Transformer-Isolated Gate Drive Design for SiC JFET Phase-Leg Module .................. 1728
   Ruxi Wang, Milisav Danilovic, Zheng Chen and Dushan Boroyevich

Optimal Torque Trajectories Minimizing Loss of Induction Motor under
Given Condition of Rotational Angle ................................................................. 1734
   Kaoru Inoue, Keito Kotera and Toshiji Kato

A Novel Single Phase Hybrid Switched Reluctance Motor Drive System .................. 1739
   Jianing Liang, Guoqing Xu, Linni Jian, Jakobsen Uffe and Jin-Woo Ahn

Experimental Methods for Synchronous Machines Evaluation by an
Accurate Magnetic Model Identification .................................................................. 1744
   Paolo Guglielmi, Eric Armando, Iustin Radu Bojoi, Gianmarino Pellegrino and Michele Pastorelli

Electromechanical Regenerative Actuator with Fault Tolerance
Capability for Automotive Chassis Applications .................................................... 1750
   Lei Hao and Chandra Namuduri

A New High Frequency Injection Method for Sensorless Control of
Doubly-Fed Induction Machines .............................................................................. 1758
   Longya Xu, Ernesto Inoa, Yu Liu and Bo Guan

MRAS Speed Observer for High Performance Linear Induction Motor
Drives based on Linear Neural Networks ............................................................... 1765
   Angelo Accetta, Maurizio Cirrincione, Marcello Pucci and Gianpaolo Vitale

Optimum Torque Control Algorithm for Wide Speed Range and Four
Quadrant Operation of Stator Flux Oriented Induction Machine
Drive without Regenerative Unit .............................................................................. 1773
   Valeriu Olarescu, Sorin Musuroi, Ciprian Sorandaru, Martin Weinmann and Stefan Zeh

Rotor Position Measurement for a Magnetically Levitated
500000 rpm Permanent Magnet Machine .............................................................. 1778
   Claudius Martin Zingerli, Imoberdorf Philipp, Thomas Nussbaumer and Johann Walter Kolar

Innovative Measuring System for Wear-out Indication of
High Power IGBT Modules ...................................................................................... 1785
   Jens Due, Stig Munk-Nielsen and Rasmus Nielsen
Resonant Power Shoes for Humanoid Robots ................................. 1791
Lee Byunghun, Kim Hyunjae, Lee Sung Woo, Park Chang Byung and Rim Chun Taek

Loss Evaluation of an AC-AC Direct Converter with a New GaN HEMT SPICE Model .. 1795
Okamoto Masayuki, Toyoda Genki, Hiraki Eiji, Tanaka Toshihiko and Hashizume Tamotsu

A New High Frequency Inductor Loss Measurement Method .............................. 1801
Mingkai Mu and Lee Fred

Optimal Design Method for Interleaved Single-Phase PFC Converter
with Coupled Inductor ....................................................................... 1807
Jun Imaoka, Yuki Ishikura, Tokohiro Kawashima and Masayoshi Yamamoto

Lithium-Ion Supercapacitors for Pulsed Power Applications ............................... 1813
Raymond Sepe, Anton Steyerl and Steven Bastien

Zero Voltage Switching Performance of 1200V SiC MOSFET,
1200V Silicon IGBT and 900V CoolMOS MOSFET .................................................. 1819
Arun Kadavelugu, Vinay Baliga, Subhashish Bhattacharya, Mrinal Das and Anant Agarwal

Novel Silicon-Embedded Coreless Coupled Inductors for
High Efficiency On-Chip DC-DC Conversion ..................................................... 1827
Rongxiang Wu and Johnny K.O. Sin

A Bipolar Primary Pad Topology for EV Stationary Charging and
Highway Power by Inductive Coupling ......................................................... 1832
Grant Covic, Michael Kissin, Dariusz Kacprzak, Niels Clausen and Hao Hao

Integrated Magnetic Design of Small Planar Transformers for
LLC Resonant Converters ..................................................................... 1839
Samuel Robert Cove, Martin Ordonez, Federico Luchino and John Quaicoe

