PROCEEDINGS OF
THE 4TH INTERNATIONAL
CONFERENCE ON
MECHANICAL ENGINEERING
AND MECHANICS

Edited by

R. C. BATRA
Virginia Polytechnic Institute and State University, USA

L. F. QIAN, Y. HE, X. N. LI, K. D. ZHOU
Nanjing University of Science and Technology, PRC

H. DRESIG
Chemnitz University of Technology, Germany

Y. MORITA
Kyushu University, Japan

Chuah K.B
City University of Hong Kong, PRC
CONTENTS

KEYNOTES

Design and Monitoring of Serviceable Product Based on Intelligent Data Acquisition and Cumulative Diagnosis..................Kondo H. Adjallah 14
Displacement Control—the Future of Fluid Power Systems..............................Dr. Monika Ivantysynova 21
Dynamic Modeling and LQR-based Active Vibration Control of Piezoelectric Structures..................................................Xiaoting RUI, Bao RONG 31
German VDI Guidelines on Mechanisms and Vibrations of Machines..............................Hans Dresig, Gerald Hilpert 37
Innovative Machine Design Based on 6-DOF Parallel Kinematics Mechanism.................................Yutaka Tanaka, Hiroyuki Goto, Ken ICHIRYU 43
Looking Beyond the Structure: Critical Thinking for Designers and Architects..........................Dan Buscescu 53
Material Tailoring in Structures Composed of Functionally Graded Materials..............................R. C. Batra 59
Modelling Blast Response of Fibre Metal Laminates....................................................Z.W. Guan, T.P. Vo, W.J. Cantwel 64
Organizational Learning Journey—a Longitudinal Study....................................................Chuah KB, Cao Rui, Chau Y C, Kwong K F, Law Kris M Y 70
Rehabilitation and Engineering: an Experience..............................................................Esteban Peña-Pitarch, Neus Ticó-Falguera, Montserrat Abenoza-Guardiola, Ashraf A.F. Bichay, Georgia Romero-Culeres 77
Study of the Transmission Characteristics of Pulse Laser in the Rain..........................He ZHANG, Jing GUO, Bingting ZHA 82

ENGINEERING DESIGN

Analysis of Thermal Expansion of Work Roll During Hot Strip Rolling Process......................................................Xingdong LI, Changhong GUO, Yanxia SHAN 88
Comparison of Finite Element Modeling Methods for Welding Plate Structure...Xiu CHI, Guolai YANG, Jianli GE 93
Design and Experiment Validation for Time-varying Mechanics Test-bed of Cantilever Beam................................................Xutong WANG, Guolai YANG, Jianguo ZHENG, Renshu YUAN 97
Design and Simulation of an Overloaded Acceleration Device......................................................Hua YANG, Lebin TAN, Xiaobin PAN 101
Design for “Innovation” and Design for “Performance” Two Case Studies on Project-Based-Design................................................Madadnia, J., Waldron, K.J., Waldron, M.B., Koosha, H. 105
Design of Explosive-to-electrical Transducers Served as Primary Source of Conventional-ammunition-borne Magnetic Flux Compression Generator......................................Lin GU, He ZHANG, Shaqiao MA, Xiuli SHI 110
Design of Mono-leaf Composite Sping..............................................................Raghavendra, Rajesh Y 115
Dynamics Simulation of High Firing Rate Automatic Rifle......................................................Zhihong JIA, Yuemin ZHANG, Kedong ZHOU 121
Engineering Design and Obtainment of High Frequency Response Strain Amplifier Module................................................Xiaojing SHI, Yong CHEN, Jian WU, Gongmin TANG 125
Fatigue Strength of the Rolls with Grooves..............................................................Prof. Dr.-Ing. Željko Domazet, Mr.sc.-Ing. Francisko Lukša, Prof. Dr.-Ing. Lovre Krstulović-Opara, Dipl. Ing. Kristina Korun-Curić 130

