## Table of Contents

**Greetings from the General Chairs**
- xvii

**Organizing Committee**
- xix

**Proceedings of the 2010 International Symposium on Intelligence Information Processing and Trusted Computing**

- Data Hiding Techniques Based on Wavelet-like Transform and Complex Wavelet Transforms
  - Sushil Kumar and S.K. Muttoo
  - 1

- Evaluating Supervised Machine Learning for Adapting Enterprise DRE Systems
  - Joseph Hoffert and Douglas Schmidt
  - 5

- The 128bit Block Cipher HyRAL (Hybrid Randomization Algorithm): Common Key Block Cipher
  - Kouzou Hirata
  - 9

- An Improved Vegas Scheme Based on Average Round Trip Time
  - Fuzhe Zhao, Shisong Xiao, and Jixiong Chen
  - 15

- Local Universities of China Management Information System Integration Model Design
  - KaiLiang Liang and Zhigao Lan
  - 18

- Tension Spline Fitting with Bezier Curve
  - Xincheng Guo, Chen Huang, and Peng Wang
  - 21

- Research on the Safety of University Financial System in the Network Environment
  - Chen Liyu
  - 25

- Reliability Analysis of Yarn Tension Control System Based on FTA in Jacquard Loom
  - Xiao-guang Wu, Chao Yu, and Li Zhu
  - 29
Dynamic Analysis of Vegetation Coverage Change in Miyun Reservoir Basin from 2000 to 2005 Based on Remote Sensing ................................................................. 33
  Tao Chen, Rui-qing Niu, Ping-xiang Li, Liang-pei Zhang, and Bo Du
An Image-Sequence Compressing Algorithm Based on Homography Transformation for Unmanned Aerial Vehicle ................................................................. 37
  Junbin Gong, Chenlin Zheng, Jinwen Tian, and Dingxue Wu
A Novel Regression Method Research Based on Covering Algorithm .................................................. 41
  Cheng-Gang He, Yan-Ping Zhang, Hui Sun, and Jin-Wei Gen
China's Legal Construction and Countermeasures in the Development of E-government .................................................. 45
  Shang Gao, Xiaofan Xue, and Aimin Liu
Power Spectral Analysis of Wrist Pulse Signal in Evaluating Adult Age .................................................. 48
  Quanyu Wu
Design and Realization of Health Monitoring System on Electric Wheel Truck .................................................. 51
  Shuxin Chen and Minglai Zhu
The Effect Mechanism of El Niño Southern Oscillation on Wheat Futures: Based on EMD and SSVS Algorithm .................................................. 55
  Lou Yingjun, Zhu Lijie, and Lu Lina
A Projection Pursuit Based Risk Assessment Method in Mobile Ad Hoc Networks .................................................. 60
  Fu Cai and Zhang Li
Decision of Trusted Software Behavior .................................................. 67
  Weiguang Kong
Design of Case-Based Reasoning System with Community Detection in Complexity Theory .................................................. 71
  Di Suo, Yali Zhu, Fuan Wen, Meisong Chen, and Yanlian Sun
The Color Components' Computing on Different Color Spaces for Image Segmentation of Hematocyte .................................................. 75
  Hang Dai and Xi Li
Modeling for the Basic Education Information Platform Based on UML .................................................. 79
  Ze-min Zhu
Solving Multi-objective Optimization Problems with Chaotic Ant Swarm .................................................. 83
  Renmin Han, Jun Huang, Junping Wang, and Dangming Guo
Reliable Multiple Object Tracking under Heavy Occlusions .................................................. 88
  Tian-jian Liu and Ping Xu
Least-Square Regularized Regression in Compressed Domain .................................................. 93
  Weijun Lu, Yi Tang, and Hong Chen
An Analysis of Stability of ECOC Kernel Machines .................................................. 97
  Weijun Lu, Hong Chen, and Dexin Cheng
A User-Centric Trust and Reputation Method for Service Selection .................................................. 101
  Surong Yan, Xiaolin Zheng, and Deren Chen
Intelligent Match Algorithm of Information Retrieve Interest .................................................. 106
  Wang Yuan
Research on Energy Feedback Based on SVPWM Algorithm for Three-Level ..................................................110
Wei Tian, Junmin Zhang, and Zhijun Zhang

