Oceans’ 11 MTS/IEEE KONA

Waikoloa, Hawaii, USA
19 – 22 September 2011

Pages 1-914
# TABLE OF CONTENTS

## ACOUSTIC TELEMETRY AND COMMUNICATION

### 1

- **High-Frequency Underwater Acoustic Communication Development System**
  
  Craig Benson, Michael Ryan, Michael Frazer

- **The Nautilus Project: Physical Parameters, Architectures And Network Scenarios**
  
  Riccardo Mariano, Paolo Casari, Michele Zorzi

- **Nams: A Networked Acoustic Modem System For Underwater Applications**
  
  Zheng Peng, Haining Mo, Zuofei Wang, Hao Zhou, Xiaoka Xu, Son Le, Yibo Zhu, Jun-Hong Cui, Shengli Zhou, Zhijie Shi

- **Real-Time Desalination Plant Outfall Monitoring Using Acoustic Telemetry Modems**
  
  Adam Lipper

### 2

- **On Channel Aware Routing Policies In Shallow Water Acoustic Networks**
  
  Paolo Casari, Alfred Asterjadhi, Michele Zorzi

- **Soft Feedback Turbo Equalization For Underwater Acoustic Communications**
  
  Amirhossein Rafati, Huang Lou, Yahong Zheng, Chengshan Xiao

- **Mac Protocols That Exploit Propagation Delay In Underwater Networks**
  
  Shiraz Shahabudeen, Mandar Chitre, Mehul Motani

- **On Enhancing Four-Way Handshake With Stair-Like NAV Setting For Underwater Acoustic Networks**
  
  Kuei-Ping, Shih Yen-Do, Chen Chun-Chih, Li Rui-Ting Dai

### 3

- **A Hybrid MMSE Approach To Channel Shortening For Underwater Acoustic OFDM**
  
  Nicholas O'Donoughue, Christian Berger, Jose' Moura

- **Blind CFO Estimation For Zero-Padded OFDM Over Underwater Acoustic Channels**
  
  Wei Zhou, Zhaohui Wang, Jie Huang, Shengli Zhou

- **Decision Feedback Equalization For Low Power Underwater Communication System**
  
  Ta-Jin Lee, Min-Soo Han, Jeong-Woo Han, Ki-Man Kim, Seung-Yong Chae, Kwang Sun

- **CS-MAC: A Channel Stealing MAC Protocol For Improving Bandwidth Utilization In Underwater Wireless Acoustic Networks**
  
  Kuei-Ping Shih, Yen-Do Chen, Shu-Sheng Liu, Chia-Ming Chung

### 4

- **A Channel Model And Estimation Technique For MIMO Underwater Acoustic Communications In Ports And Very Shallow Waters At Very High Frequencies**
  
  Gaultier Real, Pierre-Philippe Beaujean, Pierre-Jean Bouvet

- **An Analysis Of MIMO-OFDM For Shallow Water Acoustic Communications**
  
  Pierre-Jean Bouvet, Alain Leveau

- **Message Anticipation Applied To Collaborating Unmanned Underwater Vehicles**
  
  Nicodemus Hallin, Hossein Taheri, Justin Horn, Michael O'Rourke, Dean Edwards

- **Frequency-Domain Turbo Detection For No-CP Single-Carrier MIMO Underwater Acoustic Communications**
  
  Longbou Wang, Jun Tao, Yahong Zheng

- **Study Of Pilot Ovehead For Iterative OFDM Receivers On Time-Varying And Sparse Underwater Acoustic Channels**
  
  Christian Berger, Jie Huang, Jose' Moura
ACOUSTIC TELEMETRY AND COMMUNICATION

Joint Time And Spatial Reuse Handshake Protocol For Underwater Acoustic Communication
Roe Diamant, Wenbo Shi, Wei Soh, Lutz Lampe
106

Source Speed Estimation In A High-Frequency Acoustic Modem
Poorani Kathirveli, Pierre-Philippe Beauream, Nikolaos Xiras
112

