Improving Scene Text Detection by Scale-Adaptive Segmentation and Weighted CRF Verification .................................................................759
Yi-Feng Pan, Yuanping Zhu, Jun Sun, and Satoshi Naoi

Progressive Alignment and Discriminative Error Correction for Multiple OCR Engines .....................................................................................764
William B. Lund, Daniel D. Walker, and Eric K. Ringger

Offline Writer Identification Using K-Adjacent Segments ........................................769
Rajiv Jain and David Doermann

Binarizing the Courtesy Amount Field on Color Chinese Bank Check Images .................774
Dong Liu and Youbin Chen

A Table Detection Method for Multipage PDF Documents via Visual Separators and Tabular Structures .....................................................779
Jing Fang, Liangcai Gao, Kun Bai, Ruiheng Qiu, Xin Tao, and Zhi Tang

Look Inside the World of Parts of Handwritten Characters ........................................784
Wang Song, Seiichi Uchida, and Marcus Liwicki

Chinese Keyword Spotting Using Knowledge-Based Clustering ..................................789
Yong Xia, Kuanquan Wang, and Mingwei Li

Text Segmentation of Consumer Magazines in PDF Format ....................................794
Jian Fan

On-line Chinese Character Recognition System for Overlapping Samples .....................799
Xiang Wan, Changsong Liu, and Yanming Zou

On-line Signature Verification Using Segment-to-Segment Graph Matching ................804
Kaiyue Wang, Yunhong Wang, and Zhaoxiang Zhang

Snap and Translate Using Windows Phone ................................................................809
Jun Du, Qiang Huo, Lei Sun, and Jian Sun

Comparative Study of Part-Based Handwritten Character Recognition Methods .............814
Wang Song, Seiichi Uchida, and Marcus Liwicki

A Keypoint-Based Approach toward Scenery Character Detection ................................819
Seiichi Uchida, Yuki Shigeyoshi, Yasuhiro Kunishige, and Feng Yaokai
Three Dimensional Rotation-Free Recognition of Characters ................................................................. 824
   Ryo Narita, Wataru Ohyama, Tetsushi Wakabayashi, and Fumitaka Kimura

A Novel Approach for Graphics Recognition Based on Galois Lattice and Bag
of Words Representation ............................................................................................................................ 829
   Amani Boumaiza and Salvatore Tabbone

Effects of Line Densities on Nonlinear Normalization for Online Handwritten
Japanese Character Recognition .................................................................................................................. 834
   Truyen Van Phan, JinFeng Gao, Bilan Zhu, and Masaki Nakagawa

Super-Resolved Binarization of Text Based on the FAIR Algorithm ...................................................... 839
   Thibault Lelore and Frédéric Bouchara

Writer Identification Using TF-IDF for Cursive Handwritten Word Recognition ..................................... 844
   Quang Anh Bui, Muriel Visani, Sophea Prum, and Jean-Marc Ogier

Creation and Analysis of a Corpus of Text Rich Indian TV Videos ..................................................... 849
   T. Chattopadhyay, Soumik Sengupta, Aniruddha Sinha, and Nisha Rampuria

Text Classification and Document Layout Analysis of Paper Fragments ................................................. 854
   Markus Diem, Florian Kleber, and Robert Sablatnig

Touching Character Separation in Chinese Handwriting Using Visibility-Based Foreground Analysis ................................................................................................................................. 859
   Liang Xu, Fei Yin, Qiu-Feng Wang, and Cheng-Lin Liu

Improved Automatic Analysis of Architectural Floor Plans .................................................................... 864
   Sheraz Ahmed, Marcus Liwicki, Markus Weber, and Andreas Dengel

Subgraph Spotting through Explicit Graph Embedding: An Application
to Content Spotting in Graphic Document Images .................................................................................. 870
   Muhammad Muzzamil Luqman, Jean-Yves Ramel, Josep Lladós, and Thierry Broduard

Exploiting Collection Level for Improving Assisted Handwritten Word Transcription of Historical Documents ................................................................................................................................. 875
   Laurent Guichard, Joseph Chazalon, and Bertrand Couasnon

Embedding a Mathematical OCR Module into OCRopus ....................................................................... 880
   Shinpei Yamazaki, Fumihiro Furukori, Qinzheg Zhao, Kelichiro Shirai, and Masayuki Okamoto

Handwriting Character Recognition as a Service: A New Handwriting Recognition System Based on Cloud Computing ..................................................................................................................... 885
   Yan Gao, Lanwen Jin, Cong He, and Guibin Zhou

Page Curling Correction for Scanned Books Using Local Distortion Information ..................................... 890
   Vladimir Kluzner and Asaf Tzadok

