The 14th annual NSTI Nanotechnology Conference and Expo is part of the TechConnect World Annual Conference & Expo which includes the parallel sister events of: TechConnect Summit 2011, Clean Technology 2011, Microtech 2011, Bio Nanotech 2011, and the 10th Workshop of Compact Modeling 2011. The combined interdisciplinary conferences focus on moving emerging applied technologies from research to market to society.
Table of Contents

Program Committee ................................................................. xv
NSTI Nanotech 2011 Vol. 1-3 Topics ............................................. xix

Nanoscale Materials Characterization

Maintaining a Stable Engineered Nanomaterials Process through Material Characterization during the Nano Product Life Cycle ................................................................. 1
A.W. Salamon

Single Particle Resolution Zeta Potential Technique ................................................................. 4
D. Griffiths, W. Bernt, P. Hole, J. Sullivan, A. Malloy, B. Carr

Using proton NMR to characterize functionalized single-walled carbon nanotubes ................................................................. 8
D.J. Nelson

Dispersing carbon nanotubes in polymer nanocomposites: detecting individually dispersed tubes ................................................................. 12
V. Tishkova, G. Bonnet, P. Puechmont, E. Flahaut, W.S. Bacs

Synthesis of Polypyrrole within Polymeric Nanotemplates in Aqueous Environment ................................................................. 16
X. Li, C. Maladier-Jugroot

Mechanical properties of PECVD Si3N4 thin films with rapid thermal annealing using finite element simulation ................................................................. 20
C-Y Chiang, Z-K Huang, K-S Chen

Laser Postionization Secondary Neutral Mass Spectrometry for Analysis on the Nanometer-Scale – the Followup ................................................................. 24

Nano-mapping Material Interfaces via Hot Electrons ................................................................. 28
K.E.J. Goh, C. Troade

Passive Microrheology: Non Intrusive Measurement of the Emulsions Stability ................................................................. 32
C. Tisserand, M. Fleury, L. Brunel, P. Bru, G. Meunier

Passive Microrheology: Non Contact Measurement of Viscoelastic Properties of Biopolymers ................................................................. 36
C. Tisserand, A. Kotzev, M. Fleury, L. Brunel, P. Bru, G. Meunier

A Novel Method for Measuring the Sizes and Concentrations of 5-500 nm Particles in Colloidal Suspensions ................................................................. 41
H.G. Van Schooneveld, M.R. Litchy, D.G. Grant

Structural and Mechanical Changes in Heart Mitochondria of Rat by AFM ................................................................. 45

Nano-imprinting technology applied in pentacene films ................................................................. 49
M-H Chang, W-Y Chou

Microstructure and tribological properties of CrTiAlN nanoscale composite coatings on 65Mn steels deposited by multi arc ion plating technology ................................................................. 53
Z. Cai, P. Zhang

Role of Hard Segment Induced Nanosized Domain on Concentrated Solutions and Bulk Properties ................................................................. 60
K.W. Lem, D.S. Lee, J.R. Haw, G.S. Song, S. Curran, S. Sund, Z. Iqbal, C. Brumlik

Fabrication and Characterization of pH-Responsive, Nanoparticle-Attached Porphyrins for Singlet Oxygen Production ................................................................. 64
W. Li, S. Courtney, N. Gandra, E.D. Ellis, P.T. Tiyyagura, R. Gao

A Study on Fabrication of Cellulose Nanofibers in Water ................................................................. 66
K.-Y. Kim, W.-Y. Jeong, D.-Y. Lim

Preparation of Ag/TiO2/bamboo charcoal composite based on chemical and electrochemical synthesis: characterization and antibacterial study ................................................................. 70
S. Pookboonmee, K. Laohhasurayotin

siRNA Delivery Using Biodegradable Nanoparticles for Breast Cancer Therapy ................................................................. 74
S. Abbasi, P. Arghya, K. Afshan, S. Prakash

Attachment of Quantum dots and gold nano particles on ZnO nanorods and nanotubes ................................................................. 77
P. Hari, J. Seay, H. Liang

Development of high performance MWCNTs-dispersed-media ................................................................. 81
N. Tarumoto
Development of the high performance GFRP with multiwall carbon nanotubes
N. Tarumoto

