Proceedings of the 13th International Conference of Hong Kong Society for Transportation Studies

TRANSPORTATION and MANAGEMENT SCIENCE

13-15 December, 2008

Edited by

H.P. LO, Stephen C.H. LEUNG and Susanna M.L. TAM

Hong Kong Society for Transportation Studies
CONTENTS

KEYNOTE ADDRESS

Transport Management – Hong Kong’s Way
Eva CHENG .......................................................... 3

PLENARY SESSION I

Cyber Transportation Logistics: Analyzing a Global Value-Chain for Services
Yupo CHAN .......................................................... 7

Transportation Planning in Consumer Goods Supply Chains
H.-O. GÜNThER and T. SEILER ...................................... 17

Dynamic System Optimal Traffic Assignment – A State-Dependent Control
Theoretic Approach
Andy H.F. CHOW .................................................... 27

SESSION A1: TRAFFIC MODELS

Frequency-Domain Analysis for Maximum and Minimum Flows of Stochastic Transportation Networks
Long ZHENG, Jinglun ZHOU, Quan SUNB and Mingxuan YUAN .............................................. 31

Schedule-Based Transit Assignment Model in Transit Networks with Recurrent Uncertainties
Yuqing ZHANG, William H.K. LAM and Agachai SUMALEE ......................................................... 41

Exploration of Traffic Phases
Yi-San HUANG and Lawrence W. LAN .......................................................... 51

Network Matching of a Traffic Assignment Network and an Aggregated Digital Road Map Considering their Difference
Kazutaka TAKAO and Yasuo ASAKURA .......................................................... 61

SESSION A2: TRAFFIC PATTERNS I

An Analysis of the Supply and Demand Imbalance and its Effect on Freight Rates on the Far East Asia to Europe Route
Giovanni Luca BARLETTA, Michael G.H. BELL and Eleni HADJICONSTANTINOu .... 73

Incident Detection based on Short-Term Travel Time Forecasting
Real-Time Estimation of Urban Travel Times based on Matching Vehicle Magnetic Signatures
Pravin VARAIYA ................................................................. 93

SESSION A3: OUTSTANDING STUDENT PAPER AWARD

An Empirical Study on the Transaction Sector within Rail Firms
Rico MERKERT ................................................................. 105

Impact of Time-Dependent Transport Management on Activity Location Costs
Xiaosu MA ................................................................. 115

Analysis of Association between Traffic Exposure and Accident Risk in Hong Kong
Xin PEI ................................................................. 125

SESSION A4: TRAVEL BEHAVIOR MODELING I

Driving Cycle Approaches in Characterising Driving Patterns
H.Y. TONG and W.T. HUNG ................................................................. 137

Pedestrian Simulation Model based on Principles of Bounded Rationality: Results of Validation Tests
Wei ZHU and Harry TIMMERMANS ................................................................. 147

Modeling Departure Time Choice for Non-Workers: A Random Coefficients Hazard Model
Hong-Zhi LIN, Hing-Po LO and Xiao-Jian CHEN ................................................................. 157

Lexicographic Model (LEX) for Travel Behavior Analysis
Chong WEI, Takamasa IRYO and Yasuo ASAKURA ................................................................. 167

SESSION A5: SUSTAINABLE TRANSPORTATION

Global Forces and Fiscal Stimulus: A Case Study of British Merchant Shipping
Michael ASTERIS and The Institute of Transport Administration ................................................................. 177

Indicators of Socially Sustainable Urban Transport: A Space-Time Accessibility Approach
Becky P.Y. LOO and Winnie W.Y. LAM ................................................................. 187

Job-housing Balance and Commuting Changes under Economic Restructuring: The Case of Hong Kong from 1992 to 2002
Becky P.Y. LOO and Alice S.Y. CHOW ................................................................. 197

A Study on Winter Road Maintenance Problem Considering both Efficiency and Equity in Cold Regions
Kenetsu UCHIDA, Mikiharu ARIMURA and Seiichi KAGAYA ................................................................. 207
SESSION B1: ALGORITHMS FOR TRANSPORTATION NETWORK MODELS