Microfabricated V-Groove Power Inductors using Multilayer Co-Zr-O
Thin Films for Very-High-Frequency DC-DC Converters .................................. 1845
Di Yao, Christopher Levey and Charles Sullivan

Boundary-Dependent Circuit Model for the Transient Behavior of a
Thermal Stack in Power Modules ............................................................. 1853
Xiao Cao, Guo-Quan Lu and Khai Ngo

A Comprehensive Design for High Power Density CM EMI Inductor ....................... 1861
Luo Fang, Boroyevich Dushan, Mattavelli Paolo and Nicolas Gazel

Analysis of Impact of Self-Power Function on Emitter Turn-Off Thyristor ................ 1868
Qian Chen and Alex Huang

Analytical Modeling of a Medium-Voltage and High-Frequency Resonant
Coaxial-Type Power Transformer for a Solid State Transformer Application .......... 1873
Seunghun Baek and Subhashish Bhattacharya
PWM Technique to Extend Current Reconstruction Range and Reduce Common-Mode Voltage for Three-Phase Inverter using DC-Link Current Sensor Only

Yong-Kai Lin and Yen-Shin Lai

An Inrush Current Reduction Technique for Multiple Inverter-Fed Transformers

Yu-Hsing Chen, Ming-Yang Yeh, Po-Tai Cheng, Steven Liao and Charles Tsai

Transition Control Strategy between Standalone and Grid Connected Operation of the Voltage Source Inverters

Nayeem Arafat, Sreeshailam Palle, Iqbal Husain and Yilmaz Sozer

Pulse Energy Modulation of a Buck-Boost Inverter

Abraham Tareke Woldegiorgis, Yonggao Zhang and Liuchen Chang

Compensation of DC Link Oscillation in Single-Phase VSI and CSI Converters for Photovoltaic Grid Connection

Montie Vitorino and Mauricio Correa

Modeling and Analysis of a DC Current Compensator in Distribution Power Lines

Giampaolo Butiicchi, Luca Consolini, Emilio Lorenzani and Carlo Concari

Investigating a H-Infinite Control Method Considering Frequency Uncertainty for CLC Type Inductively Coupled Power Transfer System

Xin Dai, Aiguo Patrick Hu, Chunsen Tang, Yue Sun and Zhihui Wang

Robustness Analysis of Active Damping Methods for a Grid Connected Inverter with an LCL Filter

Ricchiuto Domenico, Liserre Marco, Kerekes Tamas, Teodorescu Remus and Blaabjerg Frede

Switching-Sequence based Global Stability and Control of Standalone and Interactive Power Converters

Sudip Mazumder

Design and Performance of a SiC High Frequency Inverter

Miaosen Shen, Shashank Krishnamurthy and Mithir Mudholkar

Core-Loss Analysis in AC Inductors for a Single-Phase Pulse-Width Modulated Solar Power Conditioner

Hideaki Fujita

Proposal of a Series Configuration Hybrid AC Power Source

Rafael Concatto Beltrame, Matheus Iensen Desconzi, Mario Lucio da Silva Martins, Cassiano Rech and Helio Leaes Hey

A New Single-Phase Five-Level Inverter with No Problem of Voltage Balancing

Zixin Li, Ping Wang, Yaohua Li and Gao Fanqiang

Voltage Fluctuation Suppression Method of Floating Capacitors in a New Modular Multilevel Converter

Kui Wang, Yongdong Li, Zedong Zheng and Lie Xu
Theoretical Analysis of Self-Balancing Function of Capacitor Voltages in Flying Capacitor Multi-Level Converters .................................................. 2079
Hidemine Obara and Yukihiko Sato

Neutral-Point Current Modeling and Control for Neutral-Point Clamped Three-Level Converter Drive with Small DC-Link Capacitors ........................... 2087
Ramkrishan Maheshwari, Stig Munk-Nielsen and Sergio Busquets-Monge

Improved Interleaved Discontinuous Carrier-Based PWM Strategy for 3-Level Coupled Inductor Inverters ................................................................. 2095
Behzad Vafakhah, Andrew M. Knight and Salmon John

