2010 7th International Conference on Ubiquitous Intelligence & Computing and 7th International Conference on Autonomic & Trusted Computing
(UIC/ATC 2010)

Xi’an, Shaanxi, China
26-29 October 2010
2010 Symposia and Workshops on Ubiquitous, Autonomic and Trusted Computing

UIC-ATC 2010

Table of Contents

Message from ATC/UIC 2010 General/Program Chairs .................................................. xiii
Message from the ATC/UIC 2010 Workshop Chairs .......................................................... xiv
Message from ATC 2010/UIC 2010 Demo Chairs ............................................................. xvi
Preface of PerMedia 2010 .................................................................................................. xvii
Organizing Committee of PerMedia 2010 ....................................................................... xviii
Preface of UMCC 2010 ...................................................................................................... xix
Organizing Committee of UMCC 2010 ........................................................................ xx
Preface of USST 2010 ......................................................................................................... xxi
Organizing Committee of USST 2010 ........................................................................... xxiii
Preface of SSDU 2010 ......................................................................................................... xxiv
Organizing Committee of SSDU 2010 ........................................................................... xxv
Preface of IWDTN 2010 ..................................................................................................... xxvii
Organizing Committee of IWDTN 2010 ........................................................................ xxix
Preface of MobiCPS 2010 .................................................................................................. xxx
Organizing Committee of MobiCPS 2010 ....................................................................... xxxii
Preface of HiCEC 2010 ...................................................................................................... xxxiii
Organizing Committee of HiCEC 2010 .......................................................................... xxxiv
Preface of MENS 2010 ..................................................................................................... xxxv
Organizing Committee of MENS 2010 ........................................................................... xxxvii
Preface of SoTrust 2010 .................................................................................................... xxxix
Organizing Committee of SoTrust 2010 ....................................................................... xl
Preface of ANSR 2010 ....................................................................................................... xli
Organizing Committee of ANSR 2010 .......................................................................... xliii
Reviewers ......................................................................................................................... xlv
International Workshop on Pervasive Media (PerMedia 2010)

Pervasive Social Computing: Augmenting Five Facets of Human Intelligence ................................................................. 1
   Jiehan Zhou, Junzhao Sun, Kumaripaba Athukorala, and Dinesh Wijekoon

Toward a Smart Home Environment for Elder People Based on Situation Analysis ......................................................... 7
   Xing Zhang, Haipeng Wang, and Zhiwen Yu

Providing Real-Time Guarantees to Smart Car .......................................................... 13
   Jie Sun, Yongping Zhang, and Jianbo Fan

MSOrg©: Emergent Techniques for Kinetic Artifact .......................................................... 18
   Scottie Chih-Chieh Huang and Shen-Guan Shih

A Comparison of Programming Skills by Genders of Hungarian Grammar School Students .................................................. 24
   Gabor Kiss

International Workshop on Ubiquitous Multimedia Computing and Communication (UMCC 2010)

An Improved Multi-Scale Retinex Algorithm for Vehicle Shadow Elimination Based on Variational Kimmel .......................................................... 31
   Qi-sheng Wu, Xiang-long Luo, Han Li, and Pan-zhi Liu

Reliability Analysis of a Multiview Multi-description Video Streaming System .......................................................... 35
   Ivan Lee

QoS Control Framework for Ubiquitous Multimedia Computing .......................................................... 40
   K.L. Eddie Law and Sunny So

A Walkthrough System with Improved Map Projection Panoramas from Omni Directional Images .......................................................... 45
   Chao Liu, Susumu Shibusawa, and Tatsuhiro Yonekura

Toward a Programming Model for Safer Pervasive Spaces .......................................................... 52
   Chao Chen and Sumi Helal

Multilevel Image Thresholding Selection Based on the Firefly Algorithm .......................................................... 58
   Ming-Huu Horng and Ting-Wei Jiang

A Study of Video Coding by Reusing Compressive Sensing Measurements .......................................................... 64
   Zhenglin Wang and Ivan Lee

International Workshop on Ubiquitous Service Systems and Technologies (USST 2010)

