gnuplot Cookbook

Over 80 recipes to visually explore the full range of features of the world's preeminent open source graphing system

Table of Contents

Preface 1

Chapter 1: Plotting Curves, Boxes, Points, and more 7
  Introduction 8
  Plotting a function 8
  Plotting multiple curves 10
  Using two different y-axes 11
  Making a scatterplot 13
  Plotting boxes 14
  Plotting circles 16
  Drawing filled curves 17
  Handling financial data 20
  Making a basic histogram plot 21
  Stacking histograms 22
  Plotting multiple histograms 24
  Dealing with errors 25
  Making a statistical whisker plot 27
  Making an Impulse plot 29
  Graphing parametric curves 31
  Plotting with polar coordinates 32

Chapter 2: Annotating with Labels and Legends 35
  Introduction 35
  Labeling the axes 36
  Setting the label size 38
  Adding a legend 40
  Putting a box around the legend 43
  Adding a label with an arrow 44
  Using Unicode characters [new] 46
  Putting equations in your labels 47
### Chapter 3: Applying Colors and Styles  
- Introduction  
- Coloring your curves  
- Styling your curves  
- Applying transparency [new]  
- Plotting points with curves  
- Changing the point style  
- Changing the plot size  
- Positioning graphs on the page [new]  
- Plotting with objects [new]

### Chapter 4: Controlling your Tics  
- Introduction  
- Adding minor tics  
- Placing tics on the second y-axis  
- Adjusting the tic size  
- Removing all tics  
- Defining the tic values  
- Making the tics stick out  
- Setting manual tics  
- Plotting with dates and times  
- Changing the language used for labels [new]  
- Using European-style decimals [new]  
- Formatting tic labels

### Chapter 5: Combining Multiple Plots  
- Introduction  
- Arranging an array of plots  
- Positioning plots manually  
- Creating an inset plot  
- Multiplotting with labels and arrows

### Chapter 6: Including Plots in Documents  
- Introduction  
- Introducing gnuplot's high-quality graphics formats [new]  
- Adding a plot to a paper using LaTeX  
- Assembling a document using TikZ and LaTeX [new]  
- Assembling a document using epslatex  
- Using gnuplot within LaTeX  
- Creating presentation slides with incrementally displayed graphs  
- Including a plot in a web page  
- Making an interactive plot for the Web [new]
# Table of Contents

## Chapter 7: Programming gnuplot and Dealing with Data
- Introduction
- Scripting gnuplot with its own language
- Plotting on subintervals
- Smoothing your data
- Fitting functions to your data
- Using kdensity smoothing to improve on histograms [new]
- Creating a cumulative distribution [new]
- Talking to gnuplot with C
- Scripting gnuplot with Python
- Plotting with Clojure
- Handling volatile data [new]

## Chapter 8: The Third Dimension
- Introduction
- Making a surface plot
- Using coordinate mappings
- Coloring the surface
- Making a contour plot
- Making a vector plot
- Making an image plot or heat map
- Combining contours and images
- Combining surfaces with images
- Plotting a path in 3D
- Drawing parametric surfaces

## Chapter 9: Using and Making Graphical User Interfaces
- Introduction
- Using the Java gnuplot GUI JGP
- Using the Emacs GUI
- Sharing with Plotshare
- Writing a web GUI for gnuplot

## Chapter 10: Surveying Special Topics
- Introduction
- Avoiding overlapping labels
- Plotting labels from files
- Mapping the Earth
- Making a labeled contour plot
- Softening the axes
- Putting arrows on the axes
- Plotting with pictures
- Breaking an axis