Magnetic Nano-Structures Growing by Laser Ablation Deposition
L. Allocca, C. Bonavolontà, A. Morone, M. Valentino, M.F. Verrastro, V. Viggiano

Effect of surface reconstruction on the growth of self-assembled Ag nanostructures on Si(111) surfaces
D.K. Goswami

Influence of oxygen vacancies on electronic and magnetic properties
K. Srinivas, P. Venugopal Reddy

Uniqueness of intraband plasmon dispersion of a single layer graphene

The Effects of gamma-ray Radiation on n-channel MOSFET
M.A. Iqbal

Residual Stress Dependency on Wafer Location of Thin Film PECVD Silicon Nitride
J.R. Godin, S.-H.P. Won, P.M. Nieva, L.N. Phong

Synthesis and characterization of La_{0.75}Sr_{0.25}Cr_{0.3}Mn_{0.7}O_3 nanoparticles using combustion method
V.S. Reddy Channu, R. Holze, E.H. Walker Jr., R.R. Kalluru

Electromagnetic wave shielding effectiveness of SWNT-coated, transparent, conducting panels
I.W. Nam, H.K. Lee, J.B. Sim, S.M. Choi

Physical stability of nanoparticle dispersion
M. Fleury, Y. Lefeuvre, C. Tisserand, L. Brunel, G. Meunier

Scanning Probe Microscopy Study of M13 on Graphite
N. Steinsultz, P. Sharma

Controllable growth of ZnO nanorod-carbon nanotube heterojunction arrays by low-temperature wet chemical bath deposition method for using in dye solar cell
F. Dehghan Nayeria, E. Asl Soleimania, S. Darbaria, J. Sabbaghzhadehb, S. Mohajerzadeh

A Novel Approach for Modeling Mechanical Behavior of Porous Media
B.S. Altan, M. Mollamahmutoglu

Carbon Nano Structures & Devices
Highly Organized Two and Three Dimensional Singlewalled Carbon Nanotubes-Polymer Hybrid Architectures
B. Li, M.G. Hahm, Y.L. Kim, S. Kar, Y.J. Jung

Effective carbon nanotube materials and design strategies for CNT-based electronics
S. Sinton

Carbon nanotubes transistors based Selective Gas sensors : from laboratory to mass production
L. Gorintin

Continuous Growth of Vertically Aligned Carbon Nanotubes Forests
R. Guzman de Villoria, B.L. Wardle

Carbon Nanotube Arrays with Tunable Wettability and Their Applications
A. Indrat Aria

Role of interlayer interaction in the mechanical properties of a multi-walled carbon nanotube and a single-walled carbon nanotube bundle
K. Talukdar, A.K. Mitra

Interfacial Shear Strengths of Carbon Nanotube Reinforced Polymer Composites
J.M. Wernik, B.J.C. Orrwell-Mott, S.A. Meguid

Highly conductive nanotube-filled polymers with exceptional properties
T. Tiano, R. Czerw, R. Coffin, R. Adams

Introduction to Raman Spectroscopy as a Characterization Tool for Carbon Nanotubes, Graphene, and other Carbon Nanostructures
M. Wall, J. Hodkiewicz

Electrical Conductivity Control in SPNT Process
K.C. Nguyen, H.P. Dinh, T.T. Tran

Platelet graphite nanofibers synthesized by the pyrolysis of poly(ethylene glycol)/hydrochloric acid mixture and nickel catalyst
W-H Lin, Y-Y Li
Synthesis of platelet carbon nanofibers by an injection CVD method and their applications in hydrogen storage

H.C. Wu, Y.Y. Li

Decorated Single- and Multi-Walled Carbon Nanotubes Aiming H2S Sensing

C. Verissimo, M. Ding, A. Abbaspourrad, A. Star, S. Moshkalev

A field-emission X-ray source using an anisotropically focused electron beam

S. Jung, D. Kim, S.K. Seol

Increased Sensitivity of Carbon Nanotube Sensors by Forming Stable and Low Resistance CNT/metal Electrode

