Particle Dispersion in Bidirectional Vortex Flow
S. R. Dehghani, M. H. Saidi, A. A. Mozafari, and A. Ghafourian

FEDSM2009-78385
A k-ε Model for Particle-Laden Turbulent Flows
J. D. Schwarzkopf, C. T. Crowe, and P. Dutta

FEDSM2009-78460
Discrete Element Simulations of Granular Flow in a Pebble Bed Reactor
Xiang Zhao, Trent Montgomery, and Sijun Zhang

FEDSM2009-78493
Application of the Immersed Boundary Method and Direct Numerical Simulation for the Heat Transfer From Particles
Zhi-Gang Feng and Efstathios E. Michaelides

SYMPOSIUM ON CFD VERIFICATION AND VALIDATION

FEDSM2009-78075
CFD Software Applications for Transcritical Free Surface Flow
Saira F. Pineda, Armando J. Blanco, and Luis Rojas-Solórzano

FEDSM2009-78142
V&V Application on Private and U. S. Government Projects
Kelly J. Knight, Joel Pettier, and Jon M. Berkoe
Three Dimensional Simulation of Rayleigh-Bénard Convection for Rapid Microscale Polymerase Chain Reaction
Radha Muddu, Victor M. Ugaz, and Yassin A. Hassan

Study of Planform-Shape Influence on MAV Wings
Hessan Esmaeili Monir and Mehran Tadjfar

A CFD-Based Investigation of Boundary Layer Skew in the Hub Region of a Low Speed Axial Compressor and its Influence on Performance and Losses
M. Hilgert and M. Böhle

Development and Validation of an Augmentation to the Commercial CFD Software FLUENT™ Enabling the Tracking of Ellipsoidal Particles in Low Reynolds Number Flows
Kevin T. Shanley and Goodarz Ahmadi

Fibrous and Spherical Particle Transport and Deposition in the Human Nasal Airway: A Computational Fluid Dynamics Model
Kevin T. Shanley, Goodarz Ahmadi, Philip K. Hopke, and Yung-Sung Cheng

Numerical Simulation of Optimized Forebay of Pumping Station
Li Cheng and Jiren Zhou

Computational Study of Taper Effect of a Hydrofoil at Different Reynolds Numbers on the Length of Cavity and Lift and Drag Coefficients
Mohammad J. Izadi and Mahdi Mirtorabi

Numerical Investigation of Turbulent Flow Around a Stepped Airfoil at High Reynolds Number
Masoud Boroomand and Shirzad Hosseinverdi

Numerical Simulation of Confined Swirling Flows of Oldroyd Fluids
Sahand Majidi, Kayvan Sadeghy, and Ashkan Javadzadegan

Multiphase Modelling of the Steel Grade Transition in a Continuous Casting Tundish
Jesús Manuel Fernández Oro, Carlos Santolaria Morros, Javier Rodríguez Somoano, and Mónica Álvarez Ordieres

Influence of the Pressure Load in the Efficiency of a Longitudinal Ventilation System in Road Tunnels
Mónica Galdo-Vega, Carlos Santolaria-Morros, Jesús Manuel Fernández Oro, and Katia Maria Argüelles-Diaz
FEDSM2009-78544 ................................................................. 2311
Direct Interaction of Fluid-To-Fluid in an Unsteady Ejector With a Zero-Degree Conning Radial Diffuser
   Amer Khalil Ababneh and Charles Garris, Jr.

FEDSM2009-78545 ................................................................. 2319
CFD Simulation of Temperature Distribution in a Room With Various Under Floor Heating System Models
   Mohammad J. Izadi and Kamyar Makaremi

FEDSM2009-78572 ................................................................. 2331
Simulation of Eccentric-Shaft Journal Microbearing by DSMC
   Sheng Wang, Kangbin Lei, Xilian Luo, Kiwamu Kase, Elia Merzari, and Hisashi Ninokata

Author Index ........................................................................... 2341
