Minimax Localization of Structural Information in Large Noisy Matrices, Mladen Kolar, Sivaraman Balakrishnan, Carnegie Mellon University, Alessandro Rinaldo, and Aarti Singh, Carnegie Mellon University

Maximum Covariance Unfolding: Manifold Learning for Bimodal Data, Vijay Mahadevan, University of California, San Diego, Chi Wah Wong, University of California San Diego, Jose Costa Pereira, UC San
Diego, Tom Liu, University of California, San Diego, Nuno Vasconcelos, and Lawrence Saul, UC San Diego ........................................ 918

Efficient Learning of Generalized Linear and Single Index Models with Isotonic Regression, Sham Kakade, Microsoft Research, Adam Kalai, Microsoft Research New England, Varun Kanade, Harvard University, and Ohad Shamir, Microsoft Research ........................................ 927

On the Analysis of Multi-Channel Neural Spike Data, Bo Chen, David Carlson, and Lawrence Carin, Duke University .............. 936

Learning Eigenvectors for Free, Wouter Koolen, Royal Holloway, University of London, Wojciech Kotlowski, Centrum Wiskunde en Informatica, and Manfred Warmuth, Univ. of Calif. at Santa Cruz .......... 945

Noise Thresholds for Spectral Clustering, Sivaraman Balakrishnan, Min Xu, Akshay Krishnamurthy, and Aarti Singh, Carnegie Mellon University ........................................ 954

The Kernel Beta Process, Lu Ren, Yingjian Wang, Duke University, David Dunson, , and Lawrence Carin, Duke University .......... 963

Statistical Performance of Convex Tensor Decomposition, Ryota Tomioka, Taji Suzuki, University of Tokyo, Kohei Hayashi, Nara Institute of Science and Technology, and Hisashi Kashima, ........................................ 972

Probabilistic amplitude and frequency demodulation, Richard Turner, , and Maneesh Sahani, Gatsby Unit, UCL .............. 981

Directed Graph Embedding: an Algorithm based on Continuous Limits of Laplacian-type Operators, Dominique Perrault-Joncas, and Marina Meila, University of Washington ........................................ 990

Efficient coding of natural images with a population of noisy Linear-Nonlinear neurons, Yan Karlin, New York University, and Eero Simoncelli, HHMI / New York University ........................................ 999

Complexity of Inference in Latent Dirichlet Allocation, David Sontag, New York University, and Dan Roy, University of Cambridge .......... 1008

ICA with Reconstruction Cost for Efficient Overcomplete Feature Learning, Quoc V. Le, Alexandre Karpenko, Jiquan Ngiam, and Andrew Ng, Stanford University ........................................ 1017

Lower Bounds for Passive and Active Learning, Maxim Raginsky, University of Illinois at Urbana-Champaign, and Alexander Rakhlin, University of Pennsylvania ........................................ 1026

Stochastic convex optimization with bandit feedback, Alekh Agarwal, University of California Berkeley, Dean Foster, University of Pennsylvania, Daniel Hsu, Sham Kakade, Microsoft Research, and Alexander Rakhlin, University of Pennsylvania ........................................ 1035

Structure Learning for Optimization, Shulin Yang, University of Washington, and Ali Rahimi, Red Bow Labs ........................................ 1044

Inverting Grice's Maxims to Learn Rules from Natural Language Extractions, Mohammad Shaired Sorower, Thomas Dietterich, Janardhan Rao Doppa, Walker Orr, Prasad Tadepalli, and Xiaoli Fern, Oregon State University ........................................ 1053
Neuroscience Unit, University College London, JOHN CUNNINGHAM, University of Cambridge, BYRON YU, Carnegie Mellon University, KRISHNA SHENOY, Stanford University, and MANEESH SAHANI, Gatsby Unit, UCL 1350

Learning Probabilistic Non-Linear Latent Variable Models for Tracking Complex Activities, ANGELA YAO, JUERGEN GALL, ETH Zurich, LUC GOOL, , and RAQUEL URTASUN, TTI-Chicago 1359

Bayesian Partitioning of Large-Scale Distance Data, DAVID ADAMETZ, and VOLKER ROTH, University of Basel 1368

From Stochastic Nonlinear Integrate-and-Fire to Generalized Linear Models, SKANDER MENSII, Brain-Mind Institute, RICHARD NAUD, and WULFRAM GERSTNER, Ecole Polytechnique Federale de Lausanne 1377

On the Completeness of First-Order Knowledge Compilation for Lifted Probabilistic Inference, , and GUY VAN DEN BROECK, Katholieke Universiteit Leuven 1386

Hierarchical Topic Modeling for Analysis of Time-Evolving Personal Choices, XIAXING ZHANG, Duke University, DAVID DUNSON, , and LAWRENCE CARIN, Duke University 1395

An Exact Algorithm for F-Measure Maximization, KRZYSZTOF DEMBCZYNSKI, Poznan University of Technology, WILLEM WAEGEMAN, Ghent University, WEIWEI CHENG, University of Marburg, and EYKE HULLERMEIER, Philips-Universitaet Marburg 1404