D. Jeon, D. Park, S. Lee

Fabrication and characterization of thin-film transistors based on printable functionalized single-walled carbon nanotubes

J. Zhao, J. Lin, Z. Cui

Graphite Layer Nano-composites with Polyurethane Matrix

M. Czajka, R.A. Shanks

A field-emission X-ray source using an anisotropically focused electron beam

S.Jung, D.Kim, S.K. Seol

Increased Sensitivity of Carbon Nanotube Sensors by Forming Stable and Low Resistance CNT/metal Electrode

D. Jeon, D. Park, S. Lee

Fabrication and characterization of thin-film transistors based on printable functionalized single-walled carbon nanotubes

J. Zhao, J. Lin, Z. Cui

Graphite Layer Nano-composites with Polyurethane Matrix

M. Czajka, R.A. Shanks

Tearing Graphene

M.J.B. Moura, M. Marder

Controllable Sequential Low Temperature Plasma Assisted Growth of Vertical Multi-wall & Single-wall CNTs

Z. Kolahdouz, S. Darbari, S. Mohajerzadeh

Visible Photoluminescence Emission from Chemically Synthesized MWCNT/TiO2 Hybrid Nanostructure

R. Paul, P. Kumbhakar, A.K. Mitra

Magnetic Carbon-Nanotube Thermoplastic Polyurethane Composites

I. Kong, S. Spoljaric, R.A. Shanks

Improved Nanoreinforced Composite Material Bonds with Potential Sensing Capabilities

D. Starikov, A. Price, T. Glenn, F. Attia, M. Fischer, M. Bokadoum, A. Bensaoula

Rapid Determination of Purity of Carbon Nanotubes

M. Wall, J. Hodkiewicz

Nanoparticle Synthesis & Applications

Production of High Surface Area Oxygen Sensitive Powders by Na Flame Synthesis

L. Mann

Nanoscale Plasma Surface Modification of Powders

Roth, A. Sonnenfeld, Ph.R. von Rohr

Rifampicin nanosuspension production using microfluidic device

Re-dispersible ZrO2 powders for transparent high RI nanocomposite

S.H. Wang, Y.S. Sun, A.S.T. Chiang

Synthesis of Nano-Sized Ferrite Materials for H2 Generation from High Temperature Water-Splitting Reaction

R. Bhosale, R. Shende, J. Puszynski

Engineered Pigment Nanoparticles: Bottom-up Synthesis, Characterization, and Performance Properties

R. Carlini, D.A. Makeiff, C.G. Allen, S.J. Gardner, F. Paraguay-Delgado, M. Mulac, P. Li

Synthesis, tuning of electrical conductivity and self-assembly of niobium doped titania nanoparticles

Y. Liu, J. Rathousky, T. Bein, D. Fattakhova-Rohlfing

Dielectric Constant, Loss and Breakdown for Ultem containing BaTiO3 Nanoparticles

Plasmonic Biosensors with biocompatible nanosilver

G.A. Sotiropu, T. Sannomiya, A. Teleki, J. Voeroes, S.E. Pratsinis

Silver Chloride - Wool Nanohybrid Materials: Synthesis and Properties

J.H. Johnston, F.M. Kelly

Removal of 10-nm contaminant particles from a wafer surface with supersonic CO2 particle beam

I-H Kim, E-J Kim, J.W. Lee

Surface modification of powders and nanostructure deposition in the afterglow of a low power barrier discharge at atmospheric pressure

A. Sonnenfeld, P. Reichen, Ph.R. von Rohr
Synthesis of nanocrystalline ZnO powder using ultrasonic atomization technique and application of its thick films for highly toxic gases .................................................. 267
L.A. Patil

Synthesis of Molybdenum Nanoparticles by RF Plasma ........................................ 271
J.-I. Park

Preparation and characterization of PPy-CD nanospheres with a core-shell nanostructure .................................................. 274
S.M. Shang

Wet organometallic chemistry for palladium nanoparticles synthesis performed in an organic media and under supercritical conditions in microreactors .................................................. 277
S. Desportes, B. Tidona, Ph.R. von Rohr

