## Contents

### Part I: Modeling

1. **Affective Modeling for an Intelligent Educational Environment**  
   Yasmin Hernández, L. Enrique Sucar, Gustavo Arroyo-Figueroa  
   3

2. **ALEM: A Reference Model for Educational Adaptive Web Applications**  
   Mohammed Tadlaoui, Azeddine Chikh, Karim Bouamrane  
   25

3. **Proactive Sequencing Based on a Causal and Fuzzy Student Model**  
   Alejandro Peña-Ayala, Humberto Sossa  
   49

4. **Exploiting Learner Models Using Data Mining for E-Learning: A Rule Based Approach**  
   Marianne Holzhütter, Dirk Frosch-Wilke, Ulrike Klein  
   77

### Part II: Content

5. **A Study of a Learning Style Index to Support an Intelligent and Adaptive Learning Systems**  
   Mohamed Hamada, Kuseke Nishikawa, John Brine  
   109

   Paul De Bra, David Smits, Kees van der Sluijs, Alexandra I. Cristea, Jonathan Foss, Christian Glahn, Christina M. Steiner  
   133

7. **Performance Evaluation of Decision-Based Content Selection Approaches in Adaptive Educational Hypermedia Systems**  
   Pythagoras Karampiperis, Demetrios G. Sampson  
   161
8 PCMAT – Mathematics Collaborative Educational System .................. 183
Constantino Martins, Luiz Faria, Marta Fernandes, Paulo Couto, Cristina Bastos, Eurico Carrapatoso

9 A Framework for Automatic Construction of Reusable Adaptive Courses: The Case of ProPer SAT 2.0 .................................................. 213
Ioannis Kazanidis, Maya Satratzemi

10 Interoperable Intelligent Tutoring Systems as SCORM Learning Objects ................................................................. 239
Gustavo Soares Santos, Joaquin Jorge

Part III: Virtuality

11 Real Classrooms in Virtual Worlds: Scaffolding Interdisciplinary Collaborative Writing ......................................................... 269
Reneta D. Lansiquot

12 A Smart Home Lab as a Pedagogical Tool ........................................ 293
Antonio Sanchez, Lisa Burnell

13 Supporting Hybrid Courses with Closed-Loop Adaptive Training Technology ................................................................. 315
James E. McCarthy, John L. Wayne, Brian J. Deters

14 CELTS: A Cognitive Tutoring Agent with Human-Like Learning Capabilities and Emotions ..................................................... 339
Usef Faghihi, Philippe Fournier-Viger, Roger Nkambou

Part IV: Applications

15 Incorporation of Agent Prompts as Scaffolding of Reflection in an Intelligent Learning Environment .............................. 369
Longkai Wu, Chee-Kit Looi

16 Acquisition of Higher Order Knowledge by a Dynamic Modeling Environment Based on the Educational Concept of Self-Regulated Learning .................................................. 393
Stefanie A. Hillen

Elspeth McKay, John Izard

18 Intuitionistic Fuzzy Logic-Based Approach of Intrinsic Motivation in CSCL Settings during Illusionary Sense of Control .................. 443
Sofia Hadjileontiadou, Georgia Nikolaidou, Leontios Hadjileontiadis
19 An Intelligent System for Modeling and Supporting Academic Educational Processes ........................................ 469
Setsuo Tsuruta, Rainer Knauf, Shinichi Dohi, Takashi Kawabe, Yoshitaka Sakurai

20 Intelligent Decision-Making Support within the E-Learning Process ......................................................... 497
Dorota Dżega, Wiesław Pietruszkiewicz

Author Index ........................................................................... 523