Fingerprinting for Copyright Protection in P2P Context .......................................................................................114
Haibo Gao, Wenjuan Zeng, and Zhen Chen

The Design of On-vehicle Digital Terminal Based on Embedded System .........................................................118
Weihua Zang, Rui Guo, and Mingsheng Liu

Traffic Monitoring Using Floating Car Data in Hefei .........................................................................................122
Tiedong Wang, Tingjian Fang, Jianghong Han, and Jian Wu

Application of EMMD in Modal Parameter Identification of Structures under Ambient Excitation .........................125
Zhaowei Sun and Xiaoping Liu

A Novel Approach to Hide Information Based on MPEG B-Frames ......................................................................129
Peng Zheng, Bo Zhao, Minzhong Liu, and Yueyun Shang

Extracting Land Use/Cover of Mountainous Area from Remote Sensing Images Using Artificial Neural Network and Decision Tree Classifications: A Case Study of Meizhou, China ........................................................................................................133
Yong-zhu Xiong, Run Wang, and Zhi Li

Application of Rough Set-SVM Model in the Performance Evaluation of Supply Chain .......................................137
Ruihong Zhang, Rong Cao, Dachao Lin, and Lan Qiao

The Trust Development Policy of Critical System ..................................................................................................141
Yin Hu and Chaoyang Zhang

Combined Forecast Model of Refined Oil Demand Based on Grey Theory ..........................................................145
Qimin Zhang, Ning Chen, and Junchao Zhao

Orthogonal Collocation Methods and ADI Methods for Wave Equations with Variable Coefficients .................149
Ning Ma

Numerical Methods and Analysis for Compressible Miscible Displacement .........................................................153
Ning Ma

Complex Model of System Requirements Analysis .............................................................................................157
Xiaoyong Liao

A Novel 3-D Error Correcting Code Model with its Optimal Time Algorithm Analysis .........................................161
Guo-qiang Yu and Jian-an Mo

Research on the Early Warning Model of Enterprise Online Trust Crisis Based on Web Mining .........................165
Yitang Zeng, Chunhui Tan, and Lijuan Hu

Prediction of Fiber Diameter of Melt Blowing Nonwovens Produced by Dual Slot Inset Sharp Die ..........169
Zhao Bo

Design and Implementation of an Embedded Diagnosis System for Radar Built-in Test Equipment ..................173
Xianzhi Zhang and Wen Sheng
Clustered Feedback with Proportional Fair Scheduling Algorithm for Multi-user OFDM Systems .............................................................. 177

Lin Huang and Nian-sheng Chen

The Application of CUDA Architecture in Facial Expression Recognition ........................................................... 180

Jiangiang Lv and Chunfen Xia

Research State of Charge Estimation Tactics of Nickel-Hydrogen Battery ............................................................... 184

Zhihui Cai, Guofan Liu, and Jing Luo

Spatial Interpolation Method of Scalar Data Based on Raster Distance Transformation of Map Algebra ........................................... 188

Xiepeng Geng and Peng Hu

Study on View-Based Composite Connectors Modeling Method .................................................................................. 192

Zehong Lin and Xueyan Zhou

A Trust Quantification Algorithm Based on Fuzzy Comprehensive Evaluation .......................................................... 196

Shunan Ma, Jingsha He, Feng Gao, and Jing Xu

Intrusion Detection Based on Fuzzy Association Rules ......................................................................................... 200

KaiXing Wu, Juan Hao, and Chunhua Wang

Research and Design of Meta-search Engine Oriented Specialty .............................................................................. 204