Time-Domain Equalization For Underwater Acoustic OFDM Systems With Insufficient Cyclic Prefix
Kelvin Yeo, Konstantinos Pelekanski, Mandar Chitre
120

ACOUSTICAL OCEANOGRAPHY

Horizontal Array Passive Inversion In Range-Independent Environments
Donald Delbaho, James Leclere
125

Water Mass, Front And Meanders Of The Brazil Current Seen Through Acoustics: A Preliminary Study
Leandro Ponson, Jean-Pierre Hermand, Olivier Carrriére Ison, Carlos Almeida Da Silveira
128

Compensating Images For Absorption Variations Before Acoustic Seabed Classification
Christian Murskhe, Ulrike Schiller, Jon Preston
135

Acoustic Seagliders In Philsea10: Preliminary Results
Bruce Howe, Lara Uffelen, Eva Nosal, Glenn Carter
143

AIRBORNE AND SATELLITE RADAR AND SAR

C-, And Ku-Band, Dual-Frequency, Tetra-Channel, Multi-Polarization, Combined, Doppler Scatterometer-Radiometer System And Its Application Peculiarities For Sea Surface Remote Sensing
Artashes Arakelyan, Arsen Arakelyan, Melanya Grigoryan, Gagik Hovhannisyan, Vanik Karyan, Mariam Karyan, Marine Simonyan
151

A Novel Adaptive Synthetic Aperture Radar Ship Detection System
John Steen, Michael Hughes, Bryan Bagnall, Dan Garcia, Keith Piiko, Heidi Buck, Elan Sharghi
160

Time Domain Numerical Simulation Of Microwave Backscattering For Ocean SAR Image
Takero Yoshida, Chang-Kyu Rhaen
167

Differences Between ASCAT, OSCAT And QuikSCAT Derived Vorticity: Implications On Spatial Resolution
Mark Bourassa, Heather Holbach
172

Radar Sea Surface Modeling And Simulation
Reid Garello, Antoine Ghaleb, Stephanie Even, Bertrand Chapron, Nicolas Pinel, Nicole De Beaucaudray, Fabrice Combleit, Marc Parenthoen, Eric Poulier
175

AQUACULTURE: TOOLS AND TECHNIQUES

Real Time Seawater Observation Network For Aquaculture
Masaaki Wada, Katsumori Hatanaka
182

Land Based Temperate Species Mariculture In Warm Tropical Hawaii
Jon War
188

Peter Dugan, Dimitri Ponirakis, Christopher Clark, John Zollweg, Sofie Van Parijs, Aaron Rice, Michael Piattick, Jemelle Morena, Ann Warde
195

Fish Without Footprints: A Beta-Test Of The Velela Concept To Evaluate Environmental And Economic Benefits Of Unanchored Open Ocean Net Pens
Neil Sims, Gavin Key
205

ARRAY SIGNAL PROCESSING AND ARRAY DESIGN

A New Method In Passive Localization: Synthetic Triangulation Beamformer
Elias Parastates, Johan Zhang
211

Broadband Beamforming
John Piper
215
Singular Value Decomposition Utilizing Parallel Algorithms On Graphical Processors
Charlotte Kotas, Jacob Barhen

Vernier Interferometer Performance Analysis
Christophe Sintes, Gerard Llor-Cajol, Jean-Marc Lecallée

Angle Of Arrival Estimation Based On Warped Delay-And-Sum (WDAS) Beamforming Technique
Ali Massoud, Abolmajid Nourdelin

AUTOMATIC CONTROL

A Small-Scale Actuator With Passive-Compliance For A Fine-Manipulation Deep-Sea Manipulator
Johannes Lemburg

AUTOMATIC CONTROL 1

Experiments In The Control And Application Of Automated Surface Vessel Fleets
Christopher Kitts, Paul Mohocek, Thomas Adamek, Ignacio Mena

Target Detection And Recognition: A Mission Planner For Autonomous Underwater Vehicles
Laura Sorbi, Graziano De Capua, Laura Tonli, Jean-Guy Fontaine

