Cognitive Transmissions under a Primary ARQ Process via Backward Interference Cancellation ........................................... 727
Michelusi, Nicolo* University of Padova
Popovski, Petar Aalborg University
Levorato, Marco University of Southern California, Stanford University
Simeone, Osvaldo New Jersey Institute of Technology
Zorzi, Michele University of Padova

WeD4 – Detection and Estimation II
Chair: Bobak Nazer, Boston University

Recovery Guarantees for Restoration and Separation of Approximately Sparse Signals ........................................... 736
Studer, Christoph* Rice University
Baraniuk, Richard G. Rice University

Structural Similarity and Distance in Learning ................................................................. 744
Wang, Joseph Boston University
Saligrama, Venkatesh* Boston University
Castañón, David A. Boston University

Recursive Sparse Recovery in Large but Correlated Noise ......................................................... 752
Qiu, Chenlu* Iowa State University
Vaswani, Namrata Iowa State University

Iterative Projections for Signal Identification on Manifolds: Global Recovery Guarantees .............. 760
Shah, Parikshit* Massachusetts Institute of Technology
Chandrasekaran, Venkat Massachusetts Institute of Technology

Universal MAP Estimation in Compressed Sensing ............................................................ 768
Baron, Dror* North Carolina State University
Duarte, Marco F. University of Massachusetts

Ranking: Compare, Don’t Score ......................................................................................... 776
Ammar, Ammar* Massachusetts Institute of Technology
Shah, Devavrat Massachusetts Institute of Technology

WeD5 – Network Algorithms and Analysis IV
Chair: Bruce Hajek, University of Illinois
Organizers: Bruce Hajek, University of Illinois
R. Srikant, University of Illinois

Optimal Immediately-Decodable Inter-Session Network Coding (IDNC) Schemes for
Two Unicast Sessions with Hard Deadline Constraints ...................................................... 784
Li, Xiaohang* Purdue University
Wang, Chih-Chun Purdue University
Lin, Xiaojun Purdue University

Invertible Bloom Lookup Tables ....................................................................................... 792
Goodrich, Michael T. University of California, Irvine
Mitzenmacher, Michael* Harvard University
Optimal Random Access for Wireless Networks in the Presence of Fading ........................................... 800
Hu, Yichuan
Ribeiro, Alejandro*

University of Pennsylvania

Next Generation Random Access MIMO Networks ................................................................. n/a
Lin, Kate
Gollakota, Shyamnath
Katabi, Dina*
