2009 18th IEEE International Workshop on Enabling Technologies: Infrastructures for Collaborative Enterprises

(WETICE 2009)

Groningen, Netherlands
29 June – 1 July 2009

Editors:

Sumitra M. Reddy
2009 18th IEEE International Workshop on Enabling Technologies: Infrastructures for Collaborative Enterprises

WETICE 2009

Table of Contents

General Chair's Report
Organizer's Report
WETICE Organization Committee
ACEC Organizing Committee
CCC Organizing Committee
COPS Organizing Committee
DMC Organizing Committee
Edge Organizing Committee
ETNGRID Organizing Committee
ProGility Organizing Committee
SHII Organizing Committee
WeGovS2 Organizing Committee

Invited Speakers

Research Challenges for Building Complex Service-Oriented Systems for the Future Internet ................................................................. 1

Schahram Dustdar

Specific Drivers for SOA in E-government: Challenges and Solutions .................................................. 2

Carsten Hentrich

Cloud Service Engineering .............................................................. 3

Stefan Tai
Seventh International Workshop on Agent-Based Computing for Enterprise Collaboration (ACEC)

Agent-Based Computing for Enterprise Collaboration .................................................. Usman Wajid and César A. Marin
Dynamic Agent Hierarchies for Design Prototypes .................................................... Nick Szirbik, Marco Stuit, and Gerben Meyer
Enhancing Enterprise Collaboration Using a Protocol for Semantic Alignment ............... Usman Wajid and César A. Marin
An Agent-Based Architecture for Services Management .............................................. Giacomo Cabri

First International Workshop on Collaboration and Cloud Computing (CCC)

WETICE 2009—First Workshop on Collaboration and Cloud Computing ........................ Rao Mikkilineni
The Virtual Business Services Fabric: An Integrated Abstraction of Services and Computing Infrastructure ................................................................. Pankaj Goyal
Manageability and Operability in the Business Services Fabric .................................... Pankaj Goyal, Rao Mikkilineni, and Murthy Ganti
FCAPS in the Business Services Fabric Model ............................................................ Pankaj Goyal, Rao Mikkilineni, and Murthy Ganti
Creating Next Generation Cloud Computing Based Network Services and the Contributions of Social Cloud Operation Support System (OSS) to Society ............ Miyuki Sato
Cloud Computing and the Lessons from the Past ......................................................... Rao Mikkilineni and Vijay Sarathy
A Reference Model of Cloud Operating and Open Source Software Implementation Mapping ................................................................. Wenke Ji, Jiangbo Ma, and Xiaoyong Ji
Smart Metering the Clouds ......................................................................................... Tarry Singh and Pavan Kumar Vara
Virtual Systems Workload Characterization: An Overview ........................................... Mohamed A. El-Refaei and Mohamed Abu Rizkaa
Fifth International Workshop on Collaborative Peer-to-Peer Systems (COPS)

Fifth Collaborative Peer-to-Peer Systems (COPS 09) ................................................................. 84

Pedro Garcia Lopez

UniWiki: A Collaborative P2P System for Distributed Wiki Applications ........................................ 87

Gérald Oster, Pascal Molli, Sergiu Dumitriu, and Rubén Mondéjar

A Gossip-Based Distributed Social Networking System ................................................................. 93

BitTorrent or BitCrunch: Evidence of a Credit Squeeze in BitTorrent? ........................................ 99

David Hales, Rameez Rahman, Boxun Zhang, Michel Meulpolder, and Johan Pouwelse

GeoIGM: A Location-Aware IGM Platform ..................................................................................... 105

Neil Cowzer and Aaron Quigley

Search Optimizations in Structured Peer-to-Peer Systems ............................................................ 111

Nuno Lopes and Carlos Baquero

Collabrium: Active Traffic Pattern Prediction for Boosting P2P Collaboration .............................. 116

Shay Horovitz and Danny Dolev

Bootstrapping Peer-to-Peer Systems Using IRC ................................................................................ 122

Mirko Knoll, Matthias Helling, Arno Wacker, Sebastian Holzapfel, and Torben Weis

A Game Theoretical Approach in Securing P2P Storage against Whitewashers ........................... 128

Nouha Oualha and Yves Roudier

Secure Peer Sampling Service: The Mosquito Attack .................................................................... 134

Gian Paolo Jesi and Alberto Montresor

Maintaining Unlinkability in Group Based P2P Environments ....................................................... 140

Joan Arnedo-Moreno and Jordi Herrera-Joancomartí

Incentives for Voting-Based Quality Control and Document Storage in P2P Collaboration .......... 146

Thomas Bocek, Fabio Victora Hecht, David Hausheer, Dalibor Peric, and Burkhard Stiller

