# Table of Contents

Preface: Applications of Mathematics in Engineering and Economics (AMEE '11) - Proceedings of the 37th International Conference
George Venkov, Ralitza Kovacheva, and Vesela Pasheva

Organizing Committees

## MATHEMATICAL MODELING

- **Oscillations of a hybrid system with resistance**
  B. Cheshankov
  
- **Model and predictive control for a wind turbine**
  B. Gilev, J. Slavchev, D. Penev, and A. Yonchev
  
- **An analytical study of the dual mass mechanical system stability**
  Svetoslav Nikolov, Petko Sinapov, Ivan Kralov, and Ignat Ignatov
  
- **Finite element analysis of a wind turbine response when the tower and the blades are modeled as distributed parameter systems**
  V. Pasheva, Y. Slavchev, and G. Venkov
  
- **Mode III crack problems in functionally graded piezoelectric/piezomagnetic composites by BIEM**
  Yonko D. Stoynov

## NUMERICAL METHODS

- **First instances of generalized expo-rational finite elements on triangulations**
  Lubomir T. Dechevsky, Peter Zanaty, Arne Lakså, and Børre Bung
Multivariate hermite interpolation on scattered point sets using tensor-product expo-rational B-splines
Lubomir T. Dechevsky, Børre Bang, Arne Lakså, and Peter Zanaty

An approach to accelerate iterative methods for solving nonlinear operator equations
Gyurhan H. Nedzhibov

Wavelet-based lossless one- and two-dimensional representation of multidimensional geometric data
Lubomir T. Dechevsky, Jostein Bratlie, Børre Bang, Arne Lakså, and Joakim Gundersen

Comparison between polynomial, Euler Beta-function and expo-rational b-spline bases
Arnt R. Kristoffersen, Lubomir T. Dechevsky, Arne Lakså, and Børre Bang

Conservative finite difference schemes to a nonlinear parabolic system of cancer invasion
Mikhail K. Kolev and Lubin G. Vulkov

Efficient numerical method for solving Cauchy problem for the Gamma equation
Miglena N. Koleva

First instances of univariate and tensor-product multivariate generalized expo-rational finite elements
Lubomir T. Dechevsky and Peter Zanaty

A two-level second-order finite difference scheme for the single term structure equation
T. Chernogorova and R. Valkov

Matrix-vector multiplication in adaptive wavelet methods
Dana Černá and Václav Finěk

DIFFERENTIAL EQUATIONS AND APPLICATIONS

Uniqueness and symmetry of minimizers to repulsive nonlocal functionals
Hristo Genev and George Venkov

OPERATIONS RESEARCH

Licensing in an international triopoly
Fernanda A. Ferreira and Flávio Ferreira

Desirable role in a price-setting international mixed duopoly
Fernanda A. Ferreira and Flávio Ferreira

Model based predictive control of thermal comfort for integrated building system
Tz. Georgiev, T. Jonkov, E. Yonchev, and D. Tsankov

Optimal dynamic advertising strategy under age-specific market segmentation
Vladimir Krastev

ALGEBRA, SCIENTIFIC COMPUTING, AND E-LEARNING

Software development of XML parser based on algebraic tools
Bozhidar Georgiev and Adriana Georgieva

Semigroups and computer algebra in finite discrete structures
G. Bijev

Marks of change in sequences
H. Jürgensen

New public key cryptosystem based on semirings and semimodules
Ivan D. Trendafilov and Mariana I. Durcheva

Theoretical-graph approach for research of the sparse linear underdetermined systems to the sensor location problem
L. A. Pilipchuk, Y. H. Pesheva, and T. S. Vishnevetskaya

Linear problems of optimization of non-homogeneous flows in the generalized network
L. A. Pilipchuk, Y. H. Pesheva, and T. S. Vishnevetskaya

Security of data, stored in information systems of Bulgarian municipal administrations
Petko Kapralyakov
Experimental method for register of the deformations
  G. Todorova and S. Baeva 358

Method of accelerating complex SQL requests
  Peter Spaskovsky 367

Mathematical education in the Bulgarian technical universities
  Mihail Konstantinov and Vesela Pasheva 375

List of Participants 389