Guang-ming Li and Wen-juan Geng

The Study of Force Control with Artificial Intelligence in Ceramic Grinding Process ...................................................... 208

Yuan-yuan Lu and Jin-hui Dong

Study on a SVG-Based Modular Graphics Generation System .................................................................................. 212

Yongxiang Hu

Forecast of Cerebral Infraction Incidence Rate Based on BP Neural Network and ARIMA Combined Model .................. 216

Fu Peng Tian and Liang Liang Ma

Parallel Polygonization of Implicit Surfaces ............................................................................................................. 220

Bin Yang, Gui-Lin Chen, and Ming-Yong Pang

Design and Implementation of an XML-Based Penetration Testing System .......................................................... 224

Bin Xing, Ling Gao, Jing Zhang, and Deheng Sun

Web Services Trustworthiness Evaluation Based on Fuzzy Cognitive Maps .......................................................... 230

Ben Wang, Xingshe Zhou, Gang Yang, and Yalei Yang

On the Asymptotic Behavior of Second Order Nonlinear Differential Equations ......................................................... 234

Juan Luo, Zhimin Luo, and He Qingyan

Discussion on the Nonlinear Dynamics of Antibody Number in the Antibody Concentration Inspired Network Security Detection Method ........................................................................ 237

Hui Zhao, Wen Chen, and Chieh Tsang

A Web Page Malicious Script Detection Method Inspired by the Process of Immunoglobulin Secretion ................. 241

Hui Zhao and Wen Chen

Real-Time Blind Source Separation of Speech Signals with Adaptive Particle Swarm Optimization ................................. 246

Taohua Luo
Small World-Based Query Mechanism ........................................................................... 250
   Zhiqiang Liu, Lifang Wang, Zhike Zhang, Aihua Zhang, and Zejun Jiang
The Modeling of Service Composition Path Selection Problem: Research
on Linear-Structured Composed Service Routing Problem ........................................ 254
   Yan-mei Zhang and Jian Wang
Application of Delta-bar-Delta Rules Trained Back-Propagation Neural Networks
in Nuclear Fusion Pattern Recognition ....................................................................... 258
   Nan Yu, Jiarong Luo, Shuangbao Shu, and Binxuan Sun
Simulation Research Based on an Improved Genetic Algorithm ................................. 262
   Jiang Jing, Boxue Tan, Lidong Meng, and Lin Jiang
An Integrated DEA-NN Method for Supplier Performance Evaluation ...................... 266
   Yuwei Tong and Minghui Yu
Study on Information Management and Security of E-commerce System .................... 270
   Xin Tian and Wei Dai
A Reputation-Based Incentive Mechanism in Anonymous Communication System .... 274
   Yanhui Wu, Sichun Wang, and Shuchu Xiong
Performance Analysis of Reputation-Based Anonymous Communication System ........ 278
   Yanhui Wu and Sichun Wang
The Computing Method of Semantic Relevancy of Clauses in Chinese Compound
Sentence .................................................................................................................. 282
   Jiangbo Shu and Jianhong Yang
Power-Law Distribution of Human Behaviors in Internet Forums ............................... 286
   Xia-Meng Si and Yun Liu
New Turbo Equalization Algorithm Using ICI Cancellation for OFDM Systems .......... 290
   Guoqiang Gong and Ping Xia
Data Mining Based Measurement Method for Software Trustworthiness ..................... 293
   Yuan Yuyu and Han Qiang
Research of a New Fuzzy Reasoning Method by Moving of Fuzzy Membership
Functions .................................................................................................................. 297
   Cholman Ho, Jingjiao Li, and Sonil Gwak
Data Fusion for Geometrical and Pixel Based Lip Feature .......................................... 301
   Mengjun Wang and Gang Li
An Intelligent Controller Design for Automobile Anti-collision Based on Fuzzy
Network .................................................................................................................... 305
   Hai-ru Guo and Zhi-min Li
Research of Traffic State Identification Based on Probe Vehicle ............................... 309
   Junge Bai and Liang Zhao
The Design and Implementation of Signal Reconnaissance Receiver Based on FPGA .... 312
   Zhengji Huang, Xiaolin Zhang, and Xiaoming Chang
3D Pose Determination and Non-linear Image Registration of Circular Traffic Sign .... 316
   Lei Ren, Fang Cao, and Zhonggen Yang
Research in Correlation Algebraic Attack on AES First Round ................................. 320
   Yuanyuan Zheng and Tao Wang