An Application of Reactive Tabu Search for Dynamic Network Design Problem
Ampol KAROONSOONTAWONG and Steven Travis WALLER ........................................... 219

Using a Multi-Criteria Approach to Solve Path Finding Problem in Road Networks with Uncertainty
Bi Yu CHEN, William H.K. LAM and Mei Lam TAM ...................................................... 229

A Projected Gradient Method for Equilibrium Assignment
Michael FLORIAN, Isabelle CONSTANTIN and Dan FLORIAN ..................................... 239

Anthony CHEN and Piya CHOOTINAN ................................................................. 249

SESSION B2: TRAVEL SURVEY AND DATA ISSUES

Survey and Post-Evaluation Study on the Development of Public Logistics Nodes in Beijing
Jun ZHOU and Xiao-Dong ZHANG .............................................................................. 261

Applying Cluster Method to Reduce the Traffic Data Feature for Accident Duration Forecasting on Freeway
Ying LEE and Chien-Hung WEI .............................................................................. 271

An Investigation in Synthesis Methods of Generating High Geographic Resolution Freight Data
Minyan RUAN and Jie (Jane) LIN .............................................................................. 281

Factors Affecting Usage of High-Emitting Cars and Motorcycles in Taiwan
Yu-Chiun CHIOU, Lawrence W. LAN and Tai-Chieh CHEN ........................................ 291

SESSION B3: ENERGY AND EMISSION

Review of Monitoring Studies for Traffic-Induced Air Pollution in Macau with Highly Compact Urban Form
U.W. TANG and Z.S. WANG .................................................................................. 303

Investigating On-Road Fuel Consumption and Emissions of a Low-Emission Car
C.S. CHEUNG, K.S. TSANG and W.T. HUNG ......................................................... 311

A Review of Roadside Vehicular Emission Measuring and Calculation Techniques
Jason LAU ............................................................................................................. 321

Biofuels, Petroleum Refining, and the Shipping of Motor Fuels
F.W. RUSCO and W.D. WALLS ................................................................. 331
SESSION B4: TRAVEL BEHAVIOR MODELING II

Implications of Intrazonal Trips and their Treatment in Travel Mode Choice Modeling
Bharat P. BHATTA and Odd I. LARSEN ................................................................. 343

Built Environment Transformation and Activity-Travel Behavior Change in Beijing, China
Donggen WANG and Yanwei CHAI ................................................................. 353

Impact of Spousal Influence and Work Flexibility on Time-Space Prism Vertices
Joyce K.L. SOO .................................................................................................. 363

Modeling Individuals’ Cognitive and Affective Responses in Spatial Learning Behavior
Qi HAN, Theo ARENTZE, Harry TIMMERMANS, Davy JANSSENS and Geert WETS ................................................................. 373

SESSION B5: LOGISTICS AND DISTRIBUTION

Two Novel Solving Strategies for the Courier Routing Problem in City Logistics
Ching-Jung TING and Wilson W. LAN ................................................................. 385

Productivity Change of Chinese Mainland Logistics Companies: Using DEA Malmquist Productivity Change Index
Ada Suk-Fung NG, Xue-ping DENG and Xu WANG ................................................................. 395

External Determinants of Information Technology Adoption in the Trucking Firms within a Supply Chain Network
Hamid BEHBAHANI and Hamid KARIMI-RAHIMI ................................................................. 405

Modelling Consumer Directed Substitution
Stein W. WALLACE ........................................................................................... 415

PLENARY SESSION II

Challenges in Transport Planning and Congestion Management
Henry S.L. FAN ............................................................................................. 419

Toll Cordons and Congestion Pricing - The Case of Oslo
Odd I. LARSEN ............................................................................................. 492

Towards Longitudinal Activity-Based Models of Travel Demand
Theo ARENTZE and Harry TIMMERMANS ................................................................. 439
SESSION C1: RAILWAYS

