Mechanical Properties of Materials and Information Technology

Selected, peer reviewed papers from the 2011 International Conference on Mechanical Properties of Materials and Information Technology (ICMPMIT 2011), September 10-11, 2011, Chongqing, China

## Chapter 1: Mechanical Engineering and Materials Science

A Preconditioned Gauss-Seidel Iterative Method for Linear Complementarity Problem in Intelligent Materials System
B.X. Duan, W.Y. Zeng and X.P. Zhu .......................................................... 3

The Recombination of Equipment Maintenance Support Personnel Based on the Capability and Mission Model
Q.B. Yue and X. Zhao............................................................................... 9

Study on Prediction of Gas Balance Schedule in Steel Plant
G.H. Lou, X.J. Shang and S.J. Li................................................................. 14

Application of Frequency Converter Driver in Long Belt Conveyor
G.H. Lou, H.L. Yin and S.J. Li................................................................. 19

Impact Assessment of Job Machine Factors on Scaling Parameters
Y. Chen ................................................................................................. 23

Comprehensive Identification of Sintered Carbide Durability in Machining Process of Bearings Steel 100CrMn6
A. Panda, J. Duplák, J. Jurko and M. Behún .................................................. 30

Estimation of the Temperature-Dependent Thermal Conductivity of Multi-Phase Materials
H.F. Zhang, P.X. Li and L.Q. He................................................................. 34

The Method of Logging Curves Fusion Based on Multi-Scale Wavelet Transform
Y.L. Yu, Y. Bai, J.Q. Wang and W.Q. Li....................................................... 40

Design, Analysis and Test for Micro-Mechanical Piezoresistive Accelerometer

The Temperature Monitory System of Electric Cable Interface
Y. Zhou, A.M. Yang, L.Y. Bai and Y.X. Liu.................................................. 52

The Spread-Mathematical Model of Special-Shaped Steel Wire during the Rolling
B.J. Wang, W.K. Sun and Y.J. Wang.......................................................... 56

Strain Distribution Characteristics in the Rolling Process of Shaped Wires
B.J. Wang, W.P. Zhang and Y.J. Wang....................................................... 64

Dynamic Adaptive Weight Multi-Scale and Multi-Structure Morphological Edge Detection in Anterior Chamber OCT Images
S.W. Huang, A. Zhang, X.L. Tian and Y.K. Sun ........................................... 70

Temperature Field in Electric Control Unit of Diesel Engine and its Optimization Design
Z.J. Liu, Y.L. Lei and Y.J. Li....................................................................... 76

The Preparation and Evaluation of α-CSH/β-TCP Combined Artificial Bone
K. Mao, F.H. Zhou, F.Z. Cui, J.T. Li, Z.S. Cheng, P. Li, Z. Wang,
K.Z. Mao and Y. Wang........................................................................... 81
Effect of Functionalized MWCNTs on the Tribological Properties of Polyimide Film
L. Liu, Y.Q. Zhu, J. Song and S. Chen ................................................................. 88

The Study of Automatic Counting of Coal and Gangue Based on the DaVinci Video Image Processing Technology
Y.D. Zhao and M.F. Sun ......................................................................................... 95

The Design of Simulation Signal Source for Fish Torpedo Testing Based on DSP
N.J. Hao, C. Hu, Y.X. Hua and Z.J. Yu ................................................................. 99

Design of USB-GPIB Controller Based on up D7210
N.J. Hao, Z.J. Yu, C. Hu and Y.X. Hua ................................................................. 104

Research on Development for MES of Mould Making Based on WEB Platform and B/S Mode
J.G. Yu, M.L. Feng, P.P. Huang and D.C. Xu ....................................................... 109

The Design of Crops Remote Sensing Monitoring System Based on Supermap Objects
B.X. Chang, Y. Chen and J.Y. Huang .................................................................... 116

Research on the Least Squares Method in Error Compensation on RSSI Ranging
W.X. Ling, J.M. Gao and C.Y. Li ........................................................................... 121

Mechanical Mechanism Analysis for Qianjiangping Landslide Damage on Three Gorges Reservoir
Q. Feng and S.R. Xiao .......................................................................................... 126

Design and Performance of the Double Dislocation Perforated Shielding Plate Used in Vacuum Arc Deposition for High Quality Coating Deposition
W.C. Lang ............................................................................................................. 130

Experimental Study of Temperature Correction on Single-Mode Sleeve Fiber for Distributed Strain Monitoring
Y.L. Gao, G.L. Xu, J.Y. Zhang and Q.L. Le ........................................................... 136

