Contents

Preface .................................................................................................................... vii

Part 1: Keynotes

Water Water Everywhere and Not a Drop to Drink, Nor Do I Know Its Whereabouts
Robert Dunne ..................................................................................................... 1

Arsenic and Life: Bacterial Redox Reactions Associated with Arsenic Oxyanions
Ronald S. Oremland ......................................................................................... 17

Part 2: Processing With Sea Water and Saline Solutions

Challenges in Flotation of Cu-Mo Sulfide Ores in Sea Water
Sergio Castro ........................................................................................................ 29

Correlation of Graphite Flotation and Gas Holdup in Saline Solutions
S. Alexander, J. Quinn, J.E. van der Spuy, and J.A. Finch ................................. 41

Foaming Properties of Flotation Frothers at High Electrolyte Concentrations
S. Castro, P. Toledo, and J.S. Laskowski ............................................................ 51

Role of Saline Water in the Selective Flotation of Fine Particles
Yongjun Peng, Shengli Zhao, and Dee Bradshaw ............................................ 61

Induction Time Measurements for Air Bubbles on Chalcopyrite, Bornite, and Gold in Seawater
Jaroslaw Drelich and Jan D. Miller ................................................................. 73

Removal of Ions from Water with Electrosorption Technology
Jiann-Yang Hwang and Xiaowei Sun ................................................................ 87

Research on Primary Water Hardness of Coal Slurry
Jiong-tian Liu and Ming-qing Zhang ............................................................... 97

Part 3: Water Treatment and Biological Methods

Membrane Operations in Water Treatment and Reuse
Enrico Drioli and Francesca Macedonio ......................................................... 105

Application of Membrane Separation Technologies to Wastewater Reclamation and Reuse
Peter S. Cartwright ............................................................................................. 115

Removal of Heavy Elements from Aqueous Processes
Lucas Moore, Amir Mahmoudkhani, and Jean Robert Durand ...................... 131

New Electro-Biochemical Reactor for Treatment of Wastewaters
D.J. Adams, M. Peoples, and A. Opara ............................................................ 143
Kinetics and Thermodynamic Studies on Biosorption of Heavy Metals Using *Ecklonia Maxima*  
A.B. Marshall and D.I.O. Ikhu-Omoregbe  
155

Flotation of Chalcopyrite in Water Containing Bacteria  
Wenying Liu, Chris Moran, and Sue Vink  
165

Relationships Observed in Rock Pile Microbial Populations  
D.J. Adams, B. Richins, J. Eshler, and J. Kennedy  
175

Mining Effluent Reutilization in Biomass Production  
E. Martinez and M.J. Garcia  
187

**Part 4: Effect of Water Quality on Minerals Processing**

Effect of Cations, Anions, and Ionic Strength on the Flotation of Pentlandite–Pyroxene Mixtures  
N.J. Shackleton, V. Malysiak, D. De Vaux, and N. Plint  
197

Frothing in the Flotation of Copper Sulfide Ores in Sea Water  
S. Castro, O. Ramos, J.P. Cancino, and J.S. Laskowski  
211

Impact of Total Dissolved Solids in Process Water on the Surface Properties of Silica and Sphalerite Minerals  
Meijiao Deng, Qingxia Liu, and Zhenghe Xu  
225

Desalination of Coal Mine Water with Electrosorption  
Xiaowei Sun and Jiann-Yang Hwang  
237

Impact of Dissolved Gangue Species and Fine Colloidal Matter in Process Water on Flotation Performance  
Mukund Vasudevan, Tarun Bhambhani, D.R. Nagaraj, and Raymond S. Farinato  
247

Particle Aggregation and Sedimentation Characteristics of Kaolinite Suspensions as Explained by Surface Charge Considerations  
Jan D. Miller and Vishal Gupta  
261

Multi-Scale Investigation of Applying Secondary Effluent in Sulfide Flotation  
Jinhong Zhang and Wei Zhang  
279

Trace Metals Removal with Precipitated Solids from Uranium Mine Effluent at Cameco’s Key Lake Operation  
Kuang Lee, David Lee, and Arthur Lieu  
291

**Part 5: Water and Tailings Management**

Alternatives to Coal Mine Tailings Impoundment—Evaluation of Three Dewatering Methods at Rockspring Coal Mine  
Charles Murphy, Christopher Bennett, Greg Olinger, and Bret Cousins  
301

Mine Wastewater Treatment Using Novel Processes  
Ronald V. Davis, Kevin O’Leary, Thomas Haynie, and Deepak Musale  
311
Contents

Removal of Phosphate from Mine Water Effluents—How to Meet Future Regulations for Effluent Waters
   Mika Martikainen and Matias Penttinen ................................................................. 323

Mitigation Strategies to Reduce Diethylenetriamine (DETA) Residual in Tailings Water at Vale’s Sudbury Operation
   Jie Dong and Manqiu Xu ...................................................................................... 339

Managing Our Most Precious Resource—Quality and Quantity Issues With Water for Mineral Processing in Western Australia
   Damian Connelly ................................................................................................. 353

Using Spreadsheets to Evaluate the Effects of Mine Water Disposal on Surface and Ground Water
   Lisa M. Boettcher ............................................................................................... 359

Wastewater Recycling Technology in Fankou Lead-Zinc Mine of China
   Yuehua Hu, Wei Sun, Runqing Liu, and Jinping Dai ........................................... 371

Sulfidized Red Mud—A New Sorbent for Toxic Substances
   Joseph Iannicelli .................................................................................................... 389

Index ......................................................................................................................... 399
