GEOMETRY AND ANALYSIS
OF AUTOMORPHIC FORMS OF
SEVERAL VARIABLES

Proceedings of the International Symposium in Honor of
Takayuki Oda on the Occasion of His 60th Birthday

Tokyo, Japan 14 – 17 September 2009

Editors

Yoshinori Hamahata (Kansai University, Japan)
Takashi Ichikawa (Saga University, Japan)
Atsushi Murase (Kyoto Sangyo University, Japan)
Takashi Sugano (Kanazawa University, Japan)
Contents

Preface v

Program of symposium vii

The Birch and Swinnerton-Dyer conjecture for \( \mathbb{Q} \)-curves 1
and Oda's period relations

*Henri Darmon, Victor Rotger and Yu Zhao*

The supremum of Newton polygons of \( p \)-divisible groups with 41
a given \( p \)-kernel type

*Shushi Harashita*

Borcherds lifts on \( \text{Sp}_2(\mathbb{Z}) \) 56

*Bernhard Heim and Atsushi Murase*

The archimedean Whittaker functions on \( GL(3) \) 77

*Miki Hirano, Taku Ishii and Tadashi Miyazaki*

Arithmetic properties of \( p \)-adic elliptic logarithmic functions 110

*Noriko Hirata-Kohno*

Spherical functions on \( U(2n)/ (U(n) \times U(n)) \) and hermitian 120
Siegel series

*Yumiko Hironaka*

Fourier transforms of weighted orbital integrals on the real 160
symplectic group of rank two

*Werner Hoffmann*

An Atkin-Lehner type theorem on Siegel modular forms and 196
primitive Fourier coefficients

*T. Ibukiyama and H. Katsurada*
Cohomology of Siegel modular varieties of genus 2 and corresponding automorphic forms
  Takayuki Oda

Reducibility and discrete series in the case of classical $p$-adic groups; an approach based on examples
  Marko Tadić

A survey on Voronoi's theorem
  Takao Watanabe
