BENEFICIATION OF PHOSPHATES

NEW THOUGHT
NEW TECHNOLOGY
NEW DEVELOPMENT

Edited by: Patrick Zhang I Jan Miller I Hassan El- Shall

Preface ........................................................................................................................................ vii

PART 1  THEORY AND APPLICATIONS

1 Polymers at Mineral Interfaces
   John Ralston ............................................................................................................................ 3

2 A Pilot-Scale Study of Effects of Nanobubbles on Phosphate Flotation
   Maoming Fan and Daniel Tao .................................................................................................. 21

3 Effect of Ca²⁺, Mg²⁺, PO₄³⁻, and SO₄²⁻ on the Flotation of Phosphate
   Huihua Luo, Lifen Liu, Baiqin Xie, and Shengping Ou .......................................................... 33

4 Research on the Adsorption Mechanism of a Mixed Collector on Middle-Low Grade Phosphate at Ambient Temperature
   Donglian Li, Yang Zhang, and Yadong Zhang .......................................................................... 39

5 Effect of Bias Flow on Flotation Efficiency in a Packed Column
   Jun Ji, Yiqiang Ding, Lianming Luo, Lei Liu, and Changyan Yang ............................................ 45

6 Relations Between MgO Occurrence in Phosphorite and Its Removal by Flotation Process
   Lianming Luo and Xin Liu ........................................................................................................ 53

PART 2  INNOVATIONS AND CONTROL

7 Magnetic Column Flotation for Magnetite Removal from a Brazilian Phosphate Ore
   S. Marino, M. Birinci, M. Sarksaya, X. Wang, C.L. Lin, and J.D. Miller .................................... 71

8 Column and Non-Conventional Flotation for Phosphate Recovery
   J.N. Kohmuench, E.S. Yan, and L. Christodoulou ..................................................................... 81

9 On-Line Laser Induced Breakdown Spectroscopy (LIBS) Analysis in the Phosphate Industry
   Y. Groisman, L. Nagli, and M. Gafi .......................................................................................... 91

10 Study of a Calcium-Silicon Phosphate Rock Separated by the Column-Machine Combined Process
    Leming Ou, Lijun Wang, Qiming Feng, and Xiaofeng Zhang .................................................... 99

11 Application of JKSimMet Simulation Models for Energy Reduction of Large-Scale Grinding Circuits
    Mingwei Gao .......................................................................................................................... 105

12 Beneficiation Improvements Through Automatic Controls
    Regis Stana, Vaughn Astley, and Chaucer Hwang .................................................................. 111

13 Effect of Basic Factors on Florida Phosphate Beneficiation Performances
    Guoxin Wang, Zhengxing (James) Gu, and David Ambrose .................................................... 117
PART 3
ACIDULATION AND HYDROMETALLURGY

14 An Approach Toward Flotation Reagents Optimization and Foam Phenomena Management in Phosphoric Acid Production
   A. Kossir and N. Makhoukhi ................................................................. 127

15 Recovery of Uranium from Phosphoric Acid: History and Present Status
   Vaughn Astley and Regis Stana ............................................................... 133

16 Recent Developments in Beneficiating Chilisai Phosphate Ore
   Michael E. Kelahan, Guoxin Wang, Serik Utegen, and Michael R. Kelahan ........ 141

17 Recovery of Rare Earths from Phosphogypsum
   Zeqiang Zhang, Yin Mei, Wensheng Zhang, Qihai Wu, and Dongsheng He ............ 149

18 Toxic Trace Elements Composition of Eranbee Phosphate Deposits, Central Jordan:
   Possible Environmental Implications
   M. Al-Hwaiti .................................................................................................. 153

PART 4
CHARACTERIZATION AND ANALYSIS

19 Advanced Instrumentation for Mineral Liberation Analysis and Use in the Phosphate Industry
   J.D. Miller, C.L. Lin, Ismael Ahmed, X. Wang, and Patrick Zhang .................... 167

20 Process Mineralogy Studies of Yichang Phosphate Ores
   Changlian Chen, Dianji Zhang, Hebin Shi, Shicong Bao, Ruan Chi, and
   Zhiliang Huang ........................................................................................... 177

21 Multi-Scale Characterizing of Mineralogical and Textural Features of Mid-Low-Grade Sedimentary Phosphate Rocks
   Hebin Shi, Hong Zhong, Yu Liu, Shulin Wang, and Ruan Chi .......................... 181

