IHI’10
Proceedings of the 2010 ACM
International Health Informatics

Sponsored by:
ACM Professional

Supported by:
IBM, Pacific Northwest, Google Research, Indiana University, HIDOLA, SIEMENS
Table of Contents

General Chair’s Welcome ...................................................................................................................................................... iii
Ümit V. Çatalyürek (The Ohio State University)

Program Committee Co-Chairs’ Welcome .......................................................................................................................... v
Henrique Andrade (Goldman Sachs), Neil Smallheiser (University of Illinois at Chicago)

Rationale for the ACM International Health Informatics Symposium .................................................................................. xvi

1st ACM International Health Informatics Symposium 2010 Organization List ........................................................................ xviii

ACM IHI 2010 Sponsor & Supporters .................................................................................................................................. xxii

Keynote Address
Session Chair: Ümit V. Catalyürek (The Ohio State University)
- Keynote Presentation: AI, Biomedicine and the NIH . ........................................................................................................ 1
  Milton Corn (National Institutes of Health)

Session 1: Human-Centered Design of Health Informatics Systems
Session Chair: Kai Zheng (University of Michigan)
- Terminology in a Voluntary Medical Incident Reporting System: A Human-Centered Perspective ............................................... 2
  Yang Gong (University of Missouri)
- Can Clinicians Create High-Quality Databases? A Study on a Flexible Electronic Health Record (EHR) System ....... 8
  Ritu Khare, Yuan An, Il-Yeol Song, Xiaohua Hu (Drexel University)
- Ockham’s Razor of Design: An Heuristic for Guiding Design and Development of a Clinical Information Systems Generator . ........................................................................................................... 18
  Jon D. Patrick, Peter Budd (The University of Sydney)
- Modeling Annotation Time to Reduce Workload in Comparative Effectiveness Reviews ......................................................... 28
  Byron C. Wallace, Kevin Small, Carla E. Brodley (Tufts University), Joseph Lau, Thomas A. Trkilicines (Tufts Medical Center)
- Computerization and Information Assembling Process: Nursing Work and CPOD Adoption ................................................. 36
  Xiromnu Zhou (Rutgers, The State University of New Jersey), Mark S. Ackerman, Kai Zheng (University of Michigan)
- Visual Information Seeking in Multiple Electronic Health Records: Design Recommendations and a Process Model .................................................................................................................................. 46
  Tao Wei David Wang, Krist Wongsuphasawat, Catherine Plaisant, Ben Shneiderman (University of Maryland)

Session 2: Information Management in Health Informatics
Session Chair: Bradley Malin (Vanderbilt University)
- The Effect of Different Context Representations on Word Sense Discrimination in Biomedical Texts . ........................................ 56
  Ted Pedersen (University of Minnesota, Duluth)
- Clustering of Human Motions Based on Feature-Level Fusion of Multiple Body Sensor Data ......................................................................................................................... 66
  Gaurav N. Pradhan (Arizona State University), Prabhakaran B. (University of Texas at Dallas)
- Uncovering Age-Specific Invasive and DCIS Breast Cancer Rules Using Inductive Logic Programming ................................................................................................................................. 76
  Houssam Nassif, David Page, Mehmet Ayyaci, Jude Shavlik, Elizabeth S. Burnside (University of Wisconsin – Madison)
• Scalable Personalized Medicine with Active Learning: Detecting Seizures with Minimum Labeled Data ................................................................. 83
  Guha Balakrishnan, Zeeshan Syed (University of Michigan)

• Effective Epidemic Control via Strategic Vaccine Deployment: A Systematic Approach ................................................................. 91
  Jinning Liu, Shang Xia (Hong Kong Baptist University)

• Mining Electronic Health Records for Adverse Drug Effects Using Regression Based Methods .......................... 100
  Rave Harpaz, Krystl Haerian, Herbert S. Chass, Carol Friedman (Columbia University)

Session 3: Computational Support for Patient-Centered and Evidence-Based Care
Session Chair: Yang Gong (University of Missouri)