</table>
Research on Inform Rivalry Model and Dynamic Defense System under Network Environment ................................................................. 409

Wei-men Gao and Gui-xiang Li

Improved Particle Swarm Optimization in Design of Heterogeneous Distributed System .......................................................... 413

Jin-Guo Zhao and Qing-Yun Luo

Dynamic Authorization of Grid Based on Trust Mechanism ......................................................................................... 417

Xiao-jun Zhu, Shi-qin Lv, Xue-li Yu, and Guang-Ping Zuo

Contourlet-S and Generalized Gaussian Model Texture Image Retrieval System ....................................................... 422

Jian-Zhong Ma and Xin-Wu Chen

IIR Digital Filter Design Based on DSP and SOPC ........................................................................................................... 426

Jian-ping Zhang, Ling-ling Pan, and Quan-fei Ding

A Solution on the Enterprise Knowledge Management with Complexity ............................................................................ 431

Min Wang, Jiang Wang, and Yanzhao Li

Design and Implementation of Object Pool Based on J2ME RMS ...................................................................................... 435

Liang Zhao, Yang Xia, and Wei Zhang

Network Computing Based on the Credibility of Environmental Studies ........................................................................... 439

Yuhua Wang and Dawei Gu

An New PR-Tree Index Based on Pyramid Division ........................................................................................................ 442

Guobin Li and Jine Tang

Fast Multi-spectral Image Coding Algorithm Based on Fractal ....................................................................................... 446

Lei Zhu and Jing Yang

The Design and Implementation of Removable Storage Device Monitoring System Based on WDM Filter Driver ........................................................................................................... 450

Shaobo Li, Zhisheng Shao, Shulin Lv, and Xiaohui Jia

Optical Flow Analysis Based on Cellular Neural Networks ................................................................................................... 454

Lei Zhang and Yi-fang Weng

Research and Implementation of an Anomaly Detection Model Based on Clustering Analysis ................................................................................................................................. 458

Han Li

Research on Optimal Interfering Signal in Radio Anti-cheat System .................................................................................. 463

Lei Sun and Hang Zhang

Electrical and Mechanical Character of Smart Film for Crack Monitoring of Concrete Bridges ................................................................................................................................. 467

Yong Xu, Zhixiang Zhou, and Benniu Zhang

Credibility Evaluation of Missile Flight Simulation Model ...................................................................................................... 471

Yanyan Zhou, Dongyang Zhang, and Baoxiang Ren

Research on the Optimal Disposition of Near Space Multi-sensor Platform .................................................................................. 475

Dongyang Zhang, Yanyan Zhou, Shucai Huang, and Daozhi Wei

The Compressive Sensing Based on Biorthogonal Wavelet Basis ................................................................................................. 479

Shunliuao Yang, Zhengbing Zhang, Hong Du, Zhenghua Xia, and Hongying Qin
Research on Teaching Reformation of the Database Curriculum for Private Colleges and Universities Teaching Non-computer Majors ................................................................. 483

Feng-Ling Wang

Nonlinear Decoding for Precoded Spatial Multiplexing Systems with Limited Feedback ......................................................................................................................... 487

Hongliang Fu, Tiejun Yang, Yong Tao, and Dexian Zhang

Formal Photograph Compression in JPEG2000 Coding ................................................................................................................................. 491