Hydrothermal Synthesis and Properties of Hierarchical ZnO and Eu-doped ZnO 3D Structures .................................................. 281
C. Verissimo, A. Abbaspourrad, K. Sunter, F. Capasso, S. Moshkalev, D. Weitz

Synthesis of nanocrystalline nitrate enclathrated zeolite with intermediate framework structure between sodalite (SOD) and cancrinite (CAN) .................................................. 284
J.-Ch. Buhl, S. Cramm

Green and Continuous Hydrothermal Synthesis of Nanophosphors for Biomedical Applications .................................................. 288
R. Gruar, S. Kellici, C. Tighe, J. Durr

Controlling the Size and Morphology of Silver Nanoparticles: Role of Chemical Routes .................................................. 292
T. Ahmad

Electrical conductivity studies of nanocrystalline Dy3+ doped BaMoO4, synthesised by sol-gel process .................................................. 299
P. Jena, N. Nallamuthu, M. Venkateswarlu, N. Satyanarayana

Simple, open air method to synthesize monodisperse and size selective PbSe quantum dots .................................................. 303
Y. Pan, J. Lombardi

Characterization of Catalyst Effect on Carbon Nanoparls .................................................. 307
S. Pacley, M. Theodore

One Pot vs Two Steps Synthesis of Fluorescent Gold Nanoparticles and Capping with Thiolated Organic Linker .................................................. 311
S.K. Rastogi, B.D. Denn, A.L. Branen

The morphology and properties of silica nanoparticles synthesized by sol-gel reaction in elastomer matrix .................................................. 315
M. Lipinska, M. Zaborski

Novel optical property of Ag@PPy nanoparticles .................................................. 319
S. Ye, S. Chen, Y. Lu

Tuning the Gas Pressure Discharge of Nanoenergetic materials by Boron and Carbon Nanotube Additives .................................................. 323
K.S. Martirosyan, L. Wang, D. Luss

Synthesis, Characterization and Sampling of GaP Nanoparticles for Light Emissive Devices .................................................. 327
S.L. Pyshkin, J. Ballato, S. Belevschii, E. Rusu, A. Racu, D. Van DerVeer

Bimodal size distributed silver nanoparticles on copper substrate: in situ heat treating under air and protective atmospheres .................................................. 331
J. Sopousek, J. Bursik, J. Zalesak, Z. Pesina

Application of zinc and magnesium oxides nanoparticles in crosslinking of carboxylated butadiene-acrylonitrile rubber .................................................. 335
M. Lipinska, M. Zaborski

Optical Properties of Ternary Alloyed Cd0.7Zn0.3Se Semiconductor Nanocrystals .................................................. 339
I.-H. Chen, K.-W. Wang, S.-R. Chung

Enhancement in photoluminescence emission in the UV-visible region from chemically synthesized silver doped ZnS nanoparticles .................................................. 343
R. Sarkar, P. Kumbhakar, A.K. Mitra

Inverter Circuits Based on Low-Temperature Solution-Processed ZnO Nanoparticle Thin-Film Transistors .................................................. 347
K. Wolff, F.F. Vidor, U. Hilberingmann

Color tunable nanophosphors .................................................. 351
G.A. Sotiriou, M. Schneider, S.E. Pratsinis

Monitoring of glass transition at a polymer surface by localized surface plasmon resonance .................................................. 355
A. Kaan Kalkan, R.K. Putla

Self-assembled fluorescent magnetic nanoprobes for multimode-biomedical imaging .................................................. 359
E-K. Lim, S. Haam

Europium-doped gadolinium sulfide nanoparticles as a multimodal imaging agents for bio-application .................................................. 363
J.K. Park, S.J. Lee
Hydrothermal approach to a carbon graphite encapsulated FeCo nanocrystals for diagnosis, hyperthermia therapy and siRNA delivery ..........................367
J.K. Park, J.J. Jung, P. Subramaniam, B. Shah, C.J. Kim, J.K. Lee, K.B. Lee

Biological synthesis of copper nanoparticles using plant extract ......................................371

Nanostructured Coatings, Surfaces & Films

Silicon and Germanium Nanocrystal Thin Films Prepared Using Innovative Nonaqueous Electrophoretic Deposition .................................................................375
M. Haag, J. Sipe