Water Quality Monitoring with Ubiquitous Computing .......................................................... 70
   Yo-Ping Huang, Change-Tse Chou, Jung-Shian Jau, and Frode Eika Sandnes

A Mobile Agent-Based Software Intelligence Framework in Ubiquitous Environment .......................................................... 76
   Yue-Shan Chang and Chih-Tien Fan

Sweep Coverage Mechanism for Wireless Sensor Networks with Approximate Patrol Times .......................................................... 82
   Hung-Chi Chu, Wei-Kai Wang, and Yong-Hsun Lai

Personal Smart Spaces as a Basis for Identifying Users in Pervasive Systems .......................................................... 88
   Elizabeth Papadopoulou, Sarah Gallacher, Nick K. Taylor, and M. Howard Williams
Performance on Adaptive Path Selection Scheme for Cooperative Communication

Yung-Fa Huang, Cing-Chia Lai, Ling-Cheng Hsu, and Tan-Hsu Tan

International Symposium on Service, Security and Data Management Technologies in Ubi-com (SSDU 2010)

Session 1: Applications and Services

Ubiquitous Community Care Using Sensor Network and Mobile Agent Technology .................................................. 99
Chuan-Jun Su and Bo-Jung Chen

A Macro-observation Approach of Intelligence Video Surveillance for Real-Time
Unusual Event Detection ............................................................................................................................................. 105
Du-Ming Tsai and Wei-Yao Chiu

Research on Pervasive Computing Security ......................................................................................................... 111
Long Zhao Hua, Jia Zhen, and Li Tao

Session 2: Security and Privacy

An Advanced ECC ID-Based Remote Mutual Authentication Scheme for Mobile Devices .................................................. 116
Tien-Ho Chen, Yen-Chiu Chen, and Wei-Kuan Shih

Visual Scoping of Private Information Displayed on Shared Tabletop Surfaces ......................................................... 121
Simen Hagen and Frode Eika Sandnes

Improved Identity Based Online/Offline Signature Scheme ......................................................................................... 126
Yang Ming and Yumin Wang

A Method of Privacy Preserving in Mobile Wireless Environments ............................................................................ 132
YaHui Li, YaDi Zhang, and WenSheng Niu

Session 3: Algorithms and Protocols

A New Image Registration Method Using Intensity Difference Data on Overlapped Image .................................................. 138
Shu-Kai S. Fan and Yu-Chiang Chuang

Adaptive Wireless Mesh Networks Routing Protocols .................................................................................................. 142
Saaidal R. Azzuhrri, Marius Portmann, and Wee Lum Tan

Media Access Control Protocol Based on Hybrid Antennas in Ad Hoc Networks ..................................................... 148
Yanrong Ding, Xiaodong Wang, Hu Shen, and Pengyu Guo

Cai Fu, Jihang Ye, Li Zhang, Yunhe Zhang, and Han LanSheng

Dynamic Adaptive Self-Configurable Network Processor ............................................................................................ 160
A. Satheesh, D. Kumar, and S. Krishnaveni
International Workshop on Delay/Disruption Tolerant Networking (IWDTN 2010)

Session 1: Network Architecture Models

An Adaptive Cross-Layer Mechanism of Multi-channel Multi-interface Wireless Networks for Real-Time Video Streaming .................................................................165
  Jian Liu, Fangmin Li, Fei Dou, Xu He, Zhigang Luo, and Hong Xiong

An Trace Based Vehicular Mobility Model for Simulation of Vehicular Delay Tolerant Networks .................................................................171
  Yang Wei-dong, Liu Ji-zhao, and Zhou Xin-yun

A Link Quality Prediction Mechanism for WSNs Based on Time Series Model .................................................................175
  Linlan Liu, Youlei Fan, Jian Shu, and Kun Yu

Message Publish/Subscribe Scheme Based on Opportunistic Networks .................................................................180
  Jianwei Niu, Feifei Wu, Da Huo, and Kai Hu