22 Hydroxyapatite with Different Morphologies Prepared by Natural Collophanite
   Wei Li, Changlian Chen, Xiaokuan Cheng, Jianqiu Li, Ruan Chi, and
   Zhiliang Huang ........................................................................................... 189

23 Exploring the Use of Rheology in the Phosphate Industry
   Francisco J. Sotillo ........................................................................................ 195

24 Characterization of Carbonated Hydroxyapatite Whiskers Prepared by Hydrothermal Synthesis
   Changlian Chen, Wenjuan Yuan, Jianqiu Li, Zhanhui Zhang, Ruan Chi, and
   Zhiliang Huang ........................................................................................... 209

PART 5
CONTAMINANTS AND QUALITY

25 Research and Practice in Phosphate Beneficiation in Yunnan Province
   Yaoji Li ......................................................................................................... 217

26 Removal of Carbonate Minerals from Saudi Phosphate Ores by Reverse Flotation Process
   Tariq F. Al-Fariss, Saeed M. Al-Zahrani, Farag A. Abd El-Aleem, and
   Khaled A. El-Nagdy ................................................................................... 225
27 Distribution of Fatty Acid Collector and Its Effect on Direct and Reverse Flotation of a Phosphate Ore
Y. Wei, X. Liu, W. Li, F. Li, and R.F. Sandenbergh

28 Dolomite Flotation Behavior in Crago Process and Options to Recover Flotation Concentrate with Acceptable MgO Content
Charles Guan and Glenn Gruber

29 Study on the Flotation of Refractory and Low-Grade Phosphate at Normal Temperature
Hui Chen, Lifen Liu, and Huibua Luo

30 Experimental Study on Reverse Flotation of Yichang Phosphorus Ore
Hanquan Zhang, Gang Zhang, Ran Peng, Huibua Luo, and Zibin Yuan

PART 6 SUSTAINABILITY AND THE ENVIRONMENT

31 Sustainability: Inorganic and/or Organic Phosphate?
J.L. Hendrix

32 Application of Reverse Flotation to Recover Phosphate Minerals from Plant Tailings
Zhongfu Xu, Qin Zhang, Hucangjin Lin, and Yueqin Qiu

33 Smart Phosphate Mining + Smart Fertilizer = Low-Cost Food Production
Regis Stana and Vaughn Astley

34 Efficacious Remediation of Acidic Phosphate Pond Water: Di-Cal Recovery from Pond Water
Vaughn Astley

35 Sulphur Matrix from Phosphogypsum: A Sustainable Route to Waste Valorization
M. Choura, F. Maaloul, M. Keskes, and F. Cherif

36 Biosolubilization of Rock Phosphate with S. Thermosulfidooxidans Containing Pyrite
C.Q. Xiao, R.A. Chi, Y.J. Fang, and W.X. Zhang

37 Phosphogypsum Management and Utilization: A Review of Research and Industry Practice
Patrick Zhang and Regis Stana

PART 7 REAGENTS AND CHEMISTRY

38 Research on the Flotation of Phosphate and Quartz Using Amine Derivatives SF_{12} and SP_{12}
Zhizhong Liu and Chunmei Xie

39 Improving Dolomite/Francolite Separation Performance Using New Reagents
Zhengxing (James) Gu, Guoxin Wang, and John Suldickas

40 Phosphate Flotation Enhancement Using Clay Binder
Jue Kou, Guangyang Xu, Daniel Tao, Pablo G. Dopico, John Hines, and Dennis Kennedy

41 Preliminary Investigations into the Use of Jojoba Oil as a Possible Collector in Phosphate Flotation
S. Al-Thyabat, M. Harareh, K. Tarawneh, and H. Al-Zoubi
42 High-Performance Fatty Acid Collector for Phosphate Flotation
    Jue Kou, Guangyang Xu, Daniel Tao, Pablo G. Dopico, John Hines, and Dennis Kennedy .... 353

43 Synthesis and Application of a Flotation Collector for Collophanite
    Qimao Huang, Jingjing Huang, Hong Zhou, Zhiqun Pan, and Xiang Ping. ................. 359

44 Laboratories and Industrial Pilot-Scale Study on the Two-Stage Reverse Flotation of
    Collophanite Ore
    Xiaobo Zeng and Yingyong Ge ................................................................. 367

Index ......................................................................................................................... 373