Design and Study of a Third Gear Transmission for Small Tracked Mobile Robot

Design of a Low Noise Signal Disposal for the Infrared Detection

Dynamic Sliding Mode Control of Parallel Robot Based on AC Servo-motor Drive

Fuzzy Control of Parallel Robot Based on Step Motor Drive

Fuzzy-PID Based Approach to Design of Attitude Control for Cruise Munition

Mechanical Analysis and Kinematics Simulation for Micro-Motion Mechanism Based on Self-Locking Roller

Mechanism of a Biosonar’s Indirect Target Locating Ability

Miniaturized CMOS Imaging Device with DM642 for Face Recognition

Motion Planning of Launching Stage for Multi-joint Jumping Robot

Research on Stairs-climbing Stability for a Caterpillar Track Mobile Robot and Its Evaluation Method

Research Progress and Application Fields of Wireless Power and Information Synchronous Transmission Technology

Straight Ballistic Measurement Using Reflective Light Screen Target of Single Column Light Source

Study of a Biosonar Equipment for Mobile Robot Navigation

Study of an Ultrasonic Local Positioning System for Mobile Robot Navigation

The Anisotropic Magnetoresistance Preparation of Permalloy Ni81Fe19 Film

The Research of Navigation Signal Acquisition Algorithm

The Research of Wharf Bulk Machine Localization Control System Which Based on Binocular Stereovision

The Structural and Control Design of Machine Fish

Wireless Sensor Network based Structural Strain Field Monitoring System Research

A Multibody Model with Flexible Joints of Roller Chain

A Novel Coupling Model for Shape Prediction

Active Vibration Control of Smart Composite Structure Using Fuzzy Control System and Optimized by Modal Filtering

An Asymptotic Analysis of the Contact Stresses at the Axle/hub press Fit Joint

Analysis of Mechanical Fatigue Caused by Alternating Inertial Force

Analysis of Plastic Slip of Materials

Analysis of Self-locking Destruction Failure Caused by Insufficient Stiffness for a High-speed Automatic Machine

Bubbles Coalescence New Development in Ultrasonic Field

Calculation and Application of Equivalent Mechanical Parameters of Aluminum Honeycomb Sandwich Structure

Calculation of Normal Rock Breaking Force by Disc Cutter Based on Dimensional Analysis

APPLIED MECHANICS

A Multibody Model with Flexible Joints of Roller Chain

A Novel Coupling Model for Shape Prediction

Active Vibration Control of Smart Composite Structure Using Fuzzy Control System and Optimized by Modal Filtering

An Asymptotic Analysis of the Contact Stresses at the Axle/hub press Fit Joint

Analysis of Mechanical Fatigue Caused by Alternating Inertial Force

Analysis of Plastic Slip of Materials

Analysis of Self-locking Destruction Failure Caused by Insufficient Stiffness for a High-speed Automatic Machine

Bubbles Coalescence New Development in Ultrasonic Field

Calculation and Application of Equivalent Mechanical Parameters of Aluminum Honeycomb Sandwich Structure

Calculation of Normal Rock Breaking Force by Disc Cutter Based on Dimensional Analysis
Clearance Modeling and Experiment Research for Moving Mass and Cantilever Beam

Wei DENG, Guolai YANG, Jianli GE, Renshu YUAN

Composite Grid Method and Its Application on Welding Modeling

Zhipeng ZHONG, Dalong REN, Shui WAN

Dynamic Characteristics of an Axially Moving Viscelastic Belt for Nonlinear Oscillations

Yanqi LIU, Wei ZHANG, Fulei CHU

Dynamic Modeling and Analysis for the Reentry Vehicle with a Variable Bent Tail

Xugang WANG, Qin JING

Energy Absorption Properties of Multi-layer Corrugated Paperboard under Low and Intermediate Strain Rates

Yaping E, Zhiwei WANG, Guang YANG

Evaluation of PDF of Eigenvalue for Multibody System with Random Parameters

Guoping WANG, Xiaoting RUI, Bao RONG

Experiment and Simulation of PELE Perforating into Reinforced Concrete Targets

Wei DAI, Zhonghua DU, Lili SONG

Experimental and Numerical Investigation into the Internal Blast in Explosion Chamber