• An Automated Vital Sign Monitoring System for Congestive Heart Failure Patients ........................................ 108
  Myung-kyung Suh, Lorraine S. Evangelista, Chien-An Chen, Kyung Sik Han, Jinhua Wang, Michael Chai Tu, Victor Chen, Ani Nahapetian, Majid Sarrafzadegan (University of California, Los Angeles)

• Using Clinical Preferences in Argumentation about Evidence from Clinical Trials ........................................ 118
  Anthony Hunter (University College London), Matthew Williams (Royal Free Hospital)

• From Netflix to Heart Attacks: Collaborative Filtering in Medical Datasets ................................................ 128
  Shulziaib Hussain, Zeeshan Syed (University of Michigan)

• Content-Based Retrieval of Retinal Images for Maculopathy ................................................................. 135
  K Sai Deepa, Gopal Datt Joshi, Jayanthi Sivaswamy (International Institute of Information Technology, India)

• Novel Biological Network Features Discovery for In Silico Identification of Drug Targets ........................................ 144
  Jintao Zhang, Jun Huan (University of Kansas)

Session 4: Data Management, Privacy, Security, and Confidentiality
Session Chair: Prabhakaran Balakrishnan (University of Texas at Dallas)

• DigiSwitch: Design and Evaluation of a Device for Older Adults to Preserve Privacy While Monitoring Health at Home ................................................ 153

• Beyond Safe Harbor: Automatic Discovery of Health Information De-identification Policy Alternatives ................................................ 163
  Kathleen Benitez, Grigoris Loukides, Bradley Mulin (Vanderbilt University)

• Reliable Medical Recommendation Systems with Patient Privacy ................................................ 173
  T. Ryan Hoens, Marina Blanton, Nitesh V. Chawla (University of Notre Dame)

• An Evaluation of Feature Sets and Sampling Techniques for De-Identification of Medical Records ................................................ 183
  James Gardner, Li Xiong, Fusheng Wang, Andrew Post, Joel Saltz (Emory University), Tyrone Grandison (IBM Services Research)

• Privacy Policies of Personal Health Records: An Evaluation of Their Effectiveness in Protecting Patient Information ................................................ 191
  Lorenzo Martino, Suchit Ahuja (Purdue University)

Session 5: Consumer and Clinician Health Information
Session Chair: Michelle Rogers (Drexel University)

• Characterizing Mammography Reports for Health Analytics ................................................ 201
  Carlos C. Rojas, Robert M. Patton, Barbara G. Beckerman (Oak Ridge National Laboratory)

• Contextualizing Consumer Health Information Searching: An Analysis of Questions in a Social Q&A Community ................................................ 210
  Yan Zhang (School of Information, University of Texas at Austin)

• Securing the E-Health Cloud ................................................................. 220
  Hans Löhrl, Ahmad-Reza Sadeghi, Marcel Winandy (Ruhr-University Bochum)
• Understanding Parent-Pediatrician Interactions for the Design of Health Technologies .....................................230
  Julie A. Kientz (University of Washington)

• Using Electronic Health Record Systems in Diabetes Care: Emerging Practices .................................................240
  Tiffany C. Veinot, Kai Zheng (University of Michigan), Julie C. Lowery, Maria Souden,
  Rosalind Keith (VA Ann Arbor Healthcare System)

Session 6: Health Informatics Applications & Studies
Session Chair: Kay Connelly (Indiana University)

• Federated Querying Architecture for Clinical & Translational Health IT..........................................................250
  Oren E. Livne, N. Dustin Schultz, Scott P. Natus (University of Utah)

• Towards a Definition of Health Informatics Ethics .............................................................................................257
  Hamman W. Samuel, Osmar R. Zaïane, Dick Sobsey (University of Alberta)

• Architecture and Information Technology as Factors in Surgical Suite Information Sharing
  and Coordination ..............................................................................................................................................265
  Peter Scupelli (Carnegie Mellon University), Susan R. Fussell (Cornell University),
  Sara Kiesler (Carnegie Mellon University)