Nanostructured Organically Modified Silica Thin Films for Functional Surfaces ................379
M. Bayindir, A. Yildirim, H. Budunoglu, M. Yasman, H. Deniz, M.O. Gulter

Impact of Temperature and Humidity on Superhydrophobicity of Polyurethane/Organoclay Nanocomposites ..............................................................383
Y.H. Yeong, A. Steele, I. Bayer, C. Lakeman, G. De Combarieu, E. Loth

Selective Separation of Oil from Water via Superhydrophobic Magnetic Foams ..........387
D. Fragouli, I. Bayer, G. Bertoni, P. Calcagnile, G.C. Anyfantis, R. Cingolani, A. Athanassiou

Coatings of Polymers with TiO2 Nanoparticles by Sonochemical Method ......................391
N. Perkas, A. Gedanken

Rendering superhydrophobic laser-induced rough surfaces by transferring on them Teflon nanoparticles ..................395
A. Athanassiou, I. Bayer, F. Brandi, R. Cingolani

Adhesion strength and superhydrophobicity in polyurethane/organoclay nanocomposites .....399
A. Steele, I. Bayer, Y.H. Yeong, E. Loth

Super-Hydrophobic Nano-Composite Films .................................................................403
F. Helmrich

Nano-Scale Surface Coatings .............................................................................407
S. Coulson

Graphene Nanoplatelet Membranes for Aerospace Applications ....................................411
S. Rawal, J. Ravine, R. Czerw

Biocompatible Nanomembranes based on PEGylation of Cross-Linked Self-Assembled Monolayers .................................415
N. Meyerbroeker, W. Eck, M. Zharnikov

Electrodeposition of Rhenium-Tin Nanowires .......................................................419
A. Naor-Pomerantz, N. Eliaz, E. Gileadi

On-demand release of corrosion-inhibiting molecules from layerd double hydroxide film formed on magnesium alloy ......................................................421
T. Ishizaki, K. Teshima, N. Saito

A comparative study over the photocatalytic activity of nanostructured TiO2 layers for air purifiers ..........................425
M.V. Diamanti, B. Del Curto, MP. Pedeferri, A. Cigada

Upconverting Nanophosphors for High Temperature Sensing Applications ........429
X. Guo, H. Zhao, H. Song, Q. Chen, K.K. Li, Y.K. Zou, H. Jiang, C. Combs, V. Narayanaswamy, N. Clemens

Stable Superhydrophobic TiO2-based Nanobelt Films with Controllable Transparency and Adhesion ..........................433
Y.K. Laiand, J.J. Gong, Y.X. Tang, D.G. Gong, C.J. Lin, Z. Chen

Cell adhesion behaviors on polyethylene terephthalate surface modified by surface-wave plasma-initiated graft polymerization ........................................437
A. Nina, T. Ishizaki, N. Saito

Nanoscale tailoring of the surface properties of biomedical devices by layer-by-layer technique .................................441
V. Chiono, I. Carmagnola, F. Boccafoschi, P. Gentile, C. Tonda-Turo, M. Del Pilar Camacho Leal, M. Ballarini, G. Ciardelli

Synthesis and Characterization of Poly(urethane-imide)-POSS nanocomposites ..............445
D. Gnanasekaran, B.S.R. Reddy

Broadband infrared reflecting thin films inspired by quasi-ordered photonic structures in squid tissue ..................449

Fabrication of the Two-Dimensional Nanostructure on Dye-Doped Polymer Film by Multiple Holographic Recording ...............................................................452
B-Y Huang, K-Y Yu, C-T Kuo
White-Light Emission Characteristics of Nanoporous Silicon Membrane by Post-Treatment of Supercritical Fluid Technology ................................................................. 456
J.-C. Lin, M.-K. Hsu, H.-T. Hou, J.-Y. Wu

Enhancement of the magneto-optical activity via surface plasmon resonance on Au-Co nanocomposite thin films ................................................................. 460
K. Yang, C. Claverio, J. Skuza, R.A. Lukaszew

Nanoporous Materials through Anodizing of Iron in F-containing Organic Electrolytes ................................................................. 464
A. Jagminas, K. Mazeika, V. Klimas

