2010 Third International Symposium on Information Science and Engineering

(ISISE 2010)

Shanghai, China
24 – 26 December 2010

Editors:

Jianping Chen
Wen Chen

Fei Yu
Yiqin Lu
Regular Papers

An Empirical Study on Factors Influencing the Quality of Internet Banking Service .................................................. 3
Zheng Xiaoting and Dai Zhuo

Research on Methods to Fast Eliminate Singular Value in Irregular Initial Measured Displacement Serial .................................................. 7
Sha Ma and Bao Liang Jiang

Application of High Accuracy Data Acquisition in Power Plant .................................................. 11
Xiaohong Yang, Yaoliang Xu, Ning Yang, Lei Xia, and Wanjian Zhao

The Realization of the 1GHz Negative Logarithmic Function Based on the 0.35um AMS Technology .................................................. 15
Weihua Ruan

Credit Soft Budget Constraint and the Goal Difference .................................................. 19
Han-yun Lei and Shihua Wang

Research on Supply Chain Coordination Model of Green Remanufacturing with Outsourcing .................................................. 24
Cai Ming, Fan Tijun, Zhou Hong, and Xu Weixia

Analysis on Incentive Mechanism of Human Resources Dispatching
under Moral Hazard .................................................................93
   Yanli Yang and Xian Yu Wang

Application of Neural Network in Power System Inter-harmonic Detection ..........................................................97
   Li Wang and Xiao-hua Wang

A Technology Based Benefit Analysis on Reuse of Vector Register for SIMD Vectorization Optimization .................................................101
   Ming Yang, Yuan Yao, Shuai Wei, Yuanyuan Zhang, and Lei Huang

Enterprise Credit Rating Model Based on Fuzzy Clustering and Decision Tree ..........................................................105
   Wu Hongxia, Liu Xueqin, and Liu Yanhui

A Novel OFDM Spreading System with Spatial Domain Processing and MMSE-MUD ..........................................................109
   Xiaotao Feng, Yong Shang, and Bo Wu

Interference Suppression in a MLT Based Spread Spectrum System with Digital Beamforming ..................................................113
   Xiaotao Feng and Yong Shang

A Multiresolution Viewpoint Based Rendering for Large-scale Point Models ..........................................................117
   Yan Jiang, Yingjuan Sun, and Yu Jiang

Research on Distribution of Sink Nodes in Wireless Sensor Network ..........................................................122
   Haicheng Li

Rank Aggregation Performance Analysis for Borda and Local Search Algorithm ..........................................................125
   Liu Yong and Wang Zulin

A Data Compression Method for Traffic Loop Detectors' Signals Based on Lifting Wavelet Transformation and Entropy Coding ..........................................................129
   Xiao-fa Shi and Lin-lin Liang

A Fast Synthesis Approach for Diplexer with E-Plane T-Junction Design ..........................................................133
   Duanwei Zhang, Yongjiu Zhao, Wei Liu, Wei Zhao, and Quan Sun

A New Efficient ID-Based Strong Designated Verifier Signature Scheme ..........................................................137
   Shifeng Sun, Qiaoyan Wen, Zhengping Jin, and Hua Zhang

A Kind of Fog Visualization Methods in Three-Dimensional Geographic Information System ..........................................................142
   Gan Jian-Hong and He Tong-Li

Development Trends of MIS Based on Cloud Computing Environment ..........................................................145
   Qing Li and Chun Yang

Texture Image Segmentation Based on Gaussian Mixture Models and Gray Level Co-occurrence Matrix ..........................................................149
   Jian Yu
Effect of Platform Attitude Stability on Image Quality of Spatially Modulated Imaging Fourier Transform Spectrometer ................................................................. 153
Juanjuan Jing, Ruyi Wei, and Yan Yuan

Review on Performance of Construction Project Manager .................................................. 157
Hui Cao, Jiye Xiang, and Jing Lu

Income Gap of Residents, Peasant Income and Economic Growth: An Empirical Study of Rural China Data ................................................................. 160
Han Jian-yu, Ding Jie-chao, and Wang Jun