Seventh International Workshop on Distributed and Mobile Collaboration (DMC)

DMC 2009—Distributed and Mobile Collaboration Workshop Report ............................................. 148

Gerald Reif, Harald Gall, Hong-Linh Truong, and Schahram Dustdar

Towards a Framework for Distributed and Collaborative Modeling .......................................... 149

Antonio Cicchetti, Henry Muccini, Patrizio Pelliccione, and Alfonso Pierantonio
First International Workshop on Integrating the Edge with the Enterprise for Planning and Management (Edge)

Workshop on Integrating the Edge with the Enterprise for Planning and Management (EDGE) ................................................................. 155
Vinod Kulathumani, Rajiv Ramnath, and Jay Ramanathan
A Framework for Improving Enterprise Services by Mining Customer Edge Data ................................................................. 156
Preethi Raghavan, Jay Ramanathan, Rajiv Ramnath, and Zhe Xu

Sixth International Workshop on Emerging Technologies for Next Generation GRID (ETNGRID)

Emerging Technologies for Next-Generation GRID ................................................................. 162
Giovanni Morana, Corrado Santoro, and Emiliano Tramontana
Gridhra—A Web Launched Parallel Application Debugger for Grids with Heterogeneous Resources ................................................................. 164
Asvija B, Shamjith K.V., Ravi T, and Sridharan R
Synergy of Task Allocation Techniques for Large Computational Grids ................................................................. 171
Ilias K. Savvas
Implementing Data Security in Grid Environment ................................................................. 177
Vincenzo D. Cunsolo, Salvatore Distefano, Antonio Puliafito, and Marco Scarpa
Design and Implementation of an XML-Based Grid File Storage System with Security Features ................................................................. 183
Francesco Tusa, Massimo Villari, and Antonio Puliafito
A Credentials Management System for Secure Trade in a Grid Services Marketplace ................................................................. 189
Antonella Di Stefano, Giovanni Morana, and Daniele Zito
Performance Evaluation of Grid-Enabled Code: A Case Study ................................................................. 195
Sonya Marcarelli, Emilio P. Mancini, and Umberto Villano
PerfCloud: GRID Services for Performance-Oriented Development of Cloud Computing Applications ................................................................. 201
Emilio P. Mancini, Massimiliano Rak, and Umberto Villano
Analysing the Performances of Grid Services Handling Job Submission ................................................................. 207
Rosario Giunta, Fabrizio Messina, Giuseppe Pappalardo, and Emiliano Tramontana
Building T-wise Combinatorial Interaction Test Suites by Means of Grid Computing ................................................................. 213
Andrea Calvagna, Angelo Gargantini, and Emiliano Tramontana
Fourth International Workshop on Agile Cooperative Process-Aware Information Systems (ProGility)

Workshop Report .................................................................................................................. 219

Rik Eshuis, Jan Mendling, Mirjam Minor, and Barbara Weber

A Service-Oriented Approach to Document-Centric Situational Collaboration

Processes .................................................................................................................................. 221

Nelly Schuster, Christian Zirpins, Stefan Tai, Steve Battle, and Nils Heuer

An Architecture for Collaboration Patterns in Agile Event-Driven Environments

Yiannis Verginadis, Dimitris Apostolou, Nikos Papageorgiou, and Gregoris Mentzas

Alaska Simulator—Supporting Empirical Evaluation of Process Flexibility

Jakob Pinggera, Stefan Zugal, and Barbara Weber

First International Workshop on Smart Homes Infrastructures and Interactions (SHII)

Smart Homes Infrastructures and Interactions (SHII 2009) ................................................................ 234

Marco Aiello, Tiziana Catarci, and Massimo Mecella

Virtual Smart Home Controlled by Thoughts ........................................................................ 236

Clemens Holzner, Christoph Guger, Günter Edlinger, Christoph Grönegress, and Mel Slater

Deploying Pervasive Web Services over a P2P Overlay .......................................................... 240

Francisco Milagro Lardies, Pablo Antolin Rafael, Joao Fernandes, Weishan Zhang, Klaus Marius Hansen, and Peeter Kool

Is Telecare Feasible? Lessons from an In-depth Case Study .................................................... 246

Johan C. Wortmann, Albert Boonstra, Manda Broekhuis, John van Meurs, Marjolein van Offenbeek, Wim Westerman, and Jacob Wijngaard

First International Workshop for eGovernment via Software Services (WeGovS2)

Workshop for E-government via Software Services (WeGovS2 2009) ....................................... 252

Alexander Lazovik, Paris Avgeriou, and Hans Wortmann

An Overview of Software Engineering Approaches to Service Oriented Architectures in Various Fields ......................................................................................................................... 254

Artemios Kontogogos and Paris Avgeriou
