2011 International Workshop on Applications of Wireless Ad Hoc and Sensor Networks

(AWASN 2011) Organizing Committee

Third International Workshop on Security in Cloud Computing (CloudSec 2011)

Organizing Committee

2011 International Workshop on Embedded Multicore Systems (EMS 2011) Organizing Committee

Fourth International Workshop on Parallel Programming Models and Systems Software for High-End Computing (P2S2 2011)

Organizing Committee

Seventh International Workshop on Scheduling and Resource Management for Parallel and Distributed Systems

(SRMPDS 2011) Organizing Committee

Second International Workshop on Parallel Software Tools and Tool Infrastructures

(PSTI 2011) Organizing Committee
2011 International Workshop on Applications of Wireless Ad Hoc and Sensor Networks (AWASN 2011)

A Controller-Assisted Distributed (CAD) Load Balancing Scheme for ZigBee Networks ................................................................. 1
   Kuei-Li Huang, Chien-Chao Tseng, Jui-Tang Wang, and Tsung-Hsi Yang

Parallel Response Query Tree Splitting for RFID Tag Anti-collision ............................................................. 6
   Ming-Kuei Yeh, Jehn-Ruey Jiang, and Shing-Tsaan Huang

End to End Security and Path Security in Network Mobility ............................................................. 16
   Long-Sheng Li, Shr-Shiu-Tzeng, Rui-Chung Bai, and Meng-Tai Li

Connectivity Modeling of Vehicular Ad Hoc Networks in Signalized City Roads ......................................... 22
   Prasan Kumar Sahoo, Ming-Jer Chiang, and Shih-Lin Wu

Time-Synchronized versus Self-Organized K-Coverage Configuration in WSNs ..................................... 27
   Meng-Chun Wueng, Prasan Kumar Sahoo, and I-Shyan Hwang

An Accurate GPS-Based Localization in Wireless Sensor Networks: A GM-WLS Method ................................................................. 33
   Bo Cheng, Rong Du, Bo Yang, Wenbin Yu, Cailian Chen, and Xinping Guan

Sliding-Typed Communication Range Recognition Method for Indoor Position Estimation in Passive RFID Systems ................................................................. 42
   Atsuki Inada, Yuki Oda, Emi Nakamori, Manato Fujimoto, Tomotaka Wada, Kouchi Matsuura, and Hiromi Okada

Barrier Coverage Constructions for Border Security Systems Using Wireless Sensors ................................................................. 50
   Koji Yamamoto, Hayato Ozaki, Takuya Suzuki, Tomotaka Wada, Kouchi Matsuura, and Hiromi Okada

Optimal Multipath Planning for Neyman-Pearson Detection in Wireless Sensor Networks ................................................................. 57
   Yung-Liang Lai and Jehn-Ruey Jiang

AR-Based Positioning for Mobile Devices .................................................................................. 63
   Yaun-Chou Cheng, Ju-Yi Lin, Chih-Wei Yi, Yu-Chee Tseng, Lun-Chia Kuo, Yu-Jung Yeh, and Chung-Wei Lin

iMace: Protecting Females from Sexual and Violent Offenders in a Community via Smartphones ........................................................................ 71
   Jou-Chih Chang, Pi-Shih Wang, Kang-Hsuan Fan, Shih-Rong Yang, De-Yuan Su, Min-Shiung Lin, Min-Te Sun, and Yu-Chee Tseng

From Spatial Reuse to Transmission Power Control for CSMA/CA Based Wireless Ad Hoc Networks ................................................................. 75
   Han-Chuan Luo, Eric Hsiao-Kuang Wu, and Gen-Huey Chen
A Runtime Partitioning Technique for Mobile Web Services .................................................................81
Muhammad Asif and Shikaresh Majumdar

Routing and Buffering Strategies in Delay-Tolerant Networks: Survey and Evaluation .................................................................91
Shou-Chih Lo, Min-Hua Chiang, Jhan-Hua Liou, and Jhih-Siao Gao

A Lightweight Secure Data Aggregation Protocol for Wireless Sensor Networks .................................................................101
Hung-Min Sun, Chiung-Hsun Chen, and Po-Chi Li

Handling the Backhaul Link Failure for IEEE 802.16m Femto ABSs .................................................................108
Yu-Chan Lin, Whai-En Chen, and Meng-Hsuan Lin

A Study for Connection Establishment in Femtocell Network .................................................................114
Yu-Ching Hsu, Show-Shbig Tzeng, and Ching-Wen Huang

Channel-Aware Slot Assignment by Ant Colony in OFDMA-Based Mobile WiMAX Networks .................................................................119
I-Shyan Hwang, Chien-Yao Chiu, and Bor-Jiunn Hwang

A Femtocell-Assisted Data Forwarding Protocol in Relay Enhanced LTE Networks .................................................................127
Yuh-Shyan Chen, Chao-Chun Li, and Wen-Lin Chiang

Third International Workshop on Security in Cloud Computing (CloudSec 2011)

Trusted Dynamic Scheduling for Large-Scale Parallel Distributed Systems .................................................................137
Wei Wang and Guosun Zeng

A Generic Scheme for Secure Data Sharing in Cloud .................................................................145
Yanjiang Yang and Youcheng Zhang

Secure Connectivity for Intra-cloud and Inter-cloud Communication .................................................................154
Shiping Chen, Surya Nepal, and Ren Liu

A Secure Cloud Backup System with Assured Deletion and Version Control .................................................................160