Estimation of Passenger Route Choice in Railway Network with IC Card Ticket System
Takahiko KUSAKABE, Takamasa IRYO and Yasuo ASAKURA ........................................... 451

Research on the Location of Railway Customer Service Center in China
Tao WAN and Xiao-Dong ZHANG ......................................................................................... 461

Reliability and Delay in LRT Operations
R.M.N.T. SIRISOMA, Doug MORGAN and S.C. WIRASINGHE ........................................ 471

SESSION C2: ROAD PRICING I

The Marginal Cost Pricing under Stochastic Network
Agachai SUMALEE and Wei XU ......................................................................................... 475

Optimal Road Pricing Strategy in a Car-Bus Network
C.O. TONG ......................................................................................................................... 485

Road Pricing – A Survey
Theodore TSEKERIS And Stefan VOß ................................................................................. 495

SESSION C3: INDUSTRIAL TRACK

The Potential of Secondary European Airports in the Long Haul Flight Market
Sven MAERTENS .................................................................................................................. 507

Traffic Impact Assessment – Experience from UK, Singapore and HK
Man Lung YIM ..................................................................................................................... 517

Toll Road Development in China
Sam CHOW ......................................................................................................................... 519

SESSION C4: SCHEDULING

An Analysis of In-Home and Out-of-Home Working Schedules
Bayarma ALEXANDER, Martin DIJST and Dick ETTEMA ................................................... 523

Departure Time Scheduling Considering Punctuality Reliability in a Bottleneck with Degradable Capacity
Barbara W.Y. SIU and Hong K. LO ...................................................................................... 533

A Heuristic Manpower Scheduling for In-Flight Catering Service
Daniel ORON, San-Nah SZE and Ada Suk-Fung NG ......................................................... 543
SESSION C5: TRAFFIC SIGNALS

The Study and Simulation of Detector Setup in Transit Signal Priority
Jia XU, Xiao-Hong CHEN, Yang WANG and Chao YANG ........................................553

A Robust Quasi-Dynamic Traffic Signal Control Scheme for Queue Management
Wei-Hua LIN and Hong K. LO ...............................................................563

A Time-Dependent Lane-Based Cell Transmission Model for Coordinated Signal Optimization
C.K. WONG and S.C. WONG ...............................................................573

SESSION D1: PUBLIC TRANSPORT IN ASIA

Performance of Urban Public Transport Systems in China: Data Envelopment Analysis
Ji HAN and Yoshitsugu HAYASHI ..........................................................585

Rail-Based Transit-Oriented Development in Hong Kong: Factors Affecting its Success at the Station Level
Becky P.Y. LOO and Eric T.H. CHAN ..................................................595

A Practical Approach to Determine Optimal Bus Frequencies: An Empirical Study of a Bangkok Bus Service
Pairoj RAOTHANACHONKUN, Nakorn INDRA-PAYOONG and Agachai SUMALEE ..................................................603

SESSION D2: ROAD SAFETY AND MAINTENANCE

Highway Design Speed and its Impacts: Some Evidence from South Korea
Jaisung CHOI and Richard TAY ..........................................................615

Traffic Control at Signalised Intersections in Germany, Thailand and China - Some Hints to Improve Road Traffic Safety
Andreas VESPER, Ulrich BRANNOLTE, Pichai TANEERANANON and Yongsheng CHEN ..................................................625

Identifying the Change in Travel Speed and Crash Frequencies after Reducing a Speed Limit in Naebu Expressway, Seoul
Jungsoo PARK and Do-Gyeong KIM ..................................................635

The Role Of H.V. Drivers' Fatigue and Drowsiness in Causation of Traffic Incidents in Iran
E. AYATI, A. SOBHANI, H.R. ATTARAN KAKHKI and H. JABBARI NOOGHABI 645

SESSION D3: INFRASTRUCTURE

Improvement for Subsoil by Cement Column – A Case study in Thailand
Saravut JARITNGAM, Sommart SWASDI, Danupon TONNAYOPAS,
Pipat THONGCHIM and Woraphot PRACHASAREE ..................................655
Laboratory Evaluation of Mechanical Performance on Bituminous Materials with Polymer Modifiers
Zhi SUO and Wing Gun WONG ..................................................... 665