A novel strategy for fabrication of mesoporous crystalline tin dioxide films with large pores and fully crystalline walls ................................................................. 468
D. Fattakhova-Rohlfing, J. Ratousky

Simultaneous determination of guanine and adenine on nano-poly(4-aminothiophenol) patterns modified ITO electrode ................................................................. 472
W.A. El-said, T.-H. Kim, J.-W. Choi

Odd-Even Effect in Self Assembly and Phase Transition of Alkanethiols Monolayers (SAMs) on Au (111) Surfaces ................................................................. 476
L. Ramin, A. Jabbarzadeh

Reinforcing Kevlar by Thin Outer Graphene Shell ................................................................. 480
K.S. Martirosyan, M. Zyskin

Charge Confinement in Silicon Nanowires by Surface Functionalization ................................................................. 484
Y.-C. Shih, J.-H. Lee, C.-T. Lin, C.-S. Chen, K.-C. Wu

Photo Catalytic Activity of Coated PET Fabrics with Synthesised Nano TiO2 & ZnO: A Comparative Study ................................................................. 488
A. Elahi, L. Torkian, R. Khajavi

Composite Materials

Characterization of airborne particles released by the combustion of Nanocomposites ................................................................. 491
C. Motzkus, C. Chivas-Joly, E. Guillaume, S. Ducourtieux, L. Saragoza, D. Lesenechal, T. Macé

Release-ability of nano fillers from different nanomaterials ................................................................. 495
F. Tardif, L. Golanski, A. Guiot, M. Pras

Mechanical Reinforcement of Epoxy Resins using Magnetic Aligned Halloysite ................................................................. 499
S. Mendoza-Bello, S. Barrientos-Ramirez, G. Montes de Oca, L. Flores-Santos, A. Gonzalez-Montiel

Polymer Nanocomposites from Functionalized Polyolefins ................................................................. 503
D.R. Paul

Enhancing mechanical properties of epoxy resin while reducing viscosity using “liquid nano-reinforcement” ................................................................. 507
K. Zhong

Characterization of palladium nanoparticles embedded in a wool substrate ................................................................. 511
C. Fonseca-Paris, J.H. Johnston

Fabrication and Testing of Three-Dimensionally Reinforced Carbon Nanotube Based Laminated Nanocomposites ................................................................. 515
D. Askari, M.N. Ghasemi-Nejhad

Magnetic assisted self-assembly ................................................................. 519
M. Furlan, M. Lattuada

Characterization of Nanoparticle Release from Polymer Nanocomposites Due to Fire ................................................................. 523
N.M. Uddin, M.R. Nyden

Rapid one-step chemical synthesis of polyaniline-manganese ferrite nanocomposites without external initiator and mechanical agitation ................................................................. 527
E.F.C. Chimamkpam, T. Schweizer, A. Schilling, J.M.F. Ferreira

Synthesis of a CNT Nano-Coating on Carbon Fibers: its Role on Strength, Toughness & Damage Tolerance of Polymer Matrix Composites ................................................................. 531
G. Prabhu-Gaunkar

New Fluorescent Hybrid Materials Comprising Quantum Dots, Organic Fluorophores and Natural Fibre Substrates ................................................................. 534
A.J. Zeller, J.H. Johnston
New Evidence Towards the Release of Airborne Carbon Nanotubes when Burning Nanocomposite Polymers
D. Fleury, B. R'Mili, A. Janes, A. Vignes, J.A.S. Bomfim, S. Sinesi, J.X. Bouillard

Surface modification of SiO₂ micro spheres by NiFe₂O₄ nanoparticles
I. Prakash, N. Nallamuthu, P. Muralidharan, M. Venkateswarlu, N. Satyanarayana

Synthesis and ac conductivity studies of PEO+LiClO₄+La₂O₃+MoO₃ nanocomposite polymer solid electrolyte
H. Zois, A. Kanapitsas, C.G. Delides

Degradable elastomer composites containing layered silicate
M. Lipinska, M. Zaborski

Thermal decomposition behavior of clay-phenolic nanocomposite prepared by in situ polymerization
T. Periadurai, C.T. Vijayakumar, M. Balasubramanian