• Relevance Based Visualization of Large Cancer Patient Populations ..............................................................275
  Sebastian M. Klenk, Jürgen Dippon (Stuttgart University), Peter Fritz (IBM-Foundation),
  Gunther Heidemann (Stuttgart University)

• Conditional Random Fields for Activity Recognition in Smart Environments .............................................282
  Ehsan Nazerfard, Barman Das, Lawrence B. Holder, Diane J. Cook (Washington State University)

Session 7: Health Informatics Applications & Studies
Session Chair: Kelly Caine (Indiana University)

• Modeling and Estimating the Spatial Distribution of Healthcare Workers .......................................................287
  Donald E. Curtis, Christopher S. Hlady, Sriram V. Permannanju, Alberto M. Segre,
  Philip M. Polgreen (University of Iowa)

• Analysis of an Online Health Social Network ..................................................................................................297
  Xiaoxiao Ma, Guang Chen (University of Massachusetts, Lowell),
  Juntao Xiao (Jiangsu HanWin Technology Company Ltd.)

• A Framework to Model and Translate Clinical Rules to Support Complex Real-Time Analysis of
  Physiological and Clinical Data ..........................................................................................................................307
  Christina Catley, Kathy Smith, Carolyn McGregor (University of Ontario Institute of Technology),
  Andrew James (The Hospital for Sick Children, The University of Toronto),
  I. Mikael Eklund (University of Ontario Institute of Technology)

• Experience Modeling and Analyzing Medical Processes: UMass/Baystate Medical
  Safety Project Overview ......................................................................................................................................316
  George S. Avrunin, Lori A. Clarke, Leon J. Osterweil, Stefan C. Christov, Bin Chen, Elizabeth A. Henneman
  (University of Massachusetts), Philip L. Henneman (Tufts-Baystate Medical Center), Lucinda Cassells,
  Wilson Mertens (Baystate Medical Center/Tufts University School of Medicine)

Session 8: Consumer Health and Wellness Applications
Session Chair: Tiffany Veinot (University of Michigan)

• Intelligent Personal Health Record: Experience and Open Issues .................................................................326
  Gang Luo, Chunqiang Tang, Selena B. Thomas (IBM T.J. Watson Research Center)

• Mining and Monitoring Patterns of Daily Routines for Assisted Living in Real World Settings ..................336
  Parisa Rashidi, Diane J. Cook (Washington State University)

• "... is it normal to be this sore?": Using an Online Forum to Investigate Barriers
  to Physical Activity ........................................................................................................................................346
  Tammy Toscos (Indiana University), Sunny Consolvo (Intel Labs Seattle), David W. McDonald (University of Washington)
• Modeling the Temporal Evolution of an Online Cancer Forum..................................................356
   Kathleen T. Durant, Alexa T. McCray, Charles Safran (Harvard Medical School)

Poster 1: Short Papers
Session Chair: Yuan An (Drexel University)

• Concept Integration from the caTIES to i2b2 Using the UMLS Semantic Network ..................366
   Vincent Yip, Umit Topaloglu (University of Arkansas for Medical Sciences)

• Modeling the Information-Value Decay of Medical Problems for Problem List Maintenance ......371
   Jeffrey G. Klann, Gunther Schadow (Regenstrief Institute and Indiana University)

• Evidence-Based Medicine, the Essential Role of Systematic Reviews, and the Need for Automated Text Mining Tools .................................................................376
   Aaron M. Cohen (Oregon Health & Science University), Clive E. Adams (University of Nottingham),
   John M. Davis, Clement Yu, Philip S. Yu (University of Illinois at Chicago),
   Weiyi Meng (Binghamton University), Lorna Duggan (Care Principles Ltd.),
   Marian McDonagh (Oregon Health & Science University), Neil R. Smallheiser (University of Illinois at Chicago)

• Data Visualization of Teen Birth Rate Data Using Freely Available Rapid Prototyping Tools ........381
   Risa B. Myers, James W. Lomax III (UT MD Anderson Cancer Center),
   Frank J. Marton (University of Michigan), Nancy M. Wood (UT School of Public Health),
   Todd R. Johnson (University of Kentucky)