Control and Design Principle of a Soft-Switching Boost DC to AC Converter without Smoothing Capacitor using a MERS Pulse Link Concept ..................... 2102
Yohei Otani, Takanori Isobe and Ryuichi Shimada

Session 31 – Wind Energy: Grid Connection and System Integration

Modeling and Mitigation of Harmonic Resonance between Wind Turbines and the Grid ......................................................................................... 2109
Mauricio Cespedes and Jian Sun

Thermal Analysis of Multilevel Grid Side Converters for 10 MW Wind Turbines under Low Voltage Ride Through ....................................................... 2117
Ke Ma, Frede Blaabjerg and Marco Liserre

Wenzhong Gao, Xiaoyu Wang and Eduard Muljadi

Session 32 – Magnetics

Magnetic Characterization of Low Temperature Co-Fired Ceramic (LTCC) Ferrite Materials for High Frequency Power Converters ........................................ 2133
Mingkai Mu, Yipeng Su, Qiang Li and Fred Lee

Predicting Inductance Roll-Off with DC Excitations ........................................... 2139
Jennifer D. Pollock, Weyman Lundquist and Charles R. Sullivan

High Frequency Inductor Design and Comparison for High Efficiency High Density POLs with GaN Device ............................................................. 2146
Yipeng Su, Qiang Li, Mingkai Mu and Fred C. Lee
Session 33 – Drive Issues I

Influence of High-Frequency Leakage Current on Motor Position Control in PWM Inverter-Fed Servo Drives ................................................................. 2153
Kotaro Tagami and Satoshi Ogasawara

A Review of Mitigation Methods for Overvoltage in Long-Cable-Fed PWM AC Drives ... 2160
Jiangbiao He, Gennadi Sizov, Peng Zhang and Nabeel Demerdash

Investigation of Voltage Stresses inside Adjustable Speed Drives .......................... 2167
Lixiang Wei, Zhijun Liu and Gary Skibinski

Identifying Ground Fault Location in High Resistance Grounded Systems using Adjustable Speed Drive ............................................................... 2175
Lixiang Wei, Liu Zhijun, Russ Kerkman and Gary Skibinski

Session 34 – Transient Behavior in Grid Connected and Stand Alone Systems

Active Islanding Detection using High Frequency Signal Injection ....................... 2183
David Reigosa, Fernando Briz, Christian Blanco, Pablo Garcia and Juan Manuel Guerrero

Safe Transient Operation of Microgrids based on Master-Slave Configuration ...... 2191
Gustavo M. S. Azevedo, Joan Rocabert, Pedro Rodriguez, Fabricio Bradaschia, Marcelo C. Cavalcanti and Francisco A. S. Neves

Droop-Controlled Inverters with Seamless Transition between Islanding and Grid-Connected Operations ........................................................... 2196
Shang-Hung Hu, Chun-Yi Kuo, Tzung-Lin Lee and Josep M. Guerrero

Engine Generator Efficiency and Transient Characteristics Improvement using a Series Compensator Named MERS ......................................................... 2202
Kouhei Kashiwagi, Takanori Isobe and Ryuichi Shimada

Session 35 – Resonant DC-DC Converters I

A New DC/DC Converter with Wide-Range ZVS and Zero Circulating Current .......... 2209
Mehdi Narimani and Gerry Moschopoulos

Zero Voltage Switching Technique for Bi-Directional DC/DC Converters ................ 2215
Luca Corradini, Daniel Seltzer, Douglas Bloomquist, Regan Zane, Dragan Maksimovic and Boris Jacobson

Soft Switching Chopper with Tail Loss Cancel Circuit ........................................ 2223
Yukinori Tsuruta and Atsuo Kawamura

The Resonant LLC vs. LCC Converter – Comparing Two Optimized Prototypes ...... 2229
Alexander Pawellek, Christian Oeder, Juergen Stahl and Duerbaum Thomas
**Session 36 – Fractional Slot Machines**

- Design, Analysis and Loss Minimization of a Fractional-Slot Concentrated
  Winding Interior Permanent Magnet Machine for Traction Applications 2236
  Jagadeesh Tangudu, Thomas Jahns and Theodore Bohn

