Pipelines 2011

A Sound Conduit for Sharing Solutions

Seattle, Washington, USA
23-27 July 2011

Volume 1 of 2

Editors:

Hyung Seok Jeong          Dan Pecha

# TABLE OF CONTENTS

## VOLUME 1

### ASSET MANAGEMENT

**Asset Management Answer to an EPA Order** .................................................. 1  
Joseph A. Strouch  
**Damage Identification Based on Modal Analysis of Prestressed Concrete Pipes** ........ 12  
Ali Alavinasab, Ratneshwar Jha, Goodarz Ahmadi  
**Development and the Comparison of a Weighted Factor and Fuzzy Inference Model for Performance Prediction of Metallic Water Pipelines** ........................................... 24  
Alison M. St. Clair, Sunil K. Sinha  
**Portland’s Water Distribution Pipes Asset Management Plan** ........................... 33  
J. Leighton, D. Evonuk, T. Liberator  
**Optimized Pipe Renewal Programs Ensure Cost-Effective Asset Management** .......... 44  
Elsinore Mann, Jeffery Frey  
**Crack Propagation in Prestressed Concrete Noncylinder Pipe Using Finite Element Method** ........................................ 55  
Ali Alavinasab, Edward Padawski III, Mike Higgins, Mark Holley, Ratneshwar Jha, Goodarz Ahmadi  
**Examination of Asbestos Cement Pipe Deterioration with Scanning Electron Microscopy** ........................................ 65  
Dunling Wang, Yafei Hu, Rudaba Chowdhury  
**Post Rehabilitation Assessment of System Integrity and Effectiveness of Retro Fitted Cathodic Protection Using Long Term Acoustic Monitoring Data** ........................ 79  
O. Essamin, N. Bulheina, A. Leight, Nabil Feghi, M. Wrigglesworth  
**National Database for Water Infrastructure System** .............................................. 89  
Sunil Sinha, Walter Graf  
**Transitioning from Leak Detection to Leak Prevention: Proactive Repair of Steel Pipelines Using Fiber Reinforced Polymer (FRP) Composites** ........................................... 100  
Mark Geraghty, Anna Pridmore, Julio Sanchez  
**How to Fund Pipeline Renewal: Transitioning from O&M Funds to Capital Improvement Budgets** ........................................ 108  
Rudy Loera, Anna Pridmore  
**Managing Gravity Pipelines in Philadelphia** ................................................... 118  
Edward D. Speer, George Collier  
**Using Real Age As a Better Indicator of Predicting Asset Remaining Life** ............ 126  
Syadaruddin Syachrani, Hyung Seok Jeong, Colin S. Chung  
**Introduction of Mobile Asset Management Technology to a Mid-Size Utility** .......... 134  
Jim O’Dowd  
**Observations from Several Condition Assessments of Prestressed Concrete Cylinder Pipe Used at Energy Generation Facilities** ........................................ 147  
Todd Stong, Ron R. Jorgenson, Jacob Sauer  
**Statistical Analysis of Condition Assessment Data and Prediction of Future Performance of PCCP** ........................................ 160  
Mehdi S. Zarghamae, P. Graham Cranston, Roger Fongemie, Daniel Wittas  
**Asset Management Likelihood of Failure Scoring Improved by Condition Assessment Scoring Integration Techniques** ........................................ 170  
Reggie Rowe, Vani Kathula, John Bergin, Courtney Call Kennedy  
**Prestressed Concrete Cylinder Pipe Condition Assessment—What Works, What Doesn’t, What’s Next** ........................................................................ 182  
Mehdi S. Zarghamae, Rasoo F. Ojdovic, Peter D. Nardini  
**It’s Never Easy...Development and Implementation of a Comprehensive Force Main Condition Assessment** ........................................ 195  
Travis B. Wagner  
**Practical Application of Force Main Condition Assessment Methodologies for Long Term Asset Management Needs** ........................................ 202  
Andrew S. Clouthier, Peter Oram, Andrew M. Kabek  
**Denver Water’s Assessment of Interior Polyurethane Coating of 108 Inch Water Pipeline** ........................................ 215  
John H. Bambei Jr., Neal Kelemen, Richard Mielke  
**Asset Management of Asbestos Cement Pipes Using Acoustic Methods: Theory and Case Studies** ........................................ 225  
Marc Bracken, Dave Johnston, Matthew Coleman  
**Risk-Based Linear Asset Management at Fort Collins Utilities** .......................... 236  
Chris Parton, David Connor, Dilip Kumar, Simon Heart
Sewer Main and Stub Condition Assessment and Repair/Rehabilitation—A Practical Approach ........................................ 248
William F. Heubach