Session 2: MAC Routing and Congestion Control Protocols

RANC: Opportunistic Multi-path Routing Protocol in WSNs Using Reality-Aware Network Coding .................................................................185
  Jia Liu, Junzhao Du, Jie Zhang, Xiaojun Li, and Hui Liu

Epidemic-Based Controlled Flooding and Adaptive Multicast for Delay Tolerant Networks .................................................................191
  Zhigang Jin, Jia Wang, Sainan Zhang, and Yantai Shu

BiBUBBLE: Social-Based Forwarding in Pocket Switched Networks .................................................................195
  Tong Hu, Feng Hong, Xiqing Zhang, and Zhongwen Guo

Energy-Efficient Clustering Rumor Routing Protocol for Wireless Sensor Networks .................................................................200
  Zhong-hua Wang, Kai Chen, Mei Lin, and Min Yu

Session 3: Practical Applications

Asymptotic Stability Criterion for the Networked Control Systems Based on Time-Delay System .................................................................206
  Xi-min Zhang and Ya-di Zhang

Hierarchical Probabilistic Network-Based System for Traffic Accident Detection at Intersections .................................................................211
  Ju-Won Hwang, Young-Seol Lee, and Sung-Bae Cho

International Workshop on Mobile Cyber-Physical Systems (MobiCPS 2010)

Session 1: Networking and Architectures

Seamless Mobility Support for Adaptive Applications in Heterogeneous Wireless Networks .................................................................217
  Jiannong Cao, Weigang Wu, and Xuan Liu

Heterogeneous Multi-layer Wireless Networking for Mobile CPS .................................................................223
  Jia Shen, Fei Xu, Xiangyou Lu, and Huafei Li
Session 2: Technologies and Applications

A Mobile Context Sharing System Using Activity and Emotion Recognition with Bayesian Networks ........................................... 244
   Keunhyun Oh, Han-Saem Park, and Sung-Bae Cho

Net-in-Net: Interaction Modeling for Smart Community Cyber-Physical System ..................................................... 250
   Longhua Ma, Jun Yao, Ming Xu, Tengkai Yuan, and Meng Shao

DISG: Decentralized Inter-user Interference Suppression in Body Sensor Networks with Non-cooperative Game ........... 256
   Guowei Wu, Jiankang Ren, Feng Xia, Lin Yao, and Zichuan Xu

TouchInteract: An Interaction Technique with Large Displays Using Touchscreen-Phone ............................................. 262
   Hanqing Ruan, Yi Qian, Yong Zhang, and Min Zhou

Haptic u-Table: A Believable Feedback System with a Quasi-tangible Tabletop Interface .............................................. 266
   YoungTae Roh, Jun Lee, Jee-In Kim, YoungSeok Ahn, HyungSeok Kim, and MinGyu Lim

International Symposium on High Confidence Embedded Computing (HiCEC 2010)

Session 1: Testing and Measurement for Embedded Software

Testing of Component-Based Software: A Metamorphic Testing Methodology ...................................................... 272
   Xiao-li Lu, Yun-wei Dong, and Chao Luo

Experiments on Test Case Reuse of Test Coverage Criteria .................................................................................... 277
   Yunwei Dong, Yuying Wang, M.F. Lau, and Si-yu Lin

A Measurement of Software Trustworthiness Based on Approximation Algorithms .................................................. 282
   Jie Zhou and Hong Zhu

Session 2: Component-Based Development for Embedded Software

An Integrated PLC Smart Home System in Pervasive Computing ........................................................................ 288
   Yunwei Dong, Bo Zhang, and Kang Dong

Trustworthiness Expectation of Real-Time Web Services .......................................................................................... 292
   Xinxing Wu and Yixiang Chen

Security Model Oriented Attestation on Dynamically Reconfigurable Component-Based Systems ......................... 299
   Liang Gu, Guangdong Bai, Yao Guo, Xiangqun Chen, and Hong Mei
Formal Definitions for Trust in Trusted Computing ................................................................. 305
Xinmao Gai, Yong Li, Yasha Chen, and Changxiang Shen