Impacts on Regional Freight Flow of Infrastructure Investment Project in Pearl River Delta
Ryuichi SHIBASAKI, Jiaqi LI, Lixin MIAO and Tomihiro WATANABE ................. 675

SESSION D4: ACTIVITY MODELING

A Model of Pedestrian Activity and Destination Choices using Observational Data
Jodie Y.S. LEE and William H.K. LAM .................................................. 687

An Activity-Based Approach for Modeling Travel and Residential Location Choices
L.Q. OUYANG and William H.K. LAM .................................................. 697

Accessibility, E-Shopping, and Activity-Travel Patterns
Mei-Po KWAN and Fang REN ............................................................. 707

SESSION D5: CARGO TERMINALS

Integrated Scheduling of Equipment for Quayside Transport in Automated Seaport Container Terminals
R. GUJJULA and H.-O. GÜNTER ......................................................... 719

Game Theoretical Analysis of Competition between Container Terminals in Pakistan
Naima SAEED and Odd I. LARSEN ..................................................... 729

Exploring Antecedents of Business Customer’s Satisfaction and Loyalty of Air Cargo Terminal in Taiwan
Kai Chieh HU, William JEN and Mei Chieh HUANG .................................. 739

SESSION E1: TRAFFIC PATTERNS II

Effects of Distance Estimation Methods in Dial-A-Ride Planning
Carl Henrik HÄLL and Magdalena HÖGBERG ............................................. 751

Forecasting a Dynamic Future Traffic Pattern by an Activity-Based Traffic Simulator
Hyunmyung KIM, R. JAYAKRISHNAN and Yongtaek LIM .............................. 761

SESSION E2: ROAD PRICING II

A Heuristic Method for Finding Congestion Pricing Schemes in Traffic Networks with Modal Choice
Joakim EKSTRÖM, Clas RYDERGREN and Leonid ENGELSON ....................... 773
Designing Pareto Efficient Build-Operate-Transfer Contracts for Road Franchising
Zhijia TAN and Hai YANG .......................................................... 783

A Note on Toll Competition on Private Roads: To Lead or Not to Lead?
Simon SHEPHERD and Agachai SUMALEE ..................................... 793

SESSION E3: REGULATION ON TRANSPORTATION

Reformed Regulation: A Solution of Problems of Implementing Public Transport Routes
Erika BUCHARI and Allassane Balle NDIAYE .................................. 805

Differentiated Regulation of Urban Freight Traffic: Conceptual Framework and Examples from Italy
Antonio COMI, Paolo DELLE SITE, Francesco FILIPPI, Edoardo MARCUCCI and Agostino NUZZOLO ............................................. 815

Regulating Taxi Services with Heterogeneous Customers
Teng YANG, Min YE and Hai YANG ............................................. 825

SESSION E4: TRAFFIC NETWORK EQUILIBRIUM

A Dynamic Traffic Equilibrium Model with Large Discrete Time
Shoichiro NAKAYAMA ............................................................... 837

Solving Transportation Network Equilibrium Models with the Dantzig-Wolfe Decomposition Method
William CHUNG ................................................................. 845

The Equilibrium Stability of Hypercongestion in Static Traffic Theory
N. ZHANG ................................................................. 855

SESSION E5: STRATEGIC SUPPLY CHAIN MANAGEMENT

The Determination of Facility Location by Optimizing Transportation Costs within a Construction Site
C.K. WONG, I.W.H. FUNG, C. HUANG and S.C. WONG ...................... 865

Estimation of Throughput Capacity for Convoy Movement
Bhaba R. SARKER and E. Alex BAYLOT ........................................ 875

Locating a Bi-Directional Distribution Center on a Line with Replenishment Decisions
Yizhong LIN and Janny M.Y. LEUNG ........................................ 885