Influence of Carbon Nanoparticles on Thermogravimetric Properties of Epoxy Nanocomposites
H. Zois, A. Kanapitsas, C.G. Delides

Control of Pore Size in Nanoporous Ultralow Dielectric
I-Y Kang, S-H Song, H-W Rhee

Preparation and Characterization of Antibacterial TiO₂/Poly[acrylamide-co-(acrylic acid)] Composite Hydrogel
K. Boonpavanitchakul, D. Yiamsawas, W. Kangwansupamonkon

Retarded Growth of Nano-sized Carbide Particles in Liquid Metals at 1500°C
J. Kim, J. Kim, M. Seo, J. Kim, S. Kang

Computer Simulation of Graphene-Metal Composite Induced by Radiation
A.M. Ilyin, G.W. Beall

Influence of Silica Nanoparticles on the Thermal Transitions and Structure of PHBA-PET Nanocomposites
F. Miranda, A. Acevedo

The Effect of Various Binder Additions on the Magnetic Properties of Soft Magnetic P/M Cores

Polymer & Soft Nanotechnology
Using liquid crystals to improve the performance of luminescent solar concentrator
M. Debije

Controlling pH responsive polymersome assembly
R. Pearson, G. Battaglia

Magnetically Induced Drop Movement on Nanorough Micropatterned Nanocomposites
A. Millionis, D. Fragouli, G.C. Anyfantis, I. Bayer, R. Cingolani, A. Athanassiou

Fabrication of nanostructured microworms for sensor applications
J.L. Yague, J.M. Dubach, G. Ozaydin-Ince, H.A. Clark, K.K. Gleason

Silica–Polycrylate Nanocomposite Pressure Sensitive Adhesives
R. Shanks

Poly(butyl terephthalate)/oxytetramethylene + oxidized carbon nanotubes hybrids: mechanical and tribological behavior
W. Brostow, G. Broza, T. Datashvili, A. Kopyniecka

Spontaneous Liquid Flow in Microfluidic Systems by Gradual UV Irradiation of the Hybrid Polymer/TiO₂ Nanorods Channels
A. Athanassiu

Surface Modification of Iron Oxide (Fe₂O₃) Micro- and Nano-particles with Stimuli Responsive Polymers
E.S. Vasquez, W.B. Nicholson, K.B. Walters

Layer by layer control of wettability in nanocomposite films
F. Villaforita Monteleone

Durability Study of Nanophased Jute-Based Green Composites
M.K. Hossain, M.W. Dewan, M. Hosur, S. Jeelani

Role of Hard Segment Induced Nanosized Domain on Dilute Solution Properties of Ether Based Thermoplastic Polyurethanes
K.W. Lem, D.S. Lee, J.R. Haw, G.S. Song, S. Curran, S. Sund, Z. Iqbal, C. Brumlik

POSS–Substituted Hyperbranched Polyester Blends with Thermoplastic Polyurethanes
S. Spoljaric, R.A. Shanks
Microstructures and electrochemical properties of Si-Ni based alloys ................................................................. 718
J-J Song

Overview of four energy storage techniques ........................................................................................................... 722
C. Chukwubuikem

(Au, Ag, Ti)-SiO₂ Core-Shell Nanoparticles Based Polymer Nanodielectrics for Energy Storage
Applications .......................................................................................................................................................... 726
N. Badi, R. Singh, A. Bensaoula, S. Rittikulalitichai, T. Thanasarakhan, T. Randall Lee

Optimization study of Supercapacitor electrode material composition and thickness for enhanced
performance of the Supercapacitor ..................................................................................................................... 730
A.P. Ranade, D.Y. Jung, B.G. Sammakia, T. Elertsen, T. Davis

Carbon-supported platinum and nickel nanoparticles for CO capture in hydrogen fuel cells ....................... 734
D. J. D. Durbin, D. Plana, D. J. Fermin, C. Malardier-Jugroot

Design and Fabrication of Hydroelectric Fuel Cell System for Household Power Application ....................... 738
K.C. Nguyen, L.T. Chung

