A Study of Online Textbook Use Across Multiple Engineering Courses
John Chen, Christine A. Victarina, Charles Birdsong, Unny Memon, Marilyn Tseng, Tyler Scott Smith

Episodes as a Discourse Analysis Framework to Examine Feedback in an Industrially Situated Virtual Laboratory Project
Debra Gilhuna, Ben Uriel Sherrett, Milo Kosecki
T223 – EXPERIENTIAL LEARNING IN ECE

Use of Electronics Explorer Board
Mihaela Radu, Clina S. Cole, Joe Harris, Minesh Dabacoan

Lab-in-a-Box: Assessment of Materials Developed to Support Independent Experimentation on Concepts from Circuits
Kathleen Meehan, Robert W. Hendricks, Conrey T. Martin, Peter Doollittle, Richard Lee Clark

Integrating Lecture and Laboratory in an Analog Electronics Course Using an Electronics Explorer Board
Ken Maren

High Altitude Balloon Instrumentation In Undergraduate Electrical and Computer Engineering
Dick Blomfield, Mark Earl Randall

A Haptics-Enabled Rehabilitation Design Project for a Control Systems Course
Liao H!

The VU-LEGO Real Time Target: Taking Student Designs to Implementation
James Peyton Jones, Connor W. McArthur, Tyler A. Young

T224 – DIGITAL SIMULATION TOOLS IN ENERGY EDUCATION

A Student-Built Internal Combustion Engine Simulation Using Excel
Robert McMaslers

Use of Adaptable Simulation-based Virtual Laboratories for Teaching Alternative Energy and Energy Conservation in Engineering & Technology Programs
Yakov Cherner, Ahmed S. Khan, Aminul Karim, Gary J. Mullet

Using the Computer as a Tool Across the Curriculum
Laura J. Genik, Craig W. Somerion

Smart Grid Development Using Modeling, Design, Simulation, and Diagnoses of Electrical Distribution Network
Saeed Sean Monemi

T227 – TEACHING STRATEGIES FOR SOLID MODELING

What do Students Get Out of Solid Modeling Video Demonstrations?
Mark Anthony Shreve, Theodore J. Branoff, Eric N. Wiebe, Jeremy V. Ernst

The Effects of Worked Examples on CAD Performance: An Application of the Four-Component Instructional Design Model to CAD Instruction
Spencer Barnes, Eric N. Wiebe, Theodore J. Branoff

Teaching CAD Modeling Using LEGO
Derek M. Yap-Hoi, Jeffrey L. Newcomer

Development and Implementation of Challenge-Based Instruction in Engineering Graphics
Senkyoung Ahn, Robert A. Freeman, Gregory' Allen Foster

Teaching Surface Modeling to CAD/CAM Technologists
Derek M. Yap-Hoi

T229 – ENGINEERING ETHICS ISSUES PART ONE

Application of Classical Realist Philosophy Principles to Engineering Ethics
Claire Komives, Moira M. Walsh

Arguing to Solve Engineering Ethics Problems
David H. Jonassen

First-Year Engineering Students and Ethical Analysis
Gretchen L. Hein, Amber Kemppainen

The Creation of Tools for Assessing Ethical Awareness in Diverse Multi-Disciplinary Programs
Craig Tiba, Carla B. Zolnowski, Margaret Hoyack, William C. Oakes

Does a STEM Researcher's Role Orientation Predict His or Her Ethical Sensitivity to Responsible Conduct of Research?
Michael Bowler, Susan Amato-Heinonen, Thomas David Drummer, Joanna M. Schreiber, Joseph H. Holies, Ted W. Lockhart, Jingfang Ren

T233A – MECHANICAL ENGINEERING TECHNOLOGY CURRICULUM INNOVATIONS

Parametric Modeling, Rapid Prototyping, and a Walker Robot
Randy Shih

Integrating Project-Based Learning through Machine Design, Fabrication and Testing
Aaron K. Ball, George D. Ford, Frank Miceli

Resurrecting the Electrolytic Plotting Tank
Robert Edwards, Tim Demetrin, David H. Johnson

A Course on Process Design and Operation in an Engineering Technology Program
Vassiliou Tasmanas
T233B – TAC/ABET RELATED OUTCOME BASED ASSESSMENT METHODS AND MODELS

Engineering Technology Course Assessments for ABET Criterion 3: Students Outcomes
Nagendra N. Sarker, Mohan Ketkar, Cajelan M. Akujuobi
Long-Term Alumnus Performance and Evaluation after Graduation from a Distance Learning Hybrid Weekend Master’s Degree Program in Technology
Mitchell L. Springer, Mark T. Schnuier, Michael J. Dyrenforth
Developing an Application to Manage and View ABET Course Material
Scott J. Schneider
ABET Report Generation
Richard Oliver, William M. Leonard, Elizabeth Dell, Robert A. Merrill
EET Nationally-Normed Assessment Exam: First Experiences and Their Relations to ABET Outcomes
Ilya Grinberg, Ronald E. Lund, Thomas M. HelI Jr., Kelly Ann Larriva, Steve Macho, Mike Easman

