Chiral Pesticides: Stereoselectivity and Its Consequences

A. Wayne Garrison, Editor  
U.S. Environmental Protection Agency  
Athens, Georgia

Jay Gan, Editor  
University of California - Riverside  
Riverside, California

Weiping Liu, Editor  
Zhejiang University  
Zhejiang, China

Sponsored by the  
ACS Division of Agrochemicals

American Chemical Society, Washington, DC  
Distributed in print by Oxford University Press, Inc.
## Contents

**Preface** ......................................................................................................................... ix

1. **An Introduction to Pesticide Chirality and the Consequences of Stereoselectivity** ......................................................................................................................... 1  
   A. Wayne Garrison

### Occurrences

2. **Chiral Chlordane Components in Environmental Matrices** ....................................... 11  
   Elin M. Ulrich and Renee L. Falconer

3. **Comparison of the Enantiomer Distribution of Chiral Organochlorine Contaminants in Captive West Greenland Sled Dogs and Polar Bears from Baffin Bay** ........................................................................................................ 45  
   Matthew S. Ross, Robert J. Letcher, Melissa A. McKinney, Christian Sonne, Rune Dietz, and Charles S. Wong

### Analysis

4. **Enantioselective Separation and Analysis of Chiral Herbicides** ................................. 67  
   Lixia Jin, Weiping Liu, Chunmian Lin, and Jay Gan

5. **Enantioselective Separation and Analysis of Synthetic Pyrethroids** ......................... 81  
   Jing Ye, Meiqing Jin, and Weiping Liu

### Toxic Effects

6. **Chiral Pesticides and Environmental Safety** .............................................................. 97  
   Yun Ma, Jay Gan, and Weiping Liu

7. **Enantioselective Toxicity of Chiral Pesticides in Aquatic Systems** ......................... 107  
   Huijun Liu, Weidan Cai, and Weiping Liu

8. **Enantioselectivity in Estrogenic Potential of Chiral Pesticides** ................................. 121  
   Cui Wang, Quan Zhang, Meirong Zhao, and Weiping Liu

9. **Phytotoxicity and Environmental Fate of Chiral Herbicides** .................................... 135  
   Qingyan Zhou and Weiping Liu
Toxicity Tests

10. Enantioselective Cytotoxicity and Molecular Mechanisms of Modern Chiral Pesticides ................................................................. 153
    Meirong Zhao and Weiping Liu

11. Evaluating in Vivo Toxicity of Chiral Pesticides Using the Zebrafish (Danio rerio) Embryo Model ......................................................... 167
    Chao Xu and Weiping Liu

Risk Assessment and Product Improvement

12. Ecological Risk Assessment Issues for Chiral Pesticides .................. 183
    James A. Hetrick, R. David Jones, and Silvia C. Termes

    Shanshan Zhou and Weiping Liu

Editors’ Biographies ............................................................................. 213

Indexes

Author Index .......................................................................................... 217
