Cosmology — The Next Generation

Proceedings of the Yukawa International Seminar 2010 (YKIS2010)
and
Long-Term Workshop on Gravity and Cosmology 2010 (GC2010)

Yukawa Institute for Theoretical Physics,
Kyoto University
28 June (Mon) – 2 July (Fri), 2010 (YKIS2010)
24 May (Mon) – 16 July (Fri), 2010 (GC2010)

Edited by
Misao Sasaki and Takahiro Tanaka

PROGRESS OF THEORETICAL PHYSICS SUPPLEMENT No. 190, 2011
CONTENTS

Cosmology — The Next Generation —
Proceedings of the Yukawa International Seminar 2010(YKIS2010)
and
Long-Term Workshop on Gravity and Cosmology 2010(GC2010)

Preface .............................. Misao Sasaki and Takahiro Tanaka 1

Chapter I: Models of the early universe
Standard Model Higgs Inflation: CMB, Higgs Mass and Quantum
Cosmology ............................ Andrei O. Barvinsky 1
Hilltop Supernatural Inflation ............................ Chia-Min Lin 20
Linear Term Inflation from Running Kinetic Term in Supergravity ....
........................................ Fuminobu Takahashi 26
On the Electromagnetic Nature of Dark Energy and the Origin of Cosmic
Magnetic Fields ............ Jose Beltrán Jiménez and Antonio L. Maroto 33
Aspects of Hybrid Inflation in Supergravity ...........................
Kazunori Nakayama, Fuminobu Takahashi and Tsutomu T. Yanagida 42
A Minimal Supersymmetric Cosmological Model ............ Ewan Stewart 50

Chapter II: Cosmological perturbations
The Self-Interacting Curvaton .............................. Kari Enqvist 62
Future CMB Polarization Measurements and Japanese Contributions ..
........................................ Masashi Hazumi 75
Primordial Non-Gaussianities ............................. David Langlois 90
Issues Concerning the Waterfall of Hybrid Inflation ....... David H. Lyth 107
Properties of Scalar Perturbations Generated by Conformal Scalar Field
........................................ Maxim Libanov, Sergey Mironov and Valery Rubakov 120
Use of δN Formalism —Difficulty of Generating Large Local-Type
Non-Gaussianity during Inflation— ........................
........................................ Takahiro Tanaka, Teruaki Suyama and Shuichiro Yokoyama 135

Chapter III: Testing general relativity and modified gravity theory
Conformal Transformations and Nordström's Scalar Theory of Gravity
........................................ Nathalie Deruelle and Misao Sasaki 143
Non-Singular Modified Gravity Unifying Inflation with Late-Time
Acceleration and Universality of Viscous Ratio Bound in $F(R)$
Theory ................................. Shin'ichi Nojiri and Sergei D. Odintsov 155
Testing General Relativity on Cosmic Scales with the Observed Abundance of Massive Clusters .............................. 179
... David Rapetti, Steven W. Allen, Adam Mantz and Harald Ebeling

Cosmological Perturbations in General Modified Gravity Theories ....
............. Shinji Tsujikawa, Antonio De Felice and Shinji Mukohyama 188

Chapter IV: Topological defects
Signals of Inflationary Models with Cosmic Strings ...... Mark Hindmarsh 197
Numerical Study of Q-Ball Formation in Gravity Mediation ........
...... Takashi Hiramatsu, Masahiro Kawasaki and Fuminobu Takahashi 229
Analytic Model for CMB Temperature Fluctuations from Cosmic (Super-)Strings ............................. Daisuke Yamauchi,
Keitaro Takahashi, Yuuti Sendouda, Chul-Moon Yoo and Misao Sasaki 239

Chapter V: Use of holography and black objects
Effective Worldvolume Theory for Black Branes ...... Roberto Emparan 247
Holographic Description of Vacuum Bubbles ............ Jaume Garriga 261
 Thermodynamic Black Di-Rings ...... Hideo Iguchi and Takashi Mishima 274
Exploring Higher-Dimensional Black Holes in Numerical Relativity ....
............. Hirotaka Yoshino and Masaru Shibata 282
Time-Dependent Holography and Emergent Black Holes on D-Branes ...
.......................... Tadashi Takayanagi 304

Chapter VI: Gravitational waves
Double Neutron Star Binaries: A “Foreground” Source for the Gravitational-Wave Stochastic Background .......... Bruce Allen 316
Primordial Gravitational Waves from Inflation and Preheating ........
............................. Juan García-Bellido 322
Gravitational Wave Detection in Japan ........................ Masatake Ohashi and the LCGT Collaboration 335

Program of YKIS2011 and GC2010 ........................................ v
List of Participants .......................................................... x
Author Index ................................................................. xiv