Fengsheng CHENG, Pu SONG, Xiaohui GU, Gang NIAN, Xingxing ZENG

Experimental Investigation of Dynamical Blade-casing Contacts in Aircraft Engines

M. Cuny, S. Philippin, P. Chevrier, F. Garce

Experimental Research on the Law of Shock Wave Propagation Due to Explosion inside Half-airtight Space

Pu SONG, Yafei LIU, Yunmeng LIAN, Xiaohui GU, Xiaoming WANG

Experimental Studies of a Tandem Follow-through Warhead Penetrating Steel Plate

Chunxu PANG, Yong HE, Xiaojun SHEN, Zhonghua DU, Xianfeng ZHANG, Xuchao PAN

Experimental Study on Penetration Resistance of Steel Fiber Reinforced Concrete by High-speed Long Rod Projectile...

Guangle ZHANG, Yong HE, Xiaoning ZHAO, Xuchao PAN

Failure Analysis of Carbon Fibre Reinforced Composite Material Barrel

Yushou YANG, Lifang QIAN, Yadong XU

Free Vibration Analysis of FGM Timoshenko Beams by Shooting Method

Shirong LI, Hua XU

Geometric Nonlinear Static Force Analysis on the Flexible Mineral Transporting Pipe for Sea Mining

Fangqiong YANG, Hailiang XU, Wanrong WU, Bo WU

Indentation Behavior of Sandwich Structures with Metallic Foam Core

Zhongyou XIE, Jilin YU, Zhijun ZHENG

Influence of Mechanical Performance of High-energy TEGDN Propellant Caused by Several Catalyzers

Ping DU, Xin LIAO, Weidong HE

Influence of the Penetrator’s Head Structure on Crater Formation

Yucai DONG, Zhonghua DU, Lili SONG, KunZHONG, Feng WANG

Infrared Thermography Study of Defect Induced Temperature Evolution in Submicrocrystalline Metals

Plekhov O.A., Chudinov V.V., Naimark O.B.

Investigation of Vibration Power Flow in a Floating Raft Isolation System Using Vectorial Four-pole Parametric Method

Feng ZHANG, Zhenguo BAI, Shuhao XU, Peng LIU

Investigation on the Motion and Discharge Processes of Granular Sulphur in Storage Silo at Granulation Unit of South Pars Gas Complex

A. Rahi, R. Moradi, M. H. Kadiva

Natural Frequencies Analysis for a Beam Subjected to Moving Distributed Mass with Time-dependent Velocity

Qiang CHEN, Guolai YANG, Xiaofeng WANG

Numerical Investigation on Properties of Angle of Attack (AOA) for the X-51A Vehicle

Yun NIE, Guigao LE, Dawei MA

Numerical Simulation and Experimental Research of Influence of structure on PELE

Xianfeng XIONG, Zhonghua DU, Lili SONG

Tao WEI, Xiaosong WU

Numerical Simulation and SHPB Test Study for Some High Polymer

Jian ZHENG, Yutao JU, Honglei MENG, Jinseng XU

Optimal Design of System Efficiency Parameters about Terminal-Sensitive-Projectiles based on Grey Theory and Genetic Algorithm

Fenghua HUANG, Rongzhong LIU, Rui GUO
Optimization of Variable Firing Interval for Antiaircraft Rocket Launcher

Lei WANG, Dawei MA, Kedong ZHOU, Cungui YU 552

Prediction of Tire Cornering Behavior with An Enhanced Friction Model
Zhao LI, Ziran LI, Yuanming XIA 556

Research on Influence Factors of High Velocity Projectile Penetration into Concrete Target
Chuang CHEN, Weibing LI, Panjun ZHANG, Fei FAN 561