T233C – NANOTECHNOLOGY/RFID

Incorporating Social and Ethical Implications of Nanotechnology in the Engineering and Technology Curricula
Ahmed S. Khan, Aram Agajanian
Location Identification Using Passive UHF RFID System
Patrick Anderson, Ghassan T. Ibrahim
RFID-Based Permitted Entry System
Jai P. Agrawal, Chandras Sekkar, Rosanna G. Davis

T233D – ENGINEERING TECHNOLOGY FUTURISTIC PLANNING

Attracting K-12 Students towards Engineering Disciplines with Project-Based Learning Modules
Alok K. Verma
Teaching Computer Programming Skills to Engineering and Technology Students with a Modular Programming Strategy
Wangping Sun, Xian Sun

T235 – ENTREPRENEURSHIP COURSES AND OUTCOMES II

All Innovation Is Innovation of Systems: An Integrated 3-D Model of Innovation Competencies
William D. Schindel, Samuel N. PeJJers, James H. Hanson, Jameel Ahmed, William A. Kline
Development of a New Graduate Course in Sustainable Technology Entrepreneurship for Scientists and Engineers
Anthony Marchese
Preparing Engineering Graduates for the Real World
Jessica R. McCormick, Beverly Radloff, Nancy Lamm, Terri L. Talbert-Hatch

T236 – TECHNIQUES TO ENHANCE ENVIRONMENTAL ENGINEERING COURSES

Demonstrating Microbial Growth and Metabolic Kinetics with Methanotrophic Bacteria: A Classroom Laboratory Experiment
Andrew Ross Pfluger, Wenfong Wu
Reforming Environmental Engineering Laboratories for Sustainable Engineering: Incorporating Problem Based Learning and Case Studies into an Environmental Engineering Lab Course
Stephanie Luster-Teddy, Cindy Waters
Using Kefler to Teach Microbial Kinetics in an Undergraduate Wastewater Treatment Course
Isaac W. Wait, Richard F. McCormick, Sydney M. Wait
Using Screencasts to Enhance Introductory Environmental Engineering Education
Philip J. Parker

T237 – ELECTRICAL AND COMPUTER ENGINEERING LABORATORIES

Development and Implementation of a Comprehensive Nanotechnology Fundamentals Lab for Engineering Students
Noel Barakat, Lihong Jiao
Enhancing the Students’ Abilities in Experimental Designs through Design-Expert
T. Charles Liu
Incorporating Student-owned Portable Instrumentation into an Introduction to Electrical Engineering Course
Sungjunian Chiu, R. Bruce McCorn, Arlante L. Beck, Eric Deon, Alexis Kwasinski
Microwave Plasma Cleaner Design for Semiconductor Fabrication and Materials Processing Laboratory Use
Maistina G. Grovanch, Derek Richardson
Thirty Years of Rube Goldberg Projects: A Student-Driven Learning Laboratory for Innovation
R. William Graff, Paul R. Leffer, Matthew G. Green, Joel Kohlch
Reference Designs for Sensors used in Microcontroller-Based Design Projects ......................................................... 10988
Chiu Chit

Community-Based Research Project in Wireless Communication ................................................................................... 11002
Mohammad N. Amin, Ronald P. Uhlig, Pradip Peter Dey, Bhaskar Raj Sinha

T238 – FDP V: GENDER AND ENGINEERING EDUCATION: A PANEL DISCUSSION AND WORKSHOP

Gender Schemas, Privilege, Micro-messaging, and Engineering Education: Practical Lessons from Theory .............................. 11021
Yevgeniya V. Zastavker, Debbie Chachra, Caitrin Lynch, Alisha L. Sarang-Simoninski, Lynn Andrea Stein

T239 – GENERAL TOPICS IN GRADUATE EDUCATION

Correlation Between "Ethical Issues" and "Grade" Performance in a Graduate Class .......................................................... 11031
Robert M. Brooks, Naji Khonry, K. S. Jyothsna, Anithra J. Amavasai

Writing Well 2: Building Traction and Triumph into Co-Authorship .............................................................................. 11042
Suzanne M. Kresto, John A. Nychka, Roger Graves

The 4+1 Program and Distance Learning Meeting Objectives and Outcomes ............................................................... 11052
Daniel W. Walsh, Lanny Griffin, Robert S. Crockett

Survey-Based Comparison of Perceptions Among Current International Engineering Graduate Students and Alumni at U.S. Universities ................................................................................................................................. 11062
Anurag K. Srivastava, Sonmya K. Srivaslava, Adrienne R. Minerick, Noel N. Schults

Assessment Based on the Principles of Howard Gardner's Theory .................................................................................... 11073
Mysore Narayanan

T241 – INFORMATION AND NETWORK SECURITY

Satellite Communications, Data Communications, and Simulation ................................................................................... 11096
Maurice F. Abuadle, Kandan Nepal

Incorporating Virtual Lab Automation Systems in IT Education ....................................................................................... 11110
Peng Li, John M. Jones, Erika Karem-Augus

Experience with Software Support for Managing Student-Authored Wiki Textbooks ....................................................... 11123
Edward P. Gehring

Wired and Wireless Port Communication .......................................................................................................................... 11133
Jem Heng, Farrukh Zia, Andy Zhang

T242 – EFFECTIVE PROJECTS AND EXPERIMENTS IN INSTRUMENTATION AND CONTROL

Home Automation with Microcontroller and Networking .................................................................................................. 11150
Asad Younus, Tyler Scheckman