Image Enhancement for Degraded Binary Document Images .................................................................. 895
   Zhixin Shi, Srirangaraj Setlur, and Venu Govindaraju
Hybrid Approach to Adaptive OCR for Historical Books .........................................................900
Vladimir Kluzner, Asaf Tzadok, Dan Chevion, and Eugene Walach

Restoration of Arbitrarily Warped Historical Document Images Using Flow Lines .................................................................905
Maryam Rahnemoonfar and Apostolos Antonacopoulos

Towards Improving the Accuracy of Telugu OCR Systems .........................................................910
P. Pavan Kumar, Chakravarthy Bhagvati, Atul Negi, Arun Agarwal, and B. L. Deekshatulu

Correcting Specular Noise in Multiple Images of Photographed Documents ..........................915
Ednardo Mariano, Rafael Dueire Lins, Gabriel de França Pereira e Silva, Jian Fan, Peter Majewicz, and Marcelo Thielo

A Study on Automatic Chinese Text Classification .................................................................920
Xi Luo, Wataru Ohyama, Tetsushi Wakabayashi, and Fumitaka Kimura

A New System for Recognition of Handwritten Persian Bank Checks ..................................925
Javad Sadri, Younes Akbari, Mohammad J. Jalili, Ahmad Farahi, and Maliheh Habibi

Dynamic Text Line Segmentation for Real-Time Recognition of Chinese Handwritten Sentences ...............................................................931
Da-Han Wang and Cheng-Lin Liu

Character Enhancement for Historical Newspapers Printed Using Hot Metal Typesetting ........................................................................936
Iuliu Konya, Stefan Eickeler, and Christoph Seibert

Character n-Gram Spotting in Document Images .......................................................................941
M. Sudha Praveen, K. Pramod Sankar, and C. V. Jawahar

Use of Semantic and Physical Constraints in Bayesian Networks for Form Recognition .........................946
Philippot Emilie, Belalid Yolande, and Belalid Abdel

Keynote Speech 2
Chinese Paleography, Calligraphy, and Pattern Recognition: Styles and Scripts in Excavated Ancient Chinese Documents .........................................................951
Xing Wen
Applications (2)
MCS for Online Mode Detection: Evaluation on Pen-Enabled Multi-touch Interfaces ................................................................. 957
  Markus Weber, Marcus Liwicki, Yannik T. H. Schelske, Christopher Schoelzel, Florian Strauß, and Andreas Dengel
Discovering Legible Chinese Typefaces for Reading Digital Documents ................................................................. 962
  Bing Zhang, Ying Li, Ching Y. Suen, and Xuemin Zhang
Detecting Figure-Panel Labels in Medical Journal Articles Using MRF ................................................................. 967
  Daekun You, Sameer Antani, Dina Demner-Fushman, Venu Govindaraju, and George R. Thoma
A New Method on the Segmentation and Recognition of Chinese Characters for Automatic Chinese Seal Imprint Retrieval ................................................................. 972
  Chao Ren, Dong Liu, and Youbin Chen

Graphics Recognition
CalliGUI: Interactive Labeling of Calligraphic Character Images ................................................................. 977
  George Nagy and Xiafen Zhang
Symbol Spotting in Line Drawings through Graph Paths Hashing ................................................................. 982
  Anjan Dutta, Josep Lladors, and Umapada Pal
A Non-rigid Feature Extraction Method for Shape Recognition ................................................................. 987
  Jon Almazán, Alicia Fornés, and Ernest Valveny
Low Resolution QR-Code Recognition by Applying Super-Resolution Using the Property of QR-Codes ................................................................. 992
  Yuji Kato, Daisuke Deguchi, Tomokazu Takahashi, Ichiro Ide, and Hiroshi Murase

Character Recognition (2)
Tuning between Exponential Functions and Zones for Membership Functions Selection in Voronoi-Based Zoning for Handwritten Character Recognition ................................................................. 997
  S. Impedovo and G. Pirlo
Multiple Instance Learning Based Method for Similar Handwritten Chinese Characters Discrimination ................................................................. 1002
  Yunxue Shao, Chunheng Wang, Baihua Xiao, Rongguo Zhang, and Yang Zhang
Perceptron Learning of Modified Quadratic Discriminant Function ................................................................. 1007
  Tong-Hua Su, Cheng-Lin Liu, and Xu-Yao Zhang
Similar Handwritten Chinese Character Recognition Using Discriminative Locality Alignment Manifold Learning ................................................................. 1012
  Dapeng Tao, Lingyu Liang, Lianwen Jin, and Yan Gao
Keynote Speech 3

The Four and a Half Challenges of Humanities Data ..............................................1017
Marc Wilhelm Künster

Text Extraction (2)

A Gradient Vector Flow-Based Method for Video Character Segmentation ..................1024
Trung Quy Phan, Palaiahnakote Shivakumara, Bolan Su, and Chew Lim Tan