Research on the Formability of EFP with Fins
Yuqi KONG, Rui GUO 566

Research on the Process of High-speed Projectile Penetration into Concrete Target
Fei FAN, Weibing LI, Panjun ZHANG, Xiaoming WANG 570

Response of Finite Continuous Structures with Discrete Masses to Impact and Its Application to Pyroshock Simulation
Alexander Lacher, Nikolaus Juengel, Maik Remming, Utz von Wagner 575

Review on the Shock Reaction of Particle Metal Material
Qiao LIANG, Xianfeng ZHANG, Yong HE 581

Sliding Mode Control Applied for Flutter Suppression of a Nonlinear Aero-elastic System

M.R. Elhami, M. Fatehi Narab 587

Static and Dynamic Characteristics of Navigation-power Junction Surface Outlet Floodgate and Its Optimization
Ning ZHAO, Genhua YAN 593

Study on Combined Environment Adaptability of Strapdown Inertial Measure Unit by MS-TMM
Fufeng YANG, Xiaoting RUI, Heng ZHANG 598

Study on Dynamic Stress Intensity Factors of Simply Supported Beam Containing Crack in Weight Function Method
Aijing CHEN, Junjun CAO 604

Study on Influence of Movable Mass on Natural Frequencies of Cantilever Beam
Chuanjian LIANG, Guolai YANG, Xiaofeng WANG 610

Study on Technique to Add Node Adaptively Based on EFG Method
S.G. GONG, X.H. WU, J.P. ZHANG, X.G. ZENG 615

Study on the Ballistic Performance of Spaced Composite Armor with Multi-holes
Jiansheng ZHU, Zhi LIU, Jiankun YI, Xiaobing LIAO 621

The Analysis of Impact of the Automat Guided Length on Its Movement Law
Wanhe XU, Qi LIU 625

The Effect of Rotation on the Dynamic Response of a Generalized Piezoelectric-thermoelastic Problem
Shuanhu SHI, Huimin LI, Bingyao WANG, Tianhu HE 629

The Research and Development of Tactile Biomechanics on Human Fingertip
Yuetong QIU, Zhongsheng SUN, Xiaoming LI 634

The Research on Fragmentation of Tungsten Heavy Alloy Fragile Material after Penetration
Baozheng YU, Xiaoli LI, Lifeng WANG, Zhonghua DU 640

The Research on Influence of Ratio of Length to Height on New EFP Based on Collision Theory
Feng WANG, Zhonghua DU, Lifeng WANG, Yucai DONG, Jiedong GAO 645

Transformation-Domains Theory and Analysis of Combustion Waves
Jun CHEN 650

Vibration Analysis of Axially Moving Beam with Different Load and Stretching Laws
Ning LIU, Guolai YANG 656

ADVANCED MANUFACTURING TECHNOLOGY

Analysis and Control of the Hybrid Driven Special Five Bar Ellipse Trajectory Generating Mechanism of the Flexible Section Shield
Xiaowei WU, Jun ZHANG 662

Development of Direct Rapid Manufacturing Technology for Metal Parts
Yongping JIN, Ming HU 668

Dynamic Response and Crack Detection of Multi-span Simple Beam under Moving Loads
Jun ZHAO, Zhenhua NIE, Hongwei MA 674

Mode-dependent Chatter Stability in Micro Milling: Structural Modeling and Experiments
Yinuo SHI, Frederik Mahr, Utz von Wagner, Eckart Uhlmann 680

Research and Application of the Space Digital Model about the Surface of the Complex Parts
Xiaohua HUANG, Juan CAO, Jiancheng XU, Chunsong WANG, Jinsong YIN 686

Research on Compliant and Passive-active Technology for Knee Joint Rehabilitation Training
Gang YANG, Yan TENG, Xiaoning LI 691

The Development of Economical Hydroforming Technology
Lixia FAN 697
The Robust Optimization Design of 1250T Hydraulic Press Slide Block

Fan FAN, Baochun LU, Guojun YANG, Yongzheng SONG, Yulan DING 702

MEMS

A Numerical Model of Thermoelastic Damping in Prestressed Micromechanical Resonators