- Influence of Alternate Slot Openings on Torque-Speed Characteristics and
  Cogging Torque of Fractional Slot IPM Brushless AC Machines 2244
  Ziad Azar, Z.Q. Zhu and Grzegorz Ombach

- Comparison of Interior and Surface PM Machines Equipped with
  Fractional-Slot Concentrated-Windings for Hybrid Traction Applications 2252
  Ayman EL-Refaie, Patel Reddy, Kum-Kang Huh, Jagadeesh Tangudu and Thomas Jahns

**Session 37 – Z-Source Inverters**

- Single-Phase Z-Source Inverter: Analysis and Low-Frequency
  Harmonics Elimination Pulse Width Modulation 2260
  Yifan Yu, Qianfan Zhang, Bin Liang and Shumei Cui

- Stability Analysis of Reduced Leakage Current Modulation Techniques for
  Z-Source Inverters in Transformerless Photovoltaic Applications 2268
  Fabricio Bradaschia, Marcelo C. Cavalcanti, Pedro E. P. Ferraz, Gustavo M. S. Azevedo,
  Francisco A. S. Neves and Euzeli C. dos Santos Jr.

- High Step-Up Continuous Input Current LCCT-Z-Source Inverters for Fuel Cells 2276
  Marek Adamowicz, Jaroslaw Guzinski, Fang Zheng Peng, Ryszard Strzelecki and Haitham Abu-Rub

- Transient Modeling of Current-Fed Quasi-Z-Source Inverter 2283
  Qin Lei, Fangzheng Peng and Ge Baoming

**Session 38 – LED Drivers 1**

- A Universal-Input High-Power-Factor PFC Pre-Regulator without
  Electrolytic Capacitor for PWM Dimming LED Lighting Application 2288
  Hongbo Ma, Jih-Sheng Lai, Wensong Yu, Quanyuan Feng, Cong Zheng and Bo-yuan Chen

- A Novel High Efficiency and Low-Cost Current Balancing
  Method for Multi-LED Driver 2296
  Jianfeng Wang, Junming Zhang, Xinke Wu, Yangyu Shi and Zhaoming Qian

- Off-Line LED Driver with Bidirectional Second Stage for Reducing Energy Storage 2302
  Qingcong Hu and Regan Zane

- A Novel SEPIC-Derived PFC Pre-Regulator without Electrolytic Capacitor for
  PWM Dimming LED Lighting Application based on Valley Fill Circuit 2310
  Hongbo Ma, Jih-Sheng Lai, Wensong Yu, Cong Zheng and Quanyuan Feng
Session 39 – AC-DC Rectifiers:
Design and Analysis

A Flicker-Free Electrolytic Capacitor-Less AC-DC LED Driver ............................................... 2318
Shu Wang, Xinbo Ruan, Kai Yao and Zhihong Ye

An AC-DC Single-Stage Full-Bridge Converter with Buck-Boost Input Section ......................... 2326
Navid Golbon and Gerry Moschopoulos

Class E Rectifier using Switch-Controlled Capacitor ................................................................. 2332
Kazuaki Fukui and Hirotaka Koizumi

MHz Power Factor Correction with Adaptive Current Source Drivers ...................................... 2338
Pengcheng Xu, Zhiliang Zhang, Wei Cai, Yan-fei Liu and Paresh C. Sen

Session 40 – Transportation Applications:
Electric Drivetrain

Design and Analysis of a 55-kW Air Cooled Automotive Traction Drive Inverter .................. 2345
Madhu Sudhan Chinthavali, Tawfik Jonathan and Rao Arimilli

Back to Back Z-Source Inverter Topology for the Series Hybrid Electric Bus ...................... 2353
Craig Rogers and Fang Peng

A Novel Current Angle Control of a Current Source Inverter Fed Permanent Magnet Synchronous Motor Drive for Automotive Applications ......................................................... 2358
Lixin Tang and Gui-Jia Su

Special Session 4 – Power Magnetics for
Smart Grid Applications

Magnetic Components for High Voltage DC Transmission
Converters and Static Var Compensators ....................................................................................... n/a
Sarath B. Tennakoon

Magnetic Components in Electric Circuits – Understanding
Thermal Behaviour and Stress ........................................................................................................ n/a
Peter R. Wilson