The 2nd International Symposium on Multidisciplinary Emerging Networks and Systems (MENS 2010)

Assurance Networks: Concepts, Technologies, and Case Studies ........................................ 311
Yoshiaki Kakuda

Session 1: Special Session on Assurance Networks

Sensitivity Analysis of Random Port Hopping ................................................................. 316
Kousaburou Hari and Tadashi Dohi

Autonomous Community Construction Technology for Timely Transmitting Emergency Information ................................................................. 322
Fan Wei, Md. Emadul Haque, Yukihiro Fukunaga, Takehiro Gouda, Xiaodong Lu, and Kinji Mori

File Diffusion Control on Super-Seed Mode Over BitTorrent-Like P2P Networks ................................................................. 328
Yuki Kuwabara, Junichi Funasaka, and Kenji Ishida

An Extended Micro Loop Routing for Adapting to Energy Consumption ................................................................. 334
Mario Takeuchi, Eitara Kohno, Tomoyuki Ohta, and Yoshiaki Kakuda

Improvement of the Security Against Node Capture Attacks Using Dispersed Data Transmission for Wireless Sensor Networks ................................................................. 340
Eitara Kohno, Tomoya Okazaki, Mario Takeuchi, Tomoyuki Ohta, Yoshiaki Kakuda, and Masaki Aida

Architecture-Oriented Assurance Technology in Microgrid ................................................................. 346
Tianhu Ma, Peng Li, Yanbo Wang, and Yongdong Tan

Session 2: Multidisciplinary Models for Autonomous Networks and Systems

Application of Deterministic Annealing EM Algorithm to Markovian Arrival Process Parameter Estimation ................................................................. 352
Hiroyuki Okamura, Hidenari Kishikawa, and Tadashi Dohi

Dual-EigenRep: A Reputation-Based Trust Model for P2P File-Sharing Networks ................................................................. 358
Xinxin Fan, Mingchu Li, Yizhi Ren, and Jianhua Ma

On Alternation and Information Sharing among Cooperating Autonomous Management Agents ................................................................. 364
Siri Fagernes and Alva L. Couch

Autonomic Fault Identification for Ubiquitous Self Healing Systems ................................................................. 370
Junaid Ahsenali Chaudhry and Muhammad Imran

An SVM Based Automatic Segmentation Method for Brain Magnetic Resonance Image Series ................................................................. 375
Bofeng Zhang, Wenhao Zhu, Hui Zhu, Anping Song, and Wu Zhang

Verification of a Sub-ontology Update Mechanism for the Semantic Grid ................................................................. 380
Toshihiro Uchibayashi, Bernady O. Apduhan, Norio Shiratori, Wenny Rahayu, and David Taniar
Session 3: Empirical Studies of Multidisciplinary Approaches

A Framework of Organic Streams: Integrating Dynamically Diversified Contents into Ubiquitous Personal Study .................................................................386
  Hong Chen, Xiaokang Zhou, Haifeng Man, Yan Wu, Ashraf Uddin Ahmed, and Qun Jin
Making Architectural Decisions Based on Requirements: Analysis and Combination of Risk-Based and Quality Attribute-Based Methods ..................................................392
  Bingfeng Xu, Zhiqiu Huang, and Ou Wei
Monitoring Spatially Referenced Entities in Wireless Sensor Networks .................................................................398
  Farhana Jabeen and Alvaro A.A. Fernandes
An Idle-Time Eliminating Channel Transmission Scheme in EPON System .................................................................404
  Jianhua Shen, Hongmei Guo, and Zhengkun Mi
Cloud Computing Landscape and Research Challenges Regarding Trust and Reputation .................................................................410
  Sheikh Mahbub Habib, Sebastian Ries, and Max Mühlhäuser

The 2010 International Workshop on Software Trustworthiness (SoTrust 2010)