Peng CHENG, Wenting GU, Zhili HAO 710

Analysis and Simulation of Piezoelectric generator Based on High-frequency Vibration Environment

Xishan LU, Zhanwen XI, Weirong NIE 714

Design and Implementation of a Tuning-Fork Gyroscope with Low Thermoelastic Damping

Ren WANG, Peng CHENG, Fei XIE, Zhili HAO 718

Design of a Magnetic-Recoiled Generator Used for Fuze

Chunhui ZHU, Weirong NIE, Zhanwen XI 723

Design Optimization for Multiphysics Micro-actuators via a Level Set Method

Yu WANG, Zhen LUO 727

Dynamic Electromechanical Response of Piezoelectric Laminated Micro Plates Based on Couple Stress Theory

Xin KANG, Dingguo ZHANG, Wei SUN 733

Magnet Field Finite Element Analysis of Permanent Magnet Brushless DC Motors Based on ANSOFT

Caihong ZHU, Hongtao ZHANG 738

Study on the Coordinates Model for Dynamic Acoustic Array Tracking System

Yalei LIU, Yunmeng LIAN, Xiaohui GU, Tao ZHANG 743

The Design of Setback-pin for Safety and Arming Device Based on MEMS Fuze

Zhanwen XI, Xuanxuan CHENG, Zhichao LI 748

The Equivalent Heat Conductivity of Micro-grooved Flat Plate Heat Pipe

Dongyao LIU, Xianhu DING 751

Transient Liquid Phase Bonding of Cu-based Microchannel Devices

Ke CHEN, W. J. MENG, Fanghua MEI 755

VEHICLE ENGINEERING

A Study of SCR System Control Strategies on a Diesel Engine

Wei LIN, Qing YANG, You tong ZHANG 762

An Investigation of Driver Models for Closed-Loop Dynamic Stability Analysis of Articulated Vehicles

Xuejun DING, Yuping HE 768

Design and Modeling of an Extended-Range Electric City-bus Based on ADVISOR

Chengfeng SHAO, Siqin CHANG, Wei LIU 773

Development of Electronic Control Ignition System for Ignition Chamber GDI Engine

Qinzhong SONG, Liqian JIA 778

Modeling and Experimental Study on Adjustable Magneto-rheological Fluid Damper Based on Hydro-pneumatic Suspension of Heavy Vehicles

Jinqiu ZHANG, Jinfeng JIA, Jian ZHANG, Hongtao WANG 782

Modelling and Simulation of Single-stage Reciprocating Air-powered Engine

Hui GU, Lebin TAN, Xiaobin PAN 787

Simulation and Analysis of an Off-road Vehicle Handling Stability Based on ADAMS Cat

Dongming HUANG, Liangmo WANG, Guoqiang CAO 792

Simulation of Semi-active Suspension of Tracked Vehicle Based on MR Damper

Chao XIONG, Jian ZHEN, Ning ZHANG, Chunting MA, Bingwen ZHANG 796

Wind Powered Cmv with Solar Assist

Avinash K, Raghavendra G, Sree Ganesh K, Sai Prashanth G 801

INDUSTRIAL ENGINEERING

Application of Computer Program for Mathematical Modeling of Hydrodynamic Processes in the Axial Piston Pump with Combined Distribution of Working Fluid

Radovan Petrovic, Miroslav Zivkovic, Milomir Gasic 812

Design of a Micro-Probe for Direct Measurement of Convection Heat Transfer on a Vertical Building Integrated Photovoltaic (BIPV)

Madadnia, J., Dehestani, D., Mehta, A., Vakiloroaya, V., Kousha, H. 817

Development of Warehouse Management System Based on RFID

Shuqin YE, Hongbing YUAN, Lina JI 825
Research on the Improvement of Lamp Group Production Line Based on IE .................................................. Ling ZHAO, Tianling SONG, Junfeng NI 831