• Medical Decision Making Using Vector Space Model.............................................................386
   Dhrubajyoti Mondal (Erickson Living, Baltimore), Aryya Gangopadhyay (UMBC, Baltimore),
   William Russell (Erickson Living, Baltimore)

• Are Internet Searches a Reliable Source of Information for Answering Residents' Clinical Questions in the Emergency Room.................................................................391
   Diane G. Schwartz (University at Buffalo), June Abbas (University of Oklahoma), Richard Krause,
   Ronald Moscati (University at Buffalo), Shruvani Halpern (St. Elizabeth Medical Center, New York)

• An Architecture for Complex Clinical Question Answering......................................................395
   Rodney D. Nielsen (University of Colorado), James Masanz (Mayo Clinic), Philip Ogren, Wayne Ward,
   James H. Martin (University of Colorado), Guegana Savova (Childrens Hospital Boston and Harvard Medical School)

• Health Sense: A Gedanken Experiment on Persuasive Wearable Technology for Health Awareness .................................................................400
   Swamy Ranganathanarayan, Katie A. Siek (University of Colorado at Boulder)

• Automatic Patient Search for Breast Cancer Clinical Trials Using Free-Text Medical Reports ........405
   Jun Zhang, Yingying Gu, Weisong Liu, Wen Hu, Tian Zhao,
   Xiangming Mu (University of Wisconsin-Milwauk ee), James Marx, Floyd Frost, Judy Tjoe (Aurora Health Care)

• Adapting Recommender Systems to the Requirements of Personal Health Record Systems ..........410
   Martin Wiesner, Daniel Pfeifer (Heidelberg University)

• Participatory Design of an Autism Community Network to Enhance Community Participation, Health, and Well-Being .................................................................415
   John M. Carroll (The Pennsylvania State University), Janika D. Burge (BAE Systems, Inc.),
   Scott Robertson, Mary Beth Rosson (The Pennsylvania State University)

• Enabling Revisitation of Fine-Grained Clinical Information.....................................................420
   James F. Terwilliger (Microsoft Corporation), Lois M. L. Delcambre (Portland State University),
   Judith R. Logan (Oregon Health and Science University), David Maier, David W. Archer, Jeremy Steinhauser,
   Scott Britell (Portland State University)

• An Online Segmentation Tool for Cervicographic Image Analysis ..........................................425
   Zhijun Xue, Sameer Anani, L. Rodney Long, George R. Thomas (U.S. National Library of Medicine)

• Increasing Patient Safety Using Explanation-Driven Personalized Content Recommendation ..........430
   Haggai Roitman, Yossi Messika, Yevgenia Tsimerman, Yonatan Maman (IBM Research - Haifa)
• An Exploratory Study of News Article Clustering for Web-Based Bio-Surveillance ........................................435
  Manabu Torii, Burt-Ujin Bayarsaikhan, Haungfang Liu, Thang Nguyen, Kevin D. Jones, Noele P. Nelson, David M. Hartley (Georgetown University Medical Center)

• An Information and Communication Technology System to Support Rural Healthcare Delivery ..............................................................440
  Hossein Pourreza, Sergio Camorlinga (TRLabs, Canada), Carson K.-S. Laung, Bruce D. Martin (The University of Manitoba)

• A Comparison of MeSH Terms and CiteULike Social Tags as Metadata for the Same Items ........445
  Danielle H. Lee, Titus Schleyer (University of Pittsburgh)

• A Study on the User Navigation Path of a Web-Based Intervention Program — AfterTheInjury.org ..........................................................449
  Christopher C. Yang (Drexel University), Flaura Winston (The University of Pennsylvania & Children's Hospital of Philadelphia), Adam Townes, Xuming Tang (Drexel University), Nancy Kassam-Adams (Children's Hospital of Philadelphia)

• A Data Mining Approach to MPGN Type II Renal Survival Analysis .................................................................454
  Chen Yang, W. Nick Street, Der-Fa Lu, Lynnie Lanning (The University of Iowa)

