Protection of Historical Buildings

PROHITECH 09

Editor

Federico M. Mazzolani

Department of Structural Engineering, University of Naples “Federico II”, Naples, Italy

VOLUME 2
~Volume 2

Innovative materials and techniques

• Pure aluminium, as innovative material for seismic protection devices
  G. De Matteis, G. Brando & F.M. Mazzolani  1003

Performance based seismic evaluation of a non-seismic masonry building of metal sheathed walls – Part I: PBSE and intervention strategy
  A. Dogariu & D. Dubina  1009

Performance based seismic evaluation of a non-seismic masonry building of metal sheathed walls – Part II: Study case
  A. Dogariu & D. Dubina  1015
• Experimental assessment of the CAM and DIS-CAM systems for the seismic upgrading of monumental masonry buildings

• Material innovation for historic structure repairs
  S. Hamoush & S. Amer

• Polymer flexible joints – An innovative repair system protecting cracked masonries against stress concentrations
  A. Kwiecien

Influence of control algorithm in smart systems for the seismic up-grading of existing buildings
  A. Mandara, F. Ramundo & G. Spina

• Performance levels under seismic actions of masonry structures retrofitted with steel elements
  A. Mandara, F. Ramundo & G. Spina

• Designing the guidelines for the usage of “smart materials” on the conservation of historical buildings
  V. Nushi, Sh. Nixha & Gj. Hoxha

• Hybrid intelligent system for optimal design of HPC mix proportion
  R. Parichatprecha, P. Nimityongskul, S. Sayamipuk & V. Greespala

• Innovative technologies for the seismic protection of cultural heritage in Cyprus
  P. Roussis, E.A. Pavlou & C.Z. Chrysostomou

Effectiveness of surface or bulk hydrophobic treatments in cementitious materials
  F. Tittarelli & G. Moriconi

Historic buildings speak to our past through the art and ingenuity of our ancestors

Innovative technologies for strengthening of an irregular R. C. building
  I. Vayas & M. Papageorgiou

Nonlinear FE analysis of fiber reinforced concrete floor diaphragms undergoing horizontal seismic actions
  C. Zanotti, A. Marini & G.A. Plizzari

--- Numerical analysis ---

Limit analysis of masonry domes subjected to horizontal loads
  C. Anselmi, E. De Rosa, F. Galizia & D. Maniello

• Limit analysis for masonry walls discretized in staggered rigid macro-blocks subjected to out-of-plane loading
  C. Anselmi, E. De Rosa & F. Galizia

Numerical analyses of masonry-RC combined systems
  N. Augenti & F. Parisi

The acoustic model of the Greek theatre
  B. Beckers & N. Borgia

Horizontal capacity of masonry portal frames under different loading conditions
  G. Brandonisio, A. De Luca & E. Mele

Numerical investigation of the seismic response of Parthenon, Greece
  M.E. Dasiou, I.N. Pshycharis & I. Vayas

• Experimentally based calibration of a FE Model for numerical analysis of masonry shear panels strengthened by metal sheathing
  A. Dogaru, D. Dubina, F. Campitiello & G. De Matteis
• Calibration of a numerical model for masonry with application to experimental results
  E. Dumova-Jovanoska & S. Churilov 1139

Comparative assessment of analysis methods for irregular masonry walls
  A. Formisano & F.M. Mazzolani 1147

• Ultimate limit state of masonry historical buildings using collapse mechanism methodology:
  Application for Orthodox churches
  V. Gioncu & M. Mosoarca 1153

On finite element modeling of structures under infrequent loadings
  L. Kwasniewski 1159

• Numerical vs. experimental analyses of Mustafa Pasha Mosque model
  L. Lazarov & K. Todorov 1165

• Numerical F.E.M. refined analyses of the façade of Monte di Pietà in Naples, Italy:
  Analysis of the damage evolution
  G.P. Lignola, G. Manfredi & B. Faggiano 1171

• Out of plane behaviour of unreinforced masonry walls
  M. Monaco & M. Guadagnuolo 1177

Parametric studies using tools for the analysis of the stability of masonry structures
  A. Oikonomopolou, T. Ciblac & F. Guena 1181

• Strengthening of masonry using metal reinforcement: A parametric numerical investigation
  M.E. Stavroulaki, G. Bartoli, M. Betti & G.E. Stavrolakis 1187

Seismic response of traditional masonry buildings: Parametric study and evaluation
  S.P. Tastani, M. Papadopoulos & S.J. Puntazopoulou 1193

Fracture analysis of retrofitted monuments out of no proper stress distribution at earthquake time
  H.R. Yosoughifá & V. Davari 1199

- Traditional restoration techniques

• Dynamic investigations on medieval masonry towers: Seismic resistance and strengthening techniques
  D. Abbruzzese, L. Miccoli, A. Vari, M. Ferraioli, A. Mandara & S. Froncillo 1207

Complete substitution of external walls for traditional restoration of an historic masonry building
  G. Brandonisto, A. De Luca, A. De Martino & G. Mautone 1215

• Restoration of an historic kulliye in Turkey: Traditional techniques, steel interventions and sustainability approach
  Ö.N. Cocen & E. Efthymiou 1221

Experimental analysis of riveted connection in historic metallic structures
  M. D’Aniello, L. Fiorino, F. Portioli & R. Landolfo 1227

