T252 - MULTIDISCIPLINARY TECHNICAL SESSION

Encouraging Art and Science Cross-Departmental Collaboration through an Interdisciplinary Program

Mohamed K. Gownader

EXTROVERT: Experience with Cross-Disciplinary Learning

Narayanan M. Konerath, Brian German

Making a College-Level Multidisciplinary Design Program Effective and Understanding the Outcomes

Shahara B. Daly, A. Harvey Bell, Brian E. O'Keefe, Geil Susan Halborn, James Paul Holloway

A Model for Multidisciplinary Experiences for Undergraduates that Promotes Retention and Pipeline to Graduate School

Mugdalinii Z. Lagoudas, Bugrahan Yalvac

Peer Mentoring: A Transitional Program to Improve Retention in the College of Engineering

T253 - NEW FACULTY DEVELOPMENT

How can we Help Faculty Balance Between Teaching and Scholarly Activities?

Cheryl B. Schroder, Seung Youn Chyuttg, William L. Hughes, Kotaro Sasaki, Teresa Cole, John N. Chiasson

Role Models in Engineering

Craig J. Gmn

Practical Interpretation of Student Evaluations for Starting Professors

Walter W. Schilling, John K. Eastrill, Frederick Clayton Berry

Rank and Tenure Requirements at Teaching-Based University

Matoeh Aggarwal, Karen M. Fornos

T261 - SOFTWARE ENGINEERING PROJECTS

Multiplayer On-Line Role Playing Game Style Grading in a Project-Based Software Engineering Technology Capstone Course

James N. Long, Linda Sue Young

Working Towards the Student Scrum: Developing Agile Android Applications

Thomas Reichlmayr

Using Vertically Integrated Project Teams to Inspire Student Interest in Computing Careers

Massoud Towihimpal, Thomas B. Hilbara, Joseph L. Urban, Gregory W. Hishon, Richard Stansbury

T268 - FEMALE FACULTY, LEARNING, NSF, AND ABET ISSUES AT TWO YEAR COLLEGES

Satisfaction of Female Faculty at Two-Year Schools

David A. Koonce, Cynthia D. Anderson, Valerie Marie Conley, Christine Matkey

An Analysis of Female STEM Faculty at Public Two-Year Institutions

David A. Koonce, Valerie Martin Conley, Dyah A. Hening, Cynthia D. Anderson

Creating Real-World Problem-Based Learning Challenges in Sustainable Technologies to Increase the STEM Pipeline

Nicholas Mazzu, Michele Dischino, Judith F. Donnelly, Fenna D. Hames

A Service Learning Project for a Freshman Engineering Course

David G. Dimitriu, Jeremy O'Connor

NSF Advanced Technological Education (ATE) Principal Investigators Garnering Useful Instruction on Developing (Project) Effectiveness: ATE PI GUIDE

Elizabeth T. Cody, Normann L. Fountaine

"TUNING" Engineering Programs in the Context of ABET Accreditation

Mary Elise Smith, James K. Nelson, David Wofson Gardner

T269 - ENGAGING STUDENTS IN ENGINEERING (ENGAGE)

Implementing ENGAGE Strategies to Improve Retention: Focus on Spatial Skills: Engineering Schools Discuss Successes and Challenges

Susan Stiglm Mers, Sheryk A. Serby, Tricia R. Barry, Carolyn Conner Seepersad, Anu Maria Dinon, Tiaf S. Altem, John A. Merrill, Wally Peters, Erica Pfister-Aitken, Sarah C. Baxter, Guangming Zhang, James A. Leach

T402 - AEROSPACE TEACHING AND LEARNING I

The Assessment of Ethical and Sustainable Engineering Studies in Undergraduate University Education

Maxwell Smart Reid
Teaching with UFO's in an Aeronautical Engineering Course ................................. 12221
Matthew Rowland, James E. Bhiman

Towards More Effective Teaching Strategies of Iteration and Systems Management in Spacecraft Design ......................... 12230
Hadi Ali, Robin Adams

Development of an Advanced Experimental Aerodynamics Course for Undergraduates ..................................................... 12250
Lance W. Traub