Session 1: Classification and Assurance

A Flexible Multi-Source Web Service’s QoS Acquisition Framework and Implementation .................................................................416
  Junfeng Zhao, Lingshuang Shao, Zhiwen Cheng, and Bing Xie
Towards Trustworthy Composite Service Through Business Process Model Verification .................................................................422
  Wenjia Huai, Xudong Liu, and Hailong Sun
Formal Analysis of Behavioural Equivalence for Trustworthy and Composite Web Services .................................................................428
  Yongwang Zhao, Chunyang Hu, Min Liu, and Dianfu Ma
DS Theory-Based Software Trustworthiness Classification Assessment .................................................................434
  Ben Wang, Xingshe Zhou, Gang Yang, and Yalei Yang

Session 2: Techniques and Applications

Static Detection of Unsafe Use of Variables in Java Program .................................................................439
  Xiaouquan Wu and Jun Wei
Mining Frequent Development Patterns of roles in Open Source Software .................................................................444
  Lin Yuan, Huaimin Wang, Gang Yin, Dianxi Shi, Xiang Li, and Bixin Liu
Checking Compliance to Coding Standards for x86 Executables .................................................................449
  Ziying Dai, Xiaoguang Mao, Dianlin Wang, Donghong Liu, and Jie Zhang
User-Centered Trust Model Visibility of Trust Technologies .................................................................456
  Hao Jiang, Yang Li, and Yongjun Xu
Collocated Workshops on Autonomic Networks and Services, Network Evolution and Routing Innovation (ANSR 2010)

MiniMASC: A Framework for Diverse Autonomic Adaptations of Web Service Compositions .................................................................460

_Qinghua Lu and Vladimir Tosic_

PCR-a Position-and-Connectivity-Based Routing Protocol for VANETs ..................................................................................................469

_Lin Lei, Xiao Xiaqiang, Xu Ming, and Wei Liqi_

ATC Demo and Exhibition Session

MiniMASC+MiniZinc: An Autonomic Business-Driven Decision Making Middleware for Adaptation of Web Service Compositions .................................................................474

_Qinghua Lu and Vladimir Tosic_

Exploration on Integrated Development Environment of Trusted Data Processing Oriented Software Product Line for WEB Application ..................................................................................................................478

_Hongwen Huang, Xinyu Zhang, Li Zheng, and Shulan Zhao_

An Indoor Location-Based Social Network for Managing Office Resource and Connecting People ..........................................................481

_Hao Wang, Lijun Zhu, and Alvin Chin_

UIC Demo and Exhibition Session

Drive Smartly as a Taxi Driver ........................................................................................................................................484

_Yu Zheng, Jing Yuan, Wenlei Xie, Xing Xie, and Guangzhong Sun_

HouseGenie: Universal Monitor and Controller of Networked Devices on Touchscreen Phone in Smart Home ........................................................................................................................................487

_Yue Suo, Chenjun Wu, Yongqiang Qin, Chun Yu, Yu Zhong, and Yuanchun Shi_

A-CUBE: A Tangible Tabletop Application to Support Safe and Independent Chemistry Experiments ........................................................................................................................................490

_Akifumi Sokan and Kaori Fujinami_

Fall Detecting and Alarming Based on Mobile Phone ..........................................................................................................................494

_Zhongtang Zhao, Yiqiang Chen, Junfa Liu, and Zhongtang Zhao_

Taxi-Viewer: Around the Corner Taxis Are! ........................................................................................................................................498

_Ke Hu, Zhongguang He, and Yang Yue_

Directional Wi-Fi Based Indoor Location System for Emergency ..................................................................................................................501

_Mi Zhao, Hua Yang, Junfa Liu, Yiqiang Chen, and Jingye Zhou_

Speech and Auditory Interfaces for Ubiquitous, Immersive and Personalized Applications ........................................................................................................................................503

_Lei Xie, Wenhui Zhao, Xiangzeng Zhou, Xiaohai Tian, Bingfeng Li, Naicai Sun, Yali Zhao, and Yanning Zhang_

GeeAir: Waving in the Air to Control Home Appliances ..........................................................................................................................506

_Jiahui Wu, Gang Pan, Shijian Li, Zhaohui Wu, and Daqing Zhang_

Author Index ..................................................................................................................................................................................509
