Contributor contact details  xi
Woodhead Publishing Series in Textiles  xiv
Foreword  xix

Part I  General issues  1

1  Basics of process control in textile manufacturing  3
Vedpal and V. Jain, Indian Institute of Technology Delhi, India

1.1 Introduction  3
1.2 Process mapping, analysis and control  5
1.3 Statistical process control (SPC) and improving processes  9
1.4 Future trends  11
1.5 References  13

2  Basic principles of control systems in textile manufacturing  14
S. S. Saha, Government College of Engineering & Textile Technology, Berhampore, India

2.1 Introduction  14
2.2 Components of control systems  18
2.3 The control system design process  28
2.4 Digital control systems  34
2.5 Intelligent control systems using soft computing  36
2.6 Application of control systems in textile processing  39
2.7 References  39

3  Testing and statistical quality control in textile manufacturing  41
A. Das, Indian Institute of Technology Delhi, India

3.1 Introduction: statistical quality control  41
3.2 Basic measurement concepts in statistical quality control  42
Contents

3.3 Interpretations: critical difference 48
3.4 Interpretations: ‘t’ tests, ‘F’ tests and the chi-square method 53
3.5 Decision-making using control charts 57
3.6 Decision-making: hypothesis testing 59
3.7 Decision-making: significance testing 61
3.8 Testing fibre and yarn properties 72
3.9 Testing fabric properties 75
3.10 References 78

Part II Process control in fibre production and yarn manufacture 79

4 Process and quality control in cultivating natural textile fibres 81
M. ZIMNIEWSKA, Institute of Natural Fibres and Medicinal Plants, Poland, I. FRYDRYCH, Technical University of Lodz, Poland, J. MANKOWSKI, Institute of Natural Fibres and Medicinal Plants, Poland, and W. TRYWIANKA, Gdynia Cotton Association, Poland

4.1 Introduction 81
4.2 Control of cotton fibre quality 81
4.3 Indexes for cotton fibre quality 85
4.4 Process control in harvesting 89
4.5 Control of natural lignocellulosic/bast fibre quality: climatic conditions 96
4.6 Process control in production 100
4.7 Evaluating fibre quality 105
4.8 Future trends 107
4.9 References 107

5 Process control in the manufacturing of synthetic textile fibres 109
B. L. DEOPURA, Indian Institute of Technology Delhi, India, A. CHATTERJEE, Dr B R Ambedkar National Institute of Technology Jalandhar, India and N. V. PADAKI, CSTRI Central Silk Board, India

5.1 Introduction 109
5.2 Process control in polymerisation and fibre spinning 111
5.3 Post-spinning process control: drawing and heat setting 122
5.4 Key control points in synthetic fibre manufacture 127
5.5 Future trends 130
5.6 References 131
Contents

8.4 Factors affecting end breakage rates in ring spinning 205
8.5 Control of fly generation and twist variations in ring spinning 208
8.6 Process control in rotor spinning 213
8.7 Control of end breakage rate and twist loss in rotor spinning 217
8.8 Future trends 220
8.9 References 221

9 Maintenance of yarn spinning machines 225
A. Basu, Central Silk Board, India

9.1 Introduction 225
9.2 Maintenance of spinning preparatory machines 231
9.3 Maintenance of ring and rotor spinning machines 235
9.4 Future trends 236
9.5 Sources for further information and advice 239
9.6 References 240

Part III Process control in fabric manufacture, coloration and finishing 241

10 Process control in knitting 243
S. C. Ray, University of Calcutta, India

10.1 Introduction 243
10.2 Key control points in knitting 244
10.3 Quality control of knitted fabrics 248
10.4 Control of knitted loop length 251
10.5 Common faults in knitted fabrics 253
10.6 Other process control factors in knitting 259
10.7 Future trends: online quality control 262
10.8 References 264

11 Process control in weaving 265
V. K. Kothari, Indian Institute of Technology Delhi, India

11.1 Introduction 265
11.2 Controlling loom productivity, efficiency and fabric quality 267
11.3 Online process control, quality control and monitoring in weaving 269
11.4 Cost control in weaving 276
11.5 References 278

Contents ix

12 Process control in nonwovens production 279
D. MOYO, A. PATANAIK and R. D. ANANDJIWALA, CSIR Materials Science and Manufacturing, South Africa, and Department of Textile Science, Nelson Mandela Metropolitan University, South Africa

12.1 Introduction 279
12.2 Needle punching: process variables and process control 280
12.3 Hydroentanglement: process variables and process control 285
12.4 Melt blowing: process variables and process control 288
12.5 Spunbonding: process variables and process control 292
12.6 Future trends 295
12.7 Sources of further information 296
12.8 Acknowledgement 296
12.9 References 296

13 Process control in dyeing of textiles 300
S. M. SHANG, The Hong Kong Polytechnic University, China

13.1 Introduction 300
13.2 Dyeing of cotton 302
13.3 Dyeing of synthetic materials 315
13.4 Dyeing of blends 322
13.5 Process control in batchwise dyeing machines 326
13.6 Process control in continuous dyeing machines 334
13.7 References 338

14 Process control in printing of textiles 339
S. M. SHANG, The Hong Kong Polytechnic University, China

14.1 Introduction 339
14.2 Direct printing 339
14.3 Discharge, resist and heat transfer printing 345
14.4 Process control in roller and screen printing machines 348
14.5 Inkjet printing and its process control 353
14.6 Product safety and low-carbon production 360
14.7 Sources of further information 361
14.8 References 362

15 Process control in finishing of textiles 363
A. K. ROY CHOUDHURY, Government College of Engineering and Textile Technology, Serampore, India

15.1 Introduction 363
15.2 Instrumental process control 365