The Dynamics of Entropy Exchange between Field and Atom
X.Q. Yan ................................................................................................................. 143

Noise Variance Estimation Based on Knowledge of Noise Reduction Coefficient
P. Jakub and M. Grzegorz ...................................................................................... 149

Based on Spectral Analysis of Voice Controllable Surveillance System Using Normalized Mean Square Error
P. Jakub and M. Grzegorz ...................................................................................... 156

Study on Analysis and Estimation of Alert Degree Based on EEG
S.Z. Li and D.R. Jiang ............................................................................................ 161

Design of a Dynamic Magnetic Field Steered Cathodic Arc Source in Arc Ion Plating
W.C. Lang ............................................................................................................. 167

Discussion on the Construction of Accounting Informatization in Internet Era
X.Q. Tang, Y.Y. Kang and C.L. Yan ...................................................................... 173

Improved Electroluminescence from nc-Si Film Embedded in p-i-n Structure LED
Z.Y. Ma, G.Y. Xia, X.F. Jiang, W. Li, L. Xu, K.J. Chen and D. Feng ..................... 177

Effect of the Randomness of the Relative Humidity on the Phenomenon of Carbonation of the Reinforced Concrete
A. Badaoui, M. Badaoui and F. Kharchi ............................................................... 181
Chapter 2: Biomaterial Science

Comparative Analysis and Assessment on Oxidation Resistance of Proanthocyanidin Extract from Sanguisorba Root
G.Q. Jiang, G.Z. Fang and J.Y. Pang ................................................................. 187

Research on the Concurrency Control Communications Protocol in BioMedical Information Service System
X.X. Du, B. Wang and J.Z. Tian ..................................................................... 192

Research and Design of Wireless Remote Health Monitoring System Based on nRF24E1
Y.Z. Jiang, Z.M. Yao, G.J. Song and J. Dong .................................................... 197

Design of Medical Monitoring and Locating System Based on GPS and GPRS
Y. Ti, S.D. Liu and X.Y. Wang .................................................................... 202

Antioxidant Properties of Laoying Tea (Litsea Coreana L.) Extracts

Study on Combination and Bioremediation of Chlormuron-Ethyl-Degrading Strains
C.H. Xu, C.Y. Li, M.H. Xiong, J.B. Pan, X.S. Li and X.S. Cheng ......................... 215

Development of a Novel CaP-Containing Mesoporous Silica-Based Xerogels Used as Hemostatic Material with Good Biodegradability and Low Heat Generation
X.S. Li, W. Lin, F.L. Xin, Y. Yuan, C.S. Liu and C.L. Da .................................... 222

Treatment of Dye Wastewater by Zero Valent Iron Composited Organobentonite
J.F. Ma, J.M. Yu, B.Y. Cui, D.L. Li and J. Dai ..................................................... 229

Adsorption and Catalysis of Orange II from Wastewater by Inorganic-Organic-Bentonite
J.F. Ma, J.M. Yu, B.Y. Cui, D.L. Li and J. Dai ..................................................... 236

Influence of Shape of Region of Interest on the Architectural Parameters in Micro CT Image Analysis
Y.B. Yan, J. Wang, W. Qi, Y. Zhang and W. Lei ............................................. 241

Effects of Isolated Soy Protein and Ascorbic Acid on Formation of Furan, Acetic and Formic Acids from Fructose
X.S. Huang and N. Peng ........................................................................... 248

6-Gingerol Function against Fatigue
X.S. Huang and N. Peng ........................................................................... 254

A Localization and Extraction Method Research for Phalange ROI and Carpal ROI from Left Hand Radiography
L.K. Ran, L. He and Z. Chen ........................................................................ 259

Comparison of Auto and Manual Integration for Peptidomics Data Based on High Performance Liquid Chromatography Coupled with Mass Spectrometry
H.Y. Fang, G.P. Zhang, F. Gao, X.P. Zhao, P. Shen and S.F. Wang ..................... 266

Analysis of Peptides in Plasma by High Performance Liquid Chromatography Coupled with Electrospray Ionization Mass Spectrometry
H.Y. Fang, Y. Liu and S.F. Wang .................................................................. 273

Isolation and Identification of Ammonibacteria and Ammoniation Characteristic Analysis
W.Y. Zhang, F.Y. Tan, T.T. Zhao, L.Q. Lu and N. Han .................................. 280