Co-regularized Multi-view Spectral Clustering, ABHISHEK KUMAR, University of Maryland, College Park, PIYUSH RAI, University of Utah, and HAL DAUME III, University of Maryland 1413

Sequence learning with hidden units in spiking neural networks, JOHANNI BREA, Universitat Bern, WALTER SENN, , and JEAN-PASCAL PFISTER, Cambridge University 1422

Identifying Alzheimer's Disease-Related Brain Regions from Multi-Modality Neuroimaging Data using Sparse Composite Linear Discrimination Analysis, SHUAI HUANG, JING LI, JIEPING YE, TERESA WU, Arizona State University, KEWEI CHEN, ADAM FLEISHER, and ERIC REIMAN, Banner Alzheimer's Institute 1431

A blind sparse deconvolution method for neural spike identification, CHAITANYA EKANADHAM, Courant Institute, New York University, DANIEL TRANICHA, Courant Institute, NYU, and EERO SIMONCELLI, HHMI/ New York University 1440

How Do Humans Teach: On Curriculum Learning and Teaching Dimension, FAISAL KHAN, University of Wisconsin-Madison, XIAOJIN (JERRY) ZHU, U. Wisconsin-Madison, and BILGE MUTLU, University of Wisconsin-Madison 1449

Convergence Rates of Inexact Proximal-Gradient Methods for Convex Optimization, MARK SCHMIDT, INRIA - SIERRA Project Team, NICOLAS LE ROUX, INRIA, and FRANCIS BACH, INRIA - Ecole Normale Superieure 1458

Joint 3D Estimation of Objects and Scene Layout, ANDREAS GEIGER, KIT, CHRISTIAN WOJISK, , and RAQUEL URTASUN, TTI-Chicago 1467
Spatial distance dependent Chinese restaurant processes for image segmentation, Soumya Ghosh, Brown University, Andrei Ungureanu, Morgan Stanley, Erik Sudderth, Brown University, and David Blei, Princeton University ........................................... 1476

Pylon Model for Semantic Segmentation, Victor Lempitsky, Yandex, Andrea Vedaldi, and Andrew Zisserman, University of Oxford ........ 1485

t-divergence Based Approximate Inference, Nan Ding, S.V.N. Vishwanathan, Purdue University, and Yuan (Alan) Qi, Purdue University 1494

Learning person-object interactions for action recognition in still images, Vincent Delaitre, Ecole Normale Superieure, Josef Sivic, INRIA / Ecole Normale Superieure, and Ivan Laptev, INRIA .................. 1503

Submodular Multi-Label Learning, James Petterson, NICTA, and Tiberio Caetano, NICTA/Australian National University ......................... 1512

Uniqueness of Belief Propagation on Signed Graphs, , and Yusuke Watanabe, The Institute of Statistical Mathematics ...................... 1521

Higher-Order Correlation Clustering for Image Segmentation, Sungwoong Kim, KAIST, Sebastian Nowozin, Microsoft Research Cambridge, Pushmeet Kohli, Microsoft Research, and Chang D. Yoo, KAIST ................................................................. 1530

Optimal learning rates for least squares SVMs using Gaussian kernels, Mona Eberts, and Ingo Steinwart, University of Stuttgart .... 1539

Learning Auto-regressive Models from Sequence and Non-sequence Data, Tzu-Kuo Huang, and Jeff Schneider, Carnegie Mellon University ........................................... 1548

Committing Bandits, Loc Bui, Technion, Ramesh Johari, Stanford University, and Shie Mannor, Technion .............................................. 1557

Energetically Optimal Action Potentials, Martin Stemmler, LMU Munich, Biswa Sengupta, University of Cambridge, Simon Laughlin, Cambridge University, and Jeremy Niven, University of Sussex 1566

Unifying Framework for Fast Learning Rate of Non-Sparse Multiple Kernel Learning, , and Taiji Suzuki, University of Tokyo ..... 1575

See the Tree Through the Lines: The Shazoo Algorithm, Fabio Vitale, Nicolo Cesa-Bianchi, Universita degli Studi di Milano, Claudio Gentile, Universita dell'Insubria, and Giovanni Zappenda, Universita degli studi di Milano ................................................................. 1584

The Fast Convergence of Boosting, , and Matus Telgarsky, University of California, San Diego 1593

Multi-armed bandits on implicit metric spaces, , and Aleksandrs Slivkins, Microsoft Research ..................................................... 1602

Learning Anchor Planes for Classification, Ziming Zhang, Oxford Brookes University, Lubor Ladicky, University of Oxford, Philip Torr, Oxford Brookes, and Amir Saffari, Sony Computer Entertainment Europe ... 1611

Infinite Latent SVM for Classification and Multi-task Learning, Jun Zhu, Carnegie Mellon University, Ning Chen, Tsinghua University, and Eric Xing, Carnegie Mellon University ........................................ 1620
