VOLUME 24

How Educational Institutions can Handle More Students with Fewer Faculty Members ................................................................. 18331
Carolyn Kushil Dunn, David L. Butts, Sandra Lee Friend

Assessment of the CATME Peer Evaluation Tool Effectiveness ................................................................. 18344
Christopher P. Pung, John Farris

Electronic Portfolios in Academic Advising, Self-Guided Learning, and Self-Assessment ............................................................... 18359
Joshua A. Kintzer, Jessica A. Kuczynski, Kerry Meyers, Joy B. Brockman

W218 – EXPANDING THE BORDERS OF ENGINEERING EDUCATION

Academic Preparation in a Co-Op Program as a Career Enhancement Tool for International Engineering Graduates ................................................................................................................................. 18377
Sandra Ingram, Anita H. Era, Marcia R. Friesees

International Co-Op Experience at the Base of the Economic Pyramid for Engineering Students ................................................................. 18394
John Farris, Paul Merrill Lane

Encounter Engineering in Europe, Equipping Students to be Successful in the Global Market Place ................................................................. 18403
Paige Davis, Summer Dane Johnson, Emma M. Allain, Harold Thomas Leeder, Warren N. Waggenspack Jr.

W221 – CAPSTONE DESIGN III

Assessing and Improving a Capstone Design Sequence with Industrial Project Management Techniques ................................................................. 18415
Stacy S. Wilson, Mark E. Cambrom, Michael J. McIntyre

Assessing the Effect of Co-Op Sequence on Capstone Design Performance ................................................................................................................................. 18427
Bridget M. Smyser, Gregory J. Kowalski

Implementation and Assessment of a Capstone Course Designed to Achieve Program Learning Objectives ................................................................. 18444
Mohamed E. El-Sayed, Jacqueline A. El-Sayed, Timothy M. Cameron

Integration of Capstone Design Experience with the International Exchange Program ................................................................. 18456
Juan C. Ordovas, Jute Vargas, Chiang Shih, Necesio Gomes Costa

Study Abroad in Ghana as a Tool in Task Identification for Bioengineering Capstone Design ................................................................. 18465
Andrew Darling

W222A – SPECIAL SESSION: MOVING TOWARDS THE INTENDED, EXPLICIT, AND AUTHENTIC: ADDRESSING CRITICAL MISALIGNMENTS IN ENGINEERING LEARNING WITHIN SECONDARY AND UNIVERSITY EDUCATION

Special Session: Moving towards the Intended, Explicit, and Authentic: Addressing Misalignments in Engineering Learning within Secondary and University Education ................................................................................................................................. 18478

W222B – FOSTERING STUDENT LEARNING

Problem Based Learning Using HARP Instruction ................................................................................................................................. 18502
Stephen Snyder, Rachel Tomastik, Bethany Smith

Perceived Learning Effect and Guidance in Project-Based Engineering Education ................................................................................................................................. 18521
Christa Heaton, Herman Buettner, Joe Vander Steein

The Effect of Previous Team Experiences on Students’ Perceptions of Interdisciplinary Engineering Problems ................................................................................................................................. 18545
Alexandra Emilina Costa, Reif Saliba

The Effects of Engineering Demonstration Design on Learning and Interest ................................................................................................................................. 18564
Gerald Sullivan, James C. Squire, George M. Broome IV
W223A – LABORATORY DEVELOPMENT IN ECE

Developing a Course and Laboratory for Embedded Control of Mechatronic Systems
M. Moallem, Yaser M. Roshan
HEV Green Mobility Laboratory
Merk G. Thompson, Craig J. Hoff, James Gover, Allan R. Taylor, Michelle R. Pomeroy, Kevin Bai

Basic Class Materials and Laboratory Projects with DC Motors in an Introductory Undergraduate ECE Class for Non-Majors
Sergey N. Makarov, Reinhard Ludwig, Kaung Hiya Win

New Lab Project for Non-EE Majors Provides Hands-On Experience with Analog/Digital and Programmable Temperature Controllers
Patrick Kane, Alexander Gamage, Robert F. Gilby, Hangwei Liao

Integrating a Nontraditional Hands-On Learning Component into Electrical and Electronics Courses for Mechanical Engineering Students
Kathleen Mehan, David Fritz

Development of a New Lecture/Lab Course on Quantum Mechanics for Engineering Students
Vladimir Mitin, Nizami Z. Vagidov, Athos Chariton Petrou, Xiaofeng Liu

W223B – INNOVATIVE INSTRUCTIONAL STRATEGIES AND CURRICULA IN ECE II

The Building of Teams During an IT Competition: Success with Combining Multiple Schools into Teams to Perform Collaborative Challenges During a Two-Day Competition
Julie A. Rursch, Douglas W. Jacobson

Multi-Institutional Development of Mobile Studio Based Education and Outreach
Kenneth A. Connor, Craig J. Scott, Mohamed F. Chouikha, Adam M. Wilson, Adrianna Anderson, Yacob Astatke, Frederick C. Berry, Dianne Newman, Judith E. O’Rourke, Thomas D. C. Little, Don Lewis Millard

Electrical and Computer Engineering Programs in Two Countries: A New Paradigm for Cooperation
M. M. Costa

Design Projects for Programmable Embedded System-On-Chip Course
Prent Nagrajana, Robin Kizirian

Use of Java-DSP to Demonstrate Power Amplifier Linearization Techniques
Robert Santucci, Andreas S. Spanias