A Secure File Allocation Algorithm for Heterogeneous Distributed Systems .................................................................168
Yun Tian, Jiong Xie, Shu Yin, Ji Zhang, Xiao Qin, Mohammed I. Alghamdi, Meikang Qiu, and Yiming Yang

Implications of Recovery Schemes for Virtualization Platform .................................................................176
Guanhua Tian and Dan Meng

A Security Framework of Group Location-Based Mobile Applications in Cloud Computing .................................................................184
Yu-Jia Chen and Li-Chun Wang

**Accelerating the Near Non-bonded Force Computation in Desmond with Graphic Processing Units** ................................................................. 191  
*Huailiang Deng, Xin Li, Xiaoguang Liu, and Gang Wang*

**Parallelized Face Based RMS System on a Multi-core Embedded Computing Platform** ................................................................. 199  
*Te-Feng Su, Jia-Jhe Li, Chih-Hsueh Duan, Shu-Fan Wang, and Shang-Hong Lai*

**Embedded Network Intrusion Detection Systems with a Multi-core Aware Packet Capture Module** ................................................................. 207  
*Chia-Hao Hsu and Sheng-De Wang*

**C++ Compiler Supports for Embedded Multicore DSP Systems** ................................................................................................. 214  
*Chi-Bang Kuan, Jia-Jhe Li, Chung-Kai Chen, and Jenq Kuen Lee*

**Adaptive Performance Monitoring for Embedded Multicore Systems** ................................................................................................. 222  
*Chun-Yi Shih, Ming-Chih Li, Chao-Sheng Lin, Pao-An Hsiong, Chih-Hung Chang, William C. Chu, Nien-Lin Hsueh, Chihhsiong Shih, Chao-Tung Yang, and Chorng-Shih Koong*

**An Efficient Approach of Power Reducing for Scratch-Pad Memory Based Embedded Systems** ................................................................. 229  
*Yanqin Yang, Wenchao Xu, Minyi Guo, and Zili Shao*

## Fourth International Workshop on Parallel Programming Models and Systems Software for High-End Computing (P2S2 2011)

**Recomposing an Irregular Algorithm Using a Novel Low-Level PGAS Model** ................................................................................................. 238  
*Megan Cason and Peter M. Kogge*

**JETS: Language and System Support for Many-Parallel-Task Computing** ................................................................................................. 249  
*Justin M. Wozniak and Michael Wilde*

**CellPilot: A Seamless Communication Solution for Hybrid Cell Clusters** ................................................................................................. 259  
*N. Girard, W.B. Gardner, J. Carter, and G. Grewal*

**A Middleware for Concurrent Programming in MPI Applications** ................................................................................................. 269  
*Tobias Berka, Helge Hagenauer, and Marian Vajtersic*

**Improving Performance of the Irregular Data Intensive Application with Small Computation Workload for CMPs** ................................................................................................. 279  
*Gu Zhimin, Fu Yinxia, Zheng Ninghan, Zhang Jianxun, Cai Min, Huang Yan, and Tang Jie*

**Interval Based I/O: A New Approach to Providing High Performance Parallel I/O** ................................................................................................. 289  
*Jeremy Logan and Phillip Dickens*
Energy-Constrained Dynamic Resource Allocation in a Heterogeneous Computing Environment ................................................................. 298
B. Dalton Young, Jonathan Apodaca, Luis Diego Briceño, Jay Smith, Sudeep Pasricha, Anthony A. Maciejewski, Howard Jay Siegel, Bhavesh Khemka, Shirish Bahirat, Adrian Ramirez, and Yong Zou

Integrating Scientific Workflows and Large Tiled Display Walls: Bridging the Visualization Divide ................................................................. 308
Hoang Nguyen, David Abramson, Blair Bethwaite, Minh Ngoc Dinh, Colin Eenticott, Slavisa Garic, A.B.M. Russel, Stephen Firth, Ian Harper, Martin Lackmann, Mary Vail, and Stefan Schek

Job Coscheduling on Coupled High-End Computing Systems ................................................................. 317
Wei Tang, Narayan Desai, Venkatram Vishwanath, Daniel Buettner, and Zhiling Lan

Kangaroo: Reliable Execution of Scientific Applications with DAG Programming Model ................................................................. 327
Kai Zhang, Kang Chen, and Wei Xue

View-Oriented Transactional Memory ................................................................. 335
K. Leung and Z. Huang

Seventh International Workshop on Scheduling and Resource Management for Parallel and Distributed Systems (SRMPDS 2011)

Agent-Based Adaptive Resource Allocation on the Cloud Computing Environment ................................................................. 345
Gihun Jung and Kwang Mong Sim

A Simulation Framework for Reconfigurable Processors in Large-Scale Distributed Systems ................................................................. 352
M. Faisal Nadeem, S. Arash Ostadjadheh, M. Nadeem, Stephan Wong, and Koen Bertels

An Extensible Design of a Load-Aware Virtual Router Monitor in User Space ................................................................. 361
Harry F.W. Choi and Patrick P.C. Lee

Can MPI Benefit Hadoop and MapReduce Applications? ................................................................. 371
Xiaoyi Lu, Bing Wang, Li Zha, and Zhiwei Xu

An Efficient I/O Aggregator Assignment Scheme for Collective I/O Considering Processor Affinity ................................................................. 380
Kwangho Cha and Seunghyoul Maeng

Energy-Aware Workload Consolidation on GPU ................................................................. 389
Dong Li, Surendra Byna, and Srimat Chakradhar