T412 – SPECIAL SESSION: INTERDISCIPLINARY COURSE DESIGN OPPORTUNITIES FOR CHEMICAL ENGINEERS

Unpacking the Interdisciplinary Mind: Implications for Teaching and Learning ................................................................. 12259
Wendy C. Newsitner

Experience with a Cross-Disciplinary Intensive, Hands-On Pre-Tansport Course ............................................................... 12269
Baba Abdul, Edgar A. O'Rear, Gary Robert Brown, Ashley Ater Kranov, Bernward J. Van Wu, Paul B. Goiter, David B. Thiessen

Interdisciplinary Course Design Opportunities for Chemical Engineers: A Material Balances Course with Integrated Concept-Based Active Learning Pedagogy: Comparison of Student Perception and Performance with their Attitudes and Approaches to Learning ......................................................... 12286
Jeffrey A. Nason, Bill J. Brooks, Mike Korenky

A New Interdisciplinary Course for Engineering and Business Students: The Global Pharmaceutical Industry .......................... 12304
William J. Kelly

Introducing Interdisciplinary Content through Electives ............................................................................................................ 12317
Joseph J. Biernacki, Christopher D. Wilson

T414B – INNOVATIVE COLLEGE INDUSTRY PARTNERSHIPS FOR THE FUTURE

A College-Industry Research Partnership on Software Development for Undergraduate Students ........................................... 12335
Ana Elisa P. Goulart, Chris Corti, Matthew Robert Hawkes

An Industry-Government-Academia Partnership to Develop Talent and Technology ............................................................ 12344
Laura Morell, Mariou T. Trucco, Francisco Enrique Andrade Lopez

"I Just Thought I Did Insignificant Tasks": Using e-Portfolios to Understand Co-Op and Undergraduate Research Experiences ............................................................................................................ 12351
Kathleen F. Gygi, Jennifer A. Turns

Service-Learning Partnerships: Improving Education and Addressing Community Needs ....................................................... 12363
William C. Oakes

Transforming Cultures in Industry: Building Leadership Attitudes and Skills for Working Adult Graduate Students ....... 12381
Ronald J. Bennett, Elisaor R. Millam

T421 – THE BEST DESIGN IN ENGINEERING

Employing Engineering Design Tools for Designing/Redesigning of Courses ........................................................................... 12395
Zeshan Hyder, Zulfikar Ali, Janis P. Terpeny, Richard M. Goff

Analysis of Reflective Memos ........................................................................................................................................... 12406
Mark W. Steiner, Junichi Kanai, Cheng Hsu, Richard Alben

Making it Real: Scaling up Interdisciplinary Design to Model Real-World Engineering Entrepreneurship ........................... 12419
Eckehard Doerry, Bridget N. Bern

Project-Based Learning and Design Experiences in Introduction to Engineering Courses: Assessing an Incremental Introduction of Engineering Skills ............................................................................................................ 12438
Andrew L. Gerber, Robert W. Fletcher

Design in Context: Where do the Engineers of 2020 Learn this Skill? .................................................................................... 12475
Betsy Palmer, Patrick T. Terenzini, Jim F. McKenna, Betty J. Harper, Dan Merson

T424 – CURRICULAR DEVELOPMENTS IN ENERGY EDUCATION II

Renewable Energy Revives Electronics & Computer Engineering Technology ................................................................. 12501
Joyce M. E. Van De Vegte, Alan P. Duncan

Integration of Hydrogen Fuel Cell Technology to Undergraduate Education in EET Programs .............................................. 12517
Abd El Hamid El Mashabaria, Karim Balbaci, Reg Recayi Pecen

Description of Three Algae-Related Interdisciplinary Senior Design Projects in Mechanical Engineering and Their Impact on Students ............................................................................................................ 12531
Teodora Rusan, Gregory Mason

An Open Hardware, Open Source Electronic Load Bank and Data Acquisition System For Expanding the Number of Schools and Students Researching Battery Energy Storage ............................................................................. 12548
Tyler Grandahl, Gianfranco Biondi, Clark Hochgraf