Towards Selective Tidal Stream Transport For Lagrangian Profilers
Jerome Jouffroy, Qiuyang Zhou, Olivier Zielinski

Simulation Research On Intelligent Control For Propulsion System Of Large Ship
Yuanhui Wang, Bofei Chen, Shijie Li, Xinghua Chen

Intelligent Autonomy For Unmanned Underwater And Surface Vehicles
Terry Huntsberger, Gail Woodward

AUTOMATIC CONTROL 2

Formation Coordinated Control For Multi-AUV Based On Spatial Curve Path Tracking
Xinquan Bian, Chunhui Mou, Zheping Yan, Hongjian Wang

A Control-Theoretic Outlook At The No-Go Zone In Sailing Vessels
Bin Yang, Lin Xiao, Jerome Jouffroy

NN-Backstepping For Diving Control Of An Underactuated AUV
Hongjian Wang, Ziyou Chen, Henging Jia, Xinghua Chen

AUTOMATIC CONTROL 3

Modeling And Nonlinear Heading Control For Sailing Yachts
Lin Xiao, Jerome Jouffroy

Trajectory-Tracking Controller Design Of Underactuated Surface Vessels
Fuguang Ding, Yuanhui Wang, Yong Wang

AUTONOMOUS UNDERWATER VEHICLES 1

Design Considerations And Operational Advantages Of A Modular AUV With Synthetic Aperture Sonar
Mikell Taylor, Andy Wilby

Ocean Front Detection And Tracking By An Autonomous Underwater Vehicle
Yanwu Zhang, Michael Godin, James Bellingham, Jonathan Ryan

Use Of Remus 6000 AUVs In The Search For The Air France Flight 447 Wreckage
Michael Purcell, Greg Packard, Mark Demest, Andrew Sherrell, Dave Gallo

Short Range Localization Of Autonomous Underwater Vehicles
Nicos Pelavas, Carmen Lucas, Garry Heard

AUTONOMOUS UNDERWATER VEHICLES 2

Calibration And Localization Of AUV-Acquired Magnetic Survey Data
Christopher Walker, Benjamin Armstrong, Tom Bean, John Canning, Eric Wolbrecht, Michael Anderson, Dean Edwards

An Approach To Subsea Survey For Safe Naval Transit
Bao Nguyen, Matthew Baysa, Apoorva Shende, Daniel Stillwell
AUTONOMOUS UNDERWATER VEHICLES 3

Expanding The Capabilities Of The NIUST AUVs.................................................. 354
Max Woolsey, Vernon Asper, Arne Diercks, Roy Jamagin, Matt Lowe, Andy Gossett, Raymond Highsmith

Cooperative 3D Mapping Under Underwater Communication Constraints ............... 357
Max Pfingsibern, Andreas Birk, Narunas Vaskevicius, Kaustubh Pathak

Solar Robotic Material Sampler System For Chemical, Biological And Physical Ocean Observations ................................................................. 366
David Fries, Geran Barton, Gary Hendrick, Bryan Gregson, Liesl Hoatling, John Paul, Arthur Sanderson, Richard Bluhberg

Gap Filler Sensors For SAS ..................................................................................... 371
Espen Hagen

AUTONOMOUS UNDERWATER VEHICLES 4

A Pressure-Tolerant AUV For Deep-Sea Applications .......................................... 377
Tino Schmidt, Johannes Gelze, Heinz Lehr, David Mischnick, Eugen Olenew, Oliver Pecudovic, Gerhard Körner, Hans-Michael, Körner Carl, Thiade Siegfried, Krüger Harriu Huth, Rudolf Bannasch, Alexey Kebka, Sergey Yakovenko

Modular Modeling Of Autonomous Underwater Vehicle ....................................... 381
Shuhei Chao, Choek Soon, Hong You, Hong Eng, Mandar Chitre

Performance Bounds for Coordinated AUV Search Planning .............................. 387
John Baylog, Thomas Wettergren

Comparison Of SUT-Hm And UKF In Cartesian And Modified Polar Coordinates For Bearings-Only Tracking ................................................................. 397
Jin Yu, Xi Feng, Shen Ren, Jun Zeng