Text Extraction from Video Using Conditional Random Fields ...............................1029
Xujun Peng, Huaigu Cao, Rohit Prasad, and Premkumar Natarajan

Scene Text Extraction by Superpixel CRFs Combining Multiple Character Features ........1034
Min Su Cho, Jae-Hyun Seok, Seonghun Lee, and Jin Hyung Kim

Bayesian Approach to Photo Time-Stamp Recognition ..........................................1039
Asif Shahab, Faisal Shafait, and Andreas Dengel

A Chinese Character Localization Method Based on Integrating Structure and CC-Clustering for Advertising Images .................................................1044
Jie Liu, Shuwu Zhang, Heping Li, and Wei Liang

Scenery Character Detection with Environmental Context .....................................1049
Yasuhiro Kunishige, Feng Yaokai, and Seiichi Uchida

Document Retrieval (2)

Real-Time Document Image Retrieval for a 10 Million Pages Database with a Memory Efficient and Stability Improved LLAH .....................................................1054
Kazutaka Takeda, Koichi Kise, and Masakazu Iwamura

Document Image Classification and Labeling Using Multiple Instance Learning ..........1059
Jayant Kumar, Jaishanker Pillai, and David Doermann

A Lattice-Based Method for Keyword Spotting in Online Chinese Handwriting ..........1064
Heng Zhang and Cheng-Lin Liu

A Graph Lattice Approach to Maintaining Dense Collections of Subgraphs as Image Features .........................................................................................1069
Eric Saund

Similar Manga Retrieval Using Visual Vocabulary Based on Regions of Interest ..........1075
Weihan Sun and Koichi Kise

Case Study in Hebrew Character Searching .........................................................1080
Irina Rabaev, Ofer Biller, Jihad El-Sana, Klara Kedem, and Itshak Dinstein
Character Recognition (3)

Multiscale Histogram of Oriented Gradient Descriptors for Robust Character Recognition ......................................................... 1085
    Andrew J. Newell and Lewis D. Griffin

A Coarse Classifier Construction Method from a Large Number of Basic Recognizers for On-line Recognition of Handwritten Japanese Characters ................................................................. 1090
    Bilan Zhu and Masaki Nakagawa

Affine-Invariant Recognition of Handwritten Characters via Accelerated KL Divergence Minimization ........................................... 1095
    Toru Wakahara and Yukihiko Yamashita

MQDF Discriminative Learning Based Offline Handwritten Chinese Character Recognition ................................................................ 1100
    Yanwei Wang, Xiaoping Ding, and Changsong Liu

A Semi-supervised SVM Framework for Character Recognition ......................................................................................... 1105
    Amit Arora and Anoop M. Namboodiri

Efficient Word Recognition Using a Pixel-Based Dissimilarity Measure ............................................................................. 1110
    Sebastian Colutto and Basilis Gatos

Poster Session 3

A Compression Scheme for Handwritten Patterns Based on Curve Fitting ................................................................. 1115
    Kamal Gupta, Manish Bansal, and Santanu Chaudhury

Edge-Based Features for Localization of Artificial Urdu Text in Video Images ................................................................. 1120
    Akhtar Jamil, Imran Siddiqi, Fahim Arif, and Ahsen Raza

Stamp Detection in Color Document Images ..................................................................................................................... 1125
    Barbora Micenkova and Joost van Beusekom

Trie-Lexicon-Driven Recognition for On-line Handwritten Japanese Disease Names Using a Time-Synchronous Method .................. 1130
    Bilan Zhu and Masaki Nakagawa

Convolutional Neural Network Committees for Handwritten Character Classification ......................................................... 1135
    Dan Claudiu Ciresan, Ueli Meier, Luca Maria Gambardella, and Jürgen Schmidhuber

Semantic Logging: Towards Explanation-Aware DAS ........................................................................................................ 1140
    Björn Forcher, Stefan Agne, Andreas Dengel, Michael Gillmann, and Thomas Roth-Berghofer

A Novel Preprocessing Method for Hectography Prints Based on Independent Component Analysis ..................................................... 1145
    Thomas Kurbiel, Iuliu Konya, and Stefan Eickeler
An Empirical Evaluation on HIT-OR3C Database .................................................................1150
Shusen Zhou, Qingcai Chen, Xiaolong Wang, Xinyi Guo, and Hui Li

Greek Polytonic OCR Based on Efficient Character Class Number Reduction .............1155
B. Gatos, G. Louloudis, and N. Stamatopoulos

Adaptive Zoning Features for Character and Word Recognition ........................................1160
B. Gatos, A. L. Kesidis, and A. Papandreou