Transformer Construction and Its Affect on Transformer Stability ........................................... n/a
Kevin McGivern

Design, Development and Testing of a 1 MVA, 13.8 kV/465 V Solid-State Transformer with 10 kV Silicon Carbide Switches .......................................................... n/a
Ravisekhar N. Raju
Session 41 – Wind Energy: Generators and Controls

Vector Control of Multiple-Module Transverse Flux PM Generator for Large-Scale Direct-Drive Wind Turbines ................................................................. 2365
Seon-Hwan Hwang, Hui Li, Je-Wook Park, Jang-Mok Kim and Deok-Je Bang

Direct Grid Connection of a Slip-Permanent Magnet Wind Turbine Generator .......... 2373
Ulwin Hoffmann, Pieter Bouwer and Maarten Kamper

Predictive Direct Control of Doubly Fed Induction Generator for Grid Synchronization in Wind Power Generation ................................................................. 2381
Jiefeng Hu, Jianguo Zhu, Yongchang Zhang, Glenn Platt and David Dorrell

Feed-Forward Transient Compensation Control for DFIG Wind Generators during both Balanced and Unbalanced Grid Disturbances ........................................... 2389
Jiaqi Liang and Ronald Harley

Session 42 – Power Semiconductors: High Temperature Devices

Investigation of Si IGBT Operation at 200 Degree Centigrade for Traction Application ................................................................. 2397
Zhuxian Xu, Ming Li, Fred Wang and Zhenxian Liang

Characterization of a High Temperature Multichip SiC JFET-Based Module .......... 2405
Fan Xu, Dong Jiang, Jing Wang, Fred Wang, Leon M. Tolbert, Timothy Junghie Han and Sung Joon Kim

Development of a 10 kW High Temperature High Power Density Three-Phase AC-DC-AC SiC Converter ................................................................. 2413
Puqi Ning, Di Zhang, Rixin Lai, Jiong Dong, Fred Wang, Boroyevich Dushan, Ngo Khai, Burgos Rolando, Karimi Kamiar, Immanuel Vikram and Solodovnik Eugene

Design Comparison of High Power Medium-Voltage Converters based on 6.5kV Si-IGBT/Si-PiN Diode, 6.5kV Si-IGBT/SiC-JBS Diode, and 10kV SiC MOSFET/SiC-JBS Diode ................................................................. 2421
Hesam Mirzae, De Ankan, Tripathi Awneesh and Bhattacharya Subhashish

Session 43 – PM Machine Controls

Magnet Temperature Estimation in Surface PM Machines during Six-Step Operation ................................................................. 2429
David Reigosa, Fernando Briz, Michael W. Degner, Pablo Garcia and Juan Manuel Guerrero

Adaptive Flux-Weakening Controller for IPMSM Drives ......................................... 2437
Silverio Bolognani, Sandro Calligaro and Roberto Petrella
Voltage Disturbance State-Filter Design for Precise Torque-Controlled Interior PM Synchronous Motors .................................................. 2445
Kim SeHwan, Choi Chan-Hee and Seok Ju-Ki

Torque Ripple Control for Synchronous Motors using Instantaneous Torque Estimation .................................................. 2452
Noriya Nakao and Kan Akatsu

Session 44 – Grid Interactive Solar PV Systems I

Leakage Current Analysis of Grid Connected Transformerless Solar Inverters with Zero Vector Isolation .................................................. 2460
Ziya Ozkan and Ahmet Hava

Towards Next Generation Photovoltaic Inverters .................................................. 2467
Yaosuo Xue, Divya Kurthakoti Chandrashekhara, Gerd Griepentrog,
Liviu Mihalache, Sindhu Suresh and Madhav Manjrekar

Single-Stage Grid-Connected Forward Microinverter with Boundary Mode Control .................................................. 2475
David Meneses, Oscar Garcia, Pedro Alou, Jesus Angel Oliver, Roberto Prieto and Jose Antonio Cobos

Research on a Non-Complementary Active Clamp Flyback Converter with Unfolding DC-AC Inverter for Decentralized Grid-Connected PV Systems .................................................. 2481
Qiong Mo, Min Chen, Zhe Zhang, Mingzhi Gao and Zhaoming Qian