• Immunization Information and Population Data Sources: The Information Needs of Public Health Practitioners ..............................................459
  Rebecca A. Hills, Blaine Reeder, Debra Revere, William B. Lober, Neil F. Abernethy (University of Washington)

• Facial Expression Wonderland (FEW) - A Novel Design Prototype of Information and Computer Technology (ICT) for Children with Autism Spectrum Disorder (ASD) ........464
  Rung-Yu Tseng, Ellen Yi-Luen Do (Georgia Institute of Technology)

• The Automated Retrieval Console (ARC): Open Source Software for Streamlining the Process of Natural Language Processing ..................................469
  Leonard W. D'Avolio (VA Boston Healthcare System, Brigham and Women's Hospital & Harvard School of Medicine), Thien Nguyen (VA Boston Healthcare System), Louis Fiore (VA Boston Healthcare System & Boston University School of Public Health)

• Mining Personalized Medicine Algorithms with Surrogate Algorithm Tags .........................................................474
  Chili-Lin Chi (Harvard Medical School), Peter J. Kos (University of Wisconsin-Milwaukee), Vincent A. Fusaro, Rimma Pivovarov, Prasad Patil (Harvard Medical School), Peter J. Tonellato (Harvard Medical School and University of Wisconsin-Milwaukee)

• Large-Scale Multimodal Mining for Healthcare with MapReduce .................................................................479
  Fei Wang, Vuk Ercegovac, Tanveer Syeda-Mahmood (IBM Research Almaden), Akintuyo Holder (Rochester Polytechnic Institute), Eugene J. Shekita, David Beymer (IBM Research Almaden), Lin Hao Xu (IBM Research China)

• Image Classification of Vascular Smooth Muscle Cells .................................................................484
  Michael A. Grasso (University of Maryland School of Medicine), Ronil Mokashi (University of Maryland Baltimore County), Darshana Dalvi, Antonio Cardone (University of Maryland, College Park), Alden A. Dima, Kiran Bhadriraju, Anne L. Plant, Mary Brady (National Institute of Standards & Technology), Yaacov Yesha, Yelena Yesha (University of Maryland Baltimore County)

• GSA: A Framework for Rapid Prototyping of Smart Alarm Systems .................................................................487
  Andrew L. King, Alex Roederer, David Arncy, Sanjian Chen, Margaret Fortino-Mullen, Ana Gianmaria, William Hanson III, Vanessa Kern, Nicholas Stevens, Jonathan Tannen, Adrian Viesca Trevino, Soojin Park, Oleg Sokolsky, Insup Lee (The University of Pennsylvania)

• Leveraging the Semantic Web and Natural Language Processing to Enhance Drug-Mechanism Knowledge in Drug Product Labels .....................................492
  Richard Boyce, Henk Harkema, Mike Conway (University of Pittsburgh)

• Exploring the Use of Technology in Healthcare Spaces and Its Impact on Empathic Communication .................................................................497
  Amanda Fonville, Eun Kyoung Choe, Susan Oldham, Julie A. Kientz (University of Washington)
• Shape Discrimination Test on Handheld Devices for Patient Self-Test ................................................................. 502
Abhishek P. Chhetri (University of Texas at Dallas), Forrest Wen (Vital Art and Science, Texas),
Yizhong Wang (Retina Foundation of the Southwest & Vital Art and Science),
Kang Zhang (University of Texas at Dallas & Vital Art and Science)

• Using an Interdisciplinary Approach to Develop a Knowledge-Driven Careflow
  Management System for Collaborative Patient-Centred Palliative Care .............................................................. 507
Wendy MacCaull, Heather Jewers (St. Francis Xavier University), Markus Latzel (Palomino Inc.)