AUTONOMOUS UNDERWATER VEHICLES 5

Research On Adaptive Controller Based On Nonlinear Disturbance Observer Applied In UUV Recovery Process ................................................................. 403
Wei Zhang, Conglin Wang, Xingian Blon, Zeeping Fan

Autonomous UUV Inspection - Revolutionizing Undersea Inspection .................... 409
Dan McLeod, John Jacobson

An Implementation Of ROS On The Yellowfin Autonomous Underwater Vehicle (AUV) ................................................................. 413
Kevin Demarco, Michael West, Thomas Collins

Development And Testing Of A Real-Time Terrain Navigation System For AUVs ................................................................. 420
Glenn Donovan

Experimental Validation Of An Acoustic-Based Localization Technique For AUVs In The Absence Of Information On The Speed Of Sound Profile ................................................................. 429
Alessio Turetta, Giuseppe Catalano, Enrico Simetti, Alessandro Speirink

AUTONOMOUS UNDERWATER VEHICLES 6

Towards Stereo Vision SLAM Based Pose Estimation For Ship Hull Inspection .... 439
Robbi Schwartzlender, Guillaume Maurice, Wenzhi Wang

Analysis Of Manipulator Arm Steadiness During Ship-Hull Mine Neutralization By A UUV ................................................................. 447
Mathieu Kemps, Brad Richardsom, Lonnie Love, Tony Rodgers, Kurt Nelson, Tracy Dixon

Gesture-Recognition As Basis For A Human Robot Interface (HRI) On A AUV ......... 452
Heiko Biliow, Andreas Birk

AUTONOMOUS UNDERWATER VEHICLES 7

Scheduling Of BSA-AUV Mission Operation: Development, Implementation And Trials ................................................................. 461
Tan Chen, Zeeping Fan, Yufei Zhao

Using Gliders To Study A Phytoplankton Bloom In The Ross Sea, Antarctica ........... 467
Vernon Asper, Walker Smith, Craig Lee, Karen Kennedy, Michael Dinniman, Bastien Queste, Jason Gobat
Diver Detection By Motion-Segmentation And Shape-Analysis From A Moving Vehicle .................................................. 474
Andreas Birk, Heiko Buelow

Opportunities To Parallelize Path Planning Algorithms For Autonomous Underwater Vehicles ................................................. 481
Mike Eichhorn, Ulrich Kremer

Semantic Annotation Of Ground And Vegetation Types In 3D Maps For Autonomous Underwater Vehicle Operation ........................................ 488
Max Zfingsthorn, Andreas Birk, Narumas Vaskevicius

AUTONOMOUS UNDERWATER VEHICLES

Mapping And Obstacle Avoidance Using Multi-Range Sonar For BSA-AUV:Methodology And Lake Trial ............................................ 496
Zheping Yan, Zhi Zhao, Dongnan Chi, Tao Chen

Dead Reckoning Error Compensation Algorithm Of AUV Based On SVM ........................................................................... 502
Zheping Yan, Dong Chi, Zhi Zhao, Chao Deng

The Stingray AUV: A Small And Cost-Effective Solution For Ecological Monitoring .................................................. 509
Christopher Barrgrover, Thomas Denewiler, Ryan Kattner, Greg Mills

AUV Hydrodynamics For Survivability And Controllability .................................................................................... 517
Jim Liu

Facilities Of AUV Search Missions Planning .................................................................................................................. 526
Andrei Bogoniickii, Alexandre Iarinov, Rodlon Semin

BIOACOUSTICS

Is Synthetic Aperture An Essential Tool For Echoic Shape Recognition In Dolphins? .................................................... 533
Matthias Hoffmann-Kuhn, Mandar Chitre, Rebecca Wellard, Jason Lee, Grant Abel, Kalvna Yeo, Jo Loong Chew

Developing A Portable And Persistent Autonomous Real-Time Marine Mammal Acoustic Monitor ............................................... 540
Harold Cheyne, John Walrod, Norman Gholson, Michael Ornee, Christopher Clark