Session 45 – DC-DC Converters: Topologies II

Serial or Parallel Linear-Assisted Switching Converter as Envelope Amplifier: Optimization and Comparison .................................................. 2488
Miroslav Vasic, Oscar Garcia, Jesus Angel Oliver, Pedro Alou and Jose Antonio Cobos

A Large DC-Gain Highly Efficient Hybrid Switched-Capacitor-Boost Converter for Renewable Energy Systems .................................................. 2495
Dazhong Gu, Dariusz Czarkowski and Adrian Ioinovici

A Gallium-Nitride Switched-Capacitor Circuit using Synchronous Rectification .................................................. 2501
Mark J Scott, Ke Zou, Jin Wang, Chingchi Chen, Ming Su and Lihua Chen

A Novel Push-Pull Forward Converter for High Reliability and High Input Voltage Applications .................................................. 2506
Yanbing Xia, Hongfei Wu, Wei Liu, Yan Xing and Xudong Ma

Session 46 – Faults and Diagnostics

Detection and Classification of Rotor Demagnetization and Eccentricity Faults for PM Synchronous Motors .................................................. 2512
Jongman Hong, Doosoo Hyun, Tae-june Kang, Sang Bin Lee, Christian Kral and Anton Haumer
Detection of Inter-Coil Short Circuits in the Stator Winding of a PM Machine by using Salience Tracking Schemes ................................................................. 2520
Jesus Arellano-Padilla, Mark Sumner, Chris Gerada and Gary Buckley

Bearing Fault Detection Capability of Frequency Response Measurement in Speed-Sensorless Operated Two-Mass-Systems ......................................................... 2528
Henning Zoubek and Mario Pacas

A Low Conductivity Composite Rotor for Fractional Pitch Concentrated Winding Machines ........................................................................................................... 2536
Johan Wolmarans, Martin Van der Geest, Henk Polinder, Bram Ferreira and Dennis Zeilstra

Session 47 - Modeling and Control of Single-Phase Inverters

Fast Current-Tracking Control for Grid-Connected Inverter with an LCL Filter by Sinusoidal Compensation ........................................................................... 2543
Toshiji Kato, Kaoru Inoue and Yoshihisa Donomoto

Wide Bandwidth System Identification of AC System Impedances by Applying Perturbations to an Existing Converter ............................................................ 2549
Daniel Martin, Adam Barkley and Enrico Santi

A Frequency Adaptive Resonant Controller for Fixed Point Digital Implementation at High Sampling Frequency ................................................................. 2557
Sayed Ali Khajehoddin, Masoud Karimi-Ghartemani, Praveen Jain and Alireza Bakhshai

Current Mode with RMS Voltage and Offset Control Loops for a Single-Phase Aircraft Inverter Suitable for Parallel and 3-Phase Operation Modes ......................... 2562
Pablo Varela Fraile, David Meneses Herrera, Oscar Garcia Suarez, Jesus Angel Oliver Ramirez, Pedro Alou Cervera and Jose Antonio Cobos

Session 48 - LED Drivers II

Multi-Channel Constant Current (MC3) LLC Resonant LED Driver ........................................ 2568
Haoran Wu, Shu Ji, Fred C. Lee and Xinke Wu

An Energy Conservation based High-Efficiency Dimmable Multi-Channel LED Driver .. 2576
April (Yang) Zhao and Wai Tung Ng

Analysis of the Asymmetrical Half-Bridge for Street LED-Lighting Applications ....... 2581
Manuel Arias, Diego Lamar, Aitor Vazquez, Javier Sebastian, Didier Balocco and Almadidi Diallo

Single Switch Three-Level Boost Converter for PWM Dimming LED Lighting .............. 2589
Cong Zheng, Jih-Sheng Lai, Wensong Yu and Hongbo Ma
Session 49 – High Performance Power Factor Correction

Boundary Control of Boost-Derived PFCs using the Natural Switching Surface: Derivation and Enhanced Properties ........................................... 2597
Juan Galvez and Martin Ordonez