• Medical Information Visualization Conceptual Model
  for Patient-Physician Health Communication ........................................................................................................... 512
Yair G. Rajwan, George R. Kim (Johns Hopkins University School of Medicine)

• Development of a Software Tool for Healthcare Data Interchange ........................................................................... 517
Aaron Saas, Mahmoud Hossain, Cheon-Pyo Lee (Fairmont State University)

• Launching: University Partnership for Health Informatics ................................................................................................. 521
Julie A. Jacko, Terrence Adam, Bonnie Westra (University of Minnesota), Marty Witrak, Ron Berkeland
(College of St. Scholastica), Andrew F. Nelson (Health Partners Research Foundation),
Adel L. Ali (University of Minnesota-Crookston), Layne Johnson, Rui Kuang (University of Minnesota),
Kathy LaTour (College of St. Scholastica), Sandra Potthoff (University of Minnesota),
Amy Watters (College of St. Scholastica)

• Building a Corpus and Developing a Question Classifier
  to Support Messaging-Based Question Answering ........................................................................................................... 526
Adam Kurnially (University of Wisconsin-Milwaukee), Barbara Di Eugenio (University of Illinois at Chicago),
Charles E. Kahn Jr. (Medical College of Wisconsin), Susan McRoy (University of Wisconsin-Milwaukee)

• Linking Information Systems for HIV Care and Research in Kenya .................................................................................. 531
Alicia F. Guidry, Judd L. Walson, Neil F. Abernethy (University of Washington)

• Improving Disease Surveillance Capabilities Through a Public Health
  Information Affinity Domain ........................................................................................................................................ 536
José Armando Ahued Ortega, Jorge Gerardo Morales Velazquez (Mexico City Ministry of Health),
Sondra R. Renly, Stefan B. Edlund, James H. Kaufman (IBM Almaden Research Center)

• Discovering Specific Cascades in Critical Care Transfer Networks ............................................................................... 541
K. P. Unnikrishnan (University of Michigan), Debrapriyak Patnaik (Virginia Tech),
Theodore J. Iwashyna (University of Michigan)

• Towards Large-Scale Sharing of Electronic Health Records of Cancer Patients ............................................................. 545
Praveen R. Rao, Stanley A. Edlavitch (University of Missouri-Kansas City),
Jeffrey L. Hackman (University of Missouri-Kansas City & Truman Medical Center),
Timothy P. Hickman (University of Missouri-Kansas City), Douglas S. McNair (Cerner Corporation),
Deepthi S. Rao (Veterans Affairs Medical Center, Kansas City)

• Using Functional Data Analysis to Identify Physician Decision Strategies Which Lead
  to Better Type 2 Diabetes Patient Outcomes .................................................................................................................. 550
Gregory W. Ramsey (Morgan State University), Paul E. Johnson (University of Minnesota),
Patrick J. O'Connor, JoAnn M. Sperl-Hillen, William A. Rush (Health Partners Research Foundation)

Poster 2: Regular Papers
Session Chair: Yuan An (Drexel University)

• Heuristic Evaluation of Persuasive Health Technologies ................................................................................................. 555
Julie A. Kientz, Eun Kyoung Choe, Brennen Birch, Robert Maharaj, Amanda Fonville, Chelsey Glasson,
Jen Munch (University of Washington)

• Older Adults’ Perceptions and Use of Web-Based Multimedia Health Tutorials ............................................................. 565
Bo Xie, Ivan Watkins, Man Huang (University of Maryland)

• Health Information Need and Seeking Behavior of Patients in Developing Countries’ Context;
  An Iranian Experience ........................................................................................................................................................ 575
Vahideh Zarea Gavgani (Tabriz University of Medical Sciences)

• Identifying Opportunities for Inpatient-Centric Technology ............................................................................................. 580
Meredith Skeels (University of Washington), Desney S. Tan (Microsoft Research)
• Dynamic Scheduling of Emergency Department Resources .......................................................... 590
  Junhao Xiao (Chinese Academy of Sciences), Leon J. Osterweil (University of Massachusetts, Amherst), Qing Wang (Chinese Academy of Sciences)

• Towards Improving Inter-Team Coordination in the Surgical Process: A Breakdown Detection Method .......................................................... 600
  Svetlana Tancva (Swiss Federal Institute of Technology & University Health Network, Toronto), Bernhard Plattner (Swiss Federal Institute of Technology), Charlie Byer, Jacqueline Higgins, Anthony Easty (St. Michael's Hospital, Toronto)