Study on Critical Path Method with Fixed Time Parameter in Network Planning Technology ......................................................................................................................... 166
Ma Jun-jie and Qi Jian-xun

One Improvement Algorithm of Solving Time-Cost Tradeoff Problem .................................................. 171
Sun De-dong and Qi Jian-xun

Correction Calculation Model of Curve’s Interval Fractal Dimension .................................................. 175
Bin Li, Yonglong Xu, Jinhui Zhang, Wenmin Wang, Fangfang Yan, Chao Yang, Xiaofei Chen, and Mingxia Xu

Supply Chain Coordination Based on the Information Asymmetry and Virtual Third Party ......................................................................................................................... 179
Hong Cheng, Hongmei Guo, and Xianyu Wang

Quasi-affine Transform over Limited Integer Grids and Its Application .................................................. 184
Guibin Zhu, Bin Lei, Peng Quan, and Jiu Zhi Ye

Index Tracking Method Based on the Bootstrap Simulation Technology and Its Empirical Study ......................................................................................................................... 188
Li Jianfu and Zhou Shuna

Negotiation Model Based on Artificial Intelligence in the E-Commerce .................................................. 193
Shaobin Dong and Aihua Li

Image Information Hiding Based on CGH of Phase-Only Interference Holography ......................................................................................................................... 197
Da-Qing Chen, Ji-Hua Gu, and Zhi Tao

Direct Manipulation of 3D Mesh Deformation .................................................................................. 202
Shungang Hua, Qing Zhong, and Qiuxin Jiang

Design of Tomato Color Sorting Multi-channel Real-Time Data Acquisition and Processing System Based on FPGA .................................................. 207
Zhang Ruoyu, Kan Za, and Jiang Yinlan

Towards a Formal Behavioral Semantics for UML Interactions .................................................. 213
Li Dan and Li Danning

Design and Implementation of LDPC Codec for Aircraft Control and Simulation .................................................. 219

The Research of Emotion Space and Its Migration Mechanisms on the Comprehensive Information Emotional Theory ................................................................. 287
   Jiang Pu

On Boolean Index Sets of Cn x P3(n=0,1,2(mod6)) ........................................ 291
   Yu-ge Zheng, Ying Wang, C. Adiga, and A.S. Shrikanth

Fuzzy Decision Analysis of the Software Configuration Management Tools Selection ................................................................. 295
   Yongchang Ren, Qiang Quan, Tao Xing, and Xiaoji Chen

The Characteristic of Phenomenon-Fractal in Enterprise Business .................. 298
   Zeng Xiangliang, Fang Wenjie, Zhou Chang, Liu Zhong, and Zhang Fajun

RFID Integration Re-engineering of Supply Chain .......................................... 302
   Zhang Yu Hua, Wu Ke, and Zhang Jian

An Improved Static Constraint RBAC Model ................................................. 306
   Xuexiong Yan, Qingxian Wang, Qiang Wei, and Junhu Zhu

3D Digital Basin in Hydraulic Education ....................................................... 310
   Jian Ou

Design and Implementation of a Performance Monitoring Tool for Clustered Streaming Media Server Systems ................................................. 314
   Xiaoying Wang, Xiaojing Liu, Hui Xie, Zhihui Du, and Li Jin

A Method of Online Writeprint Identification Based on Principal Component Analysis ................................................................. 319
   Sanya Liu, Zhi Liu, Jianwen Sun, and Lin Liu

Laser Spot Center Detection Based on the Geometric Feature ......................... 322
   Yin-tao Shi and Xiao-jun Cheng

Combined Use of Double Weather Radar in Weather Modification .................. 326
   Zhong Huang and Yan Liu

A Novel Blind Equalization Algorithm for QPSK Signals ............................... 331
   Wang Lin and Liu Shun-lan

Cost Allocation of Jointly-Managed Inventory Based on Cooperative Game and Data Envelopment Analysis ................................................. 336
   Ning Wang, Cheng Liu, Guangshuo Hu, and Xinzhong Bao

An Ontology-Based Translation Memory Model in Localization Translation ........ 340
   Yazhi Yao

