Contents

REGULAR PAPERS

Mission-Based Component Testing for Series Systems
İ.K. Altinel, B. Çekyay, O. Feyzioğlu, M.E. Keskin, and S. Özekici

A verification study of the stochastic salvo combat model
M.J. Armstrong

Endogenizing the sticks and carrots: modeling possible perverse effects of counterterrorism measures
V.M. Bier and K. Hausken

The orienteering problem with stochastic travel and service times
A.M. Campbell, M. Gendreau, and B.W. Thomas

Testing successive regression approximations by large-scale two-stage problems
I. Dedık

A multi-period inventory model with multi-dimensional procurement bidding
P. Farahvash and T. Altıok

A least-squares minimum-cost network flow algorithm
B. Gopalakrishnan, S. Kong, E. Barnes, E.L. Johnson, and J.S. Sokol

Stochastic optimization for blending problem in brass casting industry
Ü.S. Sakalli, Ö.F. Baykoç, and B. Birgören

Optimal assignment of resources to strengthen the weakest link in an uncertain environment
C.-C. Kuo

A time-indexed LP-based approach for min-sum job-shop problems
G. Lancia, F. Rinaldi, and P. Serafini

Extensions of Logical Analysis of Data for growth hormone deficiency diagnoses
P. Lemaire

A multi-objective evolutionary optimization approach for an integrated location-inventory distribution network problem under vendor-managed inventory systems
S.-H. Liao, C.-L. Hsieh, and Y.-S. Lin

A unified framework for population-based metaheuristics
B. Liu, L. Wang, Y. Liu, and S. Wang
Regression games

M. Pintér

A simple and effective algorithm for the MaxMin diversity problem

D.C. Porumbel, J.-K. Hao, and F. Glover

Workforce-constrained maintenance scheduling for military aircraft fleet: a case study

N. Saafaei, D. Banjevic, and A.K.S. Jardine

Optimal age-replacement time with minimal repair based on cumulative repair-cost limit for a system subject to shocks

S.-H. Sheu, C.-C. Chang, and Y.-H. Chien

On duality theory for non-convex semidefinite programming

W. Sun, C. Li, and R.J.B. Sampaio

Single-machine scheduling problems with time and position dependent processing times

X. Zhang, G. Yan, W. Huang, and G. Tang

Estimation of potential gains from mergers in multiple periods: a comparison of stochastic frontier analysis and Data Envelopment Analysis

D.D. Wu, Z. Zhou, and J.R. Birge

Single machine scheduling with total tardiness criterion and convex controllable processing times

K. Xu, Z. Feng, and L. Ke

SPECIAL SECTION: CONSTRUCTION AND ENGINEERING PROJECT MANAGEMENT

Foreword

W. Herroelen, J. Pujares, and A. López-Paredes

Effort estimates through project complexity

M. Castejón-Linas, J. Ordieres-Meré, A. González-Marcos, and V. González-Castro

Dismantling of nuclear power plants at optimal NPV

J.-H. Bartels, T. Gather, and J. Zimmermann

Predetermined intervals for start times of activities in the stochastic project scheduling problem

I. Bendavid and B. Golany

Time slack-based techniques for robust project scheduling subject to resource uncertainty

O. Lambrechts, E. Demeulemeester, and W. Herroelen

A decision-making tool for project investments based on real options: the case of wind power generation

J.I. Muñoz, J. Contreras, J. Caamaño, and P.F. Correia
