Transmissions & Drivelines, 2012
SP-2334
# Table of Contents

2012-01-0109 **Hydrodynamic Synchromesh Automated Transmission Optimization and Control Aimed for Fuel Consumption**

Reduction .................................................................................................................. 1

Tinghui Hu
Institute of Automotive Engineering, TU Braunschweig
Yulong Lei and Jun Qiu
State Key Laboratory of Automotive Simulation & Control

2012-01-0110 **Model-based Estimation of Unknown Contact Forces Acting on a Piston in Dual Clutch Transmission** ................................................................. 11

Rashad Mustafa and Ferit Küçükay
IAE, TU Braunschweig

2012-01-0111 **Transmission Virtual Torque Sensor -- Absolute Torque Estimation** ...................................................................................................................... 23

Dongxu Li, Farzad Samie, Kumaraswamy Hebbale,
Chunhao Lee and Chi-Kuan Kao
General Motors Co.

2012-01-0112 **Method for Identification of the Kiss Point as well as Takeoff Point of a Hydraulically Actuated Friction Clutch** ...................................................... 29

Alex Tarasow and Christian Bohn
Clausthal University of Technology
Guido Wachsmuth and Roland Serway
IAV
Marcel Eisbach, Qi Zhao and Georg Bauer
Clausthal University of Technology

2012-01-0113 **Pressure Control Strategies of Dual Clutches in the Gear-shift Process of Wet-type DCT** ................................................................................. 39

Xiaofeng Yin
Xihua Univ.
Zhiming Liao and Peijun Li
Chongqing Tsingshan Industrial Co. Ltd.
Yuan Zhong and Xiuting Wu
Xihua Univ.

Hongbo Liu, Yulong Lei and Zhanjiang Li
State Key Lab. of ASC, Jilin Univ.
Jianguo Zhang
Changchun Inst. of Engineering Tech.
Youde Li
State Key Lab. of ASC, Jilin Univ.

2012-01-0304 **Analysis and Guidelines for Design of Efficient Power-Split Systems** .................................................................................................................. 57

Gabriela Achtenova and Tomas Budinsky
Czech Technical Univ.
2012-01-0305 Development of Front-Wheel-Drive ELSD for Efficient Performance and Safety ......................................................... 73
Matthew Fox
Eaton Corp.
John Grogg
Eaton Automotive

2012-01-0306 Development of a Standard Spin Loss Test Procedure for 4WD Transfer Cases ......................................................... 81
Michael Kirk and Syed M. Ilyas
Chrysler Group LLC
Thomas D'Anna
FEV Inc
Andreas E. Perakes
Ford Motor Co.
Craig S. Ross
General Motors Co.

2012-01-0307 Spatial Dynamics of Pushbelt CVTs: Model Enhancements .................. 97
Thomas Cebulla, Kilian Grundl, Thorsten Schindler and Heinz Ulbrich
Technische Universitaet Muenchen
Arie van der Velde and Han Pijpers
Bosch Transmission Technology B.V.

2012-01-0308 Prediction Technology for Motorcycle Drivability Attributed to Drive Train Characteristics ........................................... 107
Yasuhiro Higashi, Tatsuya Iwamoto and Naoki Kobayashi
Honda R&D Co., Ltd.

2012-01-0309 Study of Self-induced Vibration in an Operating Metal Pushing V-belt CVT ................................................................. 117
Toshihiro Saito
Honda R&D Co., Ltd.
Koji Miyamoto
Ito Corp.

2012-01-0310 A Novel Method of Axle Torque Measurement for Off-Road Vehicles ................................................................. 127
Ianto Guy
Harper Adams University College

2012-01-0311 Customer Orientated Approach for Evaluation of Transmission Rattle ................................................................. 139
Gerrit M. Knabe and Ferit Kucukay.
IAE, TU Braunschweig

2012-01-0622 HEV Application of Shaking Vibration Control System Based on Advanced Motor Control ........................................... 149
Satoru Fujimoto, Kazutaka Adachi, Hiroyuki Ashizawa and Jun Motosugi
Nissan Motor Company Ltd.

2012-01-0623 Development of New Hybrid Transaxle for Sub-Compact-Class Vehicles ................................................................. 157
Tomoaki Furukawa, Ryuji Ibaraki, Hiroaki Kimura, Koichi Kondo,
Masato Watanabe, Tatsuhiko Mizutani, Hiroyuki Hattori and Akira Takasaki
Toyota Motor Corp.
Lloydco LLC

2012-01-0625  Rotating Clutch Temperature Model Development Using Rapid Prototype Controllers .................................................................................................................. Gang Chen, Hussein Dourra and Darshan Shah
Chrysler Group LLC

2012-01-0628  A Fast-Running Model of a Van Doorne (Push-Belt) CVT Including Belt Tension and Compression Compliance ................................................................. Jesus Rodriguez
Gamma Technologies Inc.
Frederic Brix
Kaito Associates
Tomohisa Kumagai
CD-adapco Japan Co., Ltd.

2012-01-0629  Power-Split HEV Control Strategy Development with Refined Engine Transients .......................................................................................................................... John Arata, Michael Leamy and Kenneth Cunefare
Georgia Institute of Technology

2012-01-0630  Optimization of a Multiple-Speed Transmission for Downsizing the Motor of a Fully Electronic Vehicle .............................................................. Francesca Di Nicola, Aldo Sorniotti and Thomas Holdstock
University of Surrey
Fabio Viotto and Stefano Bertolotto
Oerlikon Graziano Drive Systems

2012-01-0631  Geometric Analysis of a Dual Clutch Lever-Based Electromechanical Actuator with Application to Actuator Dynamics Modelling ................................ Milan Milutinovic, Vladimir Ivanovic, Josko Deur and Dragutin Scap
University of Zagreb

2012-01-0807  Design of Test Rigs for a Dry Dual Clutch and its Electromechanical Actuators .......................................................................................................................... Vladimir Ivanović, Matija Hoić, Joško Deur and Zvonko Herold
University of Zagreb
Eric H. Tseng
Ford Motor Co.

2012-01-0808  Parametric Importance Analysis and Design Optimization of a Torque Converter Model Using Sensitivity Information ........................................... Joydeep Banerjee
University of Waterloo
Hadi Adibi asl
University of Waterloo
Nasser Lashgarian Azad
University of Waterloo
John McPhee
University of Waterloo

2012-01-0809  Low Friction Seal for Muddy Water with Textured Surface ................................................. Takuya Kato, Shohei Yamane, Go Kanzaki, Shinobu Munekata, Mitsuo Watanabe and Hirotaka Mizuta
NOK Corp.
2012-01-0811  Launch Devices for Turbo-Charged Engines ................................................. 289
    Philip Severyn, Jeff Hemphill, Philip George and Todd Sturgin
    Luk USA LLC

2012-01-0812  Analytical Approach to Gear Reverse Engineering
               (Spur and Helical) ................................................................. 299
    Sagar Jadhav
    Mahindra & Mahindra, Ltd.
    Amit Sandooja
    Mahindra Engineering Services

2012-01-0813  Duty Cycle Fatigue Simulation for Differential Casing ......................... 323
    Suresh Naidu Reddy
    Mahindra & Mahindra, Ltd.
    Vivek H. Yadav
    Mahindra & Mahindra
