THE FIRST AUSIMM INTERNATIONAL GEOMETALLURGY CONFERENCE

5 - 7 SEPTEMBER 2011
BRISBANE, AUSTRALIA

The Australasian Institute of Mining and Metallurgy
Publication Series No 10/2011

Edited by Dr Simon Dominy

Published by:
The Australasian Institute of Mining and Metallurgy
Ground Floor, 204 Lygon Street, Carlton Victoria 3053, Australia
## CONTENTS

### Keynote Addresses

- **Geometallurgy — Fifteen Years of Developments in Codelco: Pedro Carrasco Contributions**
  - J Beniscelli
  - Page 3

- **Case Studies Demonstrating Value from Geometallurgy Initiatives**
  - A R Bye
  - Page 9

- **Quantitative Mineral Mapping — A Building Block for Geometallurgy at Olympic Dam**
  - K Ehriq
  - Page 31

- **Geometallurgical Modelling — A Mineral Processor’s Perspective**
  - A Stradling
  - Page 33

- **The Geomet Curve — A Model for Implementation of Geometallurgy**
  - J Vann, J Jackson,
    - S Coward and S Dunham
  - Page 35

### Case Studies

- **Realisation of Value through Identification of Various Oxidation Fronts and Mineralisation Styles at Trilogy Cu-Au-Ag-Pb-Zn Deposit**
  - B Armstrong, A Czerw,
    - J Glen, N W. Johnson and
    - P D Munro
  - Page 47

- **Building a Geometallurgical Model for Early-Stage Project Development — A Case Study from the Canahuire Epithermal Au-Cu-Ag Deposit, Southern Peru**
  - R Baumgartner, M Dusci,
    - J Gressier, A Trueman,
    - S Poos, M Brittan and
    - P Mayta
  - Page 53

- **Development of the Zafranal Geometallurgical Model**
  - G Harholt, A Manfrino and
    - J Wright
  - Page 61

- **Geometallurgical Mapping and Modelling of Comminution Performance at the Cadia East Porphyry Deposit**
  - L Keeney, S Walters and
    - T Kojovic
  - Page 73

- **Development of a Predictive Geometallurgical Recovery Model for the La Colosa, Porphyry Gold Deposit, Colombia**
  - S Leichliter, J Hunt, R Berry,
    - L Keeney, P Montoya,
    - V Chamberlain, R Jahoda and
    - U Drews
  - Page 85

- **Use of Geometallurgy to Predict Tailings Leach Acid Consumption at Olympic Dam**
  - E Macmillan, K Ehriq,
    - V Liebezeit, P Kittler and
    - C Lower
  - Page 93
Geometallurgical Modelling Techniques Applicable to Prefeasibility Projects – La Colosa Case Study

Geometallurgy – Principals and Practice

Beyond Geometallurgy – Gaining Competitive Advantage by Exploiting the Broad View of Geometallurgy

Geometallurgy – Back to the Future: Scoping and Communicating Geomet Programs

‘It Seemed Like a Good Idea at the Time ...’ Common Mistakes in Geometallurgy

Lessons Learned from Geometallurgical Investigations Carried Out on a Nickel Sulfide Flotation Plant

Mineralogy

Estimating Mineralogy in Bulk Samples

Optical and SEM-Based Microscopy Integration for Optimisation of Geometallurgical Modelling and Ore Deposit Characterisation

Why is Mineralogical Data Essential for Designing a Metallurgical Test Work Program for Process Selection and Design?

Quantitative Clay Mineralogy for a Calcrete-Hosted Uranium Deposit – Innovative Application of Existing Technology on an Unprecedented Scale

Rock Texture and BWi Relationships, El Teniente Ore Deposit, Chile

Ni Laterite Mineralogy and Chemistry – A New Approach to Quantification

P A Montoya, L Keeney, R Jahoda, J Hunt, R Berry, U Drews, V Chamberlain and S Leichliter

S Dunham, J Vann and S Coward

J Jackson, A McFarlane and K Olson Hoal

P Kittler, V Liebezeit, K Ehrig, E Macmillan and C Lower

B Newcombe

R Berry, J Hunt and S McKnight

R Hartner, S G Walters and R Berry

L Lorenzen and M J Barnard

C Lower, K Ehrig, E Macmillan, P Kittler, V Liebezeit and K Yang

M Oyarzún and A Arévalo

M A Wells and J Chia
Modelling

Ore Selection and Sequencing

Predicting Finished Product Properties in the Mining Industry from Pre-Extraction Data

A Methodology for Geometallurgical Mapping and Orebody Modelling

Three-Dimensional Geometallurgical Data Integration for Predicting Concentrate Quality and Tailings Composition in a Massive Sulfide Deposit

Unsupervised Methods for Assessing Domain Homogeneity

Geometallurgy Data Management – A Significant Consideration

Spatial Modelling and Optimisation of Geometallurgical Indices

A Cut-Off of Liberated and Selected Ore Minerals Optimisation Based on the Geometallurgy Concept

Integrated Industry Relevant Research Initiatives to Support Geometallurgical Mapping and Modelling

Ore Characterisation

Characterisation of Gravity Amenable Gold Ores – Sample Representivity and Determination Methods

Characterisation of Gold Ores by X-Ray Computed Tomography – Part 2: Applications to the Determination of Gold Particle Size and Distribution

Geometallurgical Sampling and Resource Estimation for Magnetite Deposits

Characterisation of Gold Ores by X-Ray Computed Tomography – Part 1: Software for Calibration and Quantification of Mineralogical Phases
Characterising Liberation and Flotation Potential Using Image Analysis, Simulated Fragmentation and Small-Scale Flotation

The Development of Small-Scale Tests to Determine Hydrometallurgical Indicies for Orebody Mapping and Domaining

Author Index

J Hunt, R Berry and D Bradshaw

L I Kuhar, M I Jeffrey, A J McFarlane, B Benvie, N M Botsis, N Turner and D J Robinson