Acoustic Environment Of Admiralty Inlet: Broadband Noise Measurements .................................................................. 544
Joshua Xu, Daniel Deng, Jayson Martinez, Thomas Carlson, Joshua Myers, Mark Weiland, Mark Jones

Flexible Infrastructure For Near-Real-Time Acoustic Monitoring Of Right Whales And Other Marine Species ........................................ 550
Sam Fladung, Eric Spalding, Matthew Robbins, Christopher Clark

First Trial Of ME70 Mounted On YOKO-MARU ........................................................................................................ 556
Koki Abe, Tomohito Imaiizumi, Hitakige Tanaka, Seiji Oshimo

BUOY TECHNOLOGY 1

Texas Automated Buoy System - Sustainable Ocean Observations To Help Protect The Environment ........................................ 560
John Walpert, Norman Guinasso, Linwood Lee, Robert Martin

Designing A Test Buoy For Improving The Deep-Ocean Assessment And Reporting Of Tsunamis System ............................................. 567
Craig Kohler, Karen Grissom, Jeffery Wise

Seawater Activated Power System (SWAPS): Energy For Deep Water Detection, Ocean Platforms, Buoys, Surface Craft And Submersibles .............................................................................................................. 577
John Cleland, M Turner, John Baker

Development Of The Oceanographic Observation Buoy In Rough And Icy Sea Condition .................................................... 586
Shoichiro Baba, Yasutaka Amiomi, Tashtini Ishihara, Takashi Muraehima, Tatsuya Fukuda, Yuwaka Ota

The Next Generation Easy-To-Deploy (ETD) Tsunami Assessment Buoy ........................................................................ 591
Robert Lawson, David Graham, Christian Mestig, Scott Stalin, Noah Lawrence-Slavas, Dirk Tegvao, Ross Hibbins, Brian Ingham

BUOY TECHNOLOGY 2

A "TAO" Hybrid On Rama ........................................................................................................................................ 599
Rick Cole, Jeff Kinder, Wei Dong Yu, Yang Chao, Yang Chao

National Data Buoy Center Transition Of The Tropical Atmosphere Ocean (TAO) Program .................................................. 609
Danielle Carpenter, Raymond Beets, Richard Crotz

Wave Height Measurement As A Secondary Function Of Navigational Buoys ..................................................................... 617
Erkki Mooltes, Alvar Usk, Tarmo Khats
DATA VISUALIZATION AND ACCESS

Making United States Integrated Ocean Observing System (U.S. IOOS) Inclusive Of Marine Biological Resources ............................................................731
Hassan MoustafaHid, James Potemra, Philip Goldstein, Annette Desrochers, Roy Mendelssohn
Towards A Services Based Architecture For Real Time Marine Observing Data .........................................................740
Scott Stainbridge, Geoff Page, Mullica Jaroensutasinee, Kris Jaroensutasinee
Multi-Touch 3D Exploratory Analysis Of Ocean Flow Models .................................................................746
Thomas Butkiewics, Collin Ware
Web-Based Scientific Visualization Software For Geospatial Displays And Collaborative Applications 756
John Anderson, McKay Davis, Kayo Fujisawa, Tie Fang, Jane Andres, Michael Neidal
Spatio-Temporal 3D Terrain Modeling And Visualization Based On Measuring Data Of AUV 763
Hongjian Wang, Guixia Fu, Jinkong Xu, Jian Li

IMAGING AND VISION 1

Towards Automated And In-Situ, Near-Real Time 3-D Reconstruction Of Coral Reef Environments ..................769
David McKinnon, Hu He, Ben Upcroft, Ryan Smith
Positioning And Scene Analysis From Visual Motion Cues Within Water Column ........................................779
Shahriar Negahdaripour, Shahriar Negahdaripour, Murat Aykin, Mohammadreza Babaei, Shayanth Simmarajah, Alejandro Perez
Compact, Dual-Wavelength, Non-Line-Of-Sight (NLOS) Underwater Imager ...............................................787
Derek Alley, Linda Mullen, Alan Lans
Underwater Microorganisms Observation With Off-Axis Digital Holography Microscopy Using Partially Coherent Illumination ..................................792
Olivier Carriere, Jean-Pierre Hermand, Frank Dubois