Uncertainty About Uncertainty: What Constitutes “Knowledge of Probability and Statistics Appropriate to the Program Name and Objectives” in our Program Accreditation Criteria
Jeffrey A. Jalkio

W224 – SUSTAINABILITY, DIVERSITY, AND STEM IN CONTEMPORARY ENERGY EDUCATION

Bridging the Gap Between Science and Engineering for High School Students through an Innovative Biofuel Research Project
Jeffrey R. Seay, Wesley Allen Whipple

A Two-Year Case Study: Assessing the Impact of Active Learning on Elementary School Students during GK-12 Outreach Administered Energy Clubs
Lynn Ather, Laura Buttrumley, Amber C. Sedorich, Clair Ellen-Ann Wilson, Laura Elizabeth Ganun

Energy Conservation in the Classroom
Randolph Keller, Amy L. Miller, J. Brandon Doolcy

A Balanced View of New Technologies
John M. Robertson, Slobodan Petrovic

W227 – ASSESSMENT IN ENGINEERING GRAPHICS

Online Instructional Materials in a Hybrid Introductory Engineering Graphics Course: An Inventory of Solid Modeling Concepts
Heidi M. Steinhauser

Graphical Communications: A Concept Inventory
Heidi M. Steinhauser

Development of EDGD Website Automated Learning and Assessment Resources
Amanda Varriaci, Theodore J. Bronoff, Melissa Kelly, James O’Donnell, Joseph A. Daino, Nicholas Beruzzl

Exploring the Value of Democratic Assessment in Design-Based Activities of Graphical Education
Naul Seery, Dina Royle, Donal Carty

Measuring the Performance of the Engineering Design Graphics Journal
Robert A. Chiu

W229 – ENGINEERING ETHICS ISSUES PART II

Comparison of Engagement with Ethics between an Engineering and a Business Programs
Sven Culver, Pimol K. Lohani, Ishwar K. Puri
Incorporating Societal and Ethical Issues of Nanotechnology into an Integrated User Network: Results from the National Nanotechnology Infrastructure Network
Katherine McComas, Nancy Healy

AI & SciFi: Teaching Writing, history, Technology, Literature, and Ethics
Rebecca A. Bates

Tools to Craft Ethical Behavior
Martin E. High, A. Steven Hart, Scott D. Gelfand

Correlation Between Homework Solution Website Use and Course Performance
Sophia T. Sanlillan

W230 – INFORMATION LITERACY: PREPARING STUDENTS FOR THE REAL WORLD

Welcome to the Real World: Showing the Value of Information Literacy Beyond the Classroom
John B. Napp

What Information Sources do Engineering Students use to Address Authentic Sociotechnical Problems?
Eugene Barsky, Annette Berndt, Afteila Greenwood, Carla S. Paterson

Gauging Workplace Readiness: Information Behavior and Preparedness of Engineering Students in Cooperative Education Programs
Jon N. Jeffries, Meghan Laflery

It’s a Wrap: A Real-Life Engineering Case Study as the Focus of an Online Library Tutorial
Patsy Hulse, Dhalbia Donning Han, Emil Mehndichato, Susan Brookes

W231 – FRONTIERS IN EM EDUCATION

Missouri S&T Engineering Management Capstone Senior Design: Lessons Learned and Challenges to Come
Stephen A. Raper

Perception and Preferences of Faculty for Online Learning
Erminga C. Ozelkan, Agnes Galambosi

The Columbia City Trailhead: A Collaborative Construction Engineering Technology Capstone Experience
Barry Dupen, M. Regina Leffers

Factors that Influence the Use of Sustainable Technology in Structural Design
Charles Pedahou, Eric Nishit

W233A – ETD DESIGN IV: CONSTRUCTION AND CIVIL ENGINEERING TECHNOLOGY

The Columbia City Trailhead: A Collaborative Construction Engineering Technology Capstone Experience
Barry Dupen, M. Regina Leffers

Factors that Influence the Use of Sustainable Technology in Structural Design
Charles Pedahou, Eric Nishit

W233B – TOPICS RELATED TO TELECOMMUNICATIONS

A Lab Development for Real-Time Communication Systems with PCs
Min-Sung Koh, Esteban Rodriguez-Marek, Claudio Talarico

Design and Implement a Cost-Effective Wireless Communication Project on a PIC Training System
Shelbi Haring, Walter F. Deal III, Lucites Agusti Amojo, Mathew Henderson

Development of Low-Cost Radio Frequency Test Equipment
James O. Everly, Xuefu Zhou

Developing Digital/Analog Telecommunication Laboratory
Toshio Zhang, Xiaoqin Chen, Lawrence O. Kehinde

Orthogonal Frequency Division Multiplexing (OFDM) Development and Teaching Platform
Antonio Francisco Mondragon-Torres, Mohab Nandam Kommi, Tamoghna Bhattacharya

W235 – STUDENT ENTREPRENEURIAL SKILLS AND MINDSET II

Incorporating Entrepreneurship into Mechanical Engineering Automotive Courses: Two Case Studies
Gregory W. Davis, Craig J. Hoff, William J. Riffe

Entrepreneurial Mindset Development in a Senior Design/Capstone Course
Randall Brottwer, Aubrey Sykes, Steven H. Vanderleest

Teaching Entrepreneurship through Virtues
Calvin C. Jen, Tyler Scott Helmus, Steven H. Vanderleest