The Neural Network PID Controller for Cement Rotary Kiln Temperature Based on FPGA ................................................................. 345
   Yaohua Guo, Junshuang Ma, and Minglin Yao

Evaluating and Sequencing of the Air Target Threat Based on Dempster-Shafer Evidence Theory ................................................................. 349
   Wen Jiang and Yong Deng
The Tuning of Fractional Order PI[λ]D[μ] Controller Parameters Based on Immune Clone Selection Algorithm .................................................. 354
Tian Xiao-min and Huang You-rui

Analysis of Fault Diagnosis Based on One Advanced Discernibility Function Reduction Algorithm .......................................................... 358
Guang-yi Zhang, Yan-qin Su, and Shan Gao

Research on Evaluation Regional Sand Liquefaction Based on GIS .......................................................... 362
Huang Zhiquan and Sha Ma

Transient Response Measurement System of Ultrasonic Motors .......................................................... 366
Wu Shaolong and Zhang Xinxing

A FPGA and Zernike Moments Based Near-Field Laser Imaging Detector Multi-scale Real-Time Target Recognition Algorithm .......................................................... 370
Li-feng Liu, Hui-min Ma, and Ming-quan Lu

Micro-capacitance Measurement Based on Phase-Sensitive Detection .......................................................... 375
Ming-yan Liao, Ye Tian, and Ke-hua Wang

The Recognition of Linear Objects Based on Edge Detection and Skeleton Tracking .......................................................... 379
Liu Qin and Jiao Jian

Research and Application on the Means of Transparent Texture Anti-aliasing .......................................................... 382
Yubo Lv and Jianfeng Xu

The Semi-supervised Classification Method of LiDAR Data Integrating with Aerial Images .......................................................... 386
Liang Zhong, Jianwei Wu, Xuan Tang, and Haiyan Guan

A Behavior-Based Dynamic Trust Model of Virtual Organization .......................................................... 391
Cui Zhenzhen and Tang Wenzhong

Modeling for Random Inventory System Based on Monte Carlo Theory and Its Simulation .......................................................... 396
Shufeng Jiao and Shaojie Du

Correlation Analyses among Ionosphere Disturbance, Ground Electric Field Variation and Thunderstorm Activity .......................................................... 400
Wu Xiaoyong, Qiu Jianxia, Li Jinzhu, and Chen Yanyu

Mine Information System Based on 3D Geological Modeling .......................................................... 405
Jinhu Hu and Na Wan

3D Geological Modeling Based on Boreholes Data and Application in Underground Engineering .......................................................... 409
Jinhu Hu and Changxin Sun
Workshop Papers

Digital Image Scrambling Technology Based on Two Dimension Fibonacci Transformation and Its Periodicity ................................................................. 415
   Weigang Zou, Jiangyan Huang, and Caiying Zhou

Research and Application of Digital Image Hiding Based on Ellipse Curve ................................................................. 419
   Weigang Zou, Fangfang He, and Chaoquan Zhang

Study on the Mathematical Model Analysis of Computerized Self-Adaptive Test (CAT) ................................................................. 423
   Xie Kang

An Improved PSO-BP Network Model ................................................................. 426
   Jinxia Ren and Shuai Yang

Research and Implementation of Web-Online English Testing System ................................................................. 430
   Deng Xiaoyu and Li Yunhao

The Application of Improved DMC in Remote Networked Measure-Control System ................................................................. 434
   Hua-biao Yan, Lv-e Huang, and Zuo-shi Liu

The Simulation Design of MATLAB Applied to the Modern Technology of Digital Communication System ................................................................. 438
   Dong Yuting and Fan Lijun

Schistosoma cercariae Image Recognition Based on BP Neural Network ................................................................. 442
   Shenhai Yan, Xiantong Huang, and Yuhuan Chen

Chaos Attractor Compressing and Expanding in Chua Circuit Driven by Direct Current Voltage ................................................................. 446
   Weiqing Liu, Yin Guo, Min Lu, and Chaofei Liu