Review of Particle Damping .................................................................................................................. Zhenguo BAI, Feng ZHANG, Yan GAO 834

Study on the Vibration Isolation Design of Auto Crane Control Room Seat Based on Ergonomics .......................................................... Guangtao MA, Qi DAI 839

DESIGN ARTS

A Discussion between Digital Media and City Culture Transmission ........................................... Yijun SUN, Jianlei WANG 846

A View of Product Detail Design ...................................................................................................... Zhan WANG 849

Analysis of the Folk Art Features in Traditional Chinese Animation Design ........................................... Yi TANG 852

Brave New World: Understanding Authentic Human Behaviour ...................................................... Deana McDonagh, Megan Strickfaden, Joyce Thomas 856

Characteristics of Universal Design Environmental Installation in Subways’ Exits and Entrances in Osaka City .......................................................... Wenbo Lai, Yoshitsugu Morita 863

Collaborative Design Innovation for User Centred Design and Emotional Design in China .......................................................... Sean McCartan, Deana McDonagh, Qijun DUAN 868

Conceptual Model of Design Innovation and Consumer Luxury Value Perception .............................. Sean McCartan, Deana McDonagh, Qijun DUAN 872

Concerning the Study of CI Design Curriculum Innovation .......................................................... Wei XIAO, Jin LIU 876

Considering the Appropriate Functions of Self-relief Disaster Mitigation in the Design of Daily Necessities .......................................................... Lin WANG, Junnan YE 879

Context Research on Industrial Design and Mass Culture ............................................................. Xiang’e SHU, Wei WANG 883

Development of Design Industry and Promotion of Chinese Industrial Structure Innovation ................... Hong HU 889

Embedding “Design Innovative Mechanisms” Is the Top Priority of Business Management .................. Guanzhong LIU 894

Emotional Art in Design Thinking ................................................................................................. Yajun LI, Lin LÜ, Jiajia LIU 902

Enhancing Interaction Design Education with a Multi-disciplinary Approach .................................. Steve Visser, Cheryl Zhenyu Qian 904

Exploration and Practice in Scientific and Technological Innovation of Arts Subject Talents Cultivation ......................... Hong ZHANG, F. WANG 911

Explore the Teaching Optimization of Design and Basic Sketching ................................................. Xiaojun REN 915

Images and Interactive Space Conversion ..................................................................................... Jingjuan WANG, Yan LÜ 917

Integration of Electric Motor and Alternator in Smart Lightweight Vehicles ....................................... Christophe Bastien, Jesper Christensen, Mike V Blundell, Mike Dickson, Andrew Gittens 921

Luxification and the Need for Innovation in Boat Design ............................................................... Sean McCartan, Deana McDonagh, Qijun DUAN 929

Modern Design under the Influence of Zen Yijing ........................................................................... Lijuan YUAN, XI ZHANG 933

On the Green Concept of Chinese Traditional Environmental Design Influenced by the Confucianism ... Ning XIAN, Limmeng SHAN 937

Public Design for a Synergy between Japanese Kansei and Reason ................................................. Yoshitsugu MORITA, Haruka SOGABE 939

Research Based on FARO in Archaize Furniture’s Digital Model Reconstruction and Innovative Design & Manufacturing ................................. Renhe ZHOU, Min GAO 944

Research into the Design Methods of City Sign System Proceeding from the Idea of Universal Design ........................ Min LI 947

Research of Universal Design Method for Workspace Dimension .................................................. Qijun DUAN, Changyong HUANG 952

Research on of Ergonomic Atmosphere Design in Commercial Space .................................................. Hui LIU 956

Research on the University Library Bookshelf Design Based on Human Dimensions’ Application ......... Guangtao MA, Danning REN 960

Researching of Culture about Guangxi Beibu Gulf Low Carbon Living and Eco-green Urban .................................................................... Zhihong LIU, Jinhui YU, Xuesi ZHONG 963

Rethinking on Teaching Methods of Design Sketching and Presentation ......................................... Yang QIAO 967

vii