Jun Hou, Wen Chen, and Jing Yang

Seamless Image Stitching Using Optimized Boundary Matching for Gradient and Curvature ........................................................................... 495

Fang Cao, Zhifang Zhang, and Qi Zhang

The Simulation Research on the Evacuation Model of Supermarket by Using GIS and Agent-Based Modeling Technology ........................................... 499

Shuangyun Peng, Kun Yang, Quanli Xu, and Yuhua He

Joint Error Correction and Encryption Scheme Based on Turbo Codes ........................................................................ 503

Qian Mao, Longji Sun, and Chuan Qin

A Network Access Control Approach for QoS Support Based on the AAA Architecture ....................................................................................... 507

Shujuan Wang and Mangui Liang

Application on Image Fusion Based on Balanced Multi-wavelet ......................................................................................................................... 512

Lijun Liu and Hui Zhang

IFF Copy Protection Based on DS28E01 and Nios II processor ............................................................................................................................... 516

Xien Ye and Zirui Huang

An Improved Canny Edge Detector Against Impulsive Noise Based on CIELAB Space ...................................................................................... 520

Jun Zeng and Dehua Li

Research and Application Based on Full Digital DC Speed Adjusting Device in Mine Hoist Automation System ........................................ 524

Huaizhong Chen

Research on Real-Time Lane Line Detection Techonology Based on Machine Vision ................................................................. 528

Huaizhong Chen and Zheliang Jin

Web Services Integration on Data Mining Based on SOA ................................................................................................................................. 532

Jin Li and Bo Song

Multi-parallel Architecture for MD5 Implementations on FPGA with Gigabit-level Throughput ................................................................. 535

Dongjing He and Zhi Xue

Research on Method in Detecting Cavity of the Cross-Section of Fiberboard Based on Image Processing ................................................................. 539

Jian-fei Zhang and Yan Ma

An Automatic Incident of Freeway Detection Algorithm Based on Support Vector Machine ........................................................................... 543

Zhou Zhou and Lin-ying Zhou

Research of Time Performance of Field Bus System on Electric Wheel Truck ...................................................................................... 547

Shuxin Chen, Jinhua Jia, and Qi Na
A Research of the Partition Clustering Algorithm .........................................................551
    Jing-zhong Xiao and Li Xiao
An Efficient System for Content-Based Hand Language Video Searching
under Complex Background .........................................................................................554
    Shilin Zhang and Mei Gu
Video Segmentation Using Acoustic Analysis ..........................................................558
    Shilin Zhang and Mei Gu
Optimized Design and Applications of Axial-flow Fan .............................................562
    Mei Qi, Chuanjiang Guo, and Huishen Liang
Research on Flexible Manufacturing Execution System Platform .........................565
    Jinliang Chen, Weiping He, Wenrui He, and Yanli He
Study of Anti Jamming of Radar Signal Based on Sparse Decomposition ................569
    Fuping Yu, Youqian Feng, Dahua Gao, and Qinli An
Rectangle Algebraic Attack of Serpent Encryption Algorithm ..................................573
    Wenlue Chen, Bolit Li, and Zhihua Hu
An Elementary Change of Matrix in the Use of Find the Solution of Equation ..........577
    Qingfang Zhang
Security Analysis of WAPI Key Negotiation Protocol ..............................................581
    Zaiqiang Ku, Nian Chen, and Zhihua Hu
Security Analysis and Improvement of WAPI Protocol .............................................585
    Nian Chen, Zhihua Hu, and Zaiqiang Ku
Related-Key Collision Attack of AES_256 .................................................................589
    Zhihua Hu and Zhongping Qin
Analysis and Design of the System for Detecting Fuel Economy ............................593
    Lei Liu, Michael Leon, and Li-hong Sun
Reputation and Role Based Access Control Model for Multi-domain Environments ..597
    Huang Yong
Fuzzy Evaluation Algorithm of Teaching Effect ......................................................601
    Weiguang Kong
USB Key-Based Approach for Virtual Assets Protection ...........................................604
    Meihong Li, Yibing Zhao, JiQiang Liu, and Jun Wang
Design and Implementation of Student Information Management System ...............607
    Zhibing Liu, Huixia Wang, and Hui Zan
An Optimized Method of Inter Modes Selection in H.264/AVC ................................611
    Guoxing Bao and Honghua Hu
E-commerce Reputation Modeling Based on Fuzzy Relation .................................615
    Meiying Fang, Xiaolin Zheng, and Deren Chen
Cryptanalysis of an Efficient Hierarchical Identity Based Signature Scheme in
the Standard Model ....................................................................................................619
    Xu An Wang, Weidong Zhong, and Haining Luo
Cryptanalysis of Efficient Identity Based Signature/Signcryption Schemes in
the Standard Model .................................................................................................622
    Xu An Wang, Weidong Zhong, and Haining Luo
Particle Filtering Object Tracking Based on Texture and Color .......................................................... 626