• Health Information and Decision-Making Preferences in the Internet Age: A Pilot Study Using the Health Information Wants (HIW) Questionnaire .......................................................... 610
  Bo Xie, Mo Wang, Robert Feldman, Le Zhou (University of Maryland)

• A Machine Learning Approach for Identifying Subtypes of Autism .......................................................... 620
  Rocío Guillén, Curtis Jensen (California State University San Marcos), Stephen Edelson (Autism Research Institute)

• The Production Rule Framework: Developing a Canonical Set of Software Requirements for Compliance with Law .......................................................... 629
  Jeremy C. Maxwell (North Carolina State University & Allscripts Healthcare Solutions), Annie I. Antón (North Carolina State University)

• A Comprehensive Privacy-Aware Authorization Framework Founded on HIPAA Privacy Rules 637
  Ahmed Al Farisi, Duminda Wijesekera, Khaled Moidu (George Mason University)

• On the Integration of an Artifact System and a Real-Time Healthcare Analytics System .......................................................... 647
  Marion Blount (IBM T. J. Watson Research Center), Carolyn McGregor (University of Ontario Institute of Technology), Andrew James (The Hospital for Sick Children and the University of Toronto), Daby Sow (IBM T. J. Watson Research Center), Rishikesan Kamaleswaran, Saseha Tiuha, Jennifer Percival, Nathan Percival (University of Ontario Institute of Technology)

• Process-Based Derivation of Requirements for Medical Devices .......................................................... 656
  Heather M. Conboy, George S. Avrunin, Lori A. Clarke (University of Massachusetts)

• Automatic Integration of Drug Indications from Multiple Health Resources .......................................................... 666
  Aurélie Névial, Zhiyong Lu (U. S. National Library of Medicine)

• An Ontology Based Personal Exposure History .......................................................... 674
  Stacy A. Doore, Kate Beard (University of Maine), Carol Bunt (The Jackson Laboratory)

• Knowledge Retrieval in the Anatomical Domain .......................................................... 684
  H. Andrés Melgar S. (Pontifical Catholic University of Peru), Fabiano D. Beppler (Siesta Institute), Roberto C. S. Pucho (Federal University of Santa Catarina)

• Prediction of Breast Cancer Biopsy Outcomes Using a Distributed Genetic Programming Approach .......................................................... 694
  Simone A. Ludwig (University of Saskatchewan)

• Trust in Health Websites: A Review of an Emerging Field .......................................................... 700
  Laurian Vega (Virginia Tech), Enid Montague (University of Wisconsin-Madison), Tom DeHart (Rutgers University)

• Physician Perceptions of Clinical Reminders .......................................................... 710
  Amnette L. Valenta, Greer WP Stevenson (University of Illinois at Chicago), Margaret M. Browning (VA Information Resource Center), Andrew D. Boyd (University of Illinois at Chicago), Timothy E. Weddle (VA Information Resource Center), Denise M. Hynes (VA Information Resource Center & University of Illinois at Chicago)

• Knowledge Representation in ICU Communication .......................................................... 718
  Saif Khairat, Yang Gong (University of Missouri)

• Content-Based Medical Image Retrieval in Peer-to-Peer Systems .......................................................... 724
  Amalia Charisi, Vasileios Megaloikonomou (University of Patras)

• Predictive Rule Discovery from Electronic Health Records .......................................................... 734
  Sholom M. Weiss (IBM Research), Nitin Indurkhya (University of New South Wales), Chidanand V. Apte (IBM Research)
• Section Classification in Clinical Notes Using Supervised Hidden Markov Model
  Ying Li, Sharon Lipsky Gorman, Neemeie Elhadad (Columbia University) .............................................. 744

• Automatic Identification of Biomedical Concepts in Spanish-Language Unstructured Clinical Texts
  Elena Castro, Ana Iglesias Paloma Martinez, Leonardo Castaño (Universidad Carlos III de Madrid) ........ 751

• A Wireless EEG Monitor System Based on BSN Node
  Gang Li (Pusan National University), Haiying Chen (Wiznet Co., Ltd., Korea), Jungtae Lee (Pusan National University) ................................................................. 758