EDUCATION, TRAINING, AND PUBLIC INVOLVEMENT

A Training Program for Asset Management of Infrastructure Water Pipelines ............................................................ 258
H. D. Tran

Rigor Matrix to Enhance Public Involvement Effectiveness for Infrastructure Projects .................................................. 268
Andrew S. Chang, Kian-Pel Lee

Case Study: Public Involvement Outcomes in Four Seattle Communities Targeted for New Combined Sewer Overflow Facilities .......................................................... 277
Monica Van Der Vieren, Robert Wheeler, Shahrzad Namini

GEOTECHNICAL CONSIDERATIONS FOR PIPELINE PROJECTS

Numerical Simulation of Buried Steel Pipelines under Strike-Slip Fault Displacements ............................................ 286
Polynikis Vazouras, Spyros A. Karamanos, Panos Dakoulas

Constrained Modules of Crushed Rock for Pipeline Embedment ................................................................................. 300
Amater Howard

Finite Element Analyses of Soil-Pipe Behavior in Dry Sand under Lateral Loading ..................................................... 312
Jai K. Jang, Kunyong Zhang

Mitigating Geohazards along Aging Infrastructure—The Tolt Pipeline ................................................................. 325
Claire L. R. Gibson, Taryn Sass, Dennis R. Stentler, Colin B. Turnhull, Robert O. Middour

Development, Procedure, and Results for the Constrained Modulus of Gravel and Crushed Rock Test ...................... 335
J. Erica N. Gemperline, Mark C. Gemperline

Over or Under: Geotechnical Considerations for Pipeline Levee Crossings ............................................................. 347
David P. Sauls, Andrew E. Sparks, Michelle L. Ramos

Contribution of Lateral Earth Pressure Resistance to Restrain Horizontal Thrust in Buried Pipelines ....................... 358

PIPELINE CONSTRUCTION AND REHABILITATION

Hot Tapping and Plugging in New York City: A Method to Maintain Service and Protect the Marine Environment during Reconstruction of a Major Sewage Pumping Station and Treatment Plant ........................................... 372
Charles Herckis

The Need for National Data Standards for Condition Assessment .............................................................................. 382
L. Grant Whittle, Kristi Steiner, Sunil Sinha

Internal PCCP Force Main Deterioration—Analysis and Rehabilitation ................................................................. 395
Garry Mak

Weighing the Risks of Installing a Lake Tap with Microtunneling ............................................................................. 405
Christy Sanders-Meena, Anne Tonella-Howe, Matthew Pease

Hole Swallows Car, Film at 11:00: Greensboro's Pilot Program for Water Pipe Bursting Leads to Expanded City Wide Program .............................................................. 418
Robert H. Baldu Jr.

Pipe Reaming in Seattle ................................................................................................................................................. 431
Roger Beieler

Rehabilitating a Life Line: Inspecting and Repairing the Hultman Aqueduct in Metropolitan Boston ....................... 442
Paul Savard, Peter McGovern

Multiple HDD Applications for Portland Airport Deicing Enhancement Project ....................................................... 455
Jack R. Ostlund Jr., Barry Sarin

Sophisticated Sequencing of Water Transmission Main Repairs ............................................................................... 468
Ed Alleyne, Bill Judy, Roger Cronin, Denise Nelson

Engineering Assessment of Damaged 66 Inch Water Main ........................................................................................ 478
Alfredo Saenz, Robert J. Card

Target Values of Compacted Gravel for Pipelines ........................................................................................................ 491
Amater Howard

Rehabilitation of Brazos River and Colorado River Pipeline Bridges ........................................................................ 501
Maria Grazia Bruschi, John C. Clemence, Seth Condell, John Schmid