Hongwei Ying, Xuena Qiu, Jiatao Song, and Xiaobo Ren

The Development of an Intelligent Insulating Oil Dielectric Strength Testing Equipment ................................................. 631

Yang Fan, Du Siping, Liu Chang, and Xiao Bei

A Tolerance Rough Sets Theory-Based Knowledge Reduction Method in Knowledge Discovery in Databases ......................... 634

Yuanyuan Wei and Changhua Wei

Application of BCC Algorithm and RBFNN in Identification of Defect Parameters ..................................................... 638

Wei Kou, Feng-rui Sun, Li Yang, and Lin-gen Chen

Face Detection Method Research and Implementation Based on Adaboost ................................................................. 643

Dai Chen, Ji-lin Wang, and Yong Zhou

A New Roadmap Constitution Method Based on Dividing Grid and Level-Set ............................................................... 647

Shidong Li, Mingyue Ding, and Chao Cai

Improved Ant Colony Algorithm for Multipath Routing Algorithm Research ................................................................. 651

Na Lin and Zhixue Shao

A Wideband Monopole with Parasitic Elements Design .............................................................................................. 656

Bin Zhou, Guizhen Lu, and Yuming Hu

Image Fusion Based on Lifting Wavelet Transform ................................................................................................. 659

Xiaohong Xiao and Zhihong Wu

Design and Application of Intelligent Reasoning Module Based on Rough Set ............................................................... 663

Zu-qiao Yang, Gui-mei Liu, Xiao-hong Xiao, and Han-ping Gao

Improvement and Implementation on UMHexagonS Algorithm in H.264 Reference Software ........................................ 667

Zhihong Wu and Huixia Wang

Research about High Performance Disk Array in Stream Media Server ........................................................................ 671

Ding-Xue Wu and Guo-song Jiang

Intrusion Detection Models Analysis and Study of a New Structure ................................................................................ 675

Guo-song Jiang and Zhi-chao Yu

Design and Implementation of I/O Scheduling Algorithm Base on RAID Controller ............................................................. 679

Guo-song Jiang and Zhi-chao Yu

Trusted Computing-Based Double Factor Authentication for Mobile Terminals ............................................................. 683

Gaizhen Yang and Fen Zhou

Network Intrusion Detection Using Rough Sets Based Parallel Genetic Algorithm Hybrid Model ....................................................... 686

Fen Zhou and Gaizhen Yang

Content Based Video Retrieval Using Spatiotemporal Salient Objects .................................................................................. 689

Han-ping Gao and Zu-qiao Yang

Image Scrambling Encryption Algorithm Based on Limited Integer Domain ...................................................................... 693

Ruihong Zhang and Zhichao Yu

Spatial Changes of Cultivated Land in Zhongshan City Based on RS and GIS ................................................................. 697

Hengyao Tang and Yuan Fang