A New Fourier-Moments Based Video Word and Character Extraction Method for Recognition .................................................................1165
Deepak Rajendran, Palaihnakote Shivakumara, Bolan Su, Shijian Lu,
and Chew Lim Tan

Signature Segmentation from Machine Printed Documents Using Conditional Random Field ..............................................................................1170
Ranju Mandal, Partha Pratim Roy, and Umapada Pal

Lexicon-Free, Novel Segmentation of Online Handwritten Indic Words .........................1175
Suresh Sundaram and A. G. Ramakrishan

Scale Space Binarization Using Edge Information Weighted by a Foreground Estimation ......................................................................................1180
Florian Kleber, Markus Diem, and Robert Sablatnig

Multi Resolution Layout Analysis of Medieval Manuscripts Using Dynamic MLP ........1185
Micheal Baechler and Rolf Ingold

Document Images Indexing with Relevance Feedback: An Application

to Industrial Context .................................................................................................................1190
O. Augereau, N. Journet, and J.-P. Domenger

Interactive Competitive Breadth-First Exploration for Sketch Interpretation ...............1195
Achraf Ghorbel, Sébastien Macé, Aurélie Lemaitre, and Eric Anquetil

Document Image Indexing Using Edit Distance Based Hashing ........................................1200
Ehtesham Hassan, Santanu Chaudhury, and M. Gopal

New Binarization Approach Based on Text Block Extraction ........................................1205
Ines Ben Messaoud, Hamid Amiri, Haikal El Abed, and Volker Märgner

Searching OCR'ed Text: An LDA Based Approach .........................................................1210
Ehtesham Hassan, Vikram Garg, S. K. Mirajul Haque, Santanu Chaudhury,
and M. Gopal

A CRF Based Scheme for Overlapping Multi-colored Text Graphics Separation ..........1215
Ritu Garg, Ehtesham Hassan, Santanu Chaudhury, and M. Gopal

Fuzzy Relative Positioning Templates for Symbol Recognition ........................................1220
Adrien Delaye and Eric Anquetil

Recognition of Printed Mathematical Expressions Using Two-Dimensional
Stochastic Context-Free Grammars .........................................................................................1225
Francisco Álvaro, Joan-Andreu Sánchez, and José-Miguel Benedi
Document Recto-verso Registration Using a Dynamic Time Warping Algorithm ........................................1230
  Rabeux Vincent, Journet Nicholas, and Domenger Jean Philippe

Automatic Content Extraction on Semi-structured Documents .........................................................1235
  José Eduardo Bastos dos Santos

Video Script Identification Based on Text Lines .....................................................................................1240
  Trung Quy Phan, Palaiahnakote Shivakumara, Zhang Ding, Shijian Lu,
  and Chew Lim Tan

  Amy Winder, Tim Andersen, and Elisa H. Barney Smith

Better Digit Recognition with a Committee of Simple Neural Nets .................................................1250
  Ueli Meier, Dan Claudiu Cireșan, Luca Maria Gambardella,
  and Jürgen Schmidhuber

Towards Improved Paper-Based Election Technology .........................................................................1255
  Elisa H. Barney Smith, Daniel Lopresti, George Nagy, and Ziyan Wu

An Evaluation of HMM-Based Techniques for the Recognition of Screen Rendered Text ..................1260
  Sheikh Faisal Rashid, Faisal Shafait, and Thomas M. Breuel

A System for an Automatic Reading of Student Information Sheets ..................................................1265
  Afef Kacem, Asma Saïdani, and Abdel Belaïd

Wall Patch-Based Segmentation in Architectural Floorplans ..............................................................1270
  Lluis-Pere de las Heras, Joan Mas, Gemma Sánchez, and Ernest Valveny

High Performance Layout Analysis of Arabic and Urdu Document Images .........................................1275
  Syed Saqib Bukhari, Faisal Shafait, and Thomas M. Breuel

Automatically Discriminating between Digital and Scanned Photographs ........................................1280
  Rafael Dueire Lins, Gabriel de França Pereira e Silva, and Steven J. Simske

A Discriminative Model for On-line Handwritten Japanese Text Retrieval .......................................1285
  Cheng Cheng, Bilan Zhu, and Masaki Nakagawa

A Circular Grid-Based Rotation Invariant Feature Extraction Approach for Off-line Signature Verification ................................................1289
  Marianela Parodi, Juan C. Gómez, and Abdel Belaïd

Fringe Map Based Text Line Segmentation of Printed Telugu Document Images ..............................1294
  Vijaya Kumar Koppula and Atul Negi

Combining of Off-line and On-line Feature Extraction Approaches for Writer Identification ................1299
  Aymen Chaabouni, Houcine Boubaker, Monji Kherallah, Adel M. Alimi,
  and Haikal El Abed