VFD Dot-Matrix Display Control Module GU160X32-800B and its Application ................................................................. 451
   Li Xiaohua, Shunyong Zhou, and Wenling Xie

The Fault Diagnosis Based on Immune Neural Network ................................................................. 454
   Qiang Chen and Zhengjie Li

Information Decay in Building Predictive Models Using Temporal Data ................................................................. 458
   Mukwende Placide and Yu Lasheng

A Methodology Using Partial Swarm Optimization and Kriging to Ship Multidisciplinary Design Optimization ................................................................. 463
   Hesham Gorshy, Xuezhen Chu, Liang Gao, and Qingfu Sun

User Interest Model Create and Update in Personalized Search Engine ................................................................. 468
   Xiaoefeng Xiong, Zhihui Zhou, and Guangxue Yue

A New Algorithm of Software Copyright Protection Based on Multi-scale Triangular Mapping ................................................................. 472
   Ning Huang, Xian-tong Huang, and Xian-wen He
Particle Gradient Multi-objective Evolutionary Algorithm Based on GPU with CUDA ........................................................................................................................................540
  Xuezhi Yue, Zhijian Wu, and Kangshun Li
Overlay Multicast Routing Supported by IP Multicast Routers ..........................................................545
  Chen Xiao and Liu Nianzu
Optimized Design Bézier Surfaces Interpolation Geodesics .................................................................550
  Yang Huogen and Zou Weigang
Novel Network Primitives for Overlay Multicasting ................................................................................554
  Chen Xiao and Liu Nianzu
A Compiler for Group Key Exchange Protocol to Resist Insider Attack in Universally Composable Framework ..........................................................559
  Liehuang Zhu and Hong Li
Differential Decoding of Low-Density Parity-Check Codes Based on Min Sum Algorithm ..........................................................562
  Shizhang Peng, Zemao Zhao, and Jianrong Bao
One New Method to Solve Time-Cost Tradeoff Problem ........................................................................567
  Sun Dedong and Qi Jian-xun
Sensitivity Analysis on Single Activity to Quantity of Other Activities in Engineering Project ..................572
  Ma Jun-jie and Qi Jian-xun
A Secure Encryption Protocol for Ad Hoc Networks .................................................................................578
  Xiaoming Wang and Zhiwei Liao
Cognitive-Based Emotion Classifier of Chinese Vocabulary Design ......................................................582
  Rui Wang
RBC Image Segmentation Based on Shape Reconstruction and Multi-scale Surface Fitting ..................586
  Ruihu Wang, Brendan MacCane, and Bin Fang
Solving Vehicle Routing Problem Based on Improved Genetic Algorithm ..............................................590
  Zeng Yi
Research of Series CNC High Speed Endface Cylindrical Grinder .........................................................595
  Peng Xuange
Capacitive Micro-accelerometer PSPICE Simulation Model Research .....................................................599
  Long Kan and Luo Chao
Based on Web University Library Management System's Modeling Research ........................................603
  Yuchun Wu, Xiaojian Long, and Xiujun Ouyang
Real-Time Corner Detection Algorithm Based on GPU ...........................................................................608
  XueYu Huang and QiFeng Wu
Attribute Reduction Algorithm and the Generation of Hybrid Decision Tree
Based on Discernibility Matrix in Rough Set ................................................................. 611
  Yang Shuqing and Li Bo

Improved Pattern Matching Algorithm of BMHS ........................................................... 616
  Linquan Xie, Xiaoming Liu, and Guangxue Yue

Stream Cipher Generation Method Based on Particle Gradient Multi-objective
Evolutionary Algorithm ........................................................................................................ 620
  Liu Jianshen and Yin Baoyong

Improved Joint ICI Cancellation and Error Correction for OFDM System ..................... 624
  Zeeshan Sabir, Syed Abdul Rehman Yousaf, M. Inayatullah Babar,
  and M. Arif Wahla

A Four-Level Matching Model for Semantic Web Service Selection Based
on QoS Ontology ................................................................................................................... 630
  Guangjun Guo, Fei Yu, Zhigang Chen, and Dong Xie

Author Index .......................................................................................................................... 635