“Gadhi Soil” in Maharashtra – traditional practices and future use of compacted Gadhi Soil blocks in rural housing
  V.G. Kondekar, O.R. Jaiswal & L.M. Gupta 1233

• Deterioration and repair possibilities of natural stone facades
  J. Lahdensivu 1239

Natural pozzolanic mortars: Ancient indication for modern working capacity
  E. Sala, I. Giustina & G.A. Plizzari 1245

Intervention strategies

The role of the in-plane stiffness of timber floors in the seismic response of un-reinforced masonry buildings
  A. Brignola, S. Podestà & S. Pampanin 1253
• Seismic assessment and rehabilitation of a historical theatre based on a macro-element strategy
  C. Cennamo, B. Chiaia, S. D’Angelo & D. Ferretti

• Verification of numerical models used for the analysis of ancient temples
  M.E. Dasiou, I.N. Psycharis & I. Vayas

Economic assessment of different shear strengthening methods for clay brick masonry walls
  D. Diaconu, T. Nagy-György, V. Stolian, D. Dan, S.C. Florut, C. Dăescu & I. Demeter

Structural consolidation and seismic strengthening of Fatih (Prishtina) and Sinan Pasha (Prizren) Mosques – Kosovo
  P. Gavrilovic, G. Jekic, B. Ceko & M. Ackay

Strengthening of building by modification of structural system
  M. Mosoarca & V. Gioncu

Potential of anhydrite application in restoration of the civil engineering heritage of Serbia
  D.S. Kostić & Z. Grdić

• The effectiveness of strengthening historic brick vaults by contemporary methods
  J. Jasieńko, Ł. Bednarz & T. Nowak

Assessing the rocking response of unreinforced masonry frames in historical New Zealand structures
  C.L. Knox, Q.T. Ma & J.M. Ingham

Seismic protection & protection against demolition of Bucharest heritage buildings
  D. Lungu, A. Aldea & C. Arion

Refurbishment of Palazzo Novo of the Bibliotheca Hertziana in Rome
  A. Marimpietri, M. Mezzi & A. Parducci

The rehabilitation of the Postignano Castle (Sellano, Italy): Medieval Hilltown, country houses and training center
  G. Matacena, M. Scaramella, A. Gravagnuolo, M. Rispoli, F.M. Mazzolani & S.M. Mazzolani

• Strengthening of a historical apartment building by the insertion of steel seismic-resistant cores
  M. Mosoarca, V. Gioncu & M. Niculescu

Socio-cultural challenges of preserving historical heritage in Africa: Lessons from the King’s palace, Akure
  T.O. Odeyale

From the idea of invention through its testing to final realization all over four continents
  Z. Petrošković

Strengthening of masonry and earthen structures by means of grouting – design of grouts
  R.A. Silva, D.V. Oliveira & L. Schueremans

The pull-out problem in restoring marble fragments

• Structural evaluation and maintenance programs of historical buildings used as museums in Toluca city
  R. Vera, G.A. Segura & S.A. Miranda

Structural restoration of damaged XVIII century building: The military barracks ‘Caserma Principe Amedeo’ in Nola, Italy
  S. Voto, G. Manfredi, G.P. Lignola & M. Acanfora
Vulnerability to man-made hazards

A brief review on building fire safety in the Qing Dynasty
W.K. Chow & F.Y. Liu

Computational fluid dynamic analysis of water mist system performance for fire safety of a nineteenth century cast-iron structured building
J. de la Quintana

Improvement of fire resistance of cast-iron columns
M. Degefa, F. Wald, J. Kolisko & M. Matějka

Protection of historic urban structures during adjacent construction
E. Hammarberg, K. Kesner & D. Trelstad

Protection of historical buildings from rail traffic vibrations
S. Lakusic, V. Tkalcevic Lakusic & M. Bogut

About man-made hazards for cultural monuments in Sofia region (Bulgaria)
M. Matova & R. Glavcheva

Drilling-induced vibrations in rock church “Our Lady” – Ivanovo, Russe, NE Bulgaria
I. Paskaleva, A. Lakov, N. Nikolaev & V. Parushev

Residual strength of traditional brick masonry subjected to high temperatures
S. Russo & F. Sciarretta

Reconstruction and seismic strengthening of St. Athanasius church damaged by explosion
VI. Sendova, P. Gavrilovic, B. Stojanoski & G. Jekic

Vulnerability to natural hazards

Assessment of the structural capacity of the tunnel-entrance in the stadium of Ancient Nemea
C.D. Alexakis & N. Makris

Earthquake hazard and risk in Romania
C. Arion, D. Lungu & R. Vacareanu

Seismic vulnerability assessment of historical masonry buildings
B. Calderoni, E.A. Cordasco, P. Lenza & G. Pacella

Expert system for seismic vulnerability assessment of masonry structures
S. Churilov

Low-impact interventions for the preservation of cultural heritage: The dying town of Civita di Bagnoregio (Central Italy) and the killer landslide
G. Delmonaco, C. Margottini & D. Spizzichino

Cultural heritage buildings and earthquakes in Switzerland
M. Devaux & P. Lestuzzi

Performance evaluation of historical masonry monumental structures during the 1999 Turkey earthquakes
A. Doğangün, H. Sezen & R. Livaoğlu

Performance based seismic evaluation of multistory buildings with openings in infill walls
S.S. Dyavanal & S.A. Annigeri

Model of urban composition: Integration of area refuge against the seismic risk
B. El Kechebour & A. Nechnech