Investigation of a short stack PEM electrolyzer based on a nanosized IrO₂ anode electrocatalyst ............... 740
A. Di Blasi, S. Siracusano, V. Baglio, N. Briguglio, A. Stassi, V. Antonucci, A.S. Aricò

Strain effect on the hydrogen storage capacity of graphite oxide .................................................................... 744
J. Kim, M. Seo, J. Kim, S. Kang

Synthesis of TiO₂ Nanotube Arrays for Hydrogen Production from Photo-Assisted Water Splitting
Reaction ............................................................................................................................................................. 747
A.Y. Kawde, A. Vats, R.V. Shende, J.A. Puszynski

Increased Bandwidth of Mechanical Harvester ................................................................................................. 751
B. Ahmed Seddik, G. Despesse, E. Defay

B.M. Osenge, J.P. Abraham, G.S. Mowry

Adsorption-Enhanced Compressed Air Energy Storage ..................................................................................... 759
T.F. Havel

Study of the factors effect on the power storage and generation of a nano-biomimetic membrane electrode-
assembling (NBMEA) for battery/fuel cell dual applications ........................................................................ 763
E.T. Chen, C. Ngatchou

Dynamic Model Refinement for Buoyant Energy Storage Technology ............................................................ 767
T.B. Thornbrue, R. Ghorbani

Generation of clean energy by applying parametric resonance to quantum nonlocality clocking ............ 771
S.Y. Berkovich

Nanomaterials for Clean & Sustainable Technology

Tailoring Electron Diffusion in Electrospun Metal Oxide Nanostructures for Dye-Sensitized Solar Cells .... 775
R. Jose, P.S. Archana, A. Le Viet, E. Naveen Kumar, M.M. Yusoff, S. Ramakrishna

Nanostructured TiO₂ for Photovoltaic Hydrogen Production ........................................................................ 779
M. Patel

A Comparative Study of Nanofluids Exchanging Heat with a Thermal Energy Reservoir ........................... 783
J.A.R. Parise

Photonic crystals with nanocellulose .................................................................................................................. 787
G. Picard, D. Simon, Y. Kadiri, J-D. Lebreux, F. Gozayel

Trends in Nanotech patenting for “clean energy” applications .................................................................... 791
V. Veeckind, R. Absalom, R. Michalitsch, J. Hutado-Abir, C. Kallinger

Flowerlike Ceria Microspheres Materials for Bioethanol-H₂ Production and VOCs Decontamination .... 795

Characterization of direct ethanol fuel cell (DEFC) fabricated with porous SiC ceramic membrane ......... 799
K.M. Kang, Y.H. Yun, J.S. Choi

Realization of Silicon Nano-structured layers on Glass substrates suitable for light emitting diodes ........... 803
S. Darbazi, M. Shahmohammadi, S. Mohajerzadeh, M.D. Robertson

Exploiting Nanotubes in Fuel Cells .................................................................................................................. 807
M. Boyang

Fabrication chitosan nano fibers membrane via electrospinning ................................................................. 810
Sustainable production of 1,2-propanediol: Clean hydrogenolysis of glycerol over highly stable Cu-Ce/SiO₂ nanocatalyst
Z. Huang, F. Cui, J. Chen, C. Xia

The Characteristics and Photocatalytic Activity of Visible Light Driven N-doped TiO₂
H-J Hsu, Y-T Lin and Y-H Lin

Photocatalytic Activity of Coated PET Fabrics with Synthesised Nano TiO₂
A. Elahi, R. Khajavi, L. Torkian

Octadecylyphosphonic acid Langmuir-Blodgett films and their modification by hyperthermal hydrogen projectile
R. Dey

Improve Environmental and Economic Performance with Streamlined Life Cycle Assessment (SLCA)
J.A. Shatkin, W. Larsen

Boehmite nanometric with high surface area synthesized from a microwaves hydrothermal method
M.R. Quirino, M.J.C. Oliveira, D. Keyson, L. Gama, J. Bosco

ALD for sustainable future – building a cleaner world from sub-nanometer level
M. Toivola, T. Pilvi

Near-field infrared nanoscopy of phonon resonant silica and silica-coated gold nanoparticles
Y. Abate