• Robust Matching of Multi-Modal Retinal Images Using Radon Transform Based Local Descriptor
  Yogesh Babu Bathina, N. V. Kartichek Madathali, Jayanthi Sivaswamy (International Institute of Information Technology, Hyderabad) ............................................................ 765

• An Animated Multivariate Visualization for Physiological and Clinical Data in the ICU
  Patricia Ordoñez, Marie deslaurdina, Michael Lombardi (University of Maryland, Baltimore County), Christoph U. Lehmann, Jim Fackler (Johns Hopkins School of Medicine) ........................................ 771

• Post-Traumatic Stress Disorder: Opportunities & Challenges for Computing Technology
  Brian M. Landry, Eun Kyoung Choe (University of Washington), Stephen McCutcheon (Veterans Affairs Puget Sound Health Care System), Julie A. Kientz (University of Washington) .............................................................. 780

• Boosting-Based Discovery of Multi-Component Physiological Indicators: Applications to Express Diagnostics and Personalized Treatment Optimization
  Valery V. Gavrishchaka, Mark E. Koepke (West Virginia University), Olga N. Ulyanova (Plekhanov Russian Academy of Economics) ............................................................ 790

• MeD-Lights: A Usable Metaphor for Patient Controlled Access to Electronic Health Records
  Emily K. Adams, Mehool Intwala, Apu Kapadia (Indiana University, Bloomington) .................................... 800

Demonstration Papers: Session Chair: Yuan An (Drexel University)

• The Spatiotemporal Epidemiological Modeler
  Stefan B. Edlund, Matthew A. Davis, James H. Kaufman (IBM Almaden Research Center) ............. 817

• Remote Healthcare Delivery with Sqwelch
  Ronan Fox, James Cooley, Manfred Hauswirth (National University of Ireland, Galway) ................ 821

• Visual Coder: Clinical Coding in Translational Research
  Fieran Mason-Blakley, Jens Janke-Weber, Melanie Tory (University of Victoria), Cliff McCollum (Genologics Life Sciences) .............................................................. 825

• VPW: An Interactive Prototype of a Web-Based Visual Paired Comparison Cognitive Diagnostic Test
  Dmitry Lagun, Cecelia Manzararas (Emory University), Stuart M. Zola (Emory University and VA Medical Center), Elizabeth A. Buffalo, Eugene Agichtein (Emory University) ................................................ 829

• Virtual Rehabilitation System
  Ziyong Tang, Xiaohu Guo, Balakrishnan Prabhakaran (University of Texas at Dallas) ......................... 833

• A Neuro-Oncology Workstation for Structuring, Modeling, and Visualizing Patient Records
  William Hsu, Corey W. Arnold, Ricky K. Taira (University of California, Los Angeles) .................... 837

• HealthCareND: Leveraging EHR and CARE for Prospective Healthcare
  Brian Dentino, Darcy Davis, Nitesh V. Chawla (University of Notre Dame) ........................................ 841

• MedWISE: A Highly User-Configurable 'Web 2.0' EHR
  Yalini Senathirajah, Suzanne H. Bakken (Columbia University) .............................................................. 845

• Best Papers & Panel Session
  Session Chairs: Henrique Andrade (Goldman Sachs), Neil Smalheiser (University of Illinois, Chicago)
• Designing a Personal Health Application for Older Adults to Manage Medications..........................849
  Danish U. Khan, Katie A. Siek, Jane Meyers (University of Colorado at Boulder), Leah M. Haverhals,
  Steven Cali, Stephen E. Ross (University of Colorado Denver)

• EPharmacyNet: An Approach to Improve the Pharmaceutical Care Delivery
  in Developing Countries—Study Case: BENIN..........................................................859
  Thierry Oscar Edoh, Gunnaar Teege (Universitat der Bundeswehr Munchen)

• Panel: Implications of Social Computing in Health Informatics................................................864
  Courtney D. Corley (Pacific Northwest National Laboratory)

Author Index .........................................................................................................................865