IMAGING AND VISION 2

3D Colour Reconstruction Of A Hydrothermally Active Area Using An Underwater Robot ..........................799
Adrian Bodenmann, Blair Thornton, Takeshi Nakatani, Tamaki Ura
Improving Color Correction For Underwater Image Surveys ........................................................................805
Jeffrey Kaell, Harman Singh, Chris Murphy, Clay Kanz
Strategies For Filtering Incorrect Matches In Seabed Mosaicking ................................................................811
Hamed Bagheri, Andrew Vardy, Ralf Bachmayer

IMAGING AND VISION 3

Using Spectrometry And Photography To Study Color Underwater .................................................................816
Derya Akkaynak Yellin, Eric Chan, Justine Allen, Roger Hanion
Ambient Noise Imaging Through Joint Source Localization .........................................................................824
Subash Kuselan, Mandar Chitre, Venugopalan Pallayil
On The Way To A Pressure-Tolerant Imaging System .....................................................................................829
Johannes Gelze, Heinz Lehr
Dynamic Scene Analysis And Mosaicing Of Benthic Habitats By F's Seismic Imaging - Issues And Complexities ........................................................................833
Shahriar Negahdaripour, Murat Aykin, Shayanth Simmarajah

INFORMATION MANAGEMENT

Building Transparent Data Access For Ocean Observatories: Coordination Of U.S. IOOS With NSF's OOI Cyberinfrastructure ........................................................................840
Real-Time Data Assimilation Of Satellite Derived Ice Concentrations Into The Arctic Cap Nowcast/Forecast System (ACNFS) ......................................................849
Pamela Posey, David Herbert E. Metzger, Alan Wallcraft, James Cummins, Ruth Peller, Ole Smestad, Michael Phelps
Geospatial Portfolios For Analysis/Decision Making (Geopad) ......................................................................853
Paul Mitten, Brett Parsons
A Quality Control Framework For Marine Sensing Using Statistical, Causal Inference ................................. 858
Daniel Smith, Greg Timmer, Paulo De Souza

GLMPC: An Integrated System For Glider Command And Control .............................................................. 865
David Jones, Robert Carr, Benji Schwartz-Gilbert

LONG TIME SERIES OBSERVATION: FROM THE KEELING CURVE TO HOTS

The Global Component Of The Us Ocean Observatories Initiative And The Global OceanSITES Project ................................. 872
Uwe Send, Matthias Lankhorst

Using High Resolution Ocean Timeseries Data To Give Context To Long Term Hydrographic Sampling Off Port Hacking, NSW, Australia ....................................................... 875
Moninya Roughan, Bradley Morris

The East China Sea Seafloor Observatory And Its Upgraded Project .............................................................. 879
Huiping Xu, Changwei Xu, Rufo Qin, Yang Fu

Australia’s Integrated Marine Observing System Observation Methods And Technology Review ......................... 885
Simon Allen

MANNED UNDERWATER VEHICLES

An Initial Assessment For Using Seawater As A Method To Remove Metabolically-Produced Carbon Dioxide From A Submersible Atmosphere .......................................................... 888
Marshall Nuckols, Stan Kolaczkowski, Serpil Awdry, C. Le, Tony Smith, David Thomas

Research On The Navigation System Of A Class Of Underwater Vehicle Based On USBL ........................................ 896
Liu Kaiting, Jing Li, Wei Guan, Peiqiang Zhu, Junbao Zeng, Xiaohui Wang

Hull Design And Fabrication Of Human Powered Submersible With New Innovative Material ................................ 902
Jason McCullough, George Valdes, Andrew Harrington

MARINE EDUCATION AND OUTREACH 1

Reef Missions: Engaging Students In Science And The Marine Environment Using An Autonomous Underwater Vehicle ............................................................... 908
Malia Ana Rivera, Brian Lawton, Chryssostomos Chryssostomidis
